Once you get into exploring its great depths, you'll be surprised to see how difficult and legitimately utilitarian it is for all music lovers. [OneClickRoot.com] Try the free version to check if. Pro has ★ Unlimited Custom Pre-Segms ★ Widget (2x1) ★ Preset Automatic Detection ★ Home Screen Shortcut Profiles ★ Tasker Plugin ★ Virtualizer ★ Music visualizer ★ Reverb (Beta! It doesn't work on most phones, so it could be removed) ★ Automatically preset to incoming call ★ Start on phone boot ★ Ads-free ★ 20 built-in configurations : More bass, Improve quality, Electro, Techno, Dubstep, Dance, Pop, Rock, Metal, Reggae, Rap, R&B, Hip-Hop, Jazz, Latino, Acoustic, Classical, Party, Boost (included in the free version) Start Screen Shortcut This feature allows you to create a 1x1 Start screen shortcut that will change Bass Booster settings with one click without opening the app ! (see screenshots) Preset AutoDiscover This feature allows you to automatically adjust preset configurations according to the music being played. Let's say you're listening to some alternative rock music, by default, Bass Booster will automatically select Rock preset, but if you create a custom Rock preset, yours will be selected. But it goes even further! For example, you can create Punk Rock preset and Hard Rock preset and they will be automatically selected. 2.3.3+) You can also create a preset specifically for a song, album, or artist and it will be automatically detected the next time you play the corresponding song. AutoDiscover requires Use : - Compatible Player - Locally Stored and Tagged Audio Files Players Who Support AutoDiscover : - Stock player by Google - Google Play Music - Player Pro (recommended) - JetAudio Player - RealPlayer - Poweramp - Rocket Music Player - NRG Player - Music Folder Player - MortPlay TTPod Music Mod - Meridian - 3 (Cubed) - DoubleTwist (enable Last.FM scrobbling in DoubleTwist) - Winamp (enable Scrobbling and install Last.FM application) This list is incomplete: other media players can work. If your player isn't working, try Last.FM Scrobbling in your media player settings. For Winamp and some other players, you need to install Last.FM. If it still doesn't work, throw us the mail! Permissions - Read phone status : Automatically set up a preset if there is an incoming call. - Read external storage : It is necessary for preset autoDiscover on some devices - Recording sound : To show visual disclaimer We are not responsible for anything that could happen to your phone, your audio device or yourself ! Do not listen in full volume or with bass boost too long. This app may damage your devices or hearing. Use it wisely! Permissions require the following permissions on your Android device. Changing sound settings Allows the app to modify global sound settings such as volume and which speaker is used for output. Read the contents of the SD card Allows the app to read the contents of your SD card. Phone Status Allows you to read only phone access, including your device phone number, current cellular network information, the status of all calls in progress, and a list of any PhoneAccounts registered on your device. Run at Startup Allows the app to start as soon as the system finishes booting. This can make it take longer to start your phone and allow the app to slow down your entire phone by always running. Audio Recording Allows the app to record audio using a microphone. This permission allows the app to record audio at any time without your confirmation. Install shortcuts Allows the app to add a Start screen shortcut without user intervention.
