Installation / Replacement Instructions

WI2195.aLF 3/20

The **SLE-ZWAVE-MOD** allows your Napco iBridge® or StarLink™ device to connect to your Z-Wave devices. For more information about the StarLink SLE Commercial and Residential Dual-Path Alarm Communicators, see WI2189 and WI2190. **Note:** The **SLE-ZWAVE-MOD** requires 20mA, therefore the existing battery inside the housing may need to be replaced with a larger battery; verify sufficient power is available if the radio is powered by the FACP.

 Prior to opening the **SLE-ZWAVE-MOD** PC board package or touching anything inside the radio enclosure, discharge any static electricity from your body or clothing. Use a grounded wrist strap or touch an unpainted, grounded metal object. Install as follows:
