### SUMMARY OF EXPERTISE

I am a Board-Certified Pediatrician with 22 years of experience seeing primary care patients on the Olympic Peninsula (a medically underserved area) in Washington State. I have received multiple awards for clinical care. I am a member of the Training Center Faculty at Seattle Children's Hospital for the Pediatric Advanced Life Support program teaching physicians, nurses, EMT's, and residents to provide emergency care to children.

For the past two decades, I have precepted medical students from medical schools across the country and served on the clinical faculty of the University of Washington School of Medicine, including working on the Admissions Committee. I collaborate as part of the adjunct faculty at the Northwest Family Medicine Residency Program in Bremerton, WA, which is affiliated with the Virginia Mason Franciscan Health System. I educate and train family medicine interns and residents who rotate through my clinic regularly.

I have published a book about nonphysicians, including nurse practitioners and physician assistants, working independently in the healthcare system.

Additionally, I have done forensic analysis of cases where child abuse has been alleged in 15 states. I have performed more than 100 second opinion evaluations as an independent contractor for the Parent Representation Program of the Washington State Office of Public Defense since 2021.
