WORK EXPERIENCE

Alipour Medical Corp | Occupational Medicine Corporate Consulting
Founder / Chief Medical Officer

Newport Beach, CA
08/2019 – Present

After years of dedication to the workforce and businesses in our community as a practicing clinician, I have gained the trust of employers and patients based on a reputation for management of illness and injury in the workplace, with a focus on expedited functional recovery as well as efforts to identify hazards and assist with prevention. A value-driven, step-wise conservative treatment approach demonstrates -time and again- that not all injuries require the extent, frequency, or duration of medical management that have become the conventional approach employed by many occupational and urgent care clinics.

In effort to serve local businesses, Alipour Medical Corporation was formed as a Virtual/TeleHealth and advisory platform. We have partnered with clinics in various regions to assist cases that require an in-clinic visit, and with a national occupational medicine medical group with 24/7 nursing and physician staff to scale out day to day operations in areas outside of our telehealth or clinic footprint.

Newport Urgent Care and Occupational Medicine
Consultant: Director of Occupational Medicine

Newport Beach, CA
05/2019- Present

As the director of occupational medicine at Newport and Brea urgent Care clinics, I oversee the management of all occupational health patients, work related injuries, and help treat and coordinate care for urgent care patients. By building out a properly managed occupational health program, from both an administrative, and clinical perspective, I can continue to care for the employees in the local business community.

The Irvine Company
Consulting Medical Director

Newport Beach, CA
01/2017 - Present

Having provided evaluation and treatment to over 500 employee injuries at the Irvine Company over the past several years, and being a Newport Beach local for over 30 years, I was happy to accept the role of medical director for the Irvine Company. With 5000+ employees, and thousands of guests visiting shopping centers, apartment communities, and resorts, the Irvine Company has retained my services to treat injured workers, and provide health and safety guidance on issues ranging from snake bites, to communicable diseases

WorkCare Inc.
Contractor/Consultant:
Occupational Medicine Physician: Incident Intervention and Virtual Care

Anaheim, CA
10/2018 - Present

Working alongside a team of occupational health nurses and physicians, I provide TeleMed and corporate health consulting to WorkCare clients among various service lines ranging from real-time injury intervention and triage, to medical and travel examination.

CureMetrix Inc.

Clinical and Strategic Advisory Board

San Diego, CA

05/2014-Present

During the course of my medical career, I became passionately interested in data analytics , clinical informatics, and healthcare applications of A.I. CureMetrix was formed by data scientists who developed an algorithm to find hidden patterns and anomalies of large data sets. As one of the physicians on the advisory board, I have helped with development of a business and healthcare strategy and applications of A.I in clinical care and diagnostic imaging.

Occupational Medicine Alliance 360 Inc. (OMA360™)

Advisor for Occupational Health, Informatics, and Business Development

Newport Beach, CA

7/2018 - 06/2019

OMA360™ began as an innovative corporate and occupational healthcare thinktank and consulting group focused on patient care management, care coordination, and workplace wellness. The group has since begun to market and advise clients on integration of cloud based digital health solutions.

Sand Canyon Urgent Care Wellness and Occupational Medicine

Director of Occupational Medicine and Workplace Wellness

Consulting Occupational Medicine Specialist

Irvine, CA

6/2018 - 2/2019

2/2019 - Present

Leading business development, strategic partnership, and growth of Sand Canyon Medical Group. Sand Canyon has recently opened a 2nd clinic to expand its healthcare footprint. As the director of occupational health, I am leveraging corporate health, safety, and HR relationships, as well as clinical, and operational experiences, to help with systematic and scalable growth of our medical group.

By integrating technology platforms and experience in clinical informatics, occupational medicine, and detailed case reviews, I continually work to improve our clinical outcomes. By integrating efficient case management and an effective care coordination, we are able to continue serving our clients and patients to deliver optimal care and expedited functional recovery of injured workers in the community.

Marque Medical Group

Director of Occupational Medicine and Workplace Wellness

Newport Beach, CA

12/2017-6/2018

Director position at Marque Medical with the objective of helping a group of 9 urgent care clinics, build out a basic infrastructure of a wellness and occupational health program focusing on prevention, employee and worker safety and wellness.

U.S. Healthworks Medical Group

Managing Physician: Orange County

Irvine, CA

12/2012-10/2017

During my time with US Healthworks, I was able to apply my clinical experiences and passion for patient care to caring for and improving the clinical outcomes of our patients. I was the managing physician of a facility located in the heart of Irvine where I was privileged to care for the workforce in the community where I have called home for most of my life and the majority of my academic and professional career. Additionally, my clinic offered walk-in Urgent care for a broad range of non-occupational related injuries and illnesses.

I oversaw a therapy department with 2 physical therapists, a sports chiropractic therapist, and an acupuncturist. In addition, I managed and oversaw a staff of 15 associates, ensuring that there is a team approach, and that our patients receive the highest level of care. Critical to this was also to ensure a very positive patient experience while

developing and overseeing all treatment plans, care coordination between our therapy department, and -if needed- our team of medical specialists.

I was responsible for not only communicating treatment plans and work accommodations (when required) with clients and employers, but I also consult those we serve on how to prevent injuries and how to best transition their associates back to their full functional capacity.

As a service of our clinic, we served the workforce in our area by providing pre-employment fitness evaluations, as well as oversight of programs such as TB surveillance and noise exposure monitoring. Additionally, I am NRCME certified to provide evaluations for commercial drivers, and have my California Department of Public Health certification as an X-ray Supervisor and Operator.

Newport Urgent and Primary Care
Urgent Care and Primary Care Physician

Sand Canyon Urgent Care Medical Center:
Urgent Care Physician

Irvine, CA
12/2011-12/2012

Sunrise Medical Center
Staff Physician

Tustin, CA
12/2011-12/2012

Hoag Urgent Care Clinic: Orange
Medical Director and Physician

Orange, CA
4/2011 – 10/2011

I began my post-residency experience as a full-time physician and Medical Director at one of the local Hoag Urgent Care clinics. This opportunity allowed me to work in clinical medicine full-time while pursuing my interest in business development and administration. In doing so, I had an opportunity to pursue an MBA education that was geared toward the healthcare field. The patient-mix in a walk-in clinic setting allowed me to manage a variety of non-emergent outpatient cases while building a consistent base of established patients in the community.

During my tie with Hoag Urgent Care, I had the administrative oversight of the day-to-day operations of the facility. Additionally, part of my initial responsibilities included implementation and customization of their electronic medical records (EMR) patient management system. Our group managed multiple clinics in Southern California and had not yet rolled out the EMR system in its entirety to all the clinics. This sort of management system is not only a necessity based on new changes in the healthcare industry, but allows for improved care and patient satisfaction through information technology. The management of a large number of patients with approximately 60-70% being new patients, organization and communication among the 3 clinic physicians is imperative optimizing quality of care and patient satisfaction, both of which are necessary in the rapidly growing field of urgent care medicine

Research Fellow – University of California, Irvine
Department of Cardiovascular Medicine

Orange, CA

After returning from my 2nd year of residency in pursuit of a more academic environment, I was offered a position as a research fellow in cardiology. I was involved with not only retrospective studies using a national inpatient database, but also with clinical studies with high risk patients in preventive cardiology.

LEADERSHIP EXPERIENCE

US Healthworks Medical Group

08/2014-08/2015

Area Medical Director: Orange County

Hoag Urgent Care Clinic: Orange

04/2011-09/2011

Medical Director

Touro University Newsletter

06/2006 - 06/2007

Editor-in-Chief

One of the more rewarding leadership positions I had while in Medical School was starting the first student newsletter. TUN Live is still the Touro University Newsletter and was a great project to be a part of as it involved the coordination of students and faculty as contributors while authoring several articles per issue myself.

Student Osteopathic Medical Association.

06/2006 - 06/2007

Vice President – Touro Nevada Chapter

Greatness Fund Steering Committee – National Board

Notable Achievements: Fundraised to send almost 30 students to join us to lobby in Washington D.C. on various health issues. I had a unique opportunity that year to represent hundreds of medical students and met with senate majority leader Bill Frist in addition to both senators from Nevada, and California Senator Barbara Boxer.

Touro University College of Osteopathic Medicine

Class President Year 2

08/2005 - 06/2006

By my second term as class president, we began clinically relevant events that would benefit us as students, our university, and the community at large. We established suturing workshops, fundraisers, community health workshops; all events which would over the next few years be organized by individual clubs and interest groups.

Touro University College of Osteopathic Medicine

Class President Year 1

08/2006 - 06/2007

My choice to attend Touro University in Nevada was largely motivated by my interest in leadership and passion to affect change and influence the molding of a new institution and ultimately, my education and experiences. As class president, I committed myself to the task of developing the student government, to not biding the time, and doing more than discussing potential events, and simply handing over the reigns. My goal was to set precedent and to forge an identity and lay the groundwork for a student government that would continue involving the students with the university, and the university with the community.

Student Osteopathic Medical Association
