CALCULATION OF REGISTRATION FEE

Title of each class of securities to be registered	Amount to be registered (1)	Proposed maximum offering price per share (2)	Proposed maximum aggregate offering price	Amount of registration fee
Common Stock, par value \$0.001 per share, underlying Series I-1 Preferred Stock	2,285,714 (3)	\$3.935	\$8,994,285	\$905.73
Common Stock, par value \$0.001 per share, underlying outstanding Series A Warrants	1,142,857 (4)	\$3.935	\$4,497,143	\$452.87
Common Stock, par value \$0.001 per share, underlying outstanding Series B Warrants	2,285,714 (5)	\$3.935	\$8,994,285	\$905.73
Common Stock, par value \$0.001 per share, underlying outstanding Series C Warrants	2,285,714 (6)	\$3.935	\$8,994,285	\$905.73
Total			\$31,479,998	\$3,170.06

- (1) Pursuant to Rule 416 under the Securities Act of 1933, this registration statement includes an indeterminate number of additional shares that may be offered and sold to prevent dilution resulting from stock splits, stock dividends, recapitalizations or similar transactions.
- (2) Calculated pursuant to Rule 457(c). The offering prices per share and aggregate offering prices are based on the average of high and low sales prices of the registrant's common stock on April 19, 2016, as reported on OTC Markets (OTCQB).
- (3) Represents 200% of 1,142,857 shares that may be issued upon conversion of 2,000 shares of Series I-1 Preferred Stock.
- (4) Represents 1,142,857 shares of common stock that may be currently issued upon the exercise of outstanding Series A Warrants.
- (5) Represents 200% of 1,142,857 shares of common stock that may be currently issued upon the exercise of outstanding Series B Warrants.
- (6) Represents 200% of 1,142,857 shares of common stock that may be currently issued upon the exercise of outstanding Series C Warrants.

The registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until this Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. The selling stockholders may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities, and it is not soliciting offers to buy these securities in any state where the offer or sale of these securities is not permitted.

SUBJECT TO COMPLETION, DATED APRIL 20, 2016

PRELIMINARY PROSPECTUS

INTERNATIONAL STEM CELL CORPORATION

7,999,999 Shares of Common Stock

This prospectus relates to the resale of up to 7,999,999 shares of our common stock by the selling stockholders named herein. On March 9, 2016, we entered into a securities purchase agreement with Sabby Healthcare Master Fund, Ltd., Sabby Volatility Warrant Master Fund, Ltd. (together, the “Sabby Purchasers”) and Andrey Semechkin, the Company’s Chief Executive Officer and Co-Chairman, (together, with the Sabby Purchasers, the “Purchasers”), pursuant to which we sold to the Purchasers (i) a total of 6,310 shares of our Series I-1 and Series I-2 Convertible Preferred Stock, par value \$0.001 with a stated value of \$1,000 per share (collectively, the “Series I Preferred Stock”), convertible into 3,605,713 shares of common stock based upon an initial conversion price of \$1.75, (ii) Series A Warrants (the “Series A Warrants”) to purchase up to 3,605,713 shares of common stock at an initial exercise price of \$3.64 per share for a term of 5 years, (iii) Series B warrants (the “Series B Warrants”) to purchase up to 3,605,713 shares of common stock at an initial exercise price of \$1.75 per share for a term of six months, and (iv) Series C warrants (the “Series C Warrants”, together with the Series A Warrants and the Series B Warrants, collectively, the “Warrants”) to purchase up to 3,605,713 shares of common stock at an initial exercise price of \$1.75 per share for a term of twelve months. Pursuant to the terms of the registration rights agreement, as amended, we entered into with the Sabby Purchasers, we are initially required to register (a) 200% of the number of shares of common stock currently underlying the Series I-1 Preferred Stock, (b) 200% of the number of shares of common stock currently issuable upon exercise of the Series B Warrants and Series C Warrants held by the Sabby Purchasers, and (c) 100% of the shares of common stock currently issuable upon exercise of the Series A Warrants held by the Sabby Purchasers. To the extent that one or more Sabby Purchasers elects to convert their respective shares of Series I Preferred Stock to acquire shares of our common stock or to exercise their respective Warrants, this prospectus may be used by the selling stockholders named under the section titled “Selling Stockholders” to resell their shares. We are not selling any securities under this prospectus and will not receive any of the proceeds from the sale of shares by any selling stockholder; however, we will receive proceeds upon any exercise of the Warrants.

The selling stockholders may sell their respective shares of common stock described in this prospectus in a number of different ways and at varying prices. We provide more information about how the selling stockholders may resell their respective shares of our common stock in the section titled “Plan of Distribution” beginning on page 49. Each selling stockholder may be deemed to be an “underwriter” within the meaning of the Securities Act in connection with such sales within the meaning of the Securities Act of 1933, as amended, with respect to any shares resold under this prospectus by such selling stockholder. Although we will pay the expenses incurred in registering the shares, we will not be paying any underwriting discounts or commissions in connection with the resale of the shares.

We will pay the expenses incurred in registering the shares, including legal and accounting fees. See “Plan of Distribution.”

Our common stock is quoted on the OTC QB and trades under the symbol “ISCO”. The last reported sale price of our common stock on April 19, 2016 on the OTC QB was \$3.92 per share.

Investing in our securities involves a high degree of risk. Before buying any securities, you should read the discussion of material risks of investing in our common stock under the heading “[Risk Factors](#)” beginning on page 5 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

The date of this prospectus is _____, 2016.

About This Prospectus

You should rely only on the information contained in this prospectus provided to you in connection with this offering. We have not, and the Purchasers have not, authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. This prospectus is not an offer to sell, nor purchasers are seeking an offer to buy, securities in any state where the offer or solicitation is not permitted. The information contained in this prospectus is complete and accurate as of the date on the front cover of this prospectus. You should assume that the information appearing in this prospectus is accurate only as of the date on the front cover of this prospectus. Our business, financial condition, results of operations and prospects may have changed since that date. Neither the delivery of this prospectus nor any sale made in connection with this prospectus shall, under any circumstances, create any implication that there has been no change in our affairs since the date of this prospectus or that the information contained by reference to this prospectus is correct as of any time after its date. In this prospectus, references to “the Company,” “we,” “us,” and “our,” refer to International Stem Cell Corporation.

PROSPECTUS SUMMARY

This summary provides an overview of selected information contained elsewhere in this prospectus and does not contain all of the information you should consider before investing in our securities. You should carefully read this prospectus and the registration statement of which this prospectus is a part in their entirety before investing in our securities, including the information discussed under “Risk Factors” beginning on page 5 and our financial statements and notes thereto that appear elsewhere in this prospectus.

Business Overview

International Stem Cell Corporation (sometimes referred to herein as “ISCO”, the “Company”, “we”, “us”, or “our”) is a biotechnology company focused on therapeutic and biomedical product development with multiple long-term therapeutic opportunities and two revenue-generating businesses offering potential for increased future revenue.

We currently have no revenue generated from our principal operations in therapeutic and clinical product development through research and development efforts. We have generated revenue from our two commercial businesses, cosmetic and research products, of a total of \$7.6 million and \$7.0 million for the years ended December 31, 2015 and 2014, respectively.

Our products are based on multi-decade experience with human cell culture and a proprietary type of pluripotent stem cells, “human parthenogenetic stem cells” (“hpSCs”). Our hpSCs are comparable to human embryonic stem cells (“hESCs”) in that they have the potential to be differentiated into many different cells in the human body. However, the derivation of hpSCs does not require the use of fertilized eggs or the destruction of viable human embryos and also offers the potential for the creation of immune-matched cells and tissues that are less likely to be rejected following transplantation. ISCO scientists have created the first parthenogenetic, homozygous stem cell line that can be a source of therapeutic cells for hundreds of millions of individuals with minimal immune rejection after transplantation. We have facilities and manufacturing processes that we believe comply with the requirements of current Good Manufacturing Practice (GMP) standards as defined by the U.S. Code of Federal Regulations and promulgated by the Food and Drug Administration (“FDA”).

We are developing different cell types from our stem cells that may result in therapeutic products. We focus on applications where cell and tissue therapy is already proven but where there is an insufficient supply of functional cells or tissue. We believe that the most promising potential clinical applications of our technology are:

- Neural stem cells for treatment of Parkinson’s disease and potentially other central nervous system disorders, such as traumatic brain injury, stroke and Alzheimer’s disease.
- Liver cells (“hepatocytes”) that may be used to treat a variety of congenital and acquired liver diseases. Using the same precursor cell that leads to liver cells, it is also possible to create islet cells for potential treatment of diabetes.
- Retinal cells and three-dimensional eye structures including corneal cells and tissue to treat degenerative retinal diseases, corneal blindness, and to accelerate corneal healing.

We have completed our IND-enabling preclinical studies on our most advanced program, the development of neural stem cells for the treatment of Parkinson’s disease and filed the regulatory submission to the Australian Therapeutics Goods Administration (“TGA”) to start a phase 1/2a clinical trial in Australia.

Each of these product candidates will require extensive preclinical and clinical development and may require specific unforeseen licensing rights obtained at substantial cost before regulatory approval may be achieved and the products sold for therapeutic use.

Additionally, we are subject to various other risks; for example, our business is at an early stage of development and we may not develop therapeutic products that can be commercialized; we have a history of operating losses, do not expect to be profitable in the near future and our independent registered public accounting firm has expressed doubt as to our ability to continue as a going concern; and we will need additional capital to conduct our operations and develop our products and our ability to obtain the necessary funding is uncertain. Please see the heading “Risk Factors” beginning on page 5.

On December 16, 2014 we were named in Deloitte’s 2014 Technology Fast 500™ of the fastest growing companies in North America. International Stem Cell Corporation was ranked in 215th place in the overall list, which also included the technology, media, telecommunications and clean tech companies. Of the 47 biotechnology businesses on the list, we placed 21st and we were the only regenerative medicine company represented.

The Therapeutics Goods Administration (TGA) of Australia has recently cleared a regulatory submission from CytoTherapeutics, our wholly owned subsidiary, to initiate a Phase I/IIa clinical trial, dose escalation trial using human parthenogenetic stem cells-derived neural stem cells (ISC-hpNSC) in patients with moderate to severe Parkinson’s disease.

Recent Developments

Table of Contents

On March 15, 2016, pursuant to a securities purchase agreement, dated as of March 9, 2016, with Sabby Healthcare Master Fund, Ltd., Sabby Volatility Warrant Master Fund, Ltd., and Andrey Semechkin, the Company's Chief Executive Officer and Co-Chairman (together, the "Purchasers"), we sold in a private placement (the "Private Placement") (i) an aggregate of 6,310 shares of Series I Convertible Preferred Stock, par value \$0.001 with a stated value of \$1,000 per share (the "Series I Preferred Stock"), (ii) Series A warrants (the "Series A Warrants") to purchase up to 3,605,713 shares of common stock exercisable immediately and having a term of 5 years, (iii) Series B warrants (the "Series B Warrants") to purchase up to 3,605,713 shares of common stock exercisable immediately and having a term of 6 months, (iv) Series C warrants (the "Series C Warrants", together with the Series A Warrants, the Series B Warrants, collectively, the "Warrants") to purchase up to 3,605,713 shares of common stock exercisable immediately and having a term of 12 months. The conversion price of the Series I Preferred Stock and the exercise price of the Series B Warrants and Series C Warrants is currently \$1.75 per share, and the exercise price of the Series A Warrants is \$3.64 per share. All of the exercise prices and the conversion price are subject to further adjustment. The aggregate initial gross proceeds received from this transaction (including cancellation of indebtedness) were \$6.3 million.

The number of shares issuable upon conversion of the Series I Preferred Stock and exercise of the Warrants are adjustable in the event of stock splits, stock dividends, combinations of shares and similar transactions. The number of shares of common stock issuable upon conversion of the Series I Preferred Stock is also subject to antidilution provisions. Adjustments to the exercise price of the Series A Warrants do not affect the number of shares issuable upon exercise of the Series A Warrant; but adjustments to the exercise prices of the Series B Warrants and Series C Warrants result in changes in the number of shares issuable on exercise of those warrants. In addition, Purchasers have been granted rights of participation in future offerings of our securities for eighteen months.

In connection with the Private Placement, we entered into a registration rights agreement with the Sabby Purchasers pursuant to which we are obligated to file a registration statement to register the resale of (i) 200% of the shares of Common Stock issuable upon conversion of the Series I-1 Preferred Stock, (ii) 200% of the shares issuable upon exercise of the Series B Warrants and Series C Warrants held by the Sabby Purchasers, and (iii) 100% of the shares of common stock issuable upon exercise of the Series A Warrants held by the Sabby Purchasers. In addition to the registration rights, the Sabby Purchasers are entitled to receive liquidated damages upon the occurrence of a number of events relating to filing, obtaining and maintaining an effective registration statement covering the shares underlying the Series I-1 Preferred Stock and their Warrants, subject to certain exceptions.

Subject to certain ownership limitations with respect to the Series I-1 Preferred Stock, the Series I Preferred Stock is convertible at any time into shares of Common Stock at a current conversion price of \$1.75 per share. The Series I Preferred Stock is non-voting, is only entitled to dividends in the event that dividends are paid on the Common Stock, and will not have any preferences over the Common Stock, except that the Series I Preferred Stock shall have preferential liquidation rights over the Common Stock. Other than the Series I-1 Preferred Stock having a beneficial ownership limitation, the Series I-1 Preferred Stock and Series I-2 Preferred Stock are substantially identical. The conversion price of the Series I Preferred Stock is subject to certain resets as set forth in the Certificates of Designation, including, the effectiveness date of the registration statement, the date of the amendment to the certificate of incorporation with respect to any reverse stock split, and in certain instances the six and twelve month anniversaries of the Closing Date.

The Warrants are immediately exercisable and the exercise price of the Warrants is subject to certain reset adjustments as set forth in the forms of Warrant, including the date of amendment to the Company's certificate of incorporation with respect to any reverse stock split, the effectiveness dates of the registration statement and in certain instances the six and twelve month anniversaries of the date of issuance of the Warrants.

H.C. Wainwright & Co. (the "Placement Agent") acted as the exclusive placement agent for the Offering pursuant to a placement agency engagement letter, dated as of March 9, 2016 by and between the Placement Agent and the Company (the "Engagement Letter"). Upon the closing of the Offering, pursuant to the Engagement Letter, the Placement Agent received a placement agent fee of \$200,000 and a warrant to purchase 342,856 shares of common stock, as well as the reimbursement of fees and expenses up to \$50,000. Similar to the Series A Warrant, the placement agent warrant has a current exercise price of \$1.75 per share, is immediately exercisable and will terminate five years after the date of issuance.

The foregoing description of the Series I Preferred Stock and Warrants is only a summary and is not complete. For additional information about the terms of the Series I Preferred Stock and Warrants, see the section entitled "Description of Securities – Preferred Stock" and "Description of Securities – Warrants issued in the Private Placement", respectively, in this prospectus.

Corporate Information

Our principal executive office is located at 5950 Priestly Drive, Carlsbad, CA 92008, and our telephone number is (760) 940-6383. Our website address is www.internationalstemcell.com. No information found on our website is part of this prospectus. Also, this

Table of Contents

prospectus may include the names of various government agencies or the trade names of other companies. Unless specifically stated otherwise, the use or display by us of such other parties' names and trade names in this prospectus is not intended to and does not imply a relationship with, or endorsement or sponsorship of us by, any of these other parties.

The Offering

Common stock offered by the selling stockholders	7,999,999 shares, consisting of: <ul style="list-style-type: none">• 2,285,714 shares issuable upon conversion of the Series I-1 Preferred Stock (including shares we may issue pursuant to various conversion price resets in the Certificate of Designation for the Series I-1 Preferred Stock)• 5,714,285 shares we may issue to the Sabby Purchasers upon exercise of Warrants (including additional shares issuable pursuant to various stock price resets as prescribed in the Series B Warrants and Series C Warrants)
Common stock outstanding as of March 31, 2016	2,814,910 shares ⁽¹⁾
Common stock to be outstanding after giving effect to the total issuance of up to 7,999,999 shares issuable to the Sabby Purchasers registered hereunder	10,814,909 shares
Use of proceeds	We will not receive any proceeds from the sale by Purchasers in this offering of the shares of common stock issuable upon their conversion of Series I-1 Preferred Stock or upon exercise of Warrants. See "Use of Proceeds" of this prospectus.
OTC Markets (OTCQB) symbol	ISCO
Risk Factors	Investing in the securities involves substantial risks. See "Risk Factors" beginning on page 5 and the other information in this prospectus for a discussion of the factors you should consider before you decide to invest in shares of our common stock.

- (1) The number of shares of common stock shown above to be outstanding after this offering is based on the 2,814,910 shares outstanding as of March 31, 2016 and excludes, as of that date:
- 1,283,303 shares of common stock issuable upon exercise of outstanding stock options, including those options issued outside our stock option plans, at a weighted average exercise price of \$19.66 per share;
 - 11,286,201 shares of common stock reserved for issuance under various outstanding warrant agreements, at an exercise price of \$2.57 per share;
 - 6,798,592 additional shares of common stock reserved for issuance upon conversion of our outstanding shares of Series B, Series D, Series G and Series I Preferred Stock;
 - 12,679 additional shares of common stock reserved for future issuance under our 2006 and 2010 stock incentive plans.

Unless otherwise specifically stated, information throughout this prospectus does not assume the exercise of outstanding options or warrants to purchase shares of common stock or conversion of outstanding shares of preferred stock.

RISK FACTORS

You should carefully consider the risks described below as well as other information provided to you in this document, including information in the section of this document entitled “Forward Looking Statements”. If any of the following risks actually occur, our business, financial condition or results of operations could be materially adversely affected, the value of our common stock could decline, and you may lose all or part of your investment.

Risks Related to Our Business

Our business is at an early stage of development and we may not develop therapeutic products that can be commercialized.

Our business is at an early stage of development. We do not have any products in late stage clinical trials. We are still in the early stages of identifying and conducting research on potential therapeutic products. Our potential therapeutic products will require significant research and development and pre-clinical and clinical testing prior to regulatory approval in the United States and other countries. We may not be able to obtain regulatory approvals, enter new and later stage clinical trials for any of our product candidates, or commercialize any products. Our product candidates may prove to have undesirable and unintended side effects or other characteristics adversely affecting their safety, efficacy or cost effectiveness that could prevent or limit their use. Any product using any of our technology may fail to provide the intended therapeutic benefits, or achieve therapeutic benefits equal to or better than the standard of treatment at the time of testing or production.

We have a history of operating losses, do not expect to be profitable in the near future and our independent registered public accounting firm has expressed doubt as to our ability to continue as a going concern.

We have not generated any profits since our entry into the biotechnology business and have incurred significant operating losses. We expect to incur additional operating losses for the foreseeable future and, as we increase our research and development activities, we expect our operating losses to increase significantly. Our commercial businesses have not generated revenues in amounts to support our research and development efforts, and we may not achieve that level of revenues in the foreseeable future.

We have expended substantial funds to develop our technologies, products and product candidates. Based on our financial condition, recurring losses and projected spending, which raise substantial doubts about our ability to continue as a going concern, our independent registered public accounting firm included an explanatory paragraph in its report on our consolidated financial statements as of and for the year ended December 31, 2015 regarding this uncertainty. The inclusion of the going concern statement by our auditors may adversely affect our stock price and our ability to raise needed capital or enter into advantageous contractual relationships with third parties. If we were unable to continue as a going concern, the values we receive for our assets on liquidation or dissolution could be significantly lower than the values reflected in our financial statements.

We will need additional capital to conduct our operations and develop our products and our ability to obtain the necessary funding is uncertain.

During the year ended December 31, 2015, we used a significant amount of cash to finance the continued development and testing of our product candidates, and we need to obtain significant additional capital resources in order to develop products going forward. Our average burn rate for the year ended December 31, 2015 was approximately \$343,000 per month excluding capital expenditures and patent costs averaging \$62,000 per month. We may not be successful in maintaining our normal operating cash flow and the timing of our capital expenditures may not result in cash flows sufficient to sustain our operations through the next twelve months. If financing is not sufficient and additional financing is not available or available only on terms that are detrimental to our long-term survival, it could have a major adverse effect on our ability to pursue our clinical research and product development programs, and could ultimately affect our ability to continue to function. The timing and degree of any future capital requirements will depend on many factors, including:

- the accuracy of the assumptions underlying our estimates for capital needs in 2016 and beyond;
- scientific progress in our research and development programs;
- the magnitude and scope of our research and development programs and our ability to establish, enforce and maintain strategic arrangements for research, development, clinical testing, manufacturing and marketing;
- our progress with pre-clinical development and clinical trials;
- the time and costs involved in obtaining regulatory approvals;
- the costs involved in preparing, filing, prosecuting, maintaining, defending and enforcing patent claims; and
- the number and type of product candidates that we pursue.

Additional financing through strategic collaborations, public or private equity or debt financings or other financing sources may not be available on acceptable terms, or at all. Additional equity financing could result in significant dilution to our stockholders, and

Table of Contents

any debt financings will likely involve covenants restricting our business activities. Additional financing may not be available on acceptable terms, or at all. Further, if we obtain additional funds through arrangements with collaborative partners, these arrangements may require us to relinquish rights to some of our technologies, product candidates or products that we would otherwise seek to develop and commercialize on our own. If sufficient capital is not available, we may be required to delay, reduce the scope of or eliminate one or more of our research or product development initiatives, any of which could have a material adverse effect on our financial condition or business prospects.

Additionally, currently the U.S. government, through National Institute of Health appropriations restrictions, prevents federal funding to be used to create new embryonic and parthenogenetic stem cells, so access to grants from the NIH are limited.

We have limited clinical testing and regulatory capabilities, and human clinical trials are subject to extensive regulatory requirements, very expensive, time-consuming and difficult to design and implement. Our products may fail to achieve necessary safety and efficacy endpoints during clinical trials, which may limit our ability to generate revenues from therapeutic products.

Due to the relatively early stage of our therapeutic products and stem cell therapy-based systems, we have not yet invested significantly in internal clinical testing and regulatory capabilities, including for human clinical trials. We cannot assure you that we will be able to invest or develop resources for these capabilities successfully or as expeditiously as necessary. In particular, human clinical trials can be very expensive and difficult to design and implement, in part because they are subject to rigorous regulatory requirements. The clinical trial process is time consuming. We estimate that clinical trials of our product candidates will take at least several years to complete. Furthermore, failure can occur at any stage of the trials, and we could encounter problems that cause us to abandon or repeat clinical trials. The commencement and completion of clinical trials may be affected by several factors, including:

- unforeseen safety issues;
- determination of dosing issues;
- inability to demonstrate effectiveness during clinical trials;
- slower than expected rates of patient recruitment;
- inability to monitor patients adequately during or after treatment; and
- inability or unwillingness of medical investigators to follow our clinical protocols.

In addition, we or the FDA (or other applicable regulatory agency) may suspend our clinical trials at any time if it appears that we are exposing participants to unacceptable health risks or if the FDA or other regulatory agency finds deficiencies in our submissions or the conduct of these trials.

Patents held by other persons may result in infringement claims against us that are costly to defend and which may limit our ability to use the disputed technologies and prevent us from pursuing research and development or commercialization of potential products.

A number of pharmaceutical, biotechnology and other companies, universities and research institutions have filed patent applications or have been issued patents relating to cell therapy, stem cells, and other technologies potentially relevant to or required by our expected products. We cannot predict which, if any, of such applications will issue as patents or the claims that might be allowed. We are aware that a number of companies have filed applications relating to stem cells. We are also aware of a number of patent applications and patents claiming use of stem cells and other modified cells to treat disease, disorder or injury.

If third party patents or patent applications contain claims infringed by either our licensed technology or other technology required to make and use our potential products and such claims are ultimately determined to be valid, we might not be able to obtain licenses to these patents at a reasonable cost, if at all, or be able to develop or obtain alternative technology. If we are unable to obtain such licenses at a reasonable cost, we may not be able to develop some products commercially. We may be required to defend ourselves in court against allegations of infringement of third party patents. Patent litigation is very expensive and could consume substantial resources and create significant uncertainties. An adverse outcome in such a suit could subject us to significant liabilities to third parties, require disputed rights to be licensed from third parties, or require us to cease using such technology.

The outcome of pre-clinical, clinical and product testing of our products is uncertain, and if we are unable to satisfactorily complete such testing, or if such testing yields unsatisfactory results, we may be unable to commercially produce our proposed products.

Before obtaining regulatory approvals for the commercial sale of any potential human products, our products will be subjected to extensive pre-clinical and clinical testing to demonstrate their safety and efficacy in humans. The clinical trials of our prospective products, or those of our licensees or collaborators, may not demonstrate the safety and efficacy of such products at all, or to the extent necessary to obtain appropriate regulatory approvals. Similarly, the testing of such prospective products may not be completed in a timely manner, if at all, or only after significant increases in costs, program delays or both, all of which could harm our ability to

Table of Contents

generate revenues. In addition, our prospective products may not prove to be more effective for treating disease or injury than current therapies. Accordingly, we may have to delay or abandon efforts to research, develop or obtain regulatory approval to market our prospective products. The failure to adequately demonstrate the safety and efficacy of a therapeutic product under development could delay or prevent regulatory approval of the product and could harm our ability to generate revenues, operate profitably or produce any return on an investment in us.

Even if we are successful in developing a therapeutic application using our cell technologies, it is unclear whether cell therapy can serve as the foundation for a commercially viable and profitable business.

Stem cell technology is rapidly developing and could undergo significant change in the future. Such rapid technological development could result in our technologies becoming obsolete. While our product candidates appear promising, they may fail to be successfully commercialized for numerous reasons, including, but not limited to, competing technologies for the same indications. There can be no assurance that we will be able to develop a commercially successful therapeutic application for our stem cell technologies.

Moreover, advances in other treatment methods or in disease prevention techniques could significantly reduce or entirely eliminate the need for our cell therapy services, planned products and therapeutic efforts. There is no assurance that cell therapies will achieve the degree of success envisioned by us in the treatment of disease. Additionally, technological or medical developments may materially alter the commercial viability of our technology or services, and require us to incur significant costs to replace or modify equipment in which we have a substantial investment. We are focused on cell therapy, and if this field is substantially unsuccessful, this could jeopardize our success or future results. The occurrence of any of these factors may have a material adverse effect on our business, operating results and financial condition.

Our competition includes fully integrated biotechnology, pharmaceutical and cosmetic companies that have significant advantages over us.

The market for therapeutic stem cell products is highly competitive. We expect that our most significant competitors will be fully integrated and more established pharmaceutical, biotechnology and cosmetic companies. These companies are developing stem cell-based products and they have significantly greater capital resources and research and development, manufacturing, testing, regulatory compliance, and marketing capabilities. Many of these potential competitors are further along in the process of product development and also operate large, company-funded research and development programs. As a result, our competitors may develop more competitive or affordable products, or achieve earlier patent protection or product commercialization than we are able to achieve. Competitive products may render any products or product candidates that we develop uneconomic or obsolete.

If competitors develop and market products that are more effective, safer, or less expensive than our product candidates or offer other advantages, our commercial prospects will be limited.

Our cell therapy development programs face, and will continue to face, intense competition from pharmaceutical, biopharmaceutical and biotechnology companies, as well as numerous academic and research institutions and governmental agencies engaged in drug discovery activities or funding, both in the United States and abroad. Some of these competitors are pursuing the development of drugs and other therapies that target the same diseases and conditions that we are targeting with our product candidates.

As a general matter, we also face competition from many companies that are researching and developing cell therapies. Many of these companies have financial and other resources substantially greater than ours. In addition, many of these competitors have significantly greater experience in testing pharmaceutical and other therapeutic products, obtaining FDA and other regulatory approvals, and marketing and selling. If we ultimately obtain regulatory approval for any of our product candidates, we also will be competing with respect to manufacturing efficiency and marketing capabilities, areas in which we have limited or no commercial-scale experience. Mergers and acquisitions in the pharmaceutical and biotechnology industries may result in even more resources being concentrated by our competitors. Competition may increase further as a result of advances made in the commercial applicability of our technologies and greater availability of capital for investment in these fields.

If we fail to meet our obligations under our license agreements, we may lose our rights to key technologies on which our business depends.

Our business depends in part on licenses from third parties. These third party license agreements impose obligations on us, such as payment obligations and obligations to diligently pursue development of commercial products under the licensed patents. If a licensor believes that we have failed to meet our obligations under a license agreement, the licensor could seek to limit or terminate our license rights, which could lead to costly and time consuming litigation and, potentially, a loss of the licensed rights. During the period of any such litigation, our ability to carry out the development and commercialization of potential products could be significantly and negatively affected. If our license rights were restricted or ultimately lost, our ability to continue our business based on the affected technology platform could be severely affected adversely.

Significant delays or reductions in U.S. Government funding may negatively affect our results of operations.

We estimate that governmental funding, either directly or indirectly (through sponsorship of academic research), comprises approximately 40% of the market for basic and applied research in biological sciences, which is the target market for our LCT research products. The U.S. Government is considering (and has implemented in the recent past) significant changes in government spending and other governmental programs, which in the recent past involved several automatic spending cuts being implemented. There are many variables in how these laws could be implemented in the future that make it difficult to determine specific impacts on our customers, and we are unable to predict the impact that future automatic spending cuts would have on funding our customers receive and resulting sales of our LCT products. Additionally, U.S. Governmental programs are subject to annual congressional budget authorization and appropriation processes. However, whether through the automatic cuts or other decisions, long-term funding for certain programs in which our research product customers participate may be reduced, delayed or cancelled. In the event that governmental funding for any of our research product customers is reduced or delayed, our sales to those customers would likely suffer, which could have a material adverse effect on our results of operations. Further, currently the U.S. government, through National Institute of Health appropriations restrictions, prevents federal funding to be used to create new embryonic and parthenogenetic stem cells, so access to grants from the NIH are limited, which may adversely affect our partnering opportunities and internal therapeutic product development initiatives.

Restrictive and extensive government regulation could slow or hinder our production of a cellular product.

The research and development of stem cell therapies is subject to and restricted by extensive regulation by governmental authorities in the United States and other countries. The process of obtaining FDA and other necessary regulatory approvals is lengthy, expensive and uncertain. We may fail to obtain the necessary approvals to continue our research and development, which would hinder our ability to manufacture or market any future product.

The development and commercialization of our product candidates is subject to extensive regulation by the FDA and other regulatory agencies in the United States and abroad, and the failure to receive regulatory approvals for our other product candidates would likely have a material and adverse effect on our business and prospects.

The process of obtaining FDA and other regulatory approvals is expensive, generally takes many years and is subject to numerous risks and uncertainties, particularly with complex and/or novel product candidates such as our product candidates. Changes in regulatory approval policies during the development period, changes in or the enactment of additional statutes or regulations, or changes in regulatory review for each submitted product application, may cause delays in the approval or rejection of an application or may make it easier for our competitors to gain regulatory approval to enter the marketplace. Ultimately, the FDA and other regulatory agencies have substantial discretion in the approval process and may refuse to accept any application or may decide that our product candidate data are insufficient for approval without the submission of additional pre-clinical, clinical or other studies. In addition, varying agency interpretations of the data obtained from pre-clinical and clinical testing could delay, limit or prevent regulatory approval of a product candidate. Any regulatory approval we ultimately obtain may be limited or subject to restrictions or post-approval commitments that render the approved product not commercially viable.

Any of the following factors, among others, could cause regulatory approval for our product candidates to be delayed, limited or denied:

- the product candidates require significant clinical testing to demonstrate safety and effectiveness before applications for marketing approval can be filed with the FDA and other regulatory authorities;
- data obtained from pre-clinical and nonclinical animal testing and clinical trials can be interpreted in different ways, and regulatory authorities may not agree with our respective interpretations or may require us to conduct additional testing;
- negative or inconclusive results or the occurrence of serious or unexpected adverse events during a clinical trial could cause us to delay or terminate development efforts for a product candidate; and/or
- FDA and other regulatory authorities may require expansion of the size and scope of the clinical trials.

Any difficulties or failures that we encounter in securing regulatory approval for our product candidates would likely have a substantial adverse impact on our ability to generate product sales, and could make any search for a collaborative partner more difficult.

Research in the field of embryonic stem cells is currently subject to strict government regulations, and our operations could be restricted or outlawed by any legislative or administrative efforts impacting the use of nuclear transfer technology or human embryonic material.

Significant portions of our business are focused on human cell therapy, which includes the production of human differentiated cells from stem cells and involves human oocytes. Although our focus is on parthenogenetic stem cells derived from unfertilized oocytes, certain aspects of that work may involve the use of embryonic stem cells. Research utilizing embryonic stem cells is controversial, and currently subject to intense scrutiny, particularly in the area of the use of human embryonic material.

Table of Contents

Federal law is not as restrictive regarding the use of federal funds for human embryonic cell research, commonly referred to as hES cell research as it once was. However, federal law does prohibit federal funding for creation of parthenogenetic stem cells. Our operations may also be restricted by future legislative or administrative efforts by politicians or groups opposed to the development of hES cell technology, parthenogenetic cell technology or nuclear transfer technology. Further, future legislative or administrative restrictions could, directly or indirectly, delay, limit or prevent the use of hES technology, parthenogenetic technology, or nuclear transfer technology, the use of human embryonic material, or the sale, manufacture or use of products or services derived from nuclear transfer technology or hES or parthenogenetic technology.

We may be unsuccessful in our efforts to comply with applicable federal, state and international laws and regulations, which could result in loss of licensure, certification or accreditation or other government enforcement actions or impact our ability to secure regulatory approval of our product candidates.

Although we seek to conduct our business in compliance with applicable governmental healthcare laws and regulations, these laws and regulations are exceedingly complex and often subject to varying interpretations. The cell therapy industry is the topic of significant government interest, and thus the laws and regulations applicable to our business are subject to frequent change and/or reinterpretation. As such, there can be no assurance that we will be able, or will have the resources, to maintain compliance with all such healthcare laws and regulations. Failure to comply with such healthcare laws and regulations, as well as the costs associated with such compliance or with enforcement of such healthcare laws and regulations, may have a material adverse effect on our operations or may require restructuring of our operations or impair our ability to operate profitably.

Our manufacture of certain cellular therapy products triggers additional FDA requirements applicable to hESCs which are regulated as a drug, biological product, or medical device. FDA's GMP regulations govern the manufacture, processing, packaging and holding of cell therapy products regulated as drugs. FDA's Quality System Regulation, or QSR, similarly governs the manufacture, processing, packaging and holding of cell therapy products regulated as medical devices. We must comply with GMP or QSR requirements including quality control, quality assurance and the maintenance of records and documentation for certain products. We may be unable to comply with these GMP or QSR requirements and with other FDA, state and foreign regulatory requirements. These requirements may change over time and we or third-party manufacturers may be unable to comply with the revised requirements.

We will continue to be subject to extensive FDA regulation following any product approvals, and if we fail to comply with these regulations, we may suffer a significant setback in our business.

Even if we are successful in obtaining regulatory approval of our product candidates, we will continue to be subject to the requirements of and review by, the FDA and comparable regulatory authorities in the areas of manufacturing processes, post-approval clinical data, adverse event reporting, labeling, advertising and promotional activities, among other things. In addition, any marketing approval we receive may be limited in terms of the approved product indication or require costly post-marketing testing and surveillance. Discovery after approval of previously unknown problems with a product, manufacturer or manufacturing process, or a failure to comply with regulatory requirements, may result in actions such as:

- warning letters or other actions requiring changes in product manufacturing processes or restrictions on product marketing or distribution;
- product recalls or seizures or the temporary or permanent withdrawal of a product from the market; and
- fines, restitution or disgorgement of profits or revenue, the imposition of civil penalties or criminal prosecution.

The occurrence of any of these actions would likely cause a material adverse effect on our business, financial condition and results of operations.

Health care companies have been the subjects of federal and state investigations, and we could become subject to investigations in the future.

Both federal and state government agencies have heightened civil and criminal enforcement efforts. There are numerous ongoing investigations of health care companies, as well as their executives and managers. In addition, amendments to the Federal False Claims Act, have made it easier for private parties to bring "qui tam" (whistleblower) lawsuits against companies under which the whistleblower may be entitled to receive a percentage of any money paid to the government. The Federal False Claims Act provides, in part, that an action can be brought against any person or entity that has knowingly presented, or caused to be presented, a false or fraudulent request for payment from the federal government, or who has made a false statement or used a false record to get a claim approved. The government has taken the position that claims presented in violation of the federal anti-kickback law, Stark Law or other healthcare-related laws, including laws enforced by the FDA, may be considered a violation of the Federal False Claims Act.

Table of Contents

Penalties include substantial fines for each false claim, plus three times the amount of damages that the federal government sustained because of the act of that person or entity and/or exclusion from the Medicare program. In addition, a majority of states have adopted similar state whistleblower and false claims provision. Any future investigations of our business or executives could cause us to incur substantial costs, and result in significant liabilities or penalties, as well as damage to our reputation.

Restrictions on the use of human stem cells, and the ethical, legal and social implications of that research, could prevent us from developing or gaining acceptance for commercially viable products in these areas.

Although our stem cells are derived from unfertilized human eggs through a process called “parthenogenesis” that can produce cells suitable for therapy, but are believed to be incapable of producing a human being, such cells are nevertheless often incorrectly referred to as “embryonic” stem cells. Because the use of human embryonic stem cells gives rise to ethical, legal and social issues regarding the appropriate use of these cells, our research related to human parthenogenetic stem cells could become the subject of adverse commentary or publicity and some political and religious groups may still raise opposition to our technology and practices. In addition, many research institutions, including some of our scientific collaborators, have adopted policies regarding the ethical use of human embryonic tissue, which, if applied to our procedures, may have the effect of limiting the scope of research conducted using our stem cells, thereby impairing our ability to conduct research in this field. In some states, use of embryos as a source of stem cells is prohibited.

To the extent we utilize governmental grants in the future, the governmental entities involved may retain certain rights in technology that we develop using such grant money and we may lose the revenues from such technology if we do not commercialize and utilize the technology pursuant to established government guidelines.

Certain of our licensors’ research have been or are being funded in part by government grants. Our research may also be government-funded in the future. In connection with certain grants, the governmental entity involved retains various rights in the technology developed with the grant. These rights could restrict our ability to fully capitalize upon the value of this research by reducing total revenues that might otherwise be available since such governmental rights may give the government the right to practice the invention without payment of royalties if we do not comply with applicable requirements.

We rely on parthenogenesis, cell differentiation and other stem cell technologies that we may not be able to successfully develop, which may prevent us from generating revenues, operating profitably or providing investors any return on their investment.

We have concentrated our research on our parthenogenesis, cell differentiation and stem cell technologies, and our ability to operate profitably will depend on being able to successfully implement or develop these technologies for human applications. These are emerging technologies with, as yet, limited human applications. We cannot guarantee that we will be able to successfully implement or develop our nuclear transfer, parthenogenesis, cell differentiation and other stem cell technologies or that these technologies will result in products or services with any significant commercial utility. We anticipate that the commercial sale of such products or services, and royalty/licensing fees related to our technology, would be an additional source of revenues.

If we are unable to keep up with rapid technological changes in our field or compete effectively, we will be unable to operate profitably.

We are engaged in activities in the biotechnology field, which is characterized by extensive research efforts and rapid technological progress. If we fail to anticipate or respond adequately to technological developments, our ability to operate profitably could suffer. Research and discoveries by other biotechnology, agricultural, pharmaceutical or other companies may render our technologies or potential products or services uneconomical or result in products superior to those we develop. Similarly, any technologies, products or services we develop may not be preferred to any existing or newly developed technologies, products or services.

We may not be able to protect our proprietary technology, which could harm our ability to operate profitably.

The biotechnology, cosmetic, and pharmaceutical industries place considerable importance on obtaining patent and trade secret protection for new technologies, products and processes. Our success will depend, to a substantial degree, on our ability to obtain and enforce patent protection for our products, preserve any trade secrets and operate without infringing the proprietary rights of others. We cannot assure you that:

- we will succeed in obtaining any patents, obtain them in a timely manner, or that the breadth or degree of protection that any such patents will protect our interests;
- the use of our technology will not infringe on the proprietary rights of others;
- patent applications relating to our potential products or technologies will result in the issuance of any patents or that, if issued, such patents will afford adequate protection to us or will not be challenged, invalidated or infringed; or
- patents will not be issued to other parties, which may be infringed by our potential products or technologies.

Table of Contents

We are aware of certain patents that have been granted to others and certain patent applications that have been filed by others with respect to nuclear transfer and other stem cell technologies. The fields in which we operate have been characterized by significant efforts by competitors to establish dominant or blocking patent rights to gain a competitive advantage, and by considerable differences of opinion as to the value and legal legitimacy of competitors' purported patent rights and the technologies they actually utilize in their businesses.

Considerable research in the areas of stem cells, cell therapeutics and regenerative medicine is being performed in countries outside of the United States, and a number of our competitors are located in those countries. The laws protecting intellectual property in some of those countries may not provide adequate protection to prevent our competitors from misappropriating our intellectual property.

Our business is highly dependent upon maintaining licenses with respect to key technology.

Although our primary focus relates to intellectual property we have developed internally, some of the patents we utilize are licensed to us by Ocata, which has licensed some of these from other parties, including the University of Massachusetts. These licenses are subject to termination under certain circumstances (including, for example, our failure to make minimum royalty payments). The loss of any of such licenses, or the conversion of such licenses to non-exclusive licenses, could harm our operations and/or enhance the prospects of our competitors.

Although our licenses with Ocata allow us to cure any defaults under the underlying licenses to them and to take over the patents and patents pending in the event of default by Ocata, the cost of such remedies could be significant and we might be unable to adequately maintain these patent positions. If so, such inability could have a material adverse effect on our business. Some of these licenses also contain restrictions (e.g., limitations on our ability to grant sublicenses) that could materially interfere with our ability to generate revenue through the licensing or sale to third parties of important and valuable technologies that we have, for strategic reasons, elected not to pursue directly. In the future we may require further licenses to complete and/or commercialize our proposed products. We may not be able to acquire any such licenses on a commercially-viable basis.

Cybersecurity breaches could expose us to liability, damage our reputation, compromise our confidential information or otherwise adversely affect our business.

We maintain sensitive company data on our computer networks, including our intellectual property and proprietary business information, as well as certain personal information regarding customers who purchase our skin care products online. We face a number of threats to our networks from unauthorized access, security breaches and other system disruptions. Despite our security measures, our infrastructure may be vulnerable to attacks by hackers or other disruptive problems. Any such security breach may compromise information stored on our networks and may result in significant data losses or theft of our intellectual property, proprietary business information or our customers' personally identifiable information. A cybersecurity breach could hurt our reputation by adversely affecting the perception of customers and potential customers of the security of their orders and personal information. In addition, a cybersecurity attack could result in other negative consequences, including disruption of our internal operations, increased cyber security protection costs, lost revenues or litigation.

Certain of our technology may not be subject to protection through patents, which leaves us vulnerable to theft of our technology.

Certain parts of our know-how and technology are not patentable or are trade secrets. To protect our proprietary position in such know-how and technology, we intend to require all employees, consultants, advisors and collaborators to enter into confidentiality and invention ownership agreements with us. These agreements may not provide meaningful protection for our trade secrets, know-how or other proprietary information in the event of any unauthorized use or disclosure. Further, in the absence of patent protection, competitors who independently develop substantially equivalent technology may harm our business.

We depend on our collaborators to help us develop and test our proposed products, and our ability to develop and commercialize products may be impaired or delayed if collaborations are unsuccessful.

Our strategy for the development, clinical testing and commercialization of our proposed products requires that we enter into collaborations with corporate partners, licensors, licensees and others. We are dependent upon the subsequent success of these other parties in performing their respective responsibilities and the continued cooperation of our partners. Our collaborators may not cooperate with us or perform their obligations under our agreements with them. We cannot control the amount and timing of our collaborators' resources that will be devoted to our research and development activities related to our collaborative agreements with them. Our collaborators may choose to pursue existing or alternative technologies in preference to those being developed in collaboration with us.

Under agreements with collaborators, we may rely significantly on such collaborators to, among other things:

- design and conduct advanced clinical trials in the event that we reach clinical trials;
- fund research and development activities with us;

Table of Contents

- pay us fees upon the achievement of milestones; and
- market with us any commercial products that result from our collaborations.

The development and commercialization of potential products will be delayed if collaborators fail to conduct these activities in a timely manner, or at all. In addition, our collaborators could terminate their agreements with us and we may not receive any development or milestone payments. If we do not achieve milestones set forth in the agreements, or if our collaborators breach or terminate their collaborative agreements with us, our business may be materially harmed.

Contractual arrangements with licensors or collaborators may require us to pay royalties or make other payments related to the development of a product candidate, which would adversely affect the level of our future revenues and profits.

Even if we obtain all applicable regulatory approvals and successfully commercialize one or more of our cell therapy candidates, contractual arrangements between us and a licensor, collaborator or other third party in connection with the respective product may require that we make royalty or other payments to the respective third party, and as a result we would not receive all of the revenue derived from commercial sales of such product.

Our reliance on the activities of our non-employee consultants, research institutions, and scientific contractors, whose activities are not wholly within our control, may lead to delays in development of our proposed products.

We rely extensively upon and have relationships with scientific consultants at academic and other institutions, some of whom conduct research at our request, and other consultants with expertise in clinical development strategy or other matters. These consultants are not our employees and may have commitments to, or consulting or advisory contracts with, other entities that may limit their availability to us. We have limited control over the activities of these consultants and, except as otherwise required by our collaboration and consulting agreements to the extent they exist, can expect only limited amounts of their time to be dedicated to our activities. These research facilities may have commitments to other commercial and non-commercial entities. We have limited control over the operations of these laboratories and can expect only limited amounts of time to be dedicated to our research goals.

We may be subject to litigation that will be costly to defend or pursue and uncertain in its outcome.

Our business may bring us into conflict with our licensees, licensors or others with whom we have contractual or other business relationships, or with our competitors or others whose interests differ from ours. If we are unable to resolve those conflicts on terms that are satisfactory to all parties, we may become involved in litigation brought by or against us. That litigation is likely to be expensive and may require a significant amount of management's time and attention, at the expense of other aspects of our business. The outcome of litigation is always uncertain, and in some cases could include judgments against us that require us to pay damages, enjoin us from certain activities, or otherwise affect our legal or contractual rights, which could have a significant adverse effect on our business.

We may not be able to obtain third party patient reimbursement or favorable product pricing, which would reduce our ability to operate profitably.

Our ability to successfully commercialize certain of our proposed products in the human therapeutic field may depend to a significant degree on patient reimbursement of the costs of such products and related treatments at acceptable levels from government authorities, private health insurers and other organizations, such as health maintenance organizations. Reimbursement in the United States or foreign countries may not be available for any products we may develop, and, if available, may be decreased in the future. Also, reimbursement amounts may reduce the demand for, or the price of, our products with a consequent harm to our business. We cannot predict what additional regulation or legislation relating to the health care industry or third party coverage and reimbursement may be enacted in the future or what effect such regulation or legislation may have on our business. If additional regulations are overly onerous or expensive, or if health care related legislation makes our business more expensive or burdensome than originally anticipated, we may be forced to significantly downsize our business plans or completely abandon our business model.

Our products may be expensive to manufacture, and they may not be profitable if we are unable to control the costs to manufacture them.

Our products may be significantly more expensive to manufacture than other therapeutic products currently on the market today. We hope to substantially reduce manufacturing costs through process improvements, development of new methods, increases in manufacturing scale and outsourcing to experienced manufacturers. If we are not able to make these, or other improvements, and depending on the pricing of the product, our profit margins may be significantly less than that of other therapeutic products on the market today. In addition, we may not be able to charge a high enough price for any cell therapy product we develop, even if they are safe and effective, to make a profit. If we are unable to realize significant profits from our potential product candidates, our business would be materially harmed.

Table of Contents

We presently lack sufficient manufacturing capabilities to produce our therapeutic product candidates at commercial scale quantities and do not have an alternate manufacturing supply, which could negatively impact our ability to meet any future demand for the product.

We expect that we would need to significantly expand our manufacturing capabilities to meet potential demand for our therapeutic product candidates, if approved. Such expansion would require additional regulatory approvals. Even if we increase our manufacturing capabilities, it is possible that we may still lack sufficient capacity to meet demand.

We do not presently have any alternate supply for our products. If our facilities where our products are currently being manufactured or equipment were significantly damaged or destroyed, or if there were other disruptions, delays or difficulties affecting manufacturing capacity, including if such facilities are deemed not in compliance with current Good Manufacturing Practice (“GMP”) requirements, future clinical studies and commercial production for our products would likely be significantly disrupted and delayed. It would be both time consuming and expensive to replace this capacity with third parties, particularly since any new facility would need to comply with the regulatory requirements.

Ultimately, if we are unable to supply our products to meet commercial demand, whether because of processing constraints or other disruptions, delays or difficulties that we experience, our production costs could dramatically increase and sales of the product and its long-term commercial prospects could be significantly damaged.

To be successful, our proposed products must be accepted by the health care community, which can be very slow to adopt or unreceptive to new technologies and products.

Our proposed products and those developed by our collaborative partners, if approved for marketing, may not achieve market acceptance since hospitals, physicians, patients or the medical community in general may decide not to accept and utilize these products. The products that we are attempting to develop represent substantial departures from established treatment methods and will compete with a number of more conventional therapies manufactured and marketed by major pharmaceutical companies. The degree of market acceptance of any of our developed products will depend on a number of factors, including:

- our establishment and demonstration to the medical community of the clinical efficacy and safety of our proposed products;
- our ability to create products that are superior to alternatives currently on the market;
- our ability to establish in the medical community the potential advantage of our treatments over alternative treatment methods; and
- reimbursement policies of government and third party payers.

If the healthcare community does not accept our products for any of the foregoing reasons, or for any other reason, our business would be materially harmed.

Table of Contents

Our business is based on novel technologies that are inherently expensive, risky and may not be understood by or accepted in the marketplace, which could adversely affect our future value.

The clinical development, commercialization and marketing of cell and tissue-based therapies are at an early-stage, substantially research-oriented, and financially speculative. To date, very few companies have been successful in their efforts to develop and commercialize a stem cell product. In general, stem cell products may be susceptible to various risks, including undesirable and unintended side effects, unintended immune system responses, inadequate therapeutic efficacy, or other characteristics that may prevent or limit their approval or commercial use. Furthermore, the number of people who may use cell or tissue-based therapies is difficult to forecast with accuracy. Our future success is dependent on the establishment of a significant market for cell- and tissue-based therapies and our ability to capture a share of this market with our product candidates.

Our development efforts with our therapeutic product candidates are susceptible to the same risks of failure inherent in the development and commercialization of therapeutic products based on new technologies. The novel nature of cellular therapeutics creates significant challenges in the areas of product development and optimization, manufacturing, government regulation, third-party reimbursement and market acceptance. For example, the United States FDA has relatively limited experience regulating therapies based on cells, and there are few approved treatments utilizing cell therapy.

During the year ended December 31, 2015, we derived approximately 24% of our revenues from one customer.

During the year ended December 31, 2015, one customer accounted for 24% of our consolidated revenues. To the extent that this significant customer reduces or delays its purchases from us or terminates its relationship with us, our revenues would decline significantly and our financial condition and results of operations would suffer substantially.

We depend on key personnel for our continued operations and future success, and a loss of certain key personnel could significantly hinder our ability to move forward with our business plan.

Because of the specialized nature of our business, we are highly dependent on our ability to identify, hire, train and retain highly qualified scientific and technical personnel for the research and development activities we conduct or sponsor. The loss of one or more key executive officers, or scientific officers, would be significantly detrimental to us. In addition, recruiting and retaining qualified scientific personnel to perform research and development work is critical to our success. Our anticipated growth and expansion into areas and activities requiring additional expertise, such as clinical testing, regulatory compliance, manufacturing and marketing, will require the addition of new management personnel and the development of additional expertise by existing management personnel. There is intense competition for qualified personnel in the areas of our present and planned activities. Accordingly, we may not be able to continue to attract and retain the qualified personnel, which would adversely affect the development of our business.

We may not have sufficient product liability insurance, which may leave us vulnerable to future claims we will be unable to satisfy.

The testing, manufacturing, marketing and sale of human therapeutic products entail an inherent risk of product liability claims. We currently have a limited amount of product liability insurance, which may not be adequate to meet potential product liability claims. In the event we are forced to expend significant funds on defending product liability actions, and in the event those funds come from operating capital, we will be required to reduce our business activities, which could lead to significant losses. Adequate insurance coverage may not be available in the future on acceptable terms, if at all. If available, we may not be able to maintain any such insurance at sufficient levels of coverage and any such insurance may not provide adequate protection against potential liabilities. Whether or not a product liability insurance policy is obtained or maintained in the future, any product liability claim could harm our business or financial condition.

Risks Related to the Securities Markets and Our Capital Structure

Stock prices for biotechnology companies have historically tended to be very volatile.

Stock prices and trading volumes for many biotechnology companies fluctuate widely for a number of reasons, including but not limited to the following factors, some of which may be unrelated to their businesses or results of operations:

- clinical trial results;
- the amount of cash resources and such company's ability to obtain additional funding;
- announcements of research activities, business developments, technological innovations or new products by competitors;
- entering into or terminating strategic relationships;
- changes in government regulation;
- disputes concerning patents or proprietary rights;

Table of Contents

- changes in our revenues or expense levels;
- public concern regarding the safety, efficacy or other aspects of the products or methodologies we are developing;
- reports by securities analysts;
- activities of various interest groups or organizations;
- media coverage; and
- status of the investment markets.

This market volatility, as well as general domestic or international economic, market and political conditions, could materially and adversely affect the market price of our common stock.

Two of our executive officers and directors can significantly influence our direction and policies, and their interests may be adverse to the interests of our other stockholders.

As of December 31, 2015, Dr. Andrey Semechkin, Chief Executive Officer and Co-Chairman of the Board of Directors, and Dr. Russell Kern (formerly Ruslan Semechkin), Executive Vice President and Chief Scientific Officer and a director, beneficially own approximately 64% of our outstanding shares of common stock, including shares issuable upon conversion of the outstanding shares of our Series D, and Series G Preferred Stock and shares issuable upon exercise of options and warrants that they hold. As a result of their holdings and the rights, preferences and privileges of those series of preferred stock, Dr. Andrey Semechkin and Dr. Russell Kern may appoint and remove two of our five directors, and propose candidates for nomination of up to two additional directors, and therefore will be able to significantly influence the election of our Board of Directors. They may also prevent corporate transactions (such as a merger, consolidation, a sale of all or substantially all of our assets or a financing transaction) that may be favorable from the standpoint of our other stockholders or they may cause a transaction that our other stockholders may view as unfavorable.

The rights of holders of our common stock are subordinate to significant rights, preferences and privileges of our existing five series of preferred stock, and to any additional series of preferred stock created in the future.

Under the authority granted by our Certificate of Incorporation, our Board of Directors has established five separate series of outstanding preferred stock, including Series B, Series D, Series G, Series I-1 and Series I-2 Preferred Stock, which have various rights and preferences senior to the shares of common stock. Shares of some series of our existing preferred stock are also entitled to enhanced voting rights and liquidation preferences. As a result of the various voting rights, the holders of our existing preferred stock may be able to block the proposed approval of various corporate actions, which could prevent us from achieving strategic or other goals dependent on such actions. As a result of the liquidation preferences, in the event that we voluntarily or involuntarily liquidate, dissolve or windup our affairs (including as a result of a merger), the holders of our preferred stock would be entitled to receive stated amounts per share, including any accrued and unpaid dividends, before any distribution of assets or merger consideration is made to holders of our common stock. Additionally, these shares of preferred stock may be converted, at the option of the holders, into common stock at rates that may be adjusted, for the benefit of holders of preferred stock, if we sell equity securities below the then existing conversion prices. Any such adjustments would compound the potential dilution suffered by holders of common stock if we issue additional securities at prices below the current conversion prices (ranging from \$1.7933 to \$23.8103 per share as of December 31, 2015). Additionally, subject to the consent of the holders of our existing preferred stock, our Board of Directors has the power to issue additional series of preferred stock and to designate, as it deems appropriate (subject to the rights of the holders of the current series of preferred stock), the special dividend, liquidation or voting rights of the shares of those additional series. The creation and designation of any new series of preferred stock could adversely affect the voting power, dividend, liquidation and other rights of holders of our common stock and, possibly, any other class or series of stock that is then in existence.

The market price for our common stock has been and may continue to be particularly volatile given our status as a relatively unknown company with a limited operating history and lack of profits, which could lead to wide fluctuations in our share price. The price at which stockholders purchase shares of our common stock may not be indicative of the price of our common stock that will prevail in the trading market.

The market for our common stock may be characterized by significant price volatility when compared to seasoned issuers, and we expect that our stock price could continue to be more volatile than a seasoned issuer for the indefinite future. The potential volatility in our share price is attributable to a number of factors. First, there has been limited trading in our common stock. As a consequence of this lack of liquidity, any future trading of shares by our stockholders may disproportionately influence the price of those shares in either direction. Second, we are a speculative or “risky” investment due to our limited operating history and lack of profits to date, and uncertainty of future market acceptance for our potential products. As a consequence of this enhanced risk, more risk averse investors may, under the fear of losing all or most of their investment in the event of negative news or lack of progress, be more inclined to sell their shares on the market more quickly and at greater discounts than would be the case with the stock of a seasoned issuer. Many of these factors will be beyond our control and may decrease the market price of our common stock, regardless of our operating performance. We cannot make any predictions or projections as to what the prevailing market price for our common stock will be at any time or as to what effect that the sale of shares or the availability of shares for sale at any time will have on the prevailing market price.

Table of Contents

In addition, the market price of our common stock could be subject to wide fluctuations in response to:

- quarterly variations in our revenues and operating expenses;
- announcements of new products or services by us;
- fluctuations in interest rates;
- significant sales of our common stock;
- the operating and stock price performance of other companies that investors may deem comparable to us; and
- news reports relating to trends in our markets or general economic conditions.

Shares eligible for future sale may adversely affect the market.

From time to time, certain of our stockholders may be eligible to sell all or some of their shares of common stock by means of ordinary brokerage transactions in the open market pursuant to Rule 144 promulgated under the Securities Act of 1933, as amended, subject to certain limitations. In general, pursuant to Rule 144, a stockholder (or stockholders whose shares are aggregated) who is not an affiliate of our company and who has satisfied a six month holding period may, as long as we are current in our required filings with the SEC, sell securities without further limitation. Rule 144 also permits, under certain circumstances, the sale of securities, without any limitations, by a non-affiliate of our company who has satisfied a one year holding period. Affiliates of our company who have satisfied a six month holding period may sell securities subject to limitations. Any substantial sale of our common stock pursuant to Rule 144 or pursuant to any resale prospectus may have an adverse effect on the market price of our securities. Currently, a substantial majority of our securities are either free trading or subject to the release of trading restrictions under the six month or one year holding periods of Rule 144.

Certain provisions of our Certificate of Incorporation and Delaware law may make it more difficult for a third party to affect a change-in-control.

Our Certificate of Incorporation authorizes the Board of Directors to issue up to 20,000,000 shares of preferred stock and our Board of Directors has created and issued shares of five series of preferred stock that remain outstanding, including Series B, Series D, Series G, Series I-1 and Series I-2 Preferred Stock. The terms of various series of Preferred Stock include, among other things, voting rights on particular matters (for example, with respect to the Series D Preferred Stock, restricting our ability to undergo a change in control or merge with, or sell assets to, a third party), preferences as to dividends and liquidation, and conversion rights. These preferred stock rights diminish the rights of holders of our common stock, and therefore could reduce the value of such common stock. In addition, as long as shares of our Series B, Series D and Series G Preferred Stock remain outstanding, or if our Board creates and issues additional shares of preferred stock in the future with rights that restrict our ability to merge with, or sell assets to, a third party, it could make it more difficult, delay, discourage, prevent or make it more costly to acquire the Company or affect a change-in-control.

The application of the “penny stock” rules to our common stock could limit the trading and liquidity of our common stock, adversely affect the market price of our common stock and increase stockholder transaction costs to sell those shares.

As long as the trading price of our common stock is below \$5.00 per share, the open market trading of our common stock will be subject to the “penny stock” rules, unless we otherwise qualify for an exemption from the “penny stock” definition. The “penny stock” rules impose additional sales practice requirements on certain broker-dealers who sell securities to persons other than established customers and accredited investors (generally those with assets in excess of \$1,000,000 or annual income exceeding \$200,000 or \$300,000 together with their spouse). These regulations, if they apply, require the delivery, prior to any transaction involving a penny stock, of a disclosure schedule explaining the penny stock market and the associated risks. Under these regulations, certain brokers who recommend such securities to persons other than established customers or certain accredited investors must make a special written suitability determination regarding such a purchaser and receive such purchaser’s written agreement to a transaction prior to sale. These regulations may have the effect of limiting the trading activity of our common stock, reducing the liquidity of an investment in our common stock and increasing the transaction costs for sales and purchases of our common stock as compared to other securities.

The sale or issuance of our common stock to Purchasers may cause dilution and the sale of the shares of common stock acquired by Purchasers, or the perception that such sales may occur, could cause the price of our common stock to fall.

On March 9, 2016, we entered into the Securities Purchase Agreement with two institutional investors and Andrey Semechkin, the Company’s chief Executive Officer and Co-Chairman, pursuant to which the Purchasers purchased 6,310 shares of Series I

Table of Contents

Convertible Preferred Stock initially convertible into 3,605,714 shares of our common stock, in addition to Series A, B, and C Warrants for 10.8 million shares of our common stock, the Series A Warrants being exercisable for 5 years from the date of issuance. The conversion price of the Preferred Stock and Warrants is subject to certain resets as set forth in the Certificates of Designation and Warrants, including the date of the amendment to the certificate of incorporation with respect to any reverse stock split, the effectiveness dates of the registration statement and in certain instances the six and twelve month anniversaries of the Closing Date. Depending on market liquidity at the time, sales of such shares may cause the trading price of our common stock to fall.

The Purchasers may ultimately convert all, some or none of the Series I Convertible Preferred Stock into shares of our common stock, exercise all, some or none of the Series A, B, and C warrants into shares of our common stock. Such shares acquired by the Purchasers may be sold, as the Purchasers may sell all, some or none of those shares. Therefore, the conversion of the preferred stock and exercise of warrants by the Purchasers will result in substantial dilution to the interests of other holders of our common stock. Additionally, the conversion into a substantial number of shares of our common stock by the Purchasers, or the anticipation of such conversion, could make it more difficult for us to sell equity or equity-related securities in the future at a time and at a price that we might otherwise wish to effect sales.

The sale or issuance of a substantial number of shares may adversely affect the market price for our common stock.

The future sale of a substantial number of shares of our common stock in the public market, or the perception that such sales could occur, could significantly and negatively affect the market price for our common stock. We expect that we will likely issue a substantial number of shares of our capital stock in financing transactions in order to fund our operations and the growth of our business. Under these arrangements, we may agree to register the shares for resale soon after their issuance. We may also continue to pay for certain goods and services with equity, which would dilute our current stockholders. Also, sales of the shares issued in this manner could negatively affect the market price of our stock.

Our ability to utilize our net operating loss carryforwards and certain other tax attributes may be limited.

We have incurred substantial tax losses during our history. Subject to various limitations, we may carryforward unused taxable losses, including those generated in the future, and other available credits to offset any future taxable income until the unused losses or credits expire. Federal and state tax laws impose restrictions on the utilization of net operating loss ("NOL") and tax credit carryforwards in the event of an "ownership change" as defined by Section 382 of the Internal Revenue Code of 1986, as amended ("Section 382"). Generally, an ownership change occurs if the percentage of the value of the stock that is owned by one or more direct or indirect "five percent shareholders" increases by more than 50 percentage points over their lowest ownership percentage at any time during the applicable testing period (typically, three years). Under Section 382 and Section 383, if a corporation undergoes an "ownership change," the corporation's ability to use its pre-change NOL carryforwards and other pre-change tax attributes to offset its post change income may be limited. Because of the cost and complexity involved in the analysis of a Section 382 ownership change and the fact that we do not have any taxable income to offset, we have not undertaken a study to assess whether an "ownership change" has occurred or whether there have been multiple ownership changes since we became a "loss corporation" as defined in Section 382. Future changes in our stock ownership, which may be outside of our control, may trigger an "ownership change." In addition, future equity offerings or acquisitions that have equity as a component of the purchase price could result in an "ownership change." If an "ownership change" has occurred or does occur in the future, our ability to utilize our NOL carryforwards or other tax attributes may be limited, which could result in an increased future tax liability to us.

The exercise of outstanding options and warrants to acquire shares of our common stock would cause additional dilution which could cause the price of our common stock to decline.

In the past, we have issued options and warrants to acquire shares of our common stock. At December 31, 2015, there were 126,206 warrants, for which we have reserved 126,206 shares of common stock, and 191,519 vested and 60,120 non-vested stock options outstanding, and we may issue additional options, warrants and other types of equity in the future as part of stock-based compensation, capital raising transactions, technology licenses, financings, strategic licenses or other strategic transactions. To the extent these options and warrants are ultimately exercised, existing common stockholders would experience additional dilution which may cause the price of our common stock to decline.

Limitations on director and officer liability and indemnification of our officers and directors by us may discourage stockholders from bringing suit against a director.

Our certificate of incorporation and bylaws provide, with certain exceptions as permitted by governing state law, that a director or officer shall not be personally liable to us or our stockholders for breach of fiduciary duty as a director, except for acts or omissions which involve intentional misconduct, fraud or knowing violation of law, or unlawful payments of dividends. These provisions may discourage stockholders from bringing suit against a director for breach of fiduciary duty and may reduce the likelihood of derivative litigation brought by stockholders on our behalf against a director. In addition, our certificate of incorporation and bylaws may provide for mandatory indemnification of directors and officers to the fullest extent permitted by governing state law.

[Table of Contents](#)

Compliance with the rules established by the SEC pursuant to Section 404 of the Sarbanes-Oxley Act of 2002 is complex. Failure to comply in a timely manner could adversely affect investor confidence and our stock price.

Rules adopted by the SEC pursuant to Section 404 of the Sarbanes-Oxley Act of 2002 require us to perform an annual assessment of our internal controls over financial reporting and certify the effectiveness of those controls. The standards that must be met for management to assess the internal controls over financial reporting now in effect are complex, costly and require significant documentation, testing and possible remediation to meet the detailed standards. We may encounter problems or delays in completing activities necessary to make an assessment of our internal controls over financial reporting. If we cannot perform the assessment or certify that our internal controls over financial reporting are effective investor confidence and share value may be negatively impacted.

We do not expect to pay cash dividends in the foreseeable future on our common stock.

We have not historically paid cash dividends on our common stock, and we do not plan to pay cash dividends on our common stock in the foreseeable future.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Information in this prospectus contains forward-looking statements. These forward-looking statements can be identified by the use of words such as “believes,” “estimates,” “could,” “possibly,” “probably,” “anticipates,” “projects,” “expects,” “may,” or “should” or other variations or similar words. No assurances can be given that the future results anticipated by the forward-looking statements will be achieved. The following matters constitute cautionary statements identifying important factors with respect to those forward-looking statements, including certain risks and uncertainties that could cause actual results to vary materially from the future results anticipated by those forward-looking statements. A description of key factors that have a direct bearing on our results of operations is provided above under “Risk Factors” beginning on page 5 of this prospectus.

Additional information on factors that may affect our business and financial results can be found in our filings with the SEC. All forward-looking statements should be considered in light of these risks and uncertainties. We assume no responsibility to update forward-looking statements made in this prospectus.

USE OF PROCEEDS

We will not receive any of the proceeds from the sale of the securities by the selling stockholders. To the extent proceeds are received upon exercise of the Warrants, we intend to use any such proceeds for general corporate and working capital purposes.

DIVIDEND POLICY

Our Board of Directors determines any payment of dividends. We have never declared or paid cash dividends on our common stock. We do not expect to authorize the payment of cash dividends on our shares of common stock in the foreseeable future. Any future decision with respect to dividends will depend on our future earnings, operations, capital requirements and availability, restrictions in future financing agreements and other business and financial considerations.

MARKET PRICE OF AND DIVIDENDS ON COMMON STOCK AND RELATED MATTERS**Market Information**

Our common stock is approved for quotation on the OTC QB under the trading symbol “ISCO”. The OTC QB is a regulated quotation service that displays real-time quotes, last-sale prices and volume information in over-the-counter equity securities. The OTC QB securities are traded by a community of market makers that enter quotes and trade reports. This market is limited in comparison to an exchange and any prices quoted may not be a reliable indication of the value of our common stock.

As of March 31, 2016, we had 2,814,910 shares of common stock outstanding, and approximately 9,100 holders of record of our common stock, and we had 5,256,353 shares of preferred stock outstanding, and seven holders of record of our preferred stock, with 5,256,353 shares of preferred stock being convertible into 6,798,592 shares of common stock.

The quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not reflect actual transactions. The high and low sales prices per share of our common stock, as reported by OTC QB for each quarter during fiscal years 2016, 2015, and 2014, are reported below:

	Market Price	
	High	Low
Fiscal Year 2016		
First Quarter	\$ 4.10	\$ 2.08
Second Quarter (through April 11, 2016)	\$ 4.05	\$ 3.95
Fiscal Year 2015		
First Quarter	\$10.50	\$ 9.00
Second Quarter	\$10.50	\$ 6.00
Third Quarter	\$ 7.50	\$ 1.80
Fourth Quarter	\$ 6.50	\$ 3.01
Fiscal Year 2014		
First Quarter	\$39.00	\$28.50
Second Quarter	\$28.50	\$10.50
Third Quarter	\$21.00	\$ 9.00
Fourth Quarter	\$16.50	\$10.50

SELLING STOCKHOLDERS

On March 15, 2016, Sabby Volatility Warrant Master Fund Ltd. and Sabby Healthcare Master Fund, Ltd. , collectively referred to as the selling stockholders, acquired an aggregate of 2,000 shares of newly created Series I-1 Preferred Stock and Warrants for an aggregate purchase price of \$2,000,000 .

The Series I-1 Preferred Stock and the Warrants issued to Sabby Volatility Warrant Master Fund Ltd. and Sabby Volatility Master Fund, Ltd. contain exercise and conversion limitations providing that a holder thereof may not convert or exercise (as the case may be) to the extent that, if after giving effect to such conversion or exercise (as the case may be), the holder or any of its affiliates would beneficially own in excess of 4.99% of the outstanding shares of common stock immediately after giving effect to such conversion or exercise (as the case may be).

This prospectus relates to the resale by the selling stockholders from time to time of up to an aggregate of 7,999,999 shares that are issuable to the selling stockholders. Pursuant to a Registration Rights Agreement between us and the selling stockholders, this prospectus covers the resale of (i) 200% of the shares of Common Stock issuable upon conversion of the Series I -1 Preferred Stock, (ii) 200% of the shares of Common Stock issuable upon exercise of the Series B Warrants and Series C Warrants held by the selling stockholders, and (iii) 100% of the shares of Common Stock issuable upon exercise of the Series A Warrants.

The table below, which was prepared based on information supplied to us by the selling stockholders, sets forth information regarding the beneficial ownership of outstanding shares of our common stock owned by the selling stockholders and the shares that they may sell or otherwise dispose of from time to time under this prospectus. Each of the selling stockholders, or their respective affiliates, transferees, donees or their successors, may resell, from time to time, all, some or none of the shares of our common stock covered by this prospectus, as provided in this prospectus under the section entitled “Plan of Distribution” and in any applicable prospectus supplement. However, we do not know when, in what amount, or at what specific prices the selling stockholders may offer their shares for sale under this prospectus, if any. Each selling stockholder’s percentage of ownership in the following table is based upon 2,814,910 shares of our common stock outstanding as of March 31, 2016.

Information concerning any of the selling stockholders may change from time to time, and any changed information will be presented in a prospectus supplement as necessary. Please carefully read the footnotes located below the table in conjunction with the information presented in the table.

Selling Stockholder	Shares Beneficially Owned Before this Offering(1)	Percentage of Outstanding Shares Beneficially Owned Before this Offering	Shares to be Sold in this Offering(3)	Number Of Shares Beneficially Owned After this Offering(6)	Percentage of Outstanding Shares Beneficially Owned After this Offering(6)
Sabby Volatility Warrant Master Fund, Ltd.	3,200,001	53.20%(2)	3,200,001(4)	—	0%
Sabby Healthcare Master Fund, Ltd.	4,799,998	63.03%(2)	4,799,998(5)	—	0%

(1) Includes all shares beneficially owned by the selling stockholders as of March 31, 2016.

(2) The Series I-1 Preferred Stock and the Warrants contain exercise and conversion limitations providing that a holder thereof may not convert or exercise (as the case may be) to the extent that, if after giving effect to such conversion or exercise (as the case may be), the holder or any of its affiliates would beneficially own in excess of 4.99% of the outstanding shares of common stock immediately after giving effect to such conversion or exercise (as the case may be). Accordingly, the number of shares of common stock set forth in the table as being registered for a selling stockholder exceeds the number of shares of common stock that the selling stockholder could own beneficially at any given time through its ownership of the Series I-1 Preferred Stock and the Warrants. Sabby Management, LLC serves as the investment manager of this stockholder and shares voting and investment power with respect to these shares on behalf of this stockholder. As manager of Sabby Management, LLC, Hal Mintz also shares voting and investment power on behalf of this stockholder. Each of Sabby Management, LLC and Hal Mintz disclaim beneficial ownership over the securities covered by this prospectus except to the extent of their pecuniary interest therein.

[Table of Contents](#)

- (3) We have assumed that each share of Series I-1 Preferred Stock is convertible into shares of common stock at a conversion price of \$1.75 per share of common stock. Includes 200% of the shares of Common Stock issuable upon conversion of the Series I -1 Preferred Stock.
- (4) Includes 200% of 457,143 shares of Common Stock issuable upon conversion of Series I-1 Preferred Stock, 200% of the 457,143 shares issuable upon exercise of the Series B Warrants and Series C Warrants and 100% of the 457,143 shares issuable upon exercise of the Series A Warrants held by the holder.
- (5) Includes 200% of 685,714 shares of Common Stock issuable upon conversion of Series I-1 Preferred Stock, 200% of the 685,714 shares issuable upon exercise of the Series B Warrants and Series C Warrants and 100% of the 685,714 shares issuable upon exercise of the Series A Warrants held by the holder.
- (6) Assumes the sale of all shares of common stock registered pursuant to this prospectus, although the selling stockholders are under no obligation known to us to sell any shares of common stock at this time.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and related notes and other financial information included elsewhere in this prospectus. The discussion contains forward-looking statements based upon current expectations that involve risks and uncertainties, such as our plans, expectations and intentions. Our actual results may differ significantly from management's expectations. This discussion should not be construed to imply that the results discussed herein will necessarily continue into the future, or that any conclusion reached herein will necessarily be indicative of actual operating results in the future. Such discussion represents only the best present assessment by our management.

Results of Operations

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Revenues

Revenue for the year ended December 31, 2015, totaled \$7.55 million, compared to \$7.02 million in 2014. LCT contributed \$4.05 million or 54% of total revenue in 2015, compared to \$3.51 million or 50% of total revenue in 2014. The increase of \$538,000 or 15% in LCT's revenue for 2015 consists of a \$218,000 increase in sales of cells, media and custom products, and \$320,000 increase in sales to OEM customers. LSC's revenue of \$3.50 million in 2015 accounted for 46% of total revenue, compared to \$3.51 million or 50% of total revenue in 2014. LSC's revenue remained essentially unchanged, and increase of \$455,000 in LSC's professional channel was offset by decreases of \$412,000 and \$47,000 in the ecommerce and international channels, respectively.

Cost of Sales

Cost of sales for the year ended December 31, 2015 was \$2.06 million or 27% of revenue, compared to \$1.92 million or 27% of revenue in 2014. While our overall cost of sales as a percentage of revenue did not change, LCT's cost of sales decreased approximately 5% as a percentage of LCT's sales and LSC's cost of sales increased approximately 5% as a percentage of LSC's sales. LCT's cost of sales for the year ended December 31, 2015 was \$1.37 million or 34% of LCT's sales, compared to \$1.38 million or 39% of LCT's sales in the prior year. The decrease in cost of sales for LCT is primarily due to a more favorable sales mix as well as efficiency gains in our operations during the year ended December 31, 2015 compared to 2014. LSC's cost of sales was \$686,000 or 20% of LSC's revenues during 2015, compared to \$540,000 or 15% of LSC's revenues in the prior year. The increase in cost of sales for LSC is primarily due to a shift in our sales mix, with a lower portion of our sales recorded from ecommerce compared to other sales channels, which have higher cost of sales.

Cost of sales reflects direct costs including salaries and benefits related to manufacturing, third party manufacturing costs, materials, general laboratory supplies and an allocation of overhead. We aim to continue refining our manufacturing processes and supply chain management to further improve the cost of sales as a percentage of revenue for both LCT and LSC.

Research and Development ("R&D")

Research and development expenses were \$2.71 million for the year ended December 31, 2015, compared to \$5.39 million in 2014. R&D expense decreased approximately \$2.68 million or 50% primarily due to decreased stem cell line research and preclinical testing expenses of \$2.14 million, a reduction in employee-related spending of \$190,000, decreased stock-based compensation of \$141,000, decreased material and supply cost of \$129,000, and decreased consulting costs of \$34,000.

Our R&D efforts are primarily focused on the development of treatments for Parkinson's disease (PD), metabolic liver diseases (such as Crigler-Najjar syndrome, (CNS) and Alpha 1-antitrypsin deficiency (A1AD)), diseases of the eye and the creation of new cGMP grade human parthenogenetic stem cell lines. These projects are long-term investments that involve developing both new stem cell lines and new differentiation techniques that can provide higher purity populations of functional cells. We do not expect these projects to provide near-term revenue, although we have published milestones including the release of preclinical rodent and non-human primate (NHP) PD study data in the first quarter of 2013. We have experienced decreased R&D expenditures in 2015 as a result of the completion of pre-clinical studies. However, we anticipate increased R&D expenditures in 2016 as a result of the Phase I/IIa clinical study which started in first quarter of 2016.

Research and development expenses are expensed as they are incurred, and are accounted for on a project by project basis. However, much of our research has potential applicability to each of our projects.

Selling and Marketing Expense

Marketing expenses for the year ended December 31, 2015 amounted to \$2.64 million, reflecting a decrease of approximately \$148,000 or 5%, as compared to \$2.79 million in 2014. The decrease was primarily due to lower website support costs of \$183,000,

Table of Contents

samples costs of \$85,000, public relations cost of \$60,000, tradeshow costs of \$29,000, shipping costs of \$15,000, creative services of \$17,000, and stock based compensation expenses of \$10,000, partially offset by higher advertising expenses of \$69,000, consulting costs of \$50,000, staff related costs of \$48,000, and logistics costs of \$61,000.

General and Administrative Expenses

General and administrative expenses for the year ended December 31, 2015 were \$4.72 million, reflecting a decrease of \$890,000 or 16%, compared to \$5.61 million in 2014. The decrease is primarily attributable to decreases in stock based compensation costs of \$762,000, investor relations related costs of \$103,000, staff related costs of \$281,000, facility and office costs of \$87,000, and consulting expense of \$87,000, partially offset by increases in accounting fees of \$74,000, franchise tax expense of \$177,000, patent impairment expense of \$85,000, depreciation expense of \$27,000, and filing fees of \$52,000.

Other Income/Expense

Other income was \$1.93 million for the year ended December 31, 2015, compared to other expense of \$3.80 million for the year ended December 31, 2014. The increase of \$5.73 million in net other income is mainly due to a decrease of \$1.78 million of other expense related to the fair value of warrants issued to the October 2014 financing transaction in excess of proceeds, a decrease of \$3.45 million of warrant exchange inducement expense, a decrease of \$997,000 of financing expenditures, offset by a decrease of \$425,000 of income related to the change in fair value of warrant liability.

Liquidity and Capital Resources

As of December 31, 2015 and 2014, our cash and cash equivalents totaled \$532,000 and \$1.11 million, respectively. At December 31, 2015, we had a working capital deficit of \$2.55 million compared to working capital deficit of \$3.24 million at December 31, 2014. The \$689,000 decrease in working capital deficit is primarily due to decrease in accounts payable and accrued liabilities of \$455,000, \$4.0 million decrease in fair value of the warrants liability related to our October 2014 Securities Purchase Agreement, \$86,000 increase in accounts receivable, \$169,000 decrease in current inventory and \$87,000 increase in prepaid and other current assets, partially offset by \$3.1 million increase in related party payable to support the ongoing operations of the Company, \$629,000 decrease in cash and cash equivalents and restricted cash.

Operating Cash Flows

Net cash used in operating activities was \$4.12 million for the year ended December 31, 2015, compared to \$6.42 million in 2014. The primary factor contributing to the variability in the reported cash flow amounts relates to the net loss after non-cash adjustments totaling \$3.33 million, increase in accounts receivable of \$86,000, increase in inventory of \$217,000, increase in prepaid and other current assets of \$87,000 and decrease in accounts payable and accrued liabilities of \$455,000 in 2015, compared to \$6.75 million of net loss after non-cash adjustments, increase in accounts receivable of \$147,000, increase in inventory of \$215,000, decrease of prepaid and other current assets of \$173,000 and increase in accounts payable and accrued liabilities of \$559,000 in 2014.

Investing Cash Flows

Net cash used in investing activities was \$738,000 for the year ended December 31, 2015, compared to \$987,000 in 2014. The decrease was primarily the result of lower payments for capital expenditures of \$255,000.

Financing Cash Flows

Net cash provided by financing activities was \$4.28 million for the year ended December 31, 2015, compared to \$6.27 million in 2014. In 2015, \$3.11 million was received from a bridge loan from a related party having a maturity date of January 10, 2016 (which was subsequently extended to April 10, 2016) and \$1.17 million was received from exercises of warrants issued in the October 2014 financing transaction. Approximately \$1.42 million of the net proceeds of \$3.43 million received in 2014 was attributable to the issuance of 54,000 shares of common stock, net of stock issuance costs of \$169,000 under the purchase agreement with Lincoln Park Capital, LLC ("Lincoln Park"), which we entered into in December 2013. In addition, we received net proceeds of \$2.1 million from the sale of approximately 129,000 shares to Dr. Andrey Semechkin, our Co-Chairman and Chief Executive Officer and Dr. Russell Kern our Executive Vice President and Chief Scientific Officer and a director. The shares were offered and sold to the purchasers in private placement transactions.

On October 14, 2014, in a private placement, we sold a total of (i) 2,500 shares of Series H Convertible Preferred Stock initially convertible into 258,519 shares of common stock at an initial conversion price of \$9.6705 (ii) Series A warrants (the "Series A Warrants") to purchase up to 258,519 shares of common stock for an initial exercise price of \$13.8150 per share exercisable

Table of Contents

immediately and which have a term of 5.5 years, (iii) Series B warrants (the “Series B Warrants”) to purchase up to 258,519 shares of common stock for an initial exercise price of \$9.6705 per share exercisable immediately and which have a term of 6 months, and (iv) Series C warrants (the “Series C Warrants”, together with the Series A Warrants and the Series B Warrants, collectively, the “Warrants”) to purchase up to 258,519 shares of common stock for an initial exercise price of \$9.6705 per share exercisable immediately and which have a term of 12 months for an aggregate initial gross purchase price of \$2.5 million, as discussed in Note 6, Capital Stock, to our consolidated financial statements.

Management continues to evaluate various financing sources and options to raise working capital to help fund our current research and development programs and operations. We will need to obtain significant additional capital from sources including exercise of outstanding warrants, equity and/or debt financings, license arrangements, grants and/or collaborative research arrangements to sustain our operations and develop products. Unless we obtain additional financing, we do not have sufficient cash on hand to operate for 12 months from the consolidated balance sheet date. The timing and degree of any future capital requirements will depend on many factors, including:

- the accuracy of the assumptions underlying our estimates for capital needs in 2016 and beyond;
- the extent that revenues from sales of LSC and LCT products cover the related costs and provide capital;
- scientific progress in our research and development programs;
- the magnitude and scope of our research and development programs and our ability to establish, enforce and maintain strategic arrangements for research, development, clinical testing, manufacturing and marketing;
- our progress with preclinical development and clinical trials;
- the time and costs involved in obtaining regulatory approvals;
- the costs involved in preparing, filing, prosecuting, maintaining, defending and enforcing patent claims; and
- the number and type of product candidates that we pursue.

Additional financing through strategic collaborations, public or private equity financings or other financing sources may not be available on acceptable terms, or at all. Additional equity financing could result in significant dilution to our stockholders. Additional debt financing may be expensive and require us to pledge all or a substantial portion of our assets. Further, if additional funds are obtained through arrangements with collaborative partners, these arrangements may require us to relinquish rights to some of our technologies, product candidates or products that we would otherwise seek to develop and commercialize on our own. If sufficient capital is not available, we may be required to delay, reduce the scope of or eliminate one or more of our product initiatives.

We currently have no revenue generated from our principal operations in therapeutic and clinical product development through research and development efforts. For the year ended December 31, 2015, our average burn rate was approximately \$343,000 per month, excluding capital expenditures and patent costs averaging \$62,000 per month. There can be no assurance that we will be successful in maintaining our normal operating cash flow and obtaining additional funds, and that the timing of our capital raising or future financing will result in cash flow sufficient to sustain our operations through 2016. Additionally, pursuant to the terms of the October 2014 Securities Purchase Agreement entered into in connection with the private placement discussed below, the Company may not sell shares to Lincoln Park under the Purchase Agreement with Lincoln Park, or otherwise enter into a variable rate transaction, until March 2016. The Company may still issue securities in certain circumstances, including issuing shares in private placements to its officers, directors and employees at market prices and issuing securities pursuant to the Company’s equity incentive plans.

Based on the factors above, there is substantial doubt about our ability to continue as a going concern. The consolidated financial statements were prepared assuming that we will continue to operate as a going concern. The consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty. Management’s plans in regard to these matters are focused on managing our cash flow, the proper timing of our capital expenditures, and raising additional capital or financing in the future.

We do not currently have any obligations for milestone payments under any of our licensed patents other than the minimum license fee of \$75,000 annually, payable in two installments per year to Ocata pursuant to the amended UMass IP license agreement. No licenses are terminable at will by the licensor. For further discussion of our patents, see Note 4 to our consolidated financial statements.

Off-Balance Sheet Arrangements

As of December 31, 2015, we did not have any off-balance sheet arrangements.

[Table of Contents](#)

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosures. On an on-going basis, we evaluate our estimates and assumptions, including those related to revenue recognition, allowances for accounts receivable, inventories, intangible assets, warrant liabilities, stock-based compensation and income taxes. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions.

We believe the following accounting policies to be critical to the judgments and estimates used in the preparation of our consolidated financial statements.

Inventories

We account for inventory using the first-in, first-out (FIFO) method for our Lifeline Cell Technology cell culture media and reagents, average cost and specific identification methods for our Lifeline Skin Care products, and specific identification method for our Lifeline Cell Technology products. We state our inventory balances at the lower of cost or market. Lab supplies used in the research and development process are expensed as consumed. Inventory is reviewed periodically for product expiration and obsolescence and is adjusted accordingly. The value of the inventory that is not expected to be sold within twelve months of the year end is classified as non-current inventory on the balance sheet.

Property and Equipment

We record property and equipment at cost. The provision for depreciation and amortization is computed using the straight-line method over the estimated useful lives of the assets, generally over three to five years. The costs of major remodeling and leasehold improvements are capitalized and depreciated over the shorter of the remaining term of the lease or the life of the asset.

Intangible Assets

Intangible assets consist of acquired research and development rights used in research and development, and capitalized legal fees related to the acquisition, filing, maintenance, and defense of patents. Patents and patent licenses are recorded at cost and are amortized on a straight-line basis over the shorter of the lives of the underlying patents or the useful life of the intangible asset, generally 15 years. Intangible asset amortization expenses are included in research and development expenses.

Long-Lived Asset Impairment

We review long-lived assets for impairment when events or changes in business conditions indicate that their carrying value may not be recovered, at least annually. We consider assets to be impaired and write them down to fair value if expected associated undiscounted cash flows are less than the carrying amounts. Fair value is the present value of the associated cash flows. Due to the numerous variables associated with our judgments and assumptions relating to the carrying value of our intangible assets and the effects of changes in circumstances affecting these valuations, both the precision and reliability of the resulting estimates are subject to uncertainty. As additional information becomes known, we may change our estimate, in which case the likelihood of a material change in our reported results would increase.

Revenue Recognition

We recognize revenue when all four of the following criteria are met: (i) persuasive evidence that an arrangement exists; (ii) delivery of the products and/or services has occurred; (iii) the selling price is fixed or determinable; and (iv) collectability is reasonably assured. Should changes in conditions cause management to determine these criteria are not met for certain future transactions, revenues recognized for any reporting period could be adversely impacted.

We recognize revenue from product sales at the time of shipment to the customer, provided no significant obligations remain and collection of the receivable is reasonably assured. If the customer has a right of return, the Company recognizes product revenues upon shipment, provided that future returns can be reasonably estimated. In the case where returns cannot be reasonably estimated, revenue will be deferred until such estimates can be made or the right of return has expired.

Cost of Sales

Cost of sales consists primarily of salaries and benefits associated with employee efforts expended directly on the production of the Company's products and include related direct materials, general laboratory supplies and allocation of overhead. Certain of the

Table of Contents

agreements under which the Company has licensed technology will require the payment of royalties based on the sale of its future products. Such royalties will be recorded as a component of cost of sales. Additionally, the amortization of license fees or milestone payments related to developed technologies used in the Company's products will be classified as a component of cost of sales to the extent such payments become due in the future. Cost of sales included salaries and benefits related to manufacturing, third party manufacturing costs, raw materials, general laboratory supplies and an allocation of overhead.

Research and Development Costs

Research and development costs, which are expensed as incurred, are primarily comprised of salaries and benefits associated with research and development personnel, overhead and occupancy, contract services, and amortization of license costs for technology used in research and development with alternative future uses.

Registration Payment Arrangements

We are required to separately recognize and measure registration payment arrangements, whether issued as a separate agreement or included as a provision of a financial instrument or other agreement. Such payments include penalties for failure to effect a registration of securities.

Stock-Based Compensation

We are required to measure and recognize compensation expense for all stock-based payment awards made to employees and consultants based on estimated fair value. We estimate the fair value of stock options granted using the Black-Scholes option-pricing model.

The determination of fair value of stock-based awards using the Black-Scholes option-pricing model requires the use of certain estimates and highly judgmental assumptions that affect the amount of stock-based compensation expense recognized in our Consolidated Statements of Operations. These include estimates of the expected volatility of our stock price, expected option life, expected dividends and the risk-free interest rate. Estimated volatility is a measure of the amount by which our stock price is expected to fluctuate each year during the expected life of the award. The expected option life is calculated using the mid-point method as prescribed by accounting guidance for stock-based compensation. We determined expected dividend yield to be 0% given that we have never declared or paid any cash dividends on our common stock, and we currently do not anticipate paying such cash dividends. The risk-free interest rate is based upon U.S. Treasury securities with remaining terms similar to the expected term of the share-based awards. If any of the assumptions used in the Black-Scholes model change significantly, stock-based compensation expense may differ materially from what we have recorded in the current period.

Income Taxes

We account for income taxes in accordance with provisions which set forth an asset and liability approach that requires the recognition of deferred tax assets and deferred tax liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Valuation allowances are established when necessary to reduce deferred tax assets to the amount that is more likely than not expected to be realized. In making such a determination, a review of all available positive and negative evidence must be considered, including scheduled reversal of deferred tax liabilities, projected future taxable income, tax planning strategies, and recent financial performance.

Concentration of Credit Risk

We maintain our cash and cash equivalents in banks located primarily in the United States. Our accounts are guaranteed by the Federal Deposit Insurance Corporation ("FDIC") up to \$250,000 per financial institution.

Income (Loss) Per Common Share

The computation of net loss per common share is based on the weighted average number of shares outstanding during each period. The computation of diluted earnings per common share is based on the weighted average number of shares outstanding during the period plus the common stock equivalents, which would arise from the exercise of stock options and warrants outstanding using the treasury stock method and the average market price per share during the period.

Recent Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board (the "FASB") issued ASU No. 2014-15, *Presentation of Financial Statements – Going Concern* (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern, which is intended to define management's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern and to provide related footnote disclosures. The ASU provides guidance to an

[Table of Contents](#)

organization's management, with principles and definitions that are intended to reduce diversity in the timing and content of disclosures that are commonly provided by organizations today in the financial statement footnotes. The amendments are effective for annual periods ending after December 15, 2016, and interim periods within annual periods beginning after December 15, 2016. Early adoption is permitted for annual or interim reporting periods for which the financial statements have not previously been issued. The Company does not intend to early adopt this standard. The Company is still evaluating what effect the adoption of this standard will have on the financial condition of the Company.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for us on January 1, 2018. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. We are currently evaluating the effect that ASU 2014-09 will have on our consolidated financial statements and related disclosures. We have not yet selected a transition method nor have we determined the effect of the standard on our ongoing financial reporting.

In July 2015, the Financial Accounting Standards Board (the "FASB") issued ASU No. 2015-11, *Simplifying the Measurement of Inventory*, which states that an entity should measure inventory within the scope of this Update at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. Subsequent measurement is unchanged for inventory measured using LIFO or the retail inventory method. ASU No. 2015-11 will be effective for annual reporting periods beginning after December 15, 2016, including interim periods within those fiscal years, which for the Company will be its 2017 fiscal quarter. The amendments in this Update should be applied prospectively with earlier application permitted as of the beginning of an interim or annual reporting period. The Company is evaluating the effect that ASU 2015-11 will have on its consolidated financial statements and related disclosures. The Company has not yet determined the effect of the standard on its ongoing financial reporting.

In February 2016, the FASB issued ASU No. 2016-02 Leases (Topic 842), which requires lessees to recognize "right of use" assets and liabilities for all leases with lease terms of more than 12 months. The ASU requires additional quantitative and qualitative financial statement footnote disclosures about the leases, significant judgments made in accounting for those leases and amounts recognized in the financial statements about those leases. The effective date will be the first quarter of fiscal year 2019. The Company is currently evaluating the impact of the adoption of this accounting standard update on our consolidated financial statements.

BUSINESS

Business Overview

International Stem Cell Corporation (sometimes referred to herein as “ISCO”, the “Company”, “we”, “us”, or “our”) is a biotechnology company focused on therapeutic and biomedical product development with multiple long-term therapeutic opportunities and two revenue-generating businesses offering potential for increased future revenue.

We currently have no revenue generated from our principal operations in therapeutic and clinical product development through research and development efforts. We have generated revenue from our two commercial businesses, cosmetic and research products, of a total of \$7.6 million and \$7.0 million for the years ended December 31, 2015 and 2014, respectively.

Our products are based on multi-decade experience with human cell culture and a proprietary type of pluripotent stem cells, “human parthenogenetic stem cells” (“hpSCs”). Our hpSCs are comparable to human embryonic stem cells (“hESCs”) in that they have the potential to be differentiated into many different cells in the human body. However, the derivation of hpSCs does not require the use of fertilized eggs or the destruction of viable human embryos and also offers the potential for the creation of immune-matched cells and tissues that are less likely to be rejected following transplantation. ISCO scientists have created the first parthenogenetic, homozygous stem cell line that can be a source of therapeutic cells for hundreds of millions of individuals with minimal immune rejection after transplantation. We have facilities and manufacturing processes that we believe comply with the requirements of current Good Manufacturing Practice (GMP) standards as defined by the U.S. Code of Federal Regulations and promulgated by the Food and Drug Administration (“FDA”).

We are developing different cell types from our stem cells that may result in therapeutic products. We focus on applications where cell and tissue therapy is already proven but where there is an insufficient supply of functional cells or tissue. We believe that the most promising potential clinical applications of our technology are:

- Neural stem cells for treatment of Parkinson’s disease and potentially other central nervous system disorders, such as traumatic brain injury, stroke and Alzheimer’s disease.
- Liver cells (“hepatocytes”) that may be used to treat a variety of congenital and acquired liver diseases. Using the same precursor cell that leads to liver cells, it is also possible to create islet cells for potential treatment of diabetes.
- Retinal cells and three-dimensional eye structures including corneal cells and tissue to treat degenerative retinal diseases, corneal blindness, and to accelerate corneal healing.

We have completed our IND-enabling preclinical studies on our most advanced program, the development of neural stem cells for the treatment of Parkinson’s disease and filed the regulatory submission to the Australian Therapeutics Goods Administration (“TGA”) to start a phase 1/2a clinical trial in Australia.

Each of these product candidates will require extensive preclinical and clinical development and may require specific unforeseen licensing rights obtained at substantial cost before regulatory approval may be achieved and the products sold for therapeutic use.

Additionally, we are subject to various other risks; for example, our business is at an early stage of development and we may not develop therapeutic products that can be commercialized; we have a history of operating losses, do not expect to be profitable in the near future and our independent registered public accounting firm has expressed doubt as to our ability to continue as a going concern; and we will need additional capital to conduct our operations and develop our products and our ability to obtain the necessary funding is uncertain. Please see the heading “Risk Factors” beginning on page 12.

On December 16, 2014 we were named in Deloitte’s 2014 Technology Fast 500™ of the fastest growing companies in North America. International Stem Cell Corporation was ranked in 215th place in the overall list, which also included the technology, media, telecommunications and clean tech companies. Of the 47 biotechnology businesses on the list, we placed 21st and we were the only regenerative medicine company represented

Market Opportunity and Growth Strategy

Therapeutic Market – Clinical Applications of hpSCs for Disease Treatments. With respect to therapeutic research and product candidates, we focus on applications where cell and tissue therapy is already proven but where there is an insufficient supply of safe and functional cells or tissue. We believe that the most promising potential clinical applications of our technology are: 1) Parkinson’s disease (“PD”); 2) metabolic/liver diseases; and 3) corneal blindness. Using our proprietary technologies and know-how, we are creating neural stem cells from hpSCs as a potential treatment of PD, liver cells from hpSCs that may be able to treat a variety of hepatic and metabolic liver diseases and corneal like structures from hpSCs that may be suitable for cornea transplantation and corneal healing in humans.

Our most advanced project is the neural stem cell program for the treatment of Parkinson’s disease. In 2013 we published in Nature Scientific Reports the basis for our patent on a new method of manufacturing neural stem cells which will be used to produce the

Table of Contents

clinical-grade cells necessary for future clinical studies and commercialization. In 2014 we completed the majority of the preclinical research establishing the safety profile of neural stem cells in various animal species including non-human primates. We have started the enrollment of patients in our Phase I trial of ISC-hpNSC®, human parthenogenetic stem cell-derived neural stem cells for the treatment of moderate to severe Parkinson's disease. It is anticipated to receive preliminary clinical data in Q4 2016.

In November 2014 in an important ruling the FDA cleared ISCO's human parthenogenetic stem cells line for investigational clinical use. This was a necessary step in the process of advancing stem cell therapies based on ISCO's core technology into clinical development and on to commercialization. Although the first Phase I study will be conducted in Australia, and therefore not subject to FDA oversight, we anticipate that a significant portion of future studies will be carried out in the United States where this approval is necessary.

In August 2014 International Stem Cell Corporation announced the launch of a stroke program, evaluating the use of neural stem cell transplantation for the treatment of ischemic stroke using a rodent model of the disease. The Company has a considerable amount of safety data on NSC from the Parkinson's disease program and, as there is evidence that transplantation of NSC may improve patient outcomes as an adjunctive therapeutic strategy in stroke, having a second program that can use this safety dataset is therefore a logical extension. In 2015 the Company together with Tulane University demonstrated that NSC can significantly reduce neurological dysfunction after a stroke in animal models.

Cosmetic Market – Skin Care Products. Our wholly-owned subsidiary Lifeline Skin Care, Inc. ("LSC") develops, manufactures and markets cosmetic skin care products using an extract derived from our pluripotent stem cells. These proprietary products include a Defensive Day Serum, Recovery Night Serum, Firming Eye Complex, and Neck Firming Complex, all of which include our patented stem cell extract. LSC also developed and launched Molecular Renewal Serum, an anti-aging and skin brightening product based on LSC's patent-pending small molecule technology. LSC's products are regulated as cosmetics. LSC's products are sold domestically through a branded website, and through the professional channel (including dermatologists, plastic surgeons, medical, day and resort spas). Internationally LSC's products are sold through a network of distributors. Domestically, we plan to increase sales of our products by expanding our product line and increasing brand awareness through advertising, sales promotion and public relations. Internationally, we plan to increase distribution and sales through partnerships with wholesale distributors in Europe, Asia, and North America.

Biomedical Market – Primary Human Cell Research Products. Our wholly-owned subsidiary Lifeline Cell Technology, LLC ("LCT") develops, manufactures and commercializes over 160 human cell culture products, including frozen human "primary" cells and the reagents (called "media") needed to grow, maintain and differentiate the cells. LCT's scientists have used a technology called basal medium optimization to systematically produce optimized products designed to culture specific human cell types and to elicit specific cellular behaviors. These techniques also produce products that do not contain non-human animal proteins, a feature desirable to the research and therapeutic markets. Each LCT cell product is quality tested for the expression of specific markers (to assure the cells are the correct type), proliferation rate, viability, morphology and absence of pathogens. Each cell system also contains associated donor information and all informed consent requirements are strictly followed. LCT's research products are marketed and sold by its internal sales force, OEM partners and LCT brand distributors in Europe and Asia.

Cyto Therapeutics was registered in the state of Victoria, Australia, on December 19, 2014 for the purpose of conducting clinical trials in Australia. Cyto Therapeutics is a limited proprietary company and a wholly-owned subsidiary of ISCO.

History

ISCO was incorporated in Delaware on June 7, 2005 under the name BTHC III, Inc. to effect the reincorporation of BTHC III, LLC, a Texas limited liability company, mandated by a plan of reorganization. On December 28, 2006 pursuant to a Share Exchange Agreement, BTHC III, Inc. issued 221,044 shares of common stock, representing approximately 93.7% of the common stock outstanding immediately after the transaction, to the shareholders of International Stem Cell Corporation, a California corporation ("ISC California"), in exchange for all outstanding stock of ISC California. As a result of this transaction, ISC California became wholly-owned by ISCO. This transaction was accounted for as a reverse merger for accounting purposes. On January 29, 2007, we changed our name to International Stem Cell Corporation.

ISC California was incorporated in California in June 2006 for the purpose of restructuring the business of Lifeline Cell Technology, LLC ("LCT"), which was organized in California in August 2001. As a result of the restructuring, LCT became wholly-owned by ISC California. Lifeline Skin Care, Inc. was formed in the State of California on June 5, 2009 and is a wholly-owned subsidiary of ISCO California.

Our principal executive offices are located at 5950 Priestly Drive, Carlsbad, CA 92008, and our telephone number is (760) 940-6383. Our corporate website address is www.internationalstemcell.com. Lifeline Cell Technology's website address is www.lifelinecelltech.com, and Lifeline Skin Care's website address is www.lifelineskincare.com. Our common stock is quoted on the OTC QB and trades under the symbol "ISCO".

Frequently Asked Questions

What are Stem Cells?

Cells are the basic living units that make up humans, animals, plants and other organisms. Stem cells have two important characteristics that distinguish them from other types of cells. First, they can renew themselves for long periods of time. Second, they are unspecialized and under certain conditions can be induced to become cells with special functions such as metabolically active cells of the liver or transparent and protective cells of the eye. Until recently, scientists have worked with two major kinds of stem cells, *embryonic stem cells* (hESCs) and *adult stem cells* that each has different properties and characteristics. ISCO has developed a third category of stem cells named *parthenogenetic stem cells* (the hpSCs mentioned above) that promise to have significant therapeutic advantages relative to these other types.

What are Pluripotent Stem Cells?

Pluripotent stem cells are able to be differentiated or developed into virtually any other cell made in an organism. Both embryonic and parthenogenetic stem cells are pluripotent. Some scientists are exploring manipulation of adult cells into a potentially pluripotent stage. This type of stem cells is called *induced pluripotent stem cells*.

What are Embryonic Stem Cells?

Embryonic stem cells are derived from embryos at an early stage of development, typically when they are in a structure of a small number of cells called the *blastocyst*. Embryonic stem cells are expanded in a laboratory cell culture process. Once cell lines are established, batches of them can be frozen and shipped to other laboratories for further culture and experimentation.

What are Adult Stem Cells?

An adult stem cell is an undifferentiated cell found among differentiated cells in a tissue or organ. An adult stem cell can renew itself (generally to a lesser degree than can embryonic or parthenogenetic stem cells) and differentiate to a limited number of specialized cell types. These cells can be isolated from different tissues such as the bone marrow, fat tissue, and umbilical cord blood.

Why are Embryonic Stem Cells Important?

Human embryonic stem cells are able to differentiate into virtually any other cell in the body and to reproduce themselves almost indefinitely. In theory, if stem cells can be grown and their development directed in culture, it would be possible to grow cells for the treatment of specific diseases.

An early potential application of human embryonic stem cell technology may be in drug screening and toxicology testing.

The study of human development may also benefit from embryonic stem cell research in that understanding the events that occur at the first stages of development has potential clinical significance for preventing or treating birth defects, infertility and pregnancy loss. The earliest stages of human development have been difficult or impossible to study. Human embryonic stem cells offer insights into developmental events that cannot be studied directly in humans or fully understood through the use of animal models.

What are Parthenogenetic Stem Cells and how are they different?

Parthenogenetic stem cells are pluripotent stem cells created from unfertilized human eggs through a “parthenogenesis” process. Parthenogenesis requires that an unfertilized human egg be “activated” by chemical, physical or other means. Activation results in a non-viable “parthenote” from which pluripotent parthenogenetic stem cell lines can be derived. The cell lines used by ISCO are human parthenogenetic stem cells. Currently International Stem Cell Corporation owns the largest published collection of human parthenogenetic stem cell lines. Our research is based on perfecting proprietary techniques for deriving stem cells through parthenogenesis that result in stem cell lines that have the same capacity to become all cells found in the human body, but do not require use or destruction of a viable human embryo. Furthermore, parthenogenetic stem cells can be produced in a simplified (“homozygous”) form that enables each line to be an immunological match for millions of people. We do not obtain stem cells from fetal tissue nor does our technology require the use of discarded frozen human embryos.

Why Not Use Stem Cells Derived from Adults?

There are several approaches now in human clinical trials that utilize adult stem cells. However, these cells have limited availability and limited ability to proliferate in culture as well as risk of genetic manipulation. Therefore, obtaining clinically significant amounts of adult stem cells may prove to be difficult.

Why is Stem Cell Research Controversial?

Table of Contents

The sources of some types of stem cells cause social and religious controversy. For example, some scientists obtain stem cells from aborted fetal tissue, causing opposition from those opposed to abortion. Another controversial source of stem cells is residual human embryos (from fertilized human eggs) that remain after vitro fertilization procedures and are used to create embryonic stem cell lines.

Is Stem Cell Research Banned in the US?

Embryonic stem cell research, in general, is not banned in the US. Work by private organizations is not limited except by the restrictions applicable to all human research. In addition, Proposition 71 in California, which voters approved in November 2004, specifically allows state funds to be used for stem cell research.

Why Not Use the Currently “Approved” Embryonic Stem Cells Lines?

Most, if not all, human embryonic stem cell lines in research now have complex (“heterozygous”) immune compositions that are likely to cause the differentiated cells to be rejected by most patients.

Why Not use Adult Cells Reprogrammed to become Pluripotent Cells?

Induced pluripotent cells (“iPSs”) benefit from not being derived from human embryos but may face a number of other limitations such as uncertainty as to which genes are turned on and off. Furthermore, like embryonic stem cells, iPSs have complex (“heterozygous”) immune compositions that are likely to cause the differentiated cells to be rejected by most patients.

Ethical Issues

The use of embryonic stem cells derived from fertilized human eggs has created an ethical debate in the US and around the world. However, since no fertilized human eggs are used in creating our stem cells and no human embryo is being created, used or destroyed, we expect that our parthenogenetic stem cells will be more readily accepted in circumstances where there are ethical concerns with using traditional embryonic stem cells.

We also have licensed worldwide rights to use a technology known as Somatic Cell Nuclear Transfer (“SCNT”) to create human stem cells. The President’s Council on Bioethics, as reported in the publication “Reproduction and Responsibility—The Regulation of New Biotechnologies 2004,” has agreed on a series of recommendations for the use of such technology. Countries such as the United Kingdom have made similar recommendations.

Our Platform Technology

We have developed a proprietary process based on parthenogenesis for the creation of a new type of stem cell that has shown to exhibit the pluripotency and proliferative benefits of embryonic stem cells yet avoid the use or destruction of fertilized human eggs or embryos. Furthermore, since parthenogenetic stem cells can be created with immunogenetically identical (“homozygous”) chromosome pairs, each line has potential to be an immune match for tens of millions of patients. If such cells were to be differentiated into functional mature cells they would, theoretically, be universally applicable across a wide range of medical conditions.

We also hold licenses to three other technologies to create human pluripotent stem cells: SCNT technology (as mentioned previously); a technology that may be useful to create induced pluripotent stem cells (“iPS”); and “single blastomere technology” which uses a single cell obtained from a fertilized blastocyst to create an embryonic stem cell line. Each of these technologies has unique cell therapy applications and provides us with a broad base of technologies from which we can operate in the future.

Our Facilities

We have built the capacity to manufacture human cells for use in preclinical and clinical trials and ultimately for therapeutic use through the completion of our cGMP manufacturing laboratories in Oceanside, California and Frederick, Maryland, which is currently cGMP ready. The Oceanside laboratory is designed specifically for the derivation of clinical-grade parthenogenetic stem cell lines for our stem cell bank and their differentiated derivatives for future clinical trials.

Our Products

Therapeutic Product Candidates

We are developing different cell types from our stem cells that may result in therapeutic products. We focus on applications where cell and tissue therapy is already proven but where there is an insufficient supply of functional cells or tissue. We believe that the most promising potential clinical applications of our technology are:

- Neural stem cells (ISC-hpNSC®) for treatment of Parkinson's disease and potentially other neurological disorders, such as spinal cord injury, traumatic brain injury and stroke.
- Liver cells ("hepatocytes") that may be used to treat a variety of congenital and acquired liver diseases. Using the same precursor cell that leads to liver cells, it is also possible to create islet cells for potential treatment of diabetes.
- Three-dimensional eye structures to treat degenerative retinal diseases, corneal blindness, and to accelerate corneal healing.

Our most advanced project is the neural stem cell program for the treatment of Parkinson's disease. In 2013 we published in Nature Scientific Reports the basis for our patent on a new method of manufacturing neural stem cells which we intend to use to produce the clinical-grade cells necessary for future clinical studies and commercialization.

In August 2014, we began evaluating the use of neural stem cell transplantation ("NSC") for the treatment of ischemic stroke using a rodent model of the disease. Because, we have developed safety data on NSC from the Parkinson's disease program we believe can leverage such data in a program for the treatment of ischemic stroke.

Each of these product candidates will require extensive preclinical and clinical development and may require specific unforeseen licensing rights obtained at substantial cost before any regulatory approval may be achieved and the products sold for therapeutic use.

Skin Care Products

ISCO's LSC subsidiary has developed four skincare products containing our proprietary stem cell extract that help combat the signs of aging. Daily Defense Complex is designed to facilitate quicker cell turnover and to restore skin's natural moisture levels, and to prevent UV damage. Recovery Night Moisture Serum helps reduce the appearance of fine lines and wrinkles, increases skin firmness, and contributes to skin cell regeneration. Eye Firming Complex provides tightening benefits and reduces puffiness, while delivering hydration to soften lines and wrinkles. Neck Firming Serum is specifically designed to nourish and tighten the skin in the decollete area, visibly reducing the appearance of lines and wrinkles. LSC has also developed three skin cleansing and exfoliating products that are intended to complement the active ingredients in the night, day, eye and neck products. Brightening Cleanser uses ultra-fine conditioning powders to help cleanse and brighten the skin. Dual Action Exfoliator uses glycolic acid and microcrystals to exfoliate dead skin cells and promote faster cell renewal. Refresh Polishing Gelee combines calming ingredients and micro beads to gently exfoliate the skin in preparation for application of the stem cell products. In December of 2015 LSC released its latest product – Molecular Renewal Serum, which provides a variety of skin brightening and anti-aging benefits without the side effects frequently associated with retinol containing skincare products.

Research Products

ISCO's LCT subsidiary develops, manufactures and commercializes over 160 human cell culture products. These products include frozen human "primary" cells and stem cells and the reagents (called "media") needed to grow, maintain and differentiate the cells. LCT's scientists have used a technology called basal medium optimization to systematically produce optimized products designed to culture specific human cell types and to elicit specific cellular behaviors. These techniques also produce products that do not contain non-human animal proteins, a feature desirable to research and therapeutic markets. LCT frequently adds more products to its line. These human cell-based products are used domestically and internationally by research scientists in pharmaceutical, academic and government research organizations to study human disease and basic cell biology. LCT's products eliminate the need for scientists to create their own cells, media and reagents or attempt to adapt "off the shelf" products to match specific experimental needs and they are superior to using animals or non-human animal cells as research tools because they are more relevant to the study of human disease. Strict quality assurance provides a high level of consistency and standardization of these products. LCT offers products that contain no animal products ("called "Xeno-free" products), allowing researchers to have better control of their experiments and to conduct research using products that ultimately can be more appropriate for therapeutic applications.

Often LCT's research customers use our cell-based research products in their clinical research, eventually adapting them for therapeutic applications. If one of our research products is adopted by a successful producer of therapeutic cells, ISCO may become a supplier to the much larger therapeutic market through LCT's products. This is based on the fact that once regulatory product submissions are made to the FDA and similar authorities, the media and reagents used during development cannot be changed easily after approval. These uses of LCT's products bring opportunities to ISCO for future therapeutic products. Such is the case with LCT's Fibrolife® media, which is currently being used in the process of creating tissue engineered vascular grafts.

[Table of Contents](#)

LCT products and applications include:

- Human skin cells and associated reagents (DermaLife®) for the study of skin disease, toxicology or wound healing.
- Human cells from the heart and blood vessels and associated reagents (VascuLife®), used by researchers to study cardiovascular disease and cancer.
- Human bronchial and tracheal cell lines for the study of toxicity, cystic fibrosis, asthma and pathogenesis.
- Human mammary epithelial cell lines for the study of breast cancer, three dimensional culture and carcinogen screening.
- Adult stem cells (called mesenchymal stem cells) and the reagents necessary to differentiate them into various tissues, including bone, cartilage and fat. These products are valuable for researchers in the emerging field of regenerative medicine.
- Human prostate cells and specialized medium (ProstaLife™) to study prostate disease including cancer.
- Human renal and bladder cells and associated media (RenaLife™) to study renal and bladder diseases.
- Human corneal cells and associated media (OccuLife™) for the study of corneal disease and as a model of toxicology for consumer product testing.
- An assortment of many other cell culture reagents and supplements for the growth, staining and freezing of human cells.

Each LCT cell product is quality tested for the expression of specific markers (to assure the cells are the correct type), proliferation rate, viability, morphology and absence of pathogens. Each cell system also contains associated donor information and all informed consent requirements are strictly followed.

LCT's research products are marketed and sold by its internal sales force, OEM partners and LCT brand distributors in Europe and Asia.

Our Markets

Therapeutic Markets

ISCO is currently pursuing a number of scientific development programs designed to lead to the creation of new therapeutic products. We anticipate that, with their superior immune-matching characteristics, our cells will be able to reduce or eliminate the need for immune-suppression drugs and the adverse reactions they trigger in patients.

Parkinson's disease. Parkinson's disease ("PD") is the second most common neurodegenerative disease and, according to the Parkinson's Disease Foundation, there are more than one million sufferers in the United States and more than \$2 billion is spent on medication. Currently there is no cure for PD and the improvements in symptoms provided by PD drugs often diminish with time. Using our proprietary technologies and know-how, we are creating neural stem cells from hpSCs as a potential treatment of PD and potentially other central nervous system disorders in order to address this significant market opportunity.

Liver disease. Liver disease affects one in ten persons according to the American Liver Foundation, and is one of the top ten leading causes of death in the United States. There are more than 100 individual diseases of the liver; and for people with liver failure, the only effective treatment is full or partial organ transplantation. However, the demand for liver organs far exceeds the number available. According to the American Liver Foundation, over 16,000 individuals in the United States are waiting for a transplant. Using our proprietary technologies and know-how, we are creating liver cells from hpSCs that may be used to treat a variety of hepatic and metabolic liver diseases to address this significant market opportunity. Importantly, liver cell transplantation has already been used in early stage clinical trials to treat patients with liver failure and has proven especially useful as a "bridge" to keep patients alive until they can receive a whole liver transplant.

Corneal disease. Corneal blindness currently affects between seven and eight million people worldwide according to the World Health Organization, with a significant number of those people in India where cultural and other reasons inhibit the donation of corneal tissue. Using our proprietary technologies and know-how, we are creating corneal-like structures from hpSCs. These clear hollow spheres are composed of tissue with a three-dimensional layered structure similar to what is found in normal corneal tissue. Portions or all of these tissue layers may be suitable for cornea transplantation in humans. In addition, corneal cells can be used for coating contact lenses to accelerate corneal healing.

Retinal diseases. Diseases involving retinal degeneration include age-related macular degeneration ("AMD") and retinitis pigmentosa ("RP"). These diseases are characterized by the death of critical photoreceptor cells called rods and cones. Photoreceptor death is due to an abnormality and/or to disruption or death of supportive cells called retinal pigment epithelial ("RPE") cells. According to the Center for Disease Control and Prevention, approximately 1.8 million Americans aged 40 and over are affected by AMD.

Table of Contents

Skin Care Market

Skin care products play a key role in the daily healthcare routines of many consumers. Greater emphasis on advertising, broader and more integrated distribution networks, raising standards of living in emerging markets, and population aging trends in developed nations are the major factors driving the global demand for skin care products.

Global skin care market consists of (i) facial care products; (ii) body care products; and (iii) specialty needs products. Top selling products in the facial skincare category include skin brighteners, anti-aging creams and serums, toners, masks, anti-acne and sun protection products.

Facial skincare products that provide anti-aging benefits represent a significant portion of the global skincare market. Increased longevity leads consumers to seek out high quality, technologically advanced skincare products that can help them maintain a youthful appearance. Anti-aging products that are backed by scientific research remain in high demand among sophisticated consumers despite premium prices.

In response to consumer demand for superior quality skin care products, manufacturers are striving to innovate at all levels of the skincare market. Increasing emphasis is placed on discovery and testing of specialty compounds and technologies that provide a demonstrable cosmetic effect. Biotechnology-based skincare products are gaining increasingly higher market share as consumers discover their potential to deliver safe and effective results.

Research Market

The research market for cell systems consists of scientists performing basic and applied research in the biological sciences. Basic research involves the study of cell biology and biochemical pathways. Applied research involves drug discovery, vaccine development, clinical research and cell transplantation. The domestic market can be broken into three segments: (i) academic researchers in universities and privately-funded research organizations; (ii) government institutions such as the National Institutes of Health, the US Army, the US Environmental Protection Agency and others; and (iii) industrial organizations such as pharmaceutical companies and consumer product companies. It is estimated that the combined academic and government markets comprise approximately 40% of the total market and that the industrial segment comprises approximately 60%. We believe the following are the main drivers in the research market for commercial cell systems:

- The need for experimental human cells which are more predictive of human biology than are non-human cells or genetically-modified cell lines or living non-human animals.
- The emerging field of stem-cell-based regenerative medicine and the increase in associated grant money to study stem cells is driving the market not only for stem cell products but also for cell culture products in general.
- The desire to lower the cost of drug development in the pharmaceutical industry. We believe that human cell systems may provide a platform for screening toxic drugs early in the development process, thus avoiding late stage failures in clinical trials and reducing costs.
- The need to eliminate animal products in research reagents that may contaminate future therapeutic products.
- The need for experimental control. Serum-free defined media provides the benefit of experimental control because there are fewer undefined components.
- The need for consistency in experiments that can be given by quality controlled products.
- The need to eliminate in-house formulation of media, obtain human tissue or perform cell isolation.
- The need to reduce animal testing in the consumer products industry.

Intellectual Property

Patents

In 2015, we were granted eight patents, covering different aspects and applications of our proprietary parthenogenetic technology. The first patent covers the use of fertilized human oocytes for the creation of human embryonic stem cell lines, and was issued in Great Britain. The second and third patents cover various aspects of pluripotent stem cell line creation and were issued in Japan and Korea respectively. The fourth patent protects various design and construction elements of specialized medium container that is currently used to package research products by ISCO's subsidiary, Lifeline Cell Technology, and was issued in the United States. The fifth patent, also issued in Great Britain, covers various aspects of creating synthetic cornea tissues from retinal stem cells. The sixth, seventh, and eighth patent, issued in United States, Israel, and Japan respectively, cover the methods of deriving differentiated cells from stem cells.

Table of Contents

In addition to the eight patents covering in-house generated technology, two pending patent applications that were licensed by ISCO from Ocata Therapeutics (“Ocata”) were issued as patents. The first, issued in Australia, covers various screening assays for identifying differentiation-inducing agents. The second, issued in Israel, covers in vitro methods for reprogramming life span of recipient cells.

We have pending patents covering homozygous parthenogenetic stem cells that can be immune matched to millions of persons and methods for deriving them. Other patents and pending patent applications include intellectual property concerning skin care formulations and methods of manufacturing stem-cell based skin care products and methods to differentiate stem cells.

In addition, we have obtained exclusive worldwide licenses to patents and patent applications from Ocata Therapeutics (formerly Advanced Cell Technology). Our licensed and internally-generated patents provide the intellectual property rights we need to operate in the pluripotent stem cell field and to progress through the stages of creating a therapeutic stem cell product. These stages include the derivation, isolation, expansion and differentiation of stem cells. The intellectual property available to us enables us to create manufacturing methods that eliminate animal proteins in order to satisfy FDA requirements. In addition, we have rights to sell research products derived through our licensed intellectual property in order to generate income.

The majority of the patents and applications have been filed in the US and in foreign countries through the Patent Corporation Treaty or by direct country filings in those jurisdictions deemed significant to our operations. Our currently issued patents will expire at various times commencing in 2020.

We have protected our research products and branding through both patents and trademarks. Lifeline Skin Care has filed patent applications covering its proprietary formulations and methods of using stem cells and small molecules to create skin care products. ISCO, LCT, and LSC have registered trademarks on their company names, logos and various product names to protect their branding investment. Lifeline Cell Technology’s reagent formulations are protected as trade secrets.

The patentability of human cells in countries throughout the world reflects widely differing governmental attitudes. In the US, hundreds of patents covering human embryonic stem cells have already been granted, including those on which we rely. Certain countries in Europe and Asia have taken the position that hES cells themselves are not patentable. ISCO believes that such restrictions are not appropriate as applied to parthenogenetic stem cells and is working with patent legislators in Europe to create exemptions for human parthenogenetic stem cells. As a result, we plan to file internationally wherever feasible and focus our research strategy on cells that best fit the US and foreign country definitions of patentable cells and technologies.

On December 18, 2014 the Court of Justice of the European Union (CJEU), the European Union’s highest court ruled that the Company’s core technology patent applications are not covered by the prohibition on patenting embryonic stem cells, removing the final barrier to the approval of ISCO’s parthenogenetic stem cell patents in the European Union. This final and definitive ruling by the EU’s highest court now formally separates parthenogenetic stem cells from embryonic stem cells, and removes the exclusion from patentability on the former while maintaining the ban on the later.

License Agreements

In May 2005, we entered into three exclusive license agreements (“ACT IP,” “Infigen IP,” and “UMass IP” or collectively “ACTC agreements”) with Ocata Therapeutics Inc. for the production of therapeutic products in the fields of diabetes, liver disease, retinal disease and the creation of research products in all fields. In February 2013, each of these license agreements was amended and restated, pursuant to which we continue to have rights to Ocata Therapeutics’ human cell patent portfolio and non-exclusive rights to future developments in the area of diabetes and liver disease, as well as certain rights to patents covering Single Blastomere technology. A significant feature of the licensed Single Blastomere technology is a method of ethically obtaining human embryonic stem cells that allows us to isolate and differentiate hES stem cells directly from a “blastocyst” without harming the embryo. Using other licensed technology, the hES cells can be immediately differentiated into stem cells capable of expansion and differentiation into other types of cells. Under the terms of the amendments we have also acquired additional exclusive rights in the area of parthenogenesis and the use of parthenogenetically derived stem cells for treatment of human diseases.

The agreements with Ocata Therapeutics further provide that we are no longer obligated to make milestone payments or to meet any minimum research and development requirements. We will no longer pay any royalties related to the ACT IP or Infigen IP, and our obligation to pay a minimum license fee for the UMass IP has been reduced to \$75,000 annually, payable in two installments to Ocata Therapeutics.

The agreements continue until the expiration of the last valid claim within the licensed patent rights. Either party to each amended and restated license agreement may terminate the agreement for an uncured breach or we may terminate the agreements at any time with a 30 days written notice.

Research Agreements

Our scientific founder, Elena Revazova, MD, PhD, has conducted basic research at the Scientific Center for Obstetrics, Gynecology and Perinatology of the Russian Academy of Medical Sciences in Moscow, Russia. Through a research agreement, we have retained all intellectual property rights in the US and other major markets with respect to such research, while the Institute has retained such rights in Russia.

Table of Contents

In 2015 and 2014, ISCO spent \$2.7 million and \$5.4 million on research and development activities, respectively. ISCO actively pursues sponsored research agreements with local and international research organizations and has established research collaborations with collaborators from Duke University, Yale University, Tulane University, University of California, San Diego, The Scripps Research Institute (La Jolla), and the Sanford Burnham Medical Research Institute. We are in frequent negotiations to develop collaborative research agreements with additional domestic and international research organizations from both the public and private sector. These agreements allow us to team up with nationally and internationally known research scientists to study stem cell technologies developed or licensed by ISCO for possible use in therapeutic or research fields. In addition to the research collaborations mentioned above, we provide our stem cell lines to researchers at many universities and other research facilities. Ordinarily, the stem cell lines are provided without charge, but we retain the right to either an exclusive or non-exclusive right to use any technology that may be developed that is necessary in order for us to make therapeutic products based on the research that uses our cells.

In 2014 the Company signed a research agreement with Rohto Pharmaceutical Co. Ltd, (“Rohto”) the second-largest consumer health company in Japan, and a world leader in the manufacturing and marketing of pharmaceuticals, cosmetics, skincare and healthcare products. Under the terms of the agreement, Rohto will evaluate stem cell-derived human cells owned and provided by ISCO in a number of pre-clinical animal models. In September 2015 the Company entered into the second phase of the existing Research Agreement with Rohto Pharmaceutical after Rohto acknowledged that ISCO’s proprietary cells demonstrate consistent high quality and are suitable for further use in Rohto’s research.

Competition

The development of therapeutic and diagnostic agents for human disease is intensely competitive. Pharmaceutical companies currently offer a number of pharmaceutical products to treat Parkinson’s disease, diabetes, liver diseases, retinal disease, corneal disease and other diseases for which our technologies may be applicable. Many pharmaceutical and biotechnology companies are investigating new drugs and therapeutic approaches for the same purposes, which may achieve new efficacy profiles, extend the therapeutic window for such products, alter the prognosis of these diseases, or prevent their onset. We believe that our therapeutic products, when and if successfully developed, will compete with these products principally on the basis of improved and extended efficacy and safety and their overall economic benefit to the health care system. We believe that our most significant competitors will be fully integrated pharmaceutical companies and more established biotechnology companies. Smaller companies may also be significant competitors, particularly through collaborative arrangements with large pharmaceutical or biotechnology companies.

Some of our primary competitors in the development of stem cell therapies are Stem Cells Inc., BioTime, Neuralstem, Inc., ReNeuron, and ViaCyte. Our primary competitors in the skin care market are Obagi, SkinCeuticals, SkinMedica (now owned by Allergan), and Murad. In the field of research products, our primary competitors for human cells, media and reagents are Lonza, EMD Millipore, Life Technologies (now owned by Thermo Fisher Scientific), StemCell Technologies, Zen-bio, PromoCell, and Specialty Media. In each of these areas many of our competitors have substantially greater resources and experience than we do.

Sales and Marketing

To date, sales of our research products have been derived primarily through our in-house sales force and via OEM and distribution contracts. Approximately 24% of our total sales in 2015 were from one customer.

The skin care line was launched in November 2010 through the company’s own website—www.lifelineskincare.com. Since that time, distribution has expanded to include destination and resort spas, dermatologists, plastic surgeons and international markets. Domestically, we plan to increase distribution of our products by expanding our product line, increasing brand awareness, strategic partnerships, sales promotions, and public relations. Internationally, we are increasing distribution and sales through new distribution and custom product development agreements.

LCT’s research products are marketed and sold by its internal sales force, OEM partners and LCT brand distributors in Europe and Asia.

Government Regulation

Regulation by governmental authorities in the U.S. and other countries is a significant factor in development, manufacture and marketing of our proposed therapeutic and skin care products and in our ongoing research and product development activities. The nature and extent to which such regulation applies to us will vary depending on the nature of any products that may be developed by

Table of Contents

us. We anticipate that many, if not all, of our proposed therapeutic products will require regulatory approval by governmental agencies prior to commercialization. In particular, human therapeutic products are subject to rigorous pre-clinical and clinical testing and other approval procedures of the FDA, and similar regulatory authorities in European and other countries. Various governmental statutes and regulations also govern or influence testing, manufacturing, safety, labeling, storage and recordkeeping related to such products and their marketing. The process of obtaining these approvals and the subsequent compliance with appropriate statutes and regulations require the expenditure of substantial time and money, and there can be no guarantee that approvals will be granted.

We have made extensive progress in obtaining the necessary regulatory approvals of research protocols, informed consent documents and donor protection procedures to obtain oocytes in the U.S. for the production of our parthenogenetic stem cell bank. These approvals include: federally mandated Institutional Review Board (IRB) and State of California required Stem Cell Research Oversight (SCRO) committee.

Currently the U.S. government, though NIH appropriations restrictions, prohibits the use of federal funds in research involving parthenogenetic stem cells. Since we cannot receive federal funds for our stem cell research, we have decided to work with various foundations who are involved with stem cell research.

FDA Approval Process

Prior to commencement of clinical studies involving humans, pre-clinical testing of new pharmaceutical products is generally conducted on animals in the laboratory to evaluate the potential efficacy and safety of the product candidate. The results of these studies are submitted to the FDA as a part of an Investigational New Drug (“IND”) application, which must become effective before clinical testing in humans can begin. Typically, human clinical evaluation involves a time-consuming and costly three-phase process. In Phase I, clinical trials are conducted with a small number of people to establish safety pattern of drug distribution and metabolism within the body. In Phase II, clinical trials are conducted with groups of patients afflicted with a specific disease in order to determine preliminary efficacy, possible dosages and expanded evidence of safety. In some cases, an initial trial is conducted in diseased patients to assess both preliminary efficacy and preliminary safety and patterns of drug metabolism and distribution, in which case it is referred to as a Phase I/II trial. In Phase III, large-scale, multi-center, comparative trials are conducted with patients afflicted with a target disease in order to provide enough data to demonstrate the efficacy and safety required by the FDA. The FDA closely monitors the progress of each of the three phases of clinical testing; and may, at its discretion, re-evaluate, alter, suspend or terminate the testing based upon the data which have been accumulated to that point and its assessment of the risk/benefit ratio to the patient. Monitoring of all aspects of the study to minimize risks is a continuing process. All adverse events must be reported to the FDA.

The results of the pre-clinical and clinical testing on a non-biologic drug and certain diagnostic drugs are submitted to the FDA in the form of a New Drug Application (“NDA”) for approval prior to commencement of commercial sales. In the case of vaccines or gene and cell therapies, the results of clinical trials are submitted as a Biologics License Application (“BLA”). In responding to a NDA or BLA, the FDA may grant marketing approval, request additional information or refuse to approve if the FDA determines that the application does not satisfy its regulatory approval criteria. There can be no assurance that approvals will be granted on a timely basis, if at all, for any of our proposed products.

In November 2014, in an important ruling the FDA cleared ISCO’s human parthenogenetic stem cells line for investigational clinical use. This was a necessary step in the process of eventually advancing stem cell therapies based on ISCO’s core technology into clinical development. Although the Phase I trial for the Parkinson’s Disease program is anticipated to be conducted in Australia, and therefore not subject to FDA oversight, future studies will be carried out in the United States where this approval is necessary.

European and Other Regulatory Approval

Whether or not FDA approval has been obtained, approval of a product by comparable regulatory authorities in Europe and other countries will likely be necessary prior to commencement of marketing the product in such countries. The regulatory authorities in each country may impose their own requirements and may refuse to grant an approval, or may require additional data before granting it, even though the relevant product has been approved by the FDA or another authority. As with the FDA, the regulatory authorities in the European Union (“EU”), Australia and other developed countries have lengthy approval processes for pharmaceutical products. The process for gaining approval in particular countries varies, but generally follows a similar sequence to that described for FDA approval. In Europe, the European Committee for Proprietary Medicinal Products provides a mechanism for EU-member states to exchange information on all aspects of product licensing. The EU has established a European agency for the evaluation of medical products, with both a centralized community procedure and a decentralized procedure, the latter being based on the principle of licensing within one member country followed by mutual recognition by the other member countries.

In Australia, the approval process for commencing Phase 1 and 2 clinical trials resides with both Therapeutic Goods Administration (TGA) and the Human Research Ethics Committee, (HREC). Prior to commencing a clinical trial, a sponsor must submit to TGA a CTX application and must submit to the HREC a study protocol, an investigator brochure and a template informed consent for such clinical trial. The HREC approval process generally takes four to eight weeks.

Table of Contents

Other Regulations

We are also subject to various U.S. federal, state, local and international laws, regulations and recommendations relating to the treatment of oocyte donors, the manufacturing environment under which human cells for therapy are derived, safe working conditions, laboratory and manufacturing practices and the use and disposal of hazardous or potentially hazardous substances, including radioactive compounds and infectious disease agents, used in connection with our research work. We cannot accurately predict the extent of government regulation which might result from future legislation or administrative action.

Other Regulations for Lifeline Skin Care

The Federal Food, Drug and Cosmetic Act ("FFDCA") and the Fair Packaging and Labeling Act ("FPLA") provide the regulatory framework for selling cosmetics. The FFDCA oversees the safety of cosmetics. The FPLA ensures that the labeling is not false or misleading and includes all relevant information in a prominent and conspicuous manner.

Safety and efficacy testing of the products is performed by independent third party testing organization.

Employees

In addition to our four executive officers, we utilize the services of 38 full-time staff members.

Properties

We have established our primary research facility in 8,215 square feet of leased office and laboratory space in Oceanside, California. Our lease for this facility expires in August 2016. The current base rent is \$9,111 per month. The facility has leasehold improvements which include cGMP (current Good Manufacturing Practices) level clean rooms designed for the derivation of clinical-grade stem cells and their differentiated derivatives, research laboratories for our stem cell differentiation studies and segregated rooms for biohazard control and containment of human donor tissue. The monthly base rent will increase by 3% annually on the anniversary date of the agreement.

In addition to the primary research facility lease, we entered into a lease with S Real Estate Holding LLC (an affiliate of our CEO and Executive Vice President and Chief Scientific Officer) to allow the Company to expand into new corporate offices located in Carlsbad, California. The building is used for administrative purposes, but could also be used for research and development purposes if such space is needed in the future. The lease initially covered approximately 4,653 square feet, starting on March 1, 2011, and was amended to cover approximately 8,199 square feet effective July 1, 2011, and to cover approximately 9,848 square feet effective January 1, 2013. The lease expired on February 29, 2016, and we extended the term of the lease for one year, see Note 12, Subsequent Events. We began paying rent at an initial rate of \$5,118 per month and the rate was amended effective July 1, 2011 and January 1, 2013 to account for additional square footage that we occupied. As of December 31, 2015, the base rent was \$12,192 per month. The monthly base rent will increase by 3% annually on the anniversary date of the agreement. We are also obligated to pay a portion of the utilities for the building and increases in property tax and insurance.

We lease a 5,520 square foot manufacturing facility in Frederick, Maryland, which we use for laboratory and administrative purposes. As of December 2015, the base rent was \$8,865. The initial term of the lease expired in December 2015 and the Company renewed the lease for an additional seven years, see Note 12, Subsequent Events. The laboratory is being used to develop and manufacture our research products and the administration facility will be used for sales and marketing and general administration purposes. Our manufacturing laboratory space has clean rooms and is fitted with the necessary water purification, refrigeration, labeling equipment and standard manufacturing equipment to manufacture, package, store, and distribute media products.

Legal Proceedings

We are not party to any material legal proceedings.

[Table of Contents](#)

MANAGEMENT

Our executive officers are as follows:

<u>Name</u>	<u>Principal Occupation</u>	<u>Age</u>
Andrey Semechkin	Co-Chairman and Chief Executive Officer	56
Mahnaz Ebrahimi	Chief Financial Officer	58
Russell Kern	Executive Vice President and Chief Scientific Officer	30
Sofya Bakalova	Vice President, Legal Affairs & Operations	32

Andrey Semechkin, Ph.D., Co-Chairman and CEO, has been a Director of the Company since December 2008. Dr. Semechkin has served as our Chief Executive Officer since November 2009, and from December 2008 to November 2009 he served in senior management positions with the Company. Dr. Semechkin is a specialist in system analysis, strategic planning and corporate management. He is a member of the Russian Academy of Sciences and has been Deputy Director of Institute of System Analysis since 2004. Professor Semechkin was awarded the Russian Government Award in Science and Technology in 2006 and has written several scientific books. He has over 20 years' experience creating and managing businesses across different industries and scientific sectors.

Mahnaz Ebrahimi, Chief Financial Officer, joined the Company in September 2015. Ms. Ebrahimi has over 25 years of experience in executive/senior level financial management, accounting and SEC reporting matters, having worked with numerous publicly traded and privately held biotechnology, life science, and technology. Prior to joining the Company, she has served as a consultant for the Company as well as for Flux Power Holdings, Polaris Pharmaceutical, and Ocera Therapeutics. From October 2010 through July 2012, she served as Director, Financial Planning and Analysis and Treasury at eBioscience, where she was instrumental in the successful merger with Affymatrix in June 2012.

Russell Kern, Ph.D, Executive Vice President and Chief Scientific Officer, became a Director in October 2008. Dr. Kern has served as our Chief Scientific Officer since June 2013 and previously served since December 2008 in various scientific research and management positions, including as Vice President Research and Development. Dr. Kern was trained in medical genetics, stem cell biology and international business administration, and holds an M.S. degree from Faculty of Fundamental Medicine of Moscow State University. He earned his Ph.D. degree in Physiology from Anokhin Research Institute of Normal Physiology, Russian Academy of Medical Sciences. Dr. Kern is a well-known speaker on stem cell biology, including the use of stem cells for neurology and skin regeneration. He has publications in the field of clinical and molecular biology, and is author of various patent applications. Dr. Russell Kern is the son of Dr. Andrey Semechkin, our Co-Chairman and Chief Executive Officer.

Sofya Bakalova, J.D., Vice President, Legal Affairs & Operations, received her law degree from the University of Miami School of Law and has experience in various aspects of corporate and biotechnology law, regulatory affairs, project management, and business operations. After joining the Company in March 2011, she has held a variety of business and legal roles, including in-house counsel, advisor to the CEO, and Vice Chairman of the Board of Directors for Lifeline Skin Care. Ms. Bakalova holds a Bachelor's degree in Economics from San Francisco State University and has worked in the banking and finance industries prior to beginning her legal career.

Directors

Andrey Semechkin, Ph.D., Co-Chairman and CEO, has been a Director of the Company since December 2008. Dr. Semechkin is a specialist in system analysis, strategic planning and corporate management. He is a member of the Russian Academy of Sciences and has been Deputy Director of Institute of System Analysis since 2004. Professor Semechkin was awarded the Russian Government Award in Science and Technology in 2006 and has written several scientific books. He has over 20 years' experience creating and managing businesses across different industries and scientific sectors. We believe Dr. Semechkin's qualifications to serve on our Board include his extensive business, management and operational experience, including as our Chief Executive Officer, and his extensive knowledge of our business and opportunities, which bring valuable insights to our Board. He has been elected to the Board by the holders of Series D Preferred Stock.

Donald A. Wright became a director in March 2007. Since January 1, 2010, Mr. Wright became Chief Executive Officer and President of SIS, Inc. (Special Intelligence Service) which provides various services under contract to various agencies of the US Government

Table of Contents

and armed services. Mr. Wright was previously the Chairman and Founder of Everett, Washington-based Confluence Capital Group Inc., which provided consulting services to institutional investors, debt holders and public and private companies. From 1995 until 2006, Mr. Wright was Chief Executive Officer and President of Pacific Aerospace & Electronics, Inc., an engineering and manufacturing company that he helped to found and that designs, manufactures and sells components primarily for the aerospace, defense and transportation industries. We believe that Mr. Wright's qualifications to serve on our Board include his significant experience, including as chief executive officer, in managing companies in a broad range of industries, which contribute valuable knowledge and insights to the Board. Mr. Wright has been nominated as a director by the holders of Series G Preferred Stock.

Charles J. Casamento has been a director since June 2010. Mr. Casamento has served since 2007 as Executive Director and Principal of The Sage Group, a healthcare advisory group specializing in mergers, acquisitions, and partnerships between biotechnology companies and pharmaceutical companies. He was the president and CEO of Osteologix, Inc., a public biopharmaceutical company developing products for treating osteoporosis, from 2004 through 2007. From 1999 through 2004, he served as chairman of the board, president and CEO of Questcor Pharmaceuticals, Inc. which was subsequently acquired by Mallinckrodt. Mr. Casamento formerly served as RiboGene, Inc.'s president, CEO and chairman of the board from 1993 through 1999 until it merged with Cypros to form Questcor. He was co-founder, president and CEO of Interneuron Pharmaceuticals, Inc. (Indevus), a biopharmaceutical company, from 1989 until 1993. Indevus was eventually acquired by Endo. Mr. Casamento has also held senior management positions at Genzyme Corporation, where he was senior vice president, pharmaceuticals and biochemicals; American Hospital Supply, where he was vice president of business development and strategic planning for the Critical Care Division; Johnson & Johnson, Hoffmann-LaRoche, Inc. and Sandoz Inc. Mr. Casamento also serves on the Board of Directors of KineMed and Relmada Therapeutics. He is Chairman of the Audit Committee at both KineMed and Relmada. During his career he has sat on the boards of ten public companies and has also been a Director and Vice Chairman of The Catholic Medical Missions Board, a large not for profit organization providing health care services to third world countries. He has served as a guest lecturer at Fordham University and is on the Science Council of Fordham University. He holds a bachelor's degree in Pharmacy from Fordham University and an M.B.A. from Iona College and was originally licensed to practice pharmacy in the states of New York and New Jersey. We believe that Mr. Casamento's qualifications to serve on our Board include his significant experience as chief executive officer in various life sciences companies and his service on several other boards, which bring valuable knowledge and insights to the Board.

Paul V. Maier became a director in July 2007 and has over 25 years of experience as a senior executive in biotechnology and pharmaceutical companies. From November 2009 through his retirement in June 2014, he served as Chief Financial Officer of Sequenom, Inc., a publicly held company serving the discovery, clinical research, and molecular diagnostics market. From February 2007 until November 2009, he served as an independent financial consultant. Previously, Mr. Maier was Senior Vice President and Chief Financial Officer of Ligand Pharmaceuticals, Inc., a commercial stage biopharmaceutical company, a position he held from 1992 to 2007. From 1990 to 1992, Mr. Maier served as Vice President, Finance of DFS West, a division of DFS Group, LP a private multinational retailer. From 1984 to 1990, Mr. Maier was employed by ICN Pharmaceuticals, a pharmaceutical and biotechnology research products company, where he held various executive positions in finance and general management in ICN as well as SPI Pharmaceuticals, a publicly held subsidiary. Mr. Maier currently serves on the Board of Directors of Apricus Biosciences, MabVax Therapeutics, Ritter Pharmaceuticals and Biological Dynamics. Mr. Maier received an MBA from Harvard Business School and a BS from Pennsylvania State University. We believe Mr. Maier's qualifications to serve on our Board include his extensive experience in financial management and his service on other boards, which brings valuable knowledge and insights to our Board.

Russell Kern, Ph.D., Executive Vice President and Chief Scientific Officer, became a Director in October 2008. Dr. Kern was trained in medical genetics, stem cell biology and international business administration, and holds an M.S. degree from Faculty of Fundamental Medicine of Moscow State University. He earned his Ph.D. degree in Physiology from Anokhin Research Institute of Normal Physiology, Russian Academy of Medical Sciences. Dr. Kern is a well-known speaker on stem cell biology, including the use of stem cells for neurology and skin regeneration. He has publications in the field of clinical and molecular biology, and is author of various patent applications. Dr. Russell Kern is the son of Dr. Andrey Semechkin, our Co-Chairman and Chief Executive Officer. We believe that Dr. Kern's qualifications to serve on our Board include his extensive knowledge of our product development initiatives, including the underlying science, which bring valuable insights to our Board. He has been elected to the Board by the holders of Series D Preferred Stock.

Director Independence

The Board of Directors has determined that each of Mr. Maier, Mr. Wright and Mr. Casamento satisfy the independence requirements specified in the listing requirements of Nasdaq Marketplace Rules.

Compensation Committee Interlocks and Insider Participation

No member of our compensation committee is or has at any time during the past year been one of our officers or employees. None of our executive officers currently serves or in the past year has served as a member of the board of directors or compensation committee of any entity that has one or more executive officers serving on our Board of Directors or compensation committee.

EXECUTIVE COMPENSATION

The following table sets forth information concerning the compensation earned during the fiscal years ended December 31, 2015 and 2014 by our most highly compensated executive officers, who are sometimes referred to herein as our named executive officers.

Name	Year	Salary (1)	Option Awards (\$ (2))	Total
Andrey Semechkin	2015	\$217,192	\$ —	\$217,192
	2014	\$246,077	\$ 160,448	\$406,525
Russell Kern	2015	\$207,692	\$ —	\$207,692
	2014	\$196,923	\$ 128,547	\$325,470
Sofya Bakalova	2015	\$170,153	\$ 9,431	\$179,584
	2014	\$138,962	\$ 29,455	\$168,417

- (1) Actual amounts paid.
- (2) Represents the grant date fair value in accordance with ASC 718. These amounts have been calculated in accordance with ASC 718 using the market price of our stock on the respective grant dates. The assumptions used with respect to the valuation of option grants are set forth in the notes in the Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2015.

On March 12, 2015 we granted 1,334 options to Ms. Bakalova at an exercise price of \$9.30. These options expire on March 12, 2025. All of the shares in this grant were granted under the 2010 Equity Participation Plan. The options issued are subject to plan restrictions and will vest 25% at the one-year anniversary on March 12, 2016, and then 1/48th on each month commencing on March 12, 2016.

On November 10, 2014 we granted options as follows: Dr. Andrey Semechkin 400 shares, Dr. Russell Kern 400 shares, and Ms. Bakalova 400 shares at an exercise price of \$15.90. These options expire on November 10, 2024. All of the shares in this grant were granted under the 2010 Equity Participation Plan. The options issued are subject to plan restrictions and will vest 25% at the one-year anniversary on November 10, 2014, and then 1/48th on each month commencing on December 10, 2015.

On May 8, 2014 we granted options as follows: Dr. Andrey Semechkin 8,334 shares, Dr. Russell Kern 6,667 shares, and Ms. Bakalova 1,334 shares at an exercise price of \$23.25. These options expire on May 8, 2024. All of the shares in this grant were granted under the 2010 Equity Participation Plan. The options issued are subject to plan restrictions and will vest 25% at the one-year anniversary on May 8, 2014, and then 1/48th on each month commencing on June 8, 2015.

Fair Value Assumptions

The following table sets forth the assumptions used in 2015 and 2014 in the calculation of the option awards presented in our “Summary Compensation Table.” For all periods presented, the fair value of share-based awards for options awards was estimated at the date of grant using the Black-Scholes valuation model.

	Year ended December 2015	Year ended December 2014
Significant assumptions (weighted-average):		
Risk-free interest rate at grant date	1.56%	1.90%
Expected stock price volatility	94.05%	100.75%
Expected dividend payout	0%	0%
Expected option life-years based on management’s estimate	5.28 years	6.08 years

OUTSTANDING EQUITY AWARDS AT FISCAL YEAR-END

The following table sets forth certain information with respect to the value of all unexercised options previously awarded to our named executive officers as of December 31, 2015:

Outstanding Equity Awards at December 31, 2015

Name	Year Option Granted	Equity Incentive Plan Awards		Option Exercise Price	Option Expiration Date
		Number of Securities Underlying Unexercised Options Exercisable	Number of Securities Underlying Unexercised Options Unexercisable		
Andrey Semechkin	2009(1)	194	—	\$ 73.50	2019
	2009(1)	8,401	—	\$ 88.50	2019
	2011(2)	16,668	—	\$289.50	2021
	2012(5)	4,304	697	\$ 48.00	2022
	2013(7)	446	222	\$ 40.50	2023
	2014(8)	3,299	5,035	\$ 23.25	2024
	2014(9)	109	292	\$ 15.90	2024
Russell Kern	2008(1)	334	—	\$ 33.00	2018
	2009(1)	1,667	—	\$ 88.50	2019
	2011(2)	3,335	—	\$289.50	2021
	2012(4)	629	39	\$ 73.50	2022
	2012(6)	422	79	\$ 57.00	2022
	2013(7)	315	153	\$ 40.50	2023
	2014(8)	2,640	4,028	\$ 23.25	2024
	2014(9)	109	292	\$ 15.90	2024
Sofya Bakalova	2011(3)	67	—	\$165.00	2021
	2012(6)	286	48	\$ 57.00	2022
	2013(7)	317	150	\$ 40.50	2023
	2014(8)	530	804	\$ 23.25	2024
	2014(9)	109	291	\$ 15.90	2024
	2015(10)	—	1,334	\$ 9.30	2025

- (1) There were no unvested stock options for this award as of December 31, 2015.
- (2) The stock option vested as to 1/50 th of the shares subject to the stock option on each month commencing on February 13, 2011.
- (3) The stock option vested as to 1/50 th of the shares subject to the stock option on each month commencing on June 3, 2011.
- (4) The stock option vested as to 1/50 th of the shares subject to the stock option on each month commencing on February 13, 2012.
- (5) The stock option vested as to 1/50 th of the shares subject to the stock option on each month commencing on June 28, 2012.
- (6) The stock option vested as to 1/50 th of the shares subject to the stock option on each month commencing on July 22, 2012.
- (7) The stock option will vest 25% at the one year anniversary on April 9, 2014, and then 1/48th on each month commencing on May 9, 2014.
- (8) The stock option will vest 25% at the one year anniversary on May 8, 2015, and then 1/48th on each month commencing on June 8, 2015.
- (9) The stock option will vest 25% at the one year anniversary on November 10, 2015, and then 1/48th on each month commencing on December 10, 2015.
- (10) The stock option will vest 25% at the one year anniversary on March 12, 2016, and then 1/48th on each month commencing on April 12, 2016.

2006 Equity Participation Plan

The 2006 Equity Participation Plan (also referred to as “2006 Stock Plan”) provides for the grant of stock options or restricted stock and other equity based awards to our employees, officers, directors and consultants. Options may be either “incentive stock options” or non-qualified options under the federal tax laws and will have an exercise price equal to at least fair market value as of the grant date. A total of 100,000 shares of common stock have been reserved for issuance under the 2006 Stock Plan, subject to adjustments for certain corporate transactions or events. The purpose of the 2006 Stock Plan is to enable us to offer non-employee directors, officers, other key employees and consultants of the Company and our subsidiaries and affiliates, equity-based incentives, thereby attracting, retaining and rewarding these participants and strengthening the mutuality of interests between these participants and our stockholders. The 2006 Stock Plan is administered by the board of directors as a whole. The board of directors has the power to determine the terms of any restricted stock or options granted under the 2006 Stock Plan. Grants under the 2006 Stock Plan are generally not transferable, and each stock option is generally exercisable during the lifetime of the optionee only and can only be exercised by such optionee.

Equity Awards Issued Outside the 2006 Equity Participation Plan

In 2009, options to purchase 68,384 shares were issued outside the 2006 Equity Participation Plan. These grants include 57,472 shares that were issued with an exercise price of \$93.00 per share and 10,913 that were issued with an exercise price of \$88.50 per share.

2010 Equity Participation Plan

[Table of Contents](#)

The 2010 Equity Participation Plan (also referred to as “2010 Stock Plan”) provides for the grant of stock options or restricted stock and other equity based awards to our employees, officers, directors and consultants. Options may be either “incentive stock options” or non-qualified options under the federal tax laws and will have an exercise price equal to at least fair market value as of the grant date. A total of 1,200,000 shares of common stock have been reserved for issuance under the 2010 Stock Plan, subject to adjustments for certain corporate transactions or events. The purpose of the 2010 Stock Plan is to enable us to offer non-employee directors, officers, other key employees and consultants of the Company and our subsidiaries and affiliates, equity-based incentives, thereby attracting, retaining and rewarding these participants and strengthening the mutuality of interests between these participants and our stockholders. The 2010 Stock Plan is administered by the board of directors as a whole. The board of directors has the power to determine the terms of any restricted stock or options granted under the 2010 Stock Plan. Grants under the 2010 Stock Plan are generally not transferable, and each stock option is generally exercisable during the lifetime of the optionee only and can only be exercised by such optionee. Please see the discussion under Proposal 4 for additional information regarding the 2010 Stock Plan.

Stock Option Grants

The Board may grant options qualifying as incentive stock options under the Internal Revenue Code and nonqualified stock options. The term of an option will be fixed by the Board, but will not exceed ten years (or five years in the case of an incentive stock option granted to a person beneficially owning shares representing 10% or more of the total combined voting power of all classes of our stock, referred to as a 10% stockholder). The option price for any option will not be less than the fair market value of the common stock on the date of grant (or 110% of the fair market value in the case of an incentive stock option granted to a 10% stockholder). Generally, the fair market value will be the closing price of the common stock on the applicable trading market. Payment for shares purchased upon exercise of a stock option must be made in full at the time of purchase. Payment may be made (i) in cash; (ii) in a cash equivalent acceptable to the Board; (iii) by the transfer to us of shares owned by the participant for at least six months on the date of transfer; (iv) if the common stock is traded on an established securities market, the board may approve payment of the exercise price by a broker-dealer or by the option holder with cash advanced by the broker-dealer if the exercise notice is accompanied by the option holder’s written irrevocable instructions to deliver the common stock acquired upon exercise of the option to the broker-dealer; or (v) any other method acceptable to the Board and in compliance with applicable laws.

Restricted Stock

The board is authorized to grant restricted stock. Restricted stock is a grant of shares of common stock which may not be sold or disposed of and which shall be subject to such risks of forfeiture and other restrictions as the board may impose. Unless otherwise determined by the board, the purchase price for any restricted stock grant will be not less than 85% of the fair market value of common stock on the date of grant or at the time the purchase is consummated (or 100% of the fair market value in the case of restricted stock granted to a 10% stockholder). Generally, the fair market value will be the closing price of the common stock on the applicable trading market. Payment for shares purchased pursuant to a restricted stock grant may be made in (i) cash at the time of purchase; (ii) at the discretion of the board, according to a deferred payment or other similar arrangement with the participant; or (iii) in any other form of legal consideration that may be acceptable to the board in its discretion. A participant granted restricted stock generally has all of the rights of a stockholder of the Company, unless otherwise determined by the board.

Option Exercises and Stock Vested During Last Fiscal Year

There were no option exercises or stock vested by named executive officers during the fiscal year ended December 31, 2015.

2015 DIRECTOR COMPENSATION

The following table sets forth information concerning the compensation earned during the last fiscal year by each individual who served as a director at any time during the fiscal year, other than directors who are listed in the Summary Compensation Table (directors who are also employees do not receive any additional compensation for service on the Board):

Name (3)	Fees Earned or Paid in Cash (1)	Restricted Stock Awards (2)	Total
Donald A. Wright	\$ 57,500	\$ 30,150	\$87,650
Paul V. Maier	\$ 32,500	\$ 30,150	\$62,650
Charles J. Casamento	\$ 32,500	\$ 30,150	\$62,650

- (1) Mr. Wright, Mr. Maier and Mr. Casamento were compensated for their service on the Board and for service on any committee of the Board at the annual rate of \$32,500, while Mr. Wright receives an additional annual compensation of \$25,000 for serving as the Co-Chairman of the Board.
- (2) In March 2014, Mr. Wright, Mr. Maier, Mr. Casamento each received 1,084 shares of restricted stock, with one quarter vesting at the end of each fiscal quarter; 332 shares of restricted stock in September 2014 vesting at grant; 514 shares of restricted stock in December 2014 vesting at grant; and each received 267 shares of restricted stock granted on the date of the Annual Meeting in May 2014 (with Mr. Wright receiving an additional 167 restricted stock for his service as Co-Chairman) and vesting on the earlier of twelve months from the date of grant or the date of the 2015 Annual Meeting. The restricted stock award amount represents the grant date fair value of the Company’s stock.

Table of Contents

- (3) As of December 31, 2015, Mr. Wright held 2,404 stock options and 10,604 shares of restricted stock; Mr. Maier held 1,736 stock options and 10,384 shares of restricted stock; Mr. Casamento held 1,002 stock options and 10,104 shares of restricted stock.

In May 2015, the Board revised the compensation program for non-employee directors. Currently, non-employee directors will receive (i) annual cash compensation of \$32,500 (with Mr. Wright receiving an additional \$25,000 per year for his service as Co-Chairman); (ii) an annual grant of 1,334 shares of Common Stock; such grant to be made in fully-vested shares at the next annual meeting (or, if earlier, upon a change-in-control); (iii) quarterly grants of stock effective on the last day of each quarter, with the number of shares of stock equal to \$8,125 divided by the average closing price of the Common Stock of the Company over the five trading days preceding the date of grant.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Pursuant to our Code of Business Conduct and Ethics, our executive officers, directors, and principal stockholders, including their immediate family members and affiliates, are prohibited from entering into transactions which create, or would appear to create, a conflict of interest with us. Our Audit Committee is responsible for reviewing and approving related party transactions. Our Audit Committee shall approve only those agreements that, in light of known circumstances, are in, or are not inconsistent with, our best interests, as our Audit Committee determines in the good faith exercise of its discretion.

Except with respect to the transactions described below, since January 1, 2014, none of our directors or executive officers, nor any person who beneficially owns, directly or indirectly, shares carrying more than 10% of the voting rights attached to our outstanding shares, nor any of our promoters, nor any relative or spouse of any of the foregoing persons has any material interest, direct or indirect, in any transaction for the past two years or in any presently proposed transaction to which we were or are to be party. None of our directors or executive officers is indebted to us.

From time to time, various persons, including certain officers, directors, principal shareholders, and their affiliates, have advanced funds to Lifeline and/or ISC California for operating expenses. As of December 31, 2015, we had an outstanding related party note payable to Dr. Andrey Semechkin, our Co-Chairman and CEO, in the amount of \$3,110,000. This note, which was issued on December 10, 2015, bears interest at the annual rate of one-half of a percent (0.50%) and was due on January 10, 2016.

We are parties to an operating lease for our corporate offices in Carlsbad, California with S Real Estate Holdings LLC. S Real Estate Holdings LLC is owned by Dr. Andrey Semechkin, the Company's Chief Executive Officer and Co-Chairman of the Board of Directors. During fiscal years 2015, and 2014, the Company recorded \$139,000 in rent expense related to the facility lease arrangement with related parties.

On May 29, 2014, to obtain funding for working capital purposes, we entered into a securities purchase agreement with Dr. Andrey Semechkin and Dr. Russell Kern, our Co-Chairman and Chief Executive Officer and Executive Vice President and Chief Scientific Officer and director, respectively, to sell a total of 22,223 shares of common stock at a price of \$22.50 per share, for a total purchase price of \$500,000.

On June 11, 2014, we entered into a series of warrant exchange agreements (the "Warrant Exchange Agreements") with the holders of its Series A Warrants and Placement Agent Warrants that were issued by us pursuant to the 2013 S-1 July Registered Offering. Under the Warrant Exchange Agreements, we agreed to issue a total of 297,772 shares of common stock (the "Exchange Shares") to the warrant holders in exchange for the cancellation of the Series A Warrants to purchase 243,699 shares of common stock and the Placement Agent Warrants to purchase 4,445 shares of common stock and Series A Warrants. Dr. Andrey Semechkin and Dr. Russell Kern, the Company's Co-Chairman and Chief Executive Officer and Executive Vice President and Chief Scientific Officer and director, respectively, participated on the same terms as the other warrant holders, agreeing to exchange Series A Warrants to purchase 67,255 shares of common stock for 80,706 shares of common stock. The closing of the transaction occurred on June 16, 2014 with the issuance of the Exchange Shares. Upon settlement of the exchange transaction, there were no remaining Series A Warrants or Placement Agent Warrants outstanding.

On June 26, 2014, to obtain funding for working capital purposes, we entered into a securities purchase agreement with Dr. Andrey Semechkin and Dr. Russell Kern, our Co-Chairman and Chief Executive Officer and Executive Vice President and Chief Scientific Officer and director, respectively, to sell a total of 36,667 shares of common stock at a price of \$15.00 per share, for a total purchase price of \$550,000.

On August 6, 2014 to obtain funding for working capital purposes, we entered into a securities purchase agreement with Dr. Andrey Semechkin and Dr. Russell Kern, our Co-Chairman and Chief Executive Officer and Executive Vice President and Chief Scientific Officer and director, respectively, to sell a total of 40,000 shares of common stock at a price of \$15.00 per share, for a total purchase price of \$600,000.

Table of Contents

From August 29, 2014 through October 10, 2014, we issued 800 shares of common stock to three executive officers of the Company, for an aggregate of \$12,000.

On September 10, 2014 to obtain funding for working capital purposes, we entered into a securities purchase agreement with Dr. Andrey Semechkin and Dr. Russell Kern, our Co-Chairman and Chief Executive Officer and Executive Vice President and Chief Scientific Officer and director, respectively, to sell a total of 29,630 shares of common stock at a price of \$13.50 per share, for a total purchase price of \$400,000.

On October 14, 2014, we closed a private placement of Series H-1 and Series H-2 preferred stock and warrants, convertible and exercisable, respectively, into shares of our common stock, for gross proceeds of \$2,500,000. The investors in the Private Placement included institutional investors and Andrey Semechkin and Russell Kern, our Chief Executive Officer and Co-Chairman and Executive Vice President and Chief Scientific Officer and Director, respectively. In this transaction we also issued Series A Warrants to purchase up to approximately 258,519 shares of common stock at an initial exercise price of \$8.64 per share with a term of five and 1/2 years, Series B Warrants to purchase up to approximately 258,519 shares of common stock at an initial exercise price of \$9.67 per share with a term of six months and Series C Warrants to purchase up to approximately 258,519 shares of common stock at an initial exercise price of \$9.67 per share with a term of twelve months.

On December 22, 2014, we issued 39,295 shares of common stock to Dr. Andrey Semechkin, our Co-Chairman and Chief Executive Officer, upon his exercise of Series B Warrants at an exercise price of \$8.64 per share for total proceeds of \$339,506.

On February 23, 2015, we issued 12,409 shares of common stock to Dr. Russell Kern, the Company's Executive Vice President and Chief Scientific Officer and director, upon his exercise of Series B Warrants at an exercise price of \$6.72 per share for total proceeds of \$83,388.

On March 31, 2015, we issued 39,295 and 12,409 shares of common stock to Dr. Andrey Semechkin, our Co-Chairman and Chief Executive Officer and Dr. Russell Kern, the Company's Executive Vice President and Chief Scientific Officer and director, respectively, upon their exercise of Series C Warrants at an exercise price of \$6.72 per share for total proceeds of \$347,448.

On November 24, 2015, we issued 39,294 shares of common stock to Dr. Andrey Semechkin, our Co-Chairman and Chief Executive Officer upon his exercise of Series A Warrants at an exercise price of \$1.7933 per share for total proceeds of \$70,466.

On March 15, 2016, we closed a private placement of Series I-1 and Series I-2 preferred stock and warrants, convertible and exercisable, respectively, into shares of our common stock, for gross proceeds of \$6,310,000. The investors in the Private Placement included institutional investors and Andrey Semechkin, our Chief Executive Officer and Co-Chairman, who all purchased on the same terms. In this transaction we also issued to Dr. Andrey Semechkin, our Chief Executive Officer and Co-Chairman Series A Warrants to purchase up to 2,462,856 shares of common stock at an initial exercise price of \$3.64 per share with a term of five years, Series B Warrants to purchase up to 2,462,856 shares of common stock at an initial exercise price of \$1.75 per share with a term of six months and Series C Warrants to purchase up to 2,462,856 shares of common stock at an initial exercise price of \$1.75 per share with a term of twelve months.

PRINCIPAL STOCKHOLDERS

The following table sets forth information regarding the beneficial ownership of our common stock and our preferred stock as of March 31, 2016, by (i) each person who is known by us to beneficially own 5% or more of our common stock or 5% or more of our preferred stock, (ii) each of our directors and named executive officers, and (iii) all executive officers and directors as a group. In general, a person is deemed to be a “beneficial owner” of a security if that person has or shares the power to vote or direct the voting of such security, or the power to dispose or to direct the disposition of such security. A person is also deemed to be a beneficial owner of any securities of which the person has the right to acquire beneficial ownership within 60 days. To the best of our knowledge, all persons named have sole voting and investment power with respect to such shares, except as otherwise noted.

Other than for matters adversely affecting the rights and preferences of the preferred stock, the shares of our preferred stock (other than shares of Series I-1 and Series I-2 preferred stock, which is non-voting) vote together with the shares of common stock on most matters, with the shares of preferred stock entitled to cast a number of votes equal to the number of shares of common stock into which the shares of preferred stock could be converted. As of March 31, 2016 there were a total of 5,256,353 shares of preferred stock outstanding that were convertible into a total of 6,798,592 shares of common stock. Dr. Andrey Semechkin and Dr. Russell Kern, either directly or through entities that they control, beneficially own a total of 5,004,353 shares of preferred stock, that could be converted into a total of 5,512,878 shares of common stock. As such, Dr. Andrey Semechkin and Dr. Russell Kern control approximately 95.5% of the voting power of the preferred stock. The shares of common stock issuable upon conversion of the preferred stock are reflected in the following table.

In computing the number of shares of Common Stock beneficially owned by a person and the percentage ownership of such person, shares of Common Stock subject to warrants or options held by that person that are currently exercisable or exercisable within 60 days of March 31, 2016 were deemed to be outstanding, and shares of preferred stock owned by such person and convertible into Common Stock were deemed to be converted into Common Stock. Such shares were not deemed to be outstanding, however, for the purpose of computing the percentage ownership of any other person.

Stock Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Name of Beneficial Owner	Actual Beneficial Ownership	Percent of Beneficial Ownership (1)
Andrey Semechkin (2)(3)(4)(5)(6)	13,829,179	87.48%

- (1) Based on 2,814,910 shares outstanding as of March 31, 2016, plus shares issuable under derivative securities which are exercisable within 60 days of March 31, 2016.
- (2) The business address for each director and officer is 5950 Priestly Drive, Carlsbad, CA 92008.
- (3) Includes shares issuable upon conversion of outstanding shares of preferred stock and warrants and options to purchase shares of our common stock exercisable within 60 days of March 31, 2016 in the following amounts:
Dr. Andrey Semechkin, 12,994,093 shares; Ms. Ebrahimi, 54,167 shares; Dr. Russell Kern, 12,994,093 shares; Mr. Casamento, 1,002 shares; Mr. Maier, 1,736 shares; Mr. Wright, 2,404 shares; and All Executive Officers and Directors as a Group, 13,055,366 shares.
- (4) The business address for X-Master, Inc. is 1 Overlook Drive, Unit 11, Amherst, New Hampshire 03031. X-Master Inc. is owned by Dr. Andrey Semechkin. Dr. Russell Kern is the President of X-Master, Inc. The shares held by X-Master are all issuable upon conversion of outstanding shares of preferred stock and are considered to be beneficially owned by each of Andrey Semechkin and Russell Kern.
- (5) Pursuant to the applicable SEC rules, each of Dr. Andrey Semechkin and Dr. Russell Kern are considered to be the beneficial owner of shares held by the other.
- (6) The business address for AR Partners LLC is 5950 Priestly Drive, Carlsbad, CA 92008. AR Partners LLC is owned by Dr. Andrey Semechkin and Dr. Russell Kern. Dr. Russell Kern is the General Manager of AR Partners LLC. The shares held by AR Partners are all issuable upon conversion of outstanding shares of preferred stock and are considered to be beneficially owned by each of Andrey Semechkin and Russell Kern.

DESCRIPTION OF SECURITIES

General

Our certificate of incorporation authorizes us to issue 740,000,000 shares of capital stock, \$0.001 par value per share, of which 720,000,000 shares are designated common stock and 20,000,000 shares are designated preferred stock. As of March 31, 2016, there were issued and outstanding 2,814,910 shares of common stock, warrants of 11,286,201, for which we have reserved 11,286,201 shares of common stock, 250,000 shares of Series B preferred stock, 43 shares of Series D preferred stock, 5,000,000 shares of Series G preferred stock, and 6,310 shares of Series I preferred stock.

Common Stock

Voting Rights

Holders of our common stock are entitled to one vote per share. Subject to any voting rights granted to holders of any preferred stock, the affirmative vote of a majority of the shares present in person or by proxy and entitled to vote on the subject matter, other than the election of directors, will generally be required to approve matters voted on by our stockholders. Directors will be elected by plurality of the votes of the shares present in person or represented by a proxy at the meeting entitled to vote on the election of directors. Our certificate of incorporation does not provide for cumulative voting.

Dividends

Subject to the rights of holders of any outstanding preferred stock, the holders of outstanding shares of our common stock will share ratably on a per share basis in any dividends declared from time to time by our Board of Directors.

Other Rights

Subject to the rights of holders of any outstanding preferred stock, upon our liquidation, dissolution or winding up, we will distribute any assets legally available for distribution to our stockholders, ratably among the holders of our common stock outstanding at that time.

Preferred Stock

Our board of directors, without stockholder approval, but subject to the rights of our outstanding preferred stock, may issue preferred stock in one or more series from time to time and fix or alter the designations, relative rights, priorities, preferences, qualifications, limitations and restrictions of the shares of each series, to the extent that those are not fixed in our certificate of incorporation. The rights, preferences, limitations and restrictions of different series of preferred stock may differ with respect to dividend rates, amounts payable on liquidation, voting rights, conversion rights, redemption provisions, sinking fund provisions and other matters. Our board of directors may authorize the issuance of preferred stock that ranks senior to our common stock with respect to the payment of dividends and the distribution of assets on liquidation. In addition, our board of directors can fix the limitations and restrictions, if any, upon the payment of dividends on our common stock to be effective while any shares of preferred stock are outstanding. We have outstanding shares of Series B, Series D, Series G and Series I Preferred Stock.

Series B Preferred Stock

We have 250,000 shares of Series B preferred stock issued and outstanding. The Series B preferred stock is currently convertible into shares of common stock at the conversion ratio of 0.57 shares of common stock for each share of Series B preferred stock converted. The Series B preferred stock conversion rate is subject to anti-dilution protection (subject to the exceptions) in the event we issue shares of stock at a price below \$1.75 per share, which is the resulting conversion price following the March 2016 financing transaction.

The Series B preferred stock has a priority (senior to the shares of common stock) on any sale or liquidation of the Company equal to the purchase price of the Series B preferred stock, plus a liquidation premium of 6% per year. If the Company elects to declare a dividend on common stock in any year, it must first pay to the Series B preferred stockholders a dividend equal to the amount of the dividend the Series B preferred stockholder would receive if the Series B preferred stock were converted just prior to the dividend declaration.

Each share of Series B preferred stock has the same voting rights as the number of shares of common stock into which it would be convertible on the record date.

Table of Contents

Series D Preferred Stock

We have 43 shares of Series D preferred stock outstanding. These shares are held by (i) X-Master Inc., which is a related party and affiliated with our Chief Executive Officer and Co-Chairman of the Board of Directors Dr. Andrey Semechkin and Dr. Russell Kern, Executive Vice President and Chief Scientific Officer and a director and (ii) our Chief Executive Officer and Co-Chairman of the Board of Directors Dr. Andrey Semechkin.

The holders of Series D preferred stock are entitled to vote as a separate class to elect two members of our Board of Directors. The holders of Series D preferred stock must approve certain transactions and are entitled to vote with the common stock on other matters on an “as converted” basis. Historically, the Series D preferred stock earned cumulative dividends at a rate of 10% per annum through December 31, 2011 and 6% per annum effective January 1, 2012, payable 15 days after each quarter end.

On October 12, 2012, the Company and the holders of all of the outstanding shares of Series D and Series G preferred stock entered into a Waiver Agreement (the “Waiver Agreement”) pursuant to which such holders irrevocably waived their right to receive any and all accrued but unpaid dividends and interest thereon on or after September 30, 2012 on the Series D and Series G preferred stock. Under the Waiver Agreement, the holders of Series D preferred stock are restricted from transferring any shares of Series D preferred stock unless the transferee agrees to be bound by the Waiver Agreement.

The conversion rate of Series D preferred stock is protected by anti-dilution provisions in the event we issue shares of stock (or are deemed to issue shares of stock) at a price below \$1.75 per share, which is the resulting conversion price following the March 2016 financing transaction.

Series G Preferred Stock

We have 5,000,000 shares of Series G preferred stock outstanding. These shares are held by AR Partners, LLC, an affiliate of Dr. Andrey Semechkin, the Company’s Co-Chairman and Chief Executive Officer, and Dr. Russell Kern, Executive Vice President and Chief Scientific Officer and a director.

The Series G preferred stock was initially convertible into shares of common stock at \$60.00 per share, resulting in conversion ratio of 0.0167 shares of common stock for every share of Series G preferred stock. The conversion price may be adjusted for stock splits and other combinations, dividends and distributions, recapitalizations and reclassifications, exchanges or substitutions and is subject to a weighted-average adjustment in the event of the issuance of additional shares of common stock below the conversion price. As a result of subsequent transactions, the current conversion price of the Series G preferred stock is \$8.4334, and the conversion ratio is 0.12 shares of common stock for every share of Series G preferred stock.

The shares of Series G preferred stock have priority over the Series B preferred stock, and Common Stock on the proceeds from any sale or liquidation of the Company in an amount equal to the purchase price of the Series G preferred stock, but such payment may be made only after payment in full of the liquidation preferences payable to holders of any shares of Series D preferred stock then outstanding. Each share of Series G preferred stock has the same voting rights as the number of shares of Common Stock into which it would be convertible on the record date. As long as there are at least 1,000,000 shares of Series G preferred stock outstanding, the holders of Series G preferred stock have (i) the initial right to propose the nomination of two members of the Board, at least one of which nominees shall be subject to the approval of the Company’s independent directors, for election by the stockholder’s at the Company next annual meeting of stockholders, or, elected by the full board of directors to fill a vacancy, as the case may be, and (ii) the right to approve any amendment to the certificate of incorporation, certificates of designation or bylaws, in manner adverse to the Series G preferred stock, alter the percentage of board seats held by the Series G preferred stock directors or increase the authorized number of shares of Series G preferred stock. At least one of the two directors nominated by holders of the Series G preferred stock shares shall be independent based on the NASDAQ listing requirements. The holders of Series G preferred stock must approve certain matters and are entitled to vote with the Common Stock on an “as converted” basis on other matters.

From the date of issuance of the Series G preferred stock, cumulative dividends at the rate per annum of six percent (6%) of the purchase price per share accrued quarterly on such shares of Series G preferred stock. However, on October 12, 2012, the Company and the holders of all of the outstanding shares of Series D and Series G preferred stock entered into Waiver Agreement pursuant to which such holders irrevocably waived their right to receive any and all accrued but unpaid dividends and interest thereon on or after September 30, 2012 on the Series D and Series G preferred stock. Under the Waiver Agreement, the holders of Series G preferred stock are restricted from transferring any shares of Series G Preferred Stock unless the transferee agrees to be bound by the Waiver Agreement.

Series I-1 and I-2 Preferred Stock

We have a total of 6,310 shares of Series I-1 and I-2 preferred stock outstanding. These shares are held by outside investors and Dr. Andrey Semechkin, the Company’s Co-Chairman and Chief Executive Officer.

Table of Contents

Subject to certain ownership limitations with respect to the Series I-1 Preferred Stock, the Series I Preferred Stock is convertible at any time into shares of Common Stock at an initial conversion price of \$1.75 per share. The Series I Preferred Stock is non-voting, is only entitled to dividends in the event that dividends are paid on the Common Stock, and will not have any preferences over the Common Stock, except that the Series I Preferred Stock shall have preferential liquidation rights over the Common Stock. Other than the Series I-1 Preferred Stock having a beneficial ownership limitation, the Series I-1 Preferred Stock and Series I-2 Preferred Stock are substantially identical. The conversion price of the Series I Preferred Stock is subject to certain resets as set forth in the Certificates of Designation, including the date of the amendment to the certificate of incorporation with respect to any reverse stock split, the effectiveness dates of the registration statement and in certain instances the six and twelve month anniversaries of their issuance date.

Warrants issued in the Private Placement

In the Private Placement, we issued (i) Series A Warrants (the “Series A Warrants”) to purchase 3,605,713 shares of common stock at an initial exercise price of \$3.64 per share with a term of five years, (ii) Series B Warrants (the “Series B Warrants”) to purchase 3,605,713 shares of common stock at an initial exercise price of \$1.75 per share with a term of six months and (iii) Series C Warrants (the “Series C Warrants”, together with the Series A Warrants and the Series B Warrants, collectively, the “Investor Warrants”) to purchase up to approximately 3,605,713 shares of common stock at an initial exercise price of \$1.75 per share with a term of twelve months. The exercise price of the Warrants is subject to certain reset adjustments as set forth in the Warrant, including the date of the amendment to the Company’s certificate of incorporation with respect to any reverse stock split, the effectiveness dates of the registration statements and in certain instances the six and twelve month anniversaries of the date of issuance of the Warrants

The Warrants issued to Sabby Volatility Warrant Master Fund Ltd. and Sabby Healthcare Volatility Master Fund, Ltd. contain exercise and conversion limitations providing that a holder thereof may not convert or exercise (as the case may be) to the extent that, if after giving effect to such conversion or exercise (as the case may be), the holder or any of its affiliates would beneficially own in excess of 4.99% of the outstanding shares of common stock immediately after giving effect to such conversion or exercise (as the case may be). However, the 4.99% limitation would not prevent such selling stockholder from acquiring and selling in excess of 4.99% of our common stock through a series of acquisitions and sales while never beneficially owning more than 9.99% in aggregate.

Registration Rights in the Private Placement

In connection with the Private Placement, we also entered into a registration rights agreement with the Sabby Purchasers pursuant to which, as amended, we are obligated to file a registration statement to register the resale of (i) 200% of the shares of Common Stock issuable upon conversion of the Series I-1 Preferred Stock, (ii) 200% of the shares of common stock issuable upon exercise of the Series B Warrants and Series C Warrants, and (iii) 100% of the shares of common stock issuable upon exercise of the Series A Warrants. In addition to the registration rights, the Sabby Purchasers are entitled to receive liquidated damages upon the occurrence of a number of events relating to filing, obtaining and maintaining an effective registration statement covering the shares underlying the Series I-1 Preferred Stock and the Warrants, including the failure of the Company to file a resale registration statement by no later than April 29, 2016 and the failure of the Company to have such resale registration statement declared effective by the Securities and Exchange Commission (the “SEC”) by no later than May 14, 2016, subject to certain exceptions.

Transfer Agent

The transfer agent for our common stock is Securities Transfer Corporation. The transfer agent address is 2591 Dallas Parkway, Suite 102, Frisco, TX 75034.

PLAN OF DISTRIBUTION

Each Selling Stockholder (the “Selling Stockholders”) of the securities and any of their pledgees, assignees and successors-in-interest may, from time to time, sell any or all of their securities covered hereby on the principal trading market or any other stock exchange, market or trading facility on which the securities are traded or in private transactions. These sales may be at fixed or negotiated prices. A Selling Stockholder may use any one or more of the following methods when selling securities:

- ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;
- block trades in which the broker-dealer will attempt to sell the securities as agent but may position and resell a portion of the block as principal to facilitate the transaction;
- purchases by a broker-dealer as principal and resale by the broker-dealer for its account;
- an exchange distribution in accordance with the rules of the applicable exchange;
- privately negotiated transactions;
- settlement of short sales;

Table of Contents

- in transactions through broker-dealers that agree with the Selling Stockholders to sell a specified number of such securities at a stipulated price per security;
- through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;
- a combination of any such methods of sale; or
- any other method permitted pursuant to applicable law.

The Selling Stockholders may also sell securities under Rule 144 under the Securities Act of 1933, as amended (the “Securities Act”), if available, rather than under this prospectus.

Broker-dealers engaged by the Selling Stockholders may arrange for other brokers-dealers to participate in sales. Broker-dealers may receive commissions or discounts from the Selling Stockholders (or, if any broker-dealer acts as agent for the purchaser of securities, from the purchaser) in amounts to be negotiated, but, except as set forth in a supplement to this Prospectus, in the case of an agency transaction not in excess of a customary brokerage commission in compliance with FINRA Rule 2440; and in the case of a principal transaction a markup or markdown in compliance with FINRA IM-2440.

In connection with the sale of the securities or interests therein, the Selling Stockholders may enter into hedging transactions with broker-dealers or other financial institutions, which may in turn engage in short sales of the securities in the course of hedging the positions they assume. The Selling Stockholders may also sell securities short and deliver these securities to close out their short positions, or loan or pledge the securities to broker-dealers that in turn may sell these securities. The Selling Stockholders may also enter into option or other transactions with broker-dealers or other financial institutions or create one or more derivative securities which require the delivery to such broker-dealer or other financial institution of securities offered by this prospectus, which securities such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The Selling Stockholders and any broker-dealers or agents that are involved in selling the securities may be deemed to be “underwriters” within the meaning of the Securities Act in connection with such sales. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of the securities purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act. Each Selling Stockholder has informed the Company that it does not have any written or oral agreement or understanding, directly or indirectly, with any person to distribute the securities.

The Company is required to pay certain fees and expenses incurred by the Company incident to the registration of the securities. The Company has agreed to indemnify the Selling Stockholders against certain losses, claims, damages and liabilities, including liabilities under the Securities Act.

Because Selling Stockholders may be deemed to be “underwriters” within the meaning of the Securities Act, they will be subject to the prospectus delivery requirements of the Securities Act including Rule 172 thereunder. In addition, any securities covered by this prospectus which qualify for sale pursuant to Rule 144 under the Securities Act may be sold under Rule 144 rather than under this prospectus. The Selling Stockholders have advised us that there is no underwriter or coordinating broker acting in connection with the proposed sale of the resale securities by the Selling Stockholders.

We agreed to keep this prospectus effective until the earlier of (i) the date on which the securities may be resold by the Selling Stockholders without registration and without regard to any volume or manner-of-sale limitations by reason of Rule 144, without the requirement for the Company to be in compliance with the current public information under Rule 144 under the Securities Act or any other rule of similar effect or (ii) all of the securities have been sold pursuant to this prospectus or Rule 144 under the Securities Act or any other rule of similar effect. The resale securities will be sold only through registered or licensed brokers or dealers if required under applicable state securities laws. In addition, in certain states, the resale securities covered hereby may not be sold unless they have been registered or qualified for sale in the applicable state or an exemption from the registration or qualification requirement is available and is complied with.

Under applicable rules and regulations under the Exchange Act, any person engaged in the distribution of the resale securities may not simultaneously engage in market making activities with respect to the common stock for the applicable restricted period, as defined in Regulation M, prior to the commencement of the distribution. In addition, the Selling Stockholders will be subject to applicable provisions of the Exchange Act and the rules and regulations thereunder, including Regulation M, which may limit the timing of purchases and sales of the common stock by the Selling Stockholders or any other person. We will make copies of this prospectus available to the Selling Stockholders and have informed them of the need to deliver a copy of this prospectus to each purchaser at or prior to the time of the sale (including by compliance with Rule 172 under the Securities Act).

LEGAL MATTERS

The validity of the issuance of securities offered by this prospectus has been passed upon for us by DLA Piper LLP (US), San Diego, California.

EXPERTS

The consolidated balance sheets of International Stem Cell Corporation and Subsidiaries as of December 31, 2015 and 2014, and the related consolidated statements of operations, changes in redeemable convertible preferred stock and stockholders' equity (deficit) and cash flows for the years then ended have been incorporated herein and in the registration statement in reliance upon the report of Mayer Hoffman McCann P.C., independent registered public accounting firm, incorporated herein, and given upon the authority of said firm as expert in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We file reports, proxy statements and other information with the SEC. Copies of our reports, proxy statements and other information may be inspected and copied at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Copies of these materials can also be obtained by mail at prescribed rates from the Public Reference Room of the SEC, 100 F Street, N.E., Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an internet site that contains reports, proxy and information statements and other information regarding International Stem Cell Corporation and other issuers that file electronically with the SEC. The address of the SEC internet site is www.sec.gov. In addition, we make available on or through our Internet site copies of these reports as soon as reasonably practicable after we electronically file or furnish them to the SEC. Our Internet site can be found at www.internationalstemcell.com.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders

INTERNATIONAL STEM CELL CORPORATION AND SUBSIDIARIES

We have audited the accompanying consolidated balance sheets of International Stem Cell Corporation and Subsidiaries (“the Company”) as of December 31, 2015 and 2014, and the related consolidated statements of operations, changes in redeemable convertible preferred stock and stockholders’ equity (deficit), and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of International Stem Cell Corporation and Subsidiaries as of December 31, 2015 and 2014, and the consolidated results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the consolidated financial statements, the Company has incurred recurring operating losses and is dependent on additional financing to fund operations. These conditions raise substantial doubt about the Company’s ability to continue as a going concern. Management’s plans in regard to these matters are described in Note 1 to the consolidated financial statements. The consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

International Stem Cell Corporation and Subsidiaries
Notes to Consolidated Financial Statements

1. Organization and Significant Accounting Policies

Business Combination and Corporate Restructure

BTHC III, Inc. (“BTHC III” or the “Company”) was organized in Delaware in June 2005 as a shell company to effect the reincorporation of BTHC III, LLC, a Texas limited liability company. On December 28, 2006, the Company effected a Share Exchange pursuant to which it acquired all of the stock of International Stem Cell Corporation, a California corporation (“ISC California”). After giving effect to the Share Exchange, the stockholders of ISC California owned 93.7% of issued and outstanding shares of common stock. As a result of the Share Exchange, ISC California is now the wholly-owned subsidiary, though for accounting purposes it was deemed to have been the acquirer in a “reverse merger.” In the reverse merger, BTHC III is considered the legal acquirer and ISC California is considered the accounting acquirer. On January 29, 2007, the Company changed its name from BTHC III, Inc. to International Stem Cell Corporation.

Lifeline Cell Technology, LLC (“LCT”) was formed in the State of California on August 17, 2001. LCT is in the business of developing and manufacturing purified primary human cells and optimized reagents for cell culture. LCT’s scientists have used a technology, called basal medium optimization, to systematically produce products designed to culture specific human cell types and to elicit specific cellular behaviors. These techniques also produce products that do not contain non-human animal proteins, a feature desirable to the research and therapeutic markets. LCT distinguishes itself in the industry by having in place scientific and manufacturing staff with the experience and knowledge to set up systems and facilities to produce a source of consistent, standardized, non-human animal protein free cell products, some of which are suitable for FDA approval.

On July 1, 2006, LCT entered into an agreement among LCT, ISC California and the holders of membership units and warrants. Pursuant to the terms of the agreement, all the membership units in LCT were exchanged for 133,334 shares of ISC California Common Stock and for ISC California’s assumption of LCT’s obligations under the warrants. LCT became a wholly-owned subsidiary of ISC California.

Lifeline Skin Care, Inc. (“LSC”) was formed in the State of California on June 5, 2009 and is a wholly-owned subsidiary of ISC California. LSC develops, manufactures and markets cosmetic products, utilizing an extract derived from the Company’s human parthenogenetic stem cell technologies.

Cyto Therapeutics was registered in the state of Victoria, Australia, on December 19, 2014 and is a limited proprietary company and a wholly-owned subsidiary of the Company. Cyto Therapeutics is a research and development company for the Therapeutic Market, which will conduct clinical trials in Australia for the use of human parthenogenetic stem cell (hpSCs) in the treatment of Parkinson’s disease.

Reverse Stock Split

Effective July 29, 2015 and pursuant to the reverse stock split approved by the Company’s Board of Directors, each 150 shares of issued and outstanding common stock were combined into and became one share of common stock and no fractional shares were issued. The accompanying financial statements and related disclosures give retroactive effect to the reverse stock split for all years presented.

Going Concern

The Company needs to raise additional working capital. The timing and degree of any future capital requirements will depend on many factors. Currently, the Company’s burn rate is approximately \$343,000 per month, excluding capital expenditures and patent costs averaging \$62,000 per month. There can be no assurance that the Company will be successful in maintaining its normal operating cash flow, and that such cash flows will be sufficient to

Table of Contents

sustain the Company's operations through 2016. Based on the above, there is substantial doubt about the Company's ability to continue as a going concern. The consolidated financial statements were prepared assuming that the Company is a going concern. The consolidated financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

Management's plans in regard to these matters are focused on managing its cash flow, the proper timing of its capital expenditures, and raising additional capital or financing in the future. In December 2013, the Company filed a registration statement with the Securities Exchange Commission (the "SEC"), which allows the Company to sell up to \$10,250,000 of common stock to Lincoln Park Capital Fund, LLC ("Lincoln Park") from time to time through January 2017 at the Company's discretion pursuant to the terms of a Common Stock Purchase Agreement entered into with Lincoln Park on December 10, 2013 (the "Purchase Agreement"). In connection with agreements entered into as part of a private placement effected October 14, 2014, the Company may not sell shares to Lincoln Park until March 2016. For further discussion, see Note 6.

Basis of Presentation

The Company is a biotechnology company focused on therapeutic and clinical product development with multiple long-term therapeutic opportunities and two revenue-generating subsidiaries with potential for increased future revenues. The Company has generated product revenues from the two commercial businesses of \$7,551,000 and \$7,017,000 for the years ended December 31, 2015 and 2014, respectively. The Company currently has no revenue generated from its principal operations in therapeutic and clinical product development through research and development efforts.

Principles of Consolidation

The Company's consolidated financial statements include the accounts of International Stem Cell Corporation and its subsidiaries after intercompany balances and transactions have been eliminated.

Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less when purchased to be cash equivalents.

Restricted Cash

Prior to July 2015, the Company was required to maintain \$50,000 in a restricted certificate of deposit account in order to fully collateralize two revolving credit card accounts. In July 2015, after closing the collateralized credit card accounts, the Company received full reimbursement of the \$50,000 and is no longer required to maintain any restricted cash.

Inventories

Inventory is accounted for using the first-in, first-out (FIFO) method for our Lifeline Cell Technology cell culture media and reagents, average cost and specific identification methods for our Lifeline Skin Care products, and specific identification method for our Lifeline Cell Technology products. Inventory balances are stated at the lower of cost or market. Lab supplies used in the research and development process are expensed as consumed. Inventory is reviewed periodically for product expiration and obsolescence and is adjusted accordingly. The value of the inventory that is not expected to be sold within twelve months of the year end is classified as non-current inventory on the balance sheet.

Accounts Receivable

Trade accounts receivable are recorded at the net invoice value and are not interest bearing. Accounts receivable primarily consist of trade accounts receivable from the sales of LCT's products, timing of cash receipts by the

Table of Contents

Company related to LSC credit card sales to customers, as well as LSC trade receivable amounts related to spa and distributor sales. The Company considers receivables past due based on the contractual payment terms. The Company reviews its exposure to accounts receivable and reserves specific amounts if collectability is no longer reasonably assured. As of December 31, 2015 and 2014, the Company had an allowance for doubtful accounts totaling \$20,000 and \$19,000, respectively.

Property and Equipment

Property and equipment are stated at cost. The provision for depreciation and amortization is computed using the straight-line method over the estimated useful lives of the assets, generally over three to five years. The costs of major remodeling and leasehold improvements are capitalized and amortized over the shorter of the remaining term of the lease or the life of the asset.

Intangible Assets

Intangible assets consist of acquired research and development rights used in research and development, and capitalized legal fees related to the acquisition, filing, maintenance, and defense of patents. Patent or patent license amortization only begins once a patent license is acquired or a patent is issued by the appropriate authoritative bodies. In the period in which a patent application is rejected or efforts to pursue the patent are abandoned, all the related accumulated costs are expensed. Patents and patent licenses are recorded at cost of \$3,894,000 and \$3,367,000 at December 31, 2015 and 2014, respectively, and are amortized on a straight-line basis over the shorter of the lives of the underlying patents or the useful life of the license. Amortization expense for the years ended December 31, 2015 and 2014 amounted to \$99,000 and \$62,000, respectively, and is included in research and development expense. Accumulated amortization as of December 31, 2015 and 2014 was \$671,000 and \$572,000, respectively. Additional information regarding patents and patent licenses is included in Note 4.

Long-Lived Asset Impairment

The Company reviews long-lived assets for impairment when events or changes in business conditions indicate that their carrying value may not be recovered, and at least annually. The Company considers assets to be impaired and writes them down to fair value if expected associated undiscounted cash flows are less than the carrying amounts. Fair value is the present value of the associated cash flows. The Company recognized \$176,000 and \$92,000 of impairment losses on its long-lived assets during the years ended December 31, 2015 and 2014, respectively.

Product Sales

The Company recognizes revenue from product sales at the time of shipment to the customer, provided no significant obligations remain and collection of the receivable is reasonably assured. If the customer has a right of return, the Company recognizes product revenues upon shipment, provided that future returns can be reasonably estimated. In the case where returns cannot be reasonably estimated, revenue will be deferred until such estimates can be made or the right of return has lapsed. LCT contributed 54% and 50% of total revenue in 2015 and 2014, respectively. LSC's revenue accounted for 46% and 50% of total revenue in 2015 and 2014, respectively.

Deferred Revenue and Allowance for Sales Returns

The Company recognizes revenue from product sales when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the price to the buyer is fixed or determinable, and collectability is reasonably assured. However, the LSC products have a 30-day product return guarantee for website sales. The Company has estimated the historical rate of returns for the 30-day product return guarantee, which has remained consistent for the year ended December 31, 2015 as compared to the years ended December 31, 2014 and 2013. At December 31, 2015 and December 31, 2014, the estimated allowance for sales returns was \$10,000.

Cost of Sales

Cost of sales consists primarily of salaries and benefits associated with employee efforts expended directly on the production of the Company’s products and include related direct materials, general laboratory supplies and allocation of overhead. Certain of the agreements under which the Company has licensed technology will require the payment of royalties based on the sale of its future products. Such royalties will be recorded as a component of cost of sales. Additionally, the amortization of license fees or milestone payments related to developed technologies used in the Company’s products will be classified as a component of cost of sales to the extent such payments become due in the future.

Research and Development Costs

Research and development costs, which are expensed as incurred, are primarily comprised of costs and expenses for salaries and benefits associated with research and development personnel, overhead and occupancy, contract services, and amortization of license costs for technology used in research and development with alternative future uses.

Registration Payment Arrangements

In accordance with applicable authoritative guidance, the Company is required to separately recognize and measure registration payment arrangements, whether issued as a separate agreement or included as a provision of a financial instrument or other agreement. Such payments include penalties for failure to effect a registration of securities.

Stock-Based Compensation

The Company recognized stock-based compensation expense associated with stock options and other stock-based awards in accordance with the authoritative guidance for stock-based compensation. The cost of a stock-based award is measured at the grant date based on the estimated fair value of the award, and is recognized as expense on a straight-line basis, net of estimated forfeitures over the requisite service period of the award. The fair value of stock options is estimated using the Black-Scholes option valuation model, which requires the input of subjective assumptions, including price volatility of the underlying stock, risk-free interest rate, dividend yield, and expected life of the option. The fair value of restricted stock awards is based on the market value of our common stock on the date of grant.

Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. Assets and liabilities that are measured at fair value are reported using a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. This hierarchy maximizes the use of observable inputs and minimizes the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

Level 1	Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
Level 2	Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and
Level 3	Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

[Table of Contents](#)

Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

The table below sets forth a summary of the fair values of the Company's assets and liabilities as of December 31, 2015 (in thousands).

	<u>Total</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
ASSETS:				
Cash equivalents	<u>\$ 5</u>	<u>\$ 5</u>	<u>\$ —</u>	<u>\$ —</u>
LIABILITIES:				
Warrants to purchase common stock	<u>\$239</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 239</u>

The table below sets forth a summary of the fair values of the Company's assets and liabilities as of December 31, 2014 (in thousands).

	<u>Total</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
ASSETS:				
Cash equivalents	<u>\$ 5</u>	<u>\$ 5</u>	<u>\$ —</u>	<u>\$ —</u>
LIABILITIES:				
Warrants to purchase common stock	<u>\$4,216</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$4,216</u>

The following table displays the rollforward activity of liabilities with inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity) (in thousands):

	<u>Warrants to purchase common stock</u>
Beginning balance at December 31, 2013	<u>\$ 4,925</u>
Issuances of warrants	4,831
Exercise of warrants	(104)
Adjustments to estimated fair value	(2,405)
Warrants exchanged for common stock	<u>(3,031)</u>
Ending balance at December 31, 2014	4,216
Exercise of warrants	(1,997)
Adjustments to estimated fair value	(1,980)
Ending balance at December 31, 2015	<u>\$ 239</u>

Income Taxes

The Company accounts for income taxes in accordance with applicable authoritative guidance, which requires the Company to provide a net deferred tax asset/liability equal to the expected future tax benefit/expense of temporary reporting differences between book and tax accounting methods and any available operating loss or tax credit carryforwards.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements. Significant estimates include patent life (remaining legal life versus remaining useful life), inventory balances (lower of cost or market and allowance for excess and obsolescence), and transactions using the Black-Scholes option pricing model, e.g., stock options, as well as Monte-Carlo valuation method for certain warrants. Actual results could differ from those estimates.

[Table of Contents](#)

Fair Value of Financial Instruments

The Company believes that the carrying value of its cash and cash equivalents, receivables, accounts payable and accrued liabilities as of December 31, 2015 and 2014 approximate their fair values because of the short-term nature of those instruments. The fair value of certain warrants was determined at each quarterly reporting date and other applicable re-measurement dates in 2015 and 2014 using the Monte-Carlo valuation methodology.

Income (Loss) Per Common Share

The computation of net loss per common share is based on the weighted average number of shares outstanding during each period. The computation of diluted earnings per common share is based on the weighted average number of shares outstanding during the period plus the common stock equivalents, which would arise from the exercise of stock options and warrants outstanding using the treasury stock method and the average market price per share during the period. At December 31, 2015, there were 191,519 vested and 60,120 non-vested stock options outstanding, and 126,206 warrants outstanding; and at December 31, 2014, there were 968 non-vested restricted stock awards, 850,058 warrants, and 141,034 vested and 51,940 non-vested stock options outstanding.

Comprehensive Income

Comprehensive income or loss includes all changes in equity except those resulting from investments by owners and distributions to owners. The Company did not have any items of comprehensive income or loss other than net loss from operations for the years ended December 31, 2015 and 2014.

Recent Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board (the “FASB”) issued ASU No. 2014-15, *Presentation of Financial Statements – Going Concern* (Subtopic 205-40): Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern, which is intended to define management’s responsibility to evaluate whether there is substantial doubt about an organization’s ability to continue as a going concern and to provide related footnote disclosures. The ASU provides guidance to an organization’s management, with principles and definitions that are intended to reduce diversity in the timing and content of disclosures that are commonly provided by organizations today in the financial statement footnotes. The amendments are effective for annual periods ending after December 15, 2016, and interim periods within annual periods beginning after December 15, 2016. Early adoption is permitted for annual or interim reporting periods for which the financial statements have not previously been issued. The Company does not intend to early adopt this standard. The Company is still evaluating what effect the adoption of this standard will have on the financial condition of the Company.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for the Company on January 1, 2018. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

[Table of Contents](#)

In July 2015, the Financial Accounting Standards Board (the “FASB”) issued ASU No. 2015-11, *Simplifying the Measurement of Inventory*, which states that an entity should measure inventory within the scope of this Update at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. Subsequent measurement is unchanged for inventory measured using LIFO or the retail inventory method. ASU No. 2015-11 will be effective for annual reporting periods beginning after December 15, 2016, including interim periods within those fiscal years, which for the Company will be its 2017 fiscal quarter. The amendments in this Update should be applied prospectively with earlier application permitted as of the beginning of an interim or annual reporting period. The Company is evaluating the effect that ASU 2015-11 will have on its consolidated financial statements and related disclosures. The Company has not yet determined the effect of the standard on its ongoing financial reporting.

In February 2016, the FASB issued ASU No. 2016-02 Leases (Topic 842), which requires lessees to recognize “right of use” assets and liabilities for all leases with lease terms of more than 12 months. The ASU requires additional quantitative and qualitative financial statement footnote disclosures about the leases, significant judgments made in accounting for those leases and amounts recognized in the financial statements about those leases. The effective date will be the first quarter of fiscal year 2019. The Company is currently evaluating the impact of the adoption of this accounting standard update on its consolidated financial statements.

2. Inventory

The components of inventories are as follows (in thousands):

	December 31, 2015	December 31, 2014
Raw materials	\$ 245	\$ 191
Work in process	533	507
Finished goods	1,149	1,012
Total	1,927	1,710
Less: allowance for inventory excess and obsolescence	(90)	(193)
Inventory, net	<u>\$ 1,837</u>	<u>\$ 1,517</u>

3. Property and Equipment

Property and equipment consists of the following (in thousands):

	December 31, 2015	December 31, 2014
Machinery and equipment	\$ 1,354	\$ 1,357
Computer equipment	310	294
Office equipment	202	203
Leasehold improvements	757	756
	2,623	2,610
Less: accumulated depreciation and amortization	(2,248)	(1,896)
Property and equipment, net	<u>\$ 375</u>	<u>\$ 714</u>

Depreciation expense for the years ended December 31, 2015 and 2014 were \$373,000 and \$396,000, respectively.

[Table of Contents](#)

4. Patent Licenses

On December 31, 2003, LCT entered into an *Option to License Intellectual Property* agreement with Advanced Cell Technology, Inc., which changed its name to Ocata Therapeutics, Inc. (“Ocata”) for patent rights and paid Ocata \$340,000 in option and license fees. On February 13, 2004, LCT and Ocata amended the Option agreement and LCT paid Ocata additional option fees of \$22,500 for fees related to registering Ocata’s patents in selected international countries.

On May 14, 2004, LCT amended the licensing agreement with Ocata for the exclusive worldwide patent rights for the following Ocata technologies: UMass IP, Ocata IP and Infigen IP. The additional license fees paid were \$400,000.

On February 7, 2013, the Company and Ocata entered into Amended and Restated License Agreements (the “Amendment”) for the purpose of completely amending and restating the terms of the license agreements. Under the terms of the Amendment, the Company acquired exclusive world-wide rights to all human therapeutic uses and cosmetic uses from Ocata and Infigen’s early work on parthenogenic-derived embryonic stem cells, as well as certain rights to patents covering Single Blastomere technology.

Pursuant to the Amendment, all minimum R&D requirements and all milestone payments due to Ocata under the Exclusive License Agreement have been eliminated. The Company will no longer pay any royalties under the Ocata IP Agreement and Infigen IP Agreement. The obligation to pay royalties that ranged from 6%-12% under the UMass IP Agreement has been reduced to 0.25% of the net sales of products using technology covered by the UMass IP Agreement; and the obligation to pay a minimum annual license fee of \$150,000 has been reduced to \$75,000 annually, payable in two installments to Ocata. Total license fees paid were \$75,000 for the years ended December 31, 2015 and 2014.

As of December 31, 2015, the total amounts capitalized related to the acquired Ocata licenses were \$747,000, and \$3,102,000 related to other patent acquisition costs.

At December 31, 2015, future amortization expense related to the intangible assets subject to amortization is expected to be as follows (in thousands):

	Amount
2016	\$ 115
2017	115
2018	115
2019	81
2020	65
Thereafter	2,687
Total	<u>\$ 3,178</u>

5. Advances

On June 18, 2008, the Company entered into an agreement with BioTime, Inc. (“BioTime”), where BioTime will pay an advance of \$250,000 to Lifeline Cell Technology, a wholly-owned subsidiary of International Stem Cell Corporation, to produce, make, and distribute Joint Products. The \$250,000 advance will be paid down with the first \$250,000 of net revenues that otherwise would be allocated to LCT under the agreement. As of December 31, 2015, no revenues were realized from this agreement.

	December 31, 2015	December 31, 2014
BioTime, Inc. (in thousands)	\$ 250	\$ 250

6. Capital Stock

As of December 31, 2015, the Company is authorized to issue 720,000,000 shares of common stock, \$0.001 par value per share, and 20,000,000 shares of preferred stock, \$0.001 par value per share.

Preferred Stock Transactions

Series B Preferred Stock

On May 12, 2008, to obtain funding for working capital, the Company entered into a series of subscription agreements with five accredited investors for the sale of a total of 400,000 Series B Units, each Series B Unit consisting of one share of Series B Preferred Stock (“Series B Preferred”) and two Series B Warrants (“Series B Warrants”) to purchase common stock for each \$1.00 invested.

The total purchase price received by the Company was \$400,000. The Series B Preferred is convertible into shares of common stock at the initial conversion ratio of 0.0134 shares of common stock for each share of Series B Preferred converted (which was established based on an initial conversion price of \$75.00 per share), and the Series B Warrants were exercisable at \$75 per share until five years from the issuance of the Series B Warrants, which expired unexercised in May 2013. The Series B Preferred contain anti-dilution clauses whereby, if the Company issues equity securities or securities convertible into equity at a price below the conversion price of the Series B Preferred, such conversion price shall be adjusted downward to equal the price of the new securities. In October 2014, the Company issued Preferred Stock which had an initial conversion price of \$9.6705, which in November 2014 was adjusted down further to \$8.64, again in February 2015 down to \$6.72, and again in August 2015 further down to \$1.79. Accordingly, these transactions triggered an adjustment in the current conversion price of the Series B Preferred to \$1.79 per share. The Series B Preferred had a priority (senior to the shares of common stock and Series H Preferred) on any sale or liquidation of the Company equal to the purchase price of the Series B Units, plus a liquidation premium of 6% per year. If the Company elects to declare a dividend in any year, it must first pay to the Series B Preferred holder a dividend equal to the amount of the dividend the Series B Preferred holder would receive if the Series B Preferred were converted just prior to the dividend declaration. Each share of Series B Preferred has the same voting rights as the number of shares of common stock into which it would be convertible on the record date. In 2015, 50,000 shares of the Series B Preferred Stock were converted to 27,881 shares of common stock at a conversion price of \$1.79. As of December 31, 2015 and 2014, there were 250,000 shares and 300,000 shares, respectively, of the Series B Preferred issued and outstanding.

Series D Preferred Stock

On December 30, 2008, the Company entered into a Series D Preferred Stock Purchase Agreement (the “Series D Agreement”) with accredited investors (the “Investors”) and sold 47 shares of Series D Preferred Stock (“Series D Preferred”) for total proceeds of \$4,700,000 at a price of \$100,000 per Series D Preferred share.

10 shares of the Series D Preferred were issued to X-Master Inc., which is a related party and affiliated with the Company’s Chief Executive Officer and Co-Chairman of the Board of Directors, Dr. Andrey Semechkin and Dr. Russell Kern (formerly Ruslan Semechkin), Executive Vice President and Chief Scientific Officer and a director; and 33 shares of the Series D Preferred were issued to Dr. Andrey Semechkin. As of December 31, 2015 and 2014, there were 43 shares of the Series D Preferred issued and outstanding.

The Series D Preferred was initially convertible into shares of common stock at \$37.50 per share, resulting in an initial conversion ratio of 2,667 shares of common stock for every share of Series D Preferred. The Series D Preferred has an anti-dilution clause whereby, if the Company issues equity securities or securities convertible into equity at a price below the conversion price of the Series D Preferred, the conversion price of the Series D Preferred shall be adjusted downward to equal the price of the new securities. The Series D Preferred has priority over the Series A Preferred Stock, Series B Preferred Stock and Common Stock on the proceeds from any sale or liquidation of the Company in an amount equal to the purchase price of the Series D Preferred.

Table of Contents

In October 2014, the Company issued Preferred Stock which had an initial conversion price of \$9.6705, which in November 2014 was adjusted down further to \$8.64, again in February 2015 down to \$6.72, and again in August 2015 further down to \$1.79. Accordingly, these transactions triggered adjustments in the current conversion price of the Series D Preferred to \$1.79.

Series G Preferred Stock

On March 9, 2012, the Company entered into a Series G Preferred Stock Purchase Agreement (the “Series G Agreement”) with AR Partners, LLC (the “Purchaser”) to sell 5,000,000 shares of Series G Preferred Stock (“Series G Preferred”) at a price of \$1.00 per Series G Preferred share, for a total purchase price of \$5,000,000. The Purchaser is an affiliate of Dr. Andrey Semechkin, the Company’s Co-Chairman and Chief Executive Officer, and Dr. Russell Kern, Executive Vice President and Chief Scientific Officer and a director.

The Series G Preferred was initially convertible into shares of common stock at \$60.00 per share, resulting in an initial conversion ratio of 0.0167 shares of common stock for every share of Series G Preferred. The conversion price may be adjusted for stock splits and other combinations, dividends and distributions, recapitalizations and reclassifications, exchanges or substitutions and is subject to a weighted-average adjustment in the event of the issuance of additional shares of common stock below the conversion price.

The Series G Preferred shares have priority over the Series B Preferred, Series H Preferred and common stock on the proceeds from any sale or liquidation of the Company in an amount equal to the purchase price of the Series G Preferred, but such payment may be made only after payment in full of the liquidation preferences payable to holders of any shares of Series D Preferred then outstanding. Each share of Series G Preferred has the same voting rights as the number of shares of common stock into which it would be convertible on the record date. As long as there are at least 1,000,000 shares of Series G Preferred outstanding, the holders of Series G Preferred have (i) the initial right to propose the nomination of two members of the Board, at least one of which such nominees shall be subject to the approval of the Company’s independent directors, for election by the stockholder’s at the Company’s next annual meeting of stockholders, or, elected by the full board of directors to fill a vacancy, as the case may be, and (ii) the right to approve any amendment to the certificate of incorporation, certificates of designation or bylaws, in manner adverse to the Series G Preferred, alter the percentage of board seats held by the Series G Preferred directors or increase the authorized number of shares of Series G Preferred. At least one of the two directors nominated by holders of the Series G Preferred shall be independent based on the NASDAQ listing requirements.

The Company determined that the Series G Preferred Stock had a contingent redemption feature allowing redemption by the holder under only some very limited circumstances (“deemed liquidation events”). As the event that may trigger the redemption of the convertible preferred stock was not solely within the Company’s control, the convertible preferred stock was classified as mezzanine equity (outside of permanent equity) on the Company’s consolidated balance sheet. Additionally, legal costs related to the Series G Preferred financing in the amount of \$59,000 were recorded in the mezzanine equity as well. On December 31, 2014, the Company entered into a Waiver Agreement with all of the holders of its Series G Preferred Stock, whereby the holders irrevocably and unconditionally waived all rights they held to require the Company to redeem any or all shares of the Series G Preferred Stock and to receive any payments and any other rights accruing to them by reason of the failure of the Company to redeem shares of Series G Preferred Stock, pursuant to the terms of the Series G Certificate of Designation. Holders of Series G Preferred Stock are Dr. Andrey Semechkin and Dr. Russell Kern, each of whom is a director and executive officer of the Company, and affiliated entities of Dr. Andrey Semechkin and Dr. Russell Kern. Subsequent to the signing of the Waiver Agreement, the Series G Preferred Stock is classified within permanent equity on the Company’s consolidated balance sheet.

As of December 31, 2015 and 2014, there were 5,000,000 shares of the Series G Preferred issued and outstanding.

In October 2014, the Company issued Preferred Stock which had an initial conversion price of \$9.6705, which in November 2014 was adjusted down to \$8.64, again in February 2015 down to \$6.72, and again in August 2015 further down to \$1.79. Accordingly, these transactions triggered an adjustment in the current conversion price and conversion ratio of the Series G Preferred to \$23.8103 per share and 0.0420 shares, respectively.

Table of Contents

Series H Preferred Stock

On October 14, 2014, pursuant to a securities purchase agreement (the “Securities Purchase Agreement”), dated as of October 7, 2014, with Sabby Healthcare Volatility Master Fund, Ltd., Sabby Volatility Warrant Master Fund, Ltd., and Andrey and Russell Kern, the Company’s Chief Executive Officer and Co-Chairman and Executive Vice President and Chief Scientific Officer and Director, respectively, (together, the “Purchasers”), the Company sold in a private placement (the “Private Placement”) (i) 2,000 shares of Series H-1 and 500 shares of Series H-2 Convertible Preferred Stock, par value \$0.001 with a stated value of \$1,000 per share (the “Series H Preferred Stock”), convertible into 258,519 shares of common stock at an initial conversion price of \$9.6705, (ii) Series A warrants (the “Series A Warrants”) to purchase up to 258,519 shares of common stock for an initial exercise price of \$13.8150 per share exercisable immediately and having a term of 5.5 years, (iii) Series B warrants (the “Series B Warrants”) to purchase up to 258,519 shares of common stock for an initial exercise price of \$9.6705 per share exercisable immediately and having a term of 6 months, (iv) Series C warrants (the “Series C Warrants”, together with the Series A Warrants and the Series B Warrants, collectively, the “Warrants”) to purchase up to 258,519 shares of common stock for an initial exercise price of \$9.6705 per share exercisable immediately and having a term of 12 months. The aggregate initial gross proceeds received from this transaction were \$2.5 million. On April 14, 2015, the Company and the holders of the Series B Warrants, issued in October 2014 private placement, that remained outstanding as of that date, amended those remaining Series B Warrants to (i) extend the termination date to June 20, 2015; (ii) set the exercise price at \$11.25 per share; (iii) remove certain price reset adjustment provisions to the exercise price and (iv) remove certain provisions related to cashless exercise, participation rights and anti-dilution effects of a subsequent financing. On June 20, 2015, the remaining unexercised Series B Warrants then outstanding expired unexercised. On October 10, 2015, the Company and the holders of the Series C Warrants issued in connection with the financing transaction which occurred on October 14, 2014 that remained outstanding as of October 10, 2015 (representing the right to acquire, in the aggregate, approximately 73,000 shares) amended those remaining Series C Warrants to extend the expiration date to November 14, 2015. Between October 1, 2015 and October 20, 2015, the Company received net proceeds of \$163,000 upon the exercise of 100,814 of the Series C Warrants by holders of the Series C Warrants. As of October 20, 2015, all remaining Series C Warrants were fully exercised. Additionally, between October 20, 2015 and October 27, 2015, the Company received net proceeds of \$334,000 upon the exercise of 206,814 of the Series A Warrants by holders of the Series A Warrants.

The number of shares issuable upon exercise of the Series A, and Placement Agent Warrants are adjustable in the event of stock splits, stock dividends, combinations of shares and similar transactions, and pursuant to anti-dilution provisions. In addition, Purchasers have been granted rights of participation in future offerings of our securities for eighteen months from the date of the offering. As of December 31, 2015, all of Series H Preferred Stock have been converted to common stock, all of the Series B Warrants have been exercised or expired unexercised, and all of the Series C Warrants have been exercised.

The Securities Purchase Agreement entered into in the Private Placement requires the Company to hold a special meeting of stockholders to seek stockholder approval of an increase in the number of authorized shares of common stock under the Company’s certificate of incorporation to 720,000,000 shares and approve a reverse stock split. The special meeting of stockholders was held on December 4, 2014 and the stockholders approved the increase in the authorized shares of common stock and the reverse stock split. In connection with the Private Placement, the Company also entered into a registration rights agreement, as amended, with the investors pursuant to which the Company was obligated to file registration statements to register the resale of (i) 200% of the shares of Common Stock issuable upon conversion of the Series H Preferred Stock, and (ii) 100% of the shares of common stock issuable upon exercise of the warrants. In addition to the registration rights, the Purchasers are entitled to receive liquidated damages upon the occurrence of a number of events relating to filing, getting effective and maintaining

Table of Contents

effective registration statements covering the shares underlying the Series H Preferred Stock and the Warrants, including the failure of the Company to file a resale registration statement registering 200% of the shares of Common Stock issuable upon conversion of the Series H Preferred Stock by no later than November 13, 2014 and the failure of the Company to have such resale registration statement declared effective by the Securities and Exchange Commission (the “SEC”) by no later than December 13, 2014, subject to certain exceptions. The Company filed such registration statement on November 3, 2014 and such registration was declared effective by the SEC on November 25, 2014. Further, on January 16, 2015, the Company filed a registration statement registering 100% of the shares of common stock issuable upon exercise of the warrants, which was declared effective by the SEC on February 6, 2015. In October 2015, the Company filed a post-effective amendment to the registration statement registering the shares of common stock issuable upon exercise of the warrants, which was declared effective by the SEC on November 2, 2015.

Subject to certain ownership limitations with respect to the Series H-1 Preferred Stock, the Series H Preferred Stock is convertible at any time into shares of Common Stock at an initial conversion price of \$9.6705 per share. The Series H Preferred Stock is non-voting, is only entitled to dividends in the event that dividends are paid on the Common Stock, and will not have any preferences over the Common Stock, except that the Series H Preferred Stock shall have preferential liquidation rights over the Common Stock. Other than the Series H-1 Preferred Stock having a beneficial ownership limitation, the Series H-1 Preferred Stock and Series H-2 Preferred Stock are substantially identical. The conversion price of the Series H Preferred Stock is subject to certain resets as set forth in the Certificates of Designation, including the date of the amendment to the certificate of incorporation with respect to the reverse stock split, the effectiveness dates of the registration statements and the six and twelve month anniversaries of the Closing Date. All Series H Preferred Stock was converted to common stock by November 24, 2015 and accordingly the Company filed Certificates of Elimination with the State of Delaware in December 2015 for both Series H-1 and Series H-2 Preferred Stock.

The Warrants are immediately exercisable. As noted earlier above, on June 20, 2015, the remaining unexercised Series B Warrants then outstanding expired unexercised. At October 20, 2015, all Series C Warrants were exercised. The exercise price of the Series A and Placement Agent Warrants is subject to certain reset adjustments as set forth in the forms of Warrant, including the date of the amendment to the Company’s certificate of incorporation with respect to the reverse stock split, the effectiveness dates of the registration statements and the six and twelve month anniversaries of the date of issuance of the Warrants. Pursuant to the terms of the Securities Purchase Agreement, the Company may not sell shares to Lincoln Park under the Purchase Agreement with Lincoln Park, or otherwise enter into a variable rate transaction, until March 2016. Additionally, pursuant to the terms of the Securities Purchase Agreement, the Company was unable to issue any of its securities until May 7, 2015 (the 90th day following the effective date of the last registration statement on Form S-1 registering all Registrable Securities (as defined in the registration rights agreement, as amended, entered into in connection with the Securities Purchase Agreement)). However, the Company may still issue securities in certain circumstances, including issuing shares in private placements to its officers, directors and employees at market prices and issuing securities pursuant to the Company’s equity incentive plans.

H.C. Wainwright & Co. (the “Placement Agent”) acted as the exclusive placement agent for the Securities Purchase Agreement pursuant to a placement agency engagement letter, dated as of September 23, 2014, by and between the Placement Agent and the Company (the “Engagement Letter”). Upon the closing of the Securities Purchase Agreement, pursuant to the Engagement Letter, the Placement Agent received a placement agent fee of \$200,000

[Table of Contents](#)

and a warrant to purchase approximately 62,045 shares of common stock, as well as the reimbursement of fees and expenses up to \$50,000. Similar to the Series A Warrant, the placement agent warrant will have an initial exercise price of \$13.815 per share, be immediately exercisable and will terminate 5.5 years after the date of issuance. In addition, the Placement Agent Warrants have the same down-round protection as the Series A Warrants. The Company's registration statement on Form S-1 filed on November 3, 2014 with the SEC became effective after amendment on November 25, 2014 registering 200% of the shares of Common Stock issuable upon conversion of the Series H Preferred Stock.

Pursuant to the terms of the Securities Purchase Agreement, the conversion price of the Series H Preferred Stock and the exercise price of the Series A and Placement Agent Warrants was reset at \$1.79 per share. During year ended December 31, 2015, the investors converted 1,981.6 shares of Series H Preferred Stock into approximately 643,000 shares of our common stock. During year ended December 31, 2014, the investors converted 518.4 shares of Series H Preferred Stock into 60,000 shares of our common stock.

See Note 9, Stock Options and Warrants, *Warrants Issued with Series H Preferred Stock* for detailed discussion of the anti-dilution provisions of the Series A, B, and C Warrants.

Common Stock Transactions

2013 S-1 July Registered Offering

See Note 9, Stock Options and Warrants, 2013 S-1 July Registered Offering and 2014 Warrant Exchange Agreements.

2014 Securities Purchase Agreements for Common Stock

On May 29, 2014, to obtain funding for working capital purposes, the Company entered into a securities purchase agreement with Dr. Andrey Semechkin and Dr. Russell Kern to sell a total of 22,223 shares of common stock at a price of \$22.50 per share, for a total purchase price of \$500,000. On June 26, 2014, to obtain funding for working capital purposes, the Company entered into a securities purchase agreement with Dr. Andrey Semechkin and Dr. Russell Kern to sell a total of 36,667 shares of common stock at a price of \$15.00 per share, for a total purchase price of \$550,000. Dr. Andrey Semechkin is the Company's Co-Chairman and Chief Executive Officer. Dr. Russell Kern is the Company's Executive Vice President and Chief Scientific Officer and director. On August 6, 2014, to obtain funding for working capital purposes, the Company entered into a securities purchase agreement with Dr. Andrey Semechkin and Dr. Russell Kern to sell a total of 40,000 shares of common stock at a price of \$15.00 per share, for a total purchase price of \$600,000. On September 10, 2014, to obtain funding for working capital purposes, the Company entered into a securities purchase agreement with Dr. Andrey Semechkin and Dr. Russell Kern to sell a total of 29,630 shares of common stock at a price of \$13.50 per share, for a total purchase price of \$400,000.

2014 Warrant Exchange Agreements

On June 11, 2014, the Company entered into a series of warrant exchange agreements (the "Warrant Exchange Agreements") with the holders of its Series A Warrants and Placement Agent Warrants that were issued by the Company pursuant to the 2013 S-1 July Registered Offering. Under the Warrant Exchange Agreements, the Company agreed to issue a total of 297,772 shares of common stock (the "Exchange Shares") to the warrant holders in exchange for the cancellation of the Series A Warrants to purchase 243,699 shares of common stock and the Placement Agent Warrants to purchase 4,445 shares of common stock and Series A Warrants. Dr. Andrey

Table of Contents

Semechkin and Dr. Russell Kern, the Company's Co-Chairman and Chief Executive Officer and Executive Vice President and Chief Scientific Officer and director, respectively, participated on the same terms as the other warrant holders, agreeing to exchange Series A Warrants to purchase 67,255 shares of common stock for 80,706 shares of common stock. The closing of the transaction occurred on June 16, 2014 with the issuance of the Exchange Shares. Upon settlement of the exchange transaction, there were no remaining Series A Warrants or Placement Agent Warrants outstanding. See Note 9, Stock Options and Warrants, *2014 Warrants Exchange Agreements* for detailed discussion of the accounting treatment of the Warrant Exchange transaction.

2013 Lincoln Park Capital Fund, LLC Stock Purchase Agreement

On December 10, 2013, the Company entered into the Purchase Agreement with Lincoln Park, pursuant to which Lincoln Park has agreed to purchase up to an aggregate of \$10,250,000 of common stock (subject to certain limitations) from time to time through January 2017. Of the aggregate \$10,250,000 of common stock that may be sold to Lincoln Park, on December 11, 2013, the Company sold 11,112 shares of common stock to Lincoln Park for an aggregate purchase price of \$250,000 pursuant to the Purchase Agreement, which is referred to as the Initial Purchase. Upon execution of the Purchase Agreement, the Company paid to Lincoln Park \$155,000, as a cash fee, for their commitment to purchase additional shares of common stock under the Purchase Agreement.

Also on December 10, 2013, the Company entered into a Registration Rights Agreement with Lincoln Park, pursuant to which the Company filed with the SEC an S-1 Registration Statement to register for resale under the Securities Act of 1933, as amended, or the Securities Act, the shares that have been or may be issued to Lincoln Park under the Purchase Agreement. The S-1 Registration Statement filed with the Securities and Exchange Commission in December 2013 and amended in January 2014 was declared effective on January 13, 2014.

During the year ended December 31, 2014, the Company sold 54,666 shares to Lincoln Park raising approximately \$1,588,000 for working capital purposes. From commencement through to December 31, 2014, the Company has sold a total of 65,777 shares of common stock to Lincoln Park for an aggregate of \$1,838,000 under the Agreement. As of December 31, 2015, there remained 67,555 shares available for sale up to a total of \$8,412,000 under the Purchase Agreement with Lincoln Park.

The Company may, from time to time and in its sole discretion, direct Lincoln Park to purchase shares of common stock in amounts up to 1,334 shares on any single business day so long as at least one business day has passed since the most recent purchase, which amounts may be increased to up to 2,000 shares and up to 2,667 shares, provided the closing price of the common stock exceeds a certain threshold, with a maximum limit of up to \$500,000 per purchase, plus an additional "accelerated amount" under certain circumstances. There are no trading volume requirements or restrictions under the Purchase Agreement, and the Company will control the timing and amount of any sales of common stock to Lincoln Park. The purchase price of the shares that may be sold to Lincoln Park under the Purchase Agreement will be based on the market price of the common stock immediately preceding the time of sale as computed under the Purchase Agreement without any fixed discount; provided that in no event will such shares be sold to Lincoln Park when the closing sale price is less than \$7.50 per share, subject to adjustment as provided in the Purchase Agreement.

The purchase price per share will be equitably adjusted for any reorganization, recapitalization, non-cash dividend, stock split, or other similar transaction occurring during the business days used to compute such price. The Company may at any time in its sole discretion terminate the Purchase Agreement without fee, penalty or cost upon one business day notice. Lincoln Park may not assign or transfer its rights and obligations under the Purchase Agreement.

Pursuant to the terms of a securities purchase agreement entered into with investors in connection with a private placement effected October 14, 2014, the Company may not sell shares to Lincoln Park under the Purchase Agreement with Lincoln Park until March 2016.

[Table of Contents](#)

Reserved Shares

At December 31, 2015, the Company had shares of common stock reserved for future issuance as follows:

Options outstanding	251,639
Options available for future grant	1,044,343
Convertible preferred stock	2,747,214
Warrants	126,206
	<u>4,169,402</u>

7. Related Party Transactions

Other than with respect to the purchases of Series D Preferred, Series G Preferred, Series H Preferred, and common stock transactions discussed above, the Company's related party transactions were for a facility lease and working capital bridge loan.

During the first quarter of 2011, the Company executed an operating lease for its corporate offices with S Real Estate Holdings LLC. S Real Estate Holdings LLC is owned by Dr. Russell Kern, the Company's Executive Vice President and Chief Scientific Officer and a director and was previously owned by Dr. Andrey Semechkin, the Company's Chief Executive Officer and Co-Chairman of the Board of Directors. The lease agreement was negotiated at arm's length and was reviewed by the Company's outside legal counsel. The terms of the lease were reviewed by a committee of independent directors, and the Company believes that, in total, those terms are at least as favorable to the Company as could be obtained for comparable facilities from an unaffiliated party. For the years ended December 31, 2015 and 2014, the Company recorded \$139,000 in rent expense that was related to the facility lease arrangement with related parties.

Between May 6, 2015 and December 10, 2015, to obtain funding for working capital purposes and to refinance the indebtedness incurred from multiple notes during this time frame, the Company borrowed a total of \$3,110,000 from Dr. Andrey Semechkin, the Company's Chief Executive Officer and Co-Chairman of the Board of Directors, and issued an unsecured, non-convertible promissory note in the principal amount of \$3,110,000 (the "Note") to Dr. Andrey Semechkin. As of December 31, 2015, the principal amount under the Note accrues interest at a rate of One Half of One Percent (0.50%) per annum. The Note was due and payable January 10, 2016. See Note 12, Subsequent Events.

8. Income Taxes

The Company accounts for income taxes in accordance with applicable authoritative guidance, which requires the Company to provide a net deferred tax asset/liability equal to the expected future tax benefit/expense of temporary reporting differences between book and tax accounting methods and any available operating loss or tax credit carryforwards. The Company has available at December 31, 2015, operating loss carryforwards of approximately \$59,713,000, which may be applied against future taxable income and will expire in various years through 2035. At December 31, 2014, the Company had operating loss carryforwards of approximately \$56,083,000. The increase in carryforwards for the year ended December 31, 2015 is approximately \$3,630,000.

Table of Contents

The amount of and ultimate realization of the benefits from the operating loss carryforwards for income tax purposes is dependent, in part, upon the tax laws in effect, the future earnings of the Company, and other future events, the effects of which cannot be determined at this time. Because of the uncertainty surrounding the realization of the loss carryforwards, the Company has established a valuation allowance equal to the tax effect of the loss carryforwards, R&D credits, and accruals; therefore, no net deferred tax asset has been recognized. A reconciliation of the statutory Federal income tax rate and the effective income tax rate for the years ended December 31, 2015 and 2014 follows:

	December 31, 2015	December 31, 2014
Statutory federal income tax rate	35%	35%
Permanent items	35%	(12)%
State income taxes, net of federal taxes	16%	4%
Change in valuation allowance	(91)%	(29)%
Tax credits claimed	5%	1%
Other	0%	1%
Effective income tax rate	0%	0%

The Company files income tax returns in the U.S. federal jurisdiction and various states. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years before 2011, with the exception of California, which is 2010. The Company does not have any material uncertain tax positions as of December 31, 2015 and 2014. The Company does not believe it is reasonably possible that the total amount of unrecognized tax benefits as of December 31, 2015 will materially change in the next 12 months.

The Company may be subject to IRC Code Sections 382 and 383, which could limit the amount of the net operating loss and tax credit carryovers that can be used in future years. The Company has not completed a study to assess whether an ownership change has occurred, as defined by IRC Code Sections 382 and 383, or whether there have been ownership changes since the Company's formation due to the complexity and cost associated with such a study, and the fact that there may be additional such ownership changes in the future. The Company estimates that if such a change did occur, the federal and state net operating loss carryforwards and research and development credit carryforwards that can be utilized in the future will be significantly limited.

There can be no assurance that the Company will ever be able to realize the benefit of some or all of the federal and state loss carryforwards or the credit carryforwards, either due to ongoing operating losses or due to ownership changes, which limit the usefulness of the loss carryforwards.

Significant components of deferred tax assets and liabilities are as follows (in thousands):

	December 31, 2015	December 31, 2014
Deferred tax assets (liabilities)		
Current deferred tax assets (liabilities)	\$ 136	\$ 187
Deferred revenues	—	—
Current deferred tax assets	136	187
Valuation allowances	(136)	(187)

9. Stock Options and Warrants

Stock Options

The Company has adopted the 2006 Equity Participation Plan (the “2006 Plan”), which provides for the grant of stock options, restricted stock and other equity based awards. Awards for up to 100,000 shares may be granted to employees, directors and consultants under this Plan. The options granted under the 2006 Plan may be either qualified or non-qualified options. Options may be granted with different vesting terms and expire no later than 10 years from the date of grant.

In April 2010, the Company adopted the 2010 Equity Participation Plan (the “2010 Plan”), which provides for the grant of stock options, restricted stock and other equity based awards. Awards of up to 1,200,000 shares may be granted to employees, directors and consultants under the 2010 Plan. The options granted under the 2010 Plan may be either qualified or non-qualified options. Options may be granted with different vesting terms and expire no later than 10 years from the date of grant.

In November and December of 2009, the Company issued non-qualified stock options to purchase 68,384 shares of common stock outside the 2006 and 2010 option plans to certain employees and consultants. These options vest over 50 months and expire no later than 10 years from the date of grant.

Total stock-based compensation expense for the years ended December 31, 2015 and 2014 was comprised of the following (in thousands):

	Years Ended December 31,	
	2015	2014
Cost of sales	\$ 26	\$ 52
Research and development	146	287
Selling and marketing	34	45
General and administrative	391	1,034
	<u>\$597</u>	<u>\$1,418</u>

Unrecognized compensation expense related to stock options as of December 31, 2015 and 2014 was \$510,000 and \$977,000, respectively, which is expected to be recognized over a weighted average period of approximately 2.1 years and 2.2 years, respectively.

In accordance with applicable authoritative guidance, the Company is required to establish assumptions and estimates of the weighted-average fair value of stock options granted, as well as using a valuation model to calculate the fair value of stock-based awards. The Company uses the Black-Scholes option-pricing model to determine the fair-value of stock-based awards. All options are amortized over the requisite service periods. Stock based compensation for stock options granted to non-employees has been determined using the Black-Scholes option pricing model. These options are revalued at each reporting period until fully vested, with any change in fair value recognized in the consolidated statements of operations.

Table of Contents

The fair value of options granted is estimated at the date of grant using a Black-Scholes option-pricing model with the following weighted-average assumptions for the years ended December 31, 2015 and 2014:

	Year Ended December 31, 2015	Year Ended December 31, 2014
Significant assumptions (weighted average):		
Risk-free interest rate at grant date	1.56%	1.90%
Expected stock price volatility	94.05%	100.75%
Expected dividend payout	0%	0%
Expected option life based on management's estimate	5.28 yrs	6.08 yrs

Options Outstanding				Options Exercisable and Vested		
Exercise Prices	Number Outstanding	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price
\$2.75-\$3.85	65,000	9.71	\$ 2.75	40,625	9.71	\$ 2.75
\$3.86-\$36.75	45,934	8.61	\$ 18.26	13,377	8.22	\$ 21.81
\$36.76-\$90.75	41,505	4.61	\$ 67.82	38,317	4.42	\$ 69.65
\$90.76-\$136.50	46,095	3.90	\$ 93.60	46,095	3.90	\$ 93.60
\$136.51-\$480.00	53,105	3.97	\$ 249.17	53,105	3.97	\$ 249.17
	<u>251,639</u>	<u>6.39</u>	<u>\$ 84.96</u>	<u>191,519</u>	<u>5.55</u>	<u>\$ 107.66</u>

Transactions involving stock options issued to employees, directors and consultants under the 2006 Plan, the 2010 Plan and outside the plans are summarized below. Options issued have a maximum life of 10 years. The following table summarizes the changes in options outstanding and the related exercise prices for the Company's common stock options issued:

	Number of Options Issued Under 2006 Plan and 2010 Plan	Weighted Average Exercise Price Per Share	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
Outstanding at December 31, 2013	106,970	\$ 168.00		
Granted	42,160	\$ 21.00

Restricted Stock Awards

Restricted stock awards are grants that entitle the holder to acquire shares of common stock at zero or a fixed price, which is typically nominal. The Company accounts for the restricted stock awards as issued and outstanding common stock, even though the shares covered by a restricted stock award cannot be sold, pledged, or otherwise disposed of until the award vests and any unvested shares may be reacquired by the Company for the original purchase price following the awardee's termination of service. Annual grants of restricted stock awards are made to non-employee members of the board of directors on the date of the annual meeting of stockholders and typically vest in full at the next annual meeting of stockholders following the grant date. Beginning in 2013, additional annual grants of restricted stock awards were made to non-employee members of the board of directors as partial compensation for their services. These awards vest quarterly at the end of each quarter. In addition, the Company has made restricted stock awards to non-employee consultants for their services, which generally vest in one year or less.

The following table summarizes the changes in restricted stock award activity and related weighted average exercise prices for the Company's awards issued during the years ended December 31, 2015 and 2014:

	Restricted Stock Issued from the 2006 Plan and 2010 Plan	Weighted Average Grant Date Fair Value
Unvested at December 31, 2013	968	\$ 34.50
Granted	7,309	\$ 25.50
Vested	(7,309)	\$ 27.00
Forfeited	—	\$ —
Unvested at December 31, 2014	968	\$ 24.00
Granted	19,547	\$ 4.95
Vested	(20,515)	\$ 5.81
Forfeited	—	\$ —
Unvested at December 31, 2015	—	\$ —

The fair value of the restricted stock awards is based on the market value of the common stock on the date of grant. The total grant-date fair value of restricted stock awards vested during the years ended December 31, 2015 and 2014 was approximately \$119,000 and \$194,000, respectively. The Company recognized approximately \$105,000 and \$191,000 of stock-based compensation expense related to the restricted stock awards for the years ended December 31, 2015 and 2014, respectively. As of December 31, 2015, there was no unrecognized compensation costs related to unvested awards. As of December 31, 2014, total unrecognized compensation costs related to unvested awards were approximately \$8,000, which is expected to be recognized over a weighted-average period of approximately 0.6 year.

Warrants

Warrants Issued with Preferred Stock

Warrants issued in connection with the October 2014 Financing

The Company has accounted for the warrants in accordance with current accounting guidance, which defines how freestanding contracts that are indexed to and potentially settled in a Company's own stock should be measured and classified. The authoritative accounting guidance prescribes that only warrants issued under contracts that cannot be net-cash settled and are both indexed to and settled in the Company's common stock can be classified as equity. As the Series A, Series B and Series C Warrants and Placement Agent Warrant agreements did not meet the specific conditions for equity classification, the Company was required to classify the fair value of the warrants issued as a liability, with subsequent changes in fair value to be recorded as income (loss) in the statement of operations upon revaluation of the fair value of warrant liability at each reporting period. Valuation of the Warrants was estimated at December 31, 2015 and 2014, using the Monte-Carlo simulation model.

The following assumptions were used as inputs to the model at December 31, 2015: for Series A Warrants and the Placement Agent Warrants, stock price of \$3.30 and warrant exercise price of \$1.7933 as of the valuation date; the Company's historical stock price volatility of 89.3%; risk free interest rate on U.S. treasury notes of 1.59%; warrant expiration of 4.29 years; and a zero dividend rate; simulated as a daily interval and anti-dilution impact if the Company had to raise capital below \$1.7933 per share.

The following assumptions were used as inputs to the model at December 31, 2014: for Series A Warrants and the Placement Agent Warrants, stock price of \$10.35 and warrant exercise price of \$8.64 as of the valuation date; the Company's historical stock price volatility of 83%; risk free interest rate on U.S. treasury notes of 1.63%; warrant expiration of 5.29 years; and a zero dividend rate, for Series B Warrants, stock price of \$10.35 and warrant exercise price of \$8.64 as of the valuation date; the Company's historical stock price volatility of 33.4%; risk free interest rate on U.S. treasury notes of 0.02%; warrant expiration of 0.28 years; and a zero dividend rate, for Series C Warrants, stock price of \$10.35 and warrant exercise price of \$8.64 as of the valuation date; the Company's historical stock price volatility of 33.4%; risk free interest rate on U.S. treasury notes of 0.02%; warrant expiration of 0.79 years; and a zero dividend rate; simulated as a daily interval and anti-dilution impact if the Company had to raise capital below \$8.64 per share.

The fair value of the warrant liability at the issuance date exceeded the gross proceeds received for the Series H Preferred shares, Series A, Series B and Series C Warrants by \$1,779,000. The Series A Warrants, Series B Warrants, Series C Warrants and Placement Agent Warrants had fair values of \$2,299,000, \$841,000, \$1,139,000 and \$552,000 at issuance, respectively. The classification and valuation of the warrants resulted in total warrant liabilities of \$4,831,000. On April 14, 2015, the Company and the holders of the Series B Warrants issued in the October 2014 private placement, that remained outstanding as of that date, amended those remaining Series B Warrants to (i) extend the termination date to June 20, 2015; (ii) set the exercise price at \$11.25 per share; (iii) remove certain price reset adjustment provisions to the exercise price and (iv) remove certain provisions related to cashless exercise, participation rights and anti-dilution effects of a subsequent financing. As a result of this modification, the Company recorded a net change in fair value of warrant liability gain of \$388,000. During the years ended December 31, 2015 and 2014, the Company recorded a net change in fair value of warrant liability gain of \$1,980,000 and \$2,405,000, respectively, in the consolidated statements of operations.

Series B Warrant Exercises – During the year ended December 31, 2015, the Company received net proceeds of \$83,388 upon the exercise of 12,409 of Series B Warrants by Dr. Russell Kern, the Company's Executive Vice President and Chief Scientific Officer and director. During the year ended December 31, 2014, the Company received net proceeds of \$339,506 upon the exercise of 39,295 of the Series B Warrants by, Dr. Andrey Semechkin, the Company's Co-Chairman and Chief Executive Officer. On June 20, 2015, the remaining unexercised outstanding Series B Warrants of 206,815 shares expired.

Table of Contents

Series C Warrant Exercises – During the year ended December 31, 2015, the Company received net proceeds of \$681,000, upon the exercise of 258,518 of Series C Warrants by Dr. Andrey Semechkin, the Company’s Co-Chairman and Chief Executive Officer and Dr. Russell Kern, the Company’s Executive Vice President and Chief Scientific Officer and director, respectively, and other holders of the Series C Warrants. At October 20, 2015, all Series C Warrants were exercised.

Series A Warrant Exercises – During the year ended December 31, 2015, the Company received net proceeds of \$404,000, upon the exercise of 246,108 of Series A Warrants by Dr. Andrey Semechkin, the Company’s Co-Chairman and Chief Executive Officer and other holders of the Series A Warrants.

Warrants Issued with Common Stock

2013 Securities Purchase Agreements for Common Stock

In conjunction with the Company’s sale of 67,500 shares of common stock on January 22, 2013, the Company issued warrants convertible into 33,750 shares of common stock at an exercise price of \$30.00 per share. The warrants have a five-year term. These warrants are held by Dr. Andrey Semechkin and Dr. Simon Craw, the Company’s Co-Chairman and Chief Executive Officer and the Company’s former Executive Vice President Business Development, respectively.

On March 12, 2013 the Company issued warrants convertible into 16,667 shares of common stock in conjunction with the sale of 33,334 shares of common stock. These warrants have a five-year term and an exercise price of \$30.00 per share. Dr. Andrey Semechkin, the Company’s Co-Chairman and Chief Executive Officer is the holder of 1,667 of these warrants.

2013 S-1 July Registered Offering

On July 24, 2013 the Company sold 20,000,000 Units, with each Unit consisting of 0.0067 share of common stock 0.0067 one Series A Warrant. The Series A Warrants were convertible into 133,334 shares of common stock at an exercise price of \$22.50 per share. The warrants have a five year term and were immediately exercisable. In addition, the Company issued 133,334 Series B Warrants each to purchase one Unit. The Series B Warrants were immediately exercisable at an initial exercise price of \$22.50 per Unit, subject to adjustment and expired on October 24, 2013. The Units issuable upon exercise of the Series B Warrants consisted of 133,334 shares of common stock and 133,334 Series A Warrants, which were convertible into an additional 133,334 shares of common stock at an exercise price of \$22.50 per share. All Series A Warrants had an expiration date of the fifth anniversary of the transaction close, July 24, 2018, regardless of the date the Series A Warrants were issued. See the *2014 Warrant Exchange Agreements* – discussed below.

On July 19, 2013, the Company also entered into a placement agent agreement (the “Placement Agent Agreement”) with Roth Capital Partners, LLC (the “Placement Agent”), pursuant to which the Placement Agent agreed to act on a reasonable best efforts basis for the Offering. The Company paid the Placement Agent a cash fee equal to 5% of the gross proceeds from the Offering and reimbursed the Placement Agent for its reasonable out-of-pocket expenses of \$75,000. The Company also issued 4,445 Placement Agent Warrants to purchase Units equal to 5% of the aggregate number of Units issued in the Offering (other than the Units issued to Andrey Semechkin and Russell Kern). The Placement Agent Warrants had substantially the same terms as the Series B Warrants, except that the Placement Agent Warrants (i) had an exercise price of \$22.50 per Unit, subject to adjustments similar to those applicable to the Series A Warrants, (ii) had a term of five years, (iii) provided for a cashless exercise, and (iv) otherwise comply with the requirements of the Financial Institutions Regulatory Authority, Inc. (FINRA). The Company also agreed to pay the Placement Agent a cash solicitation fee equal to 5% of the gross proceeds received by the Company upon the exercise of the Series B Warrants under certain circumstances. See the *2014 Warrant Exchange Agreements* – discussed below.

Series A and B Warrant Exercises – There were no warrant exercises during the year ended December 31, 2014.

2014 Warrant Exchange Agreements – On June 11, 2014, the Company entered into a series of warrant exchange agreements (the “Warrant Exchange Agreements”) with the holders of its Series A Warrants and Placement Agent

Table of Contents

Warrants that were issued by the Company pursuant to the 2013 S-1 July Registered Offering. Under the Warrant Exchange Agreements, the Company agreed to issue a total of 297,772 shares of common stock (the “Exchange Shares”) to the warrant holders in exchange for the cancellation of the Series A Warrants to purchase 243,699 shares of common stock and the Placement Agent Warrants to purchase 4,445 shares of common stock and Series A Warrants. Dr. Andrey Semechkin and Dr. Russell Kern, the Company’s Co-Chairman and Chief Executive Officer and Executive Vice President and Chief Scientific Officer and director, respectively, participated on the same terms as the other warrant holders, agreeing to exchange Series A Warrants to purchase 67,255 shares of common stock for 80,706 shares of common stock. The closing of the transaction occurred on June 16, 2014 with the issuance of the Exchange Shares.

Immediately prior to the Warrant Exchange transaction, the Company recorded a net change in fair value of warrant liability gain of \$1,271,000. As a result of the Warrant Exchange, the Company recognized a \$3,445,000 loss for the warrant exchange inducement expense. In addition, the Company recorded a reclassification of \$3,031,000 to additional paid in capital from warrant liability for a total increase to additional paid in capital of \$6,428,000, which represents the fair value of the stock issued in the Warrant Exchange.

As part of the Warrant Exchange Agreement, the Company agreed that through September 14, 2014 it would not offer, sell, pledge, contract to sell or otherwise dispose of any equity securities or securities convertible, exercisable or exchangeable into equity securities of the Company, except for the issuance of equity awards pursuant to the Company’s employee benefit plans and employee incentive plans, the issuance of common stock pursuant to the valid exercise of options or warrants or upon exercise of conversion rights with respect to convertible securities outstanding on the date of the Warrant Exchange, and the issuance and sale of equity securities in private placements to directors or officers of the Company.

As of December 31, 2015 and 2014, there were 0 Series A Warrants and 0 Placement Agent Warrants outstanding.

Warrants Issued in Connection with SkinCare Marketing Agreement

In September 2011, the Company signed a Marketing Agreement (“Agreement”) with an effective date of June 30, 2011, with a third party marketing organization. According to the terms of the Agreement as described in Note 10 below, Commitments and Contingencies, under Marketing Arrangement and Agreement, the third party marketing organization would provide assistance to LSC to sell its skin care products through various specific proprietary mailings. The Agreement provides for two tranches of common stock warrants issued by the Company for the benefit of the third party marketing organization for 667 shares each, with strike prices of \$225.00 and \$300.00, respectively, vesting over four quarters, and a warrant term of five years. As of December 31, 2015 and 2014, there were 1,334 warrants outstanding. These warrants expire in September 2016.

Share data related to warrant transactions for the years ended December 31, 2015 and 2014 were as follows:

	Common Stock July 2013 Financing	Units	Common Stock					Common Stock			Price per Warrant	
	Series A	Placement Agent	October 2014 Financing					Jan 2013 Financing	Mar 2013 Financing	Total Warrants	Range	Weighted Average Exercise Price

10. Commitments and Contingencies

Leases

The Company has established its primary research facility in 8,215 square feet of leased office and laboratory space in Oceanside, California. The lease for this facility expires in August 2016. The current base rent is \$9,111 per month. The facility has leasehold improvements which include cGMP (current Good Manufacturing Practices) level clean rooms designed for the derivation of clinical-grade stem cells and their differentiated derivatives, research laboratories for the Company's stem cell differentiation studies and segregated rooms for biohazard control and containment of human donor tissue. The monthly base rent will increase by 3% annually on the anniversary date of the agreement.

The Company leases a 5,520 square foot manufacturing facility in Frederick, Maryland, which is used for laboratory and administrative purposes. As of December 31, 2015, the base rent was \$8,865. The initial term of the lease expired in December 2015 and the Company renewed the lease for an additional seven years, see Note 12, Subsequent Events. The laboratory is being used to develop and manufacture the Company's research products and the administration facility will be used for sales and marketing and general administrative purposes. The manufacturing laboratory space has clean rooms and is fitted with the necessary water purification, refrigeration, labeling equipment and standard manufacturing equipment to manufacture, package, store, and distribute media products.

On February 25, 2011, the Company entered into a lease agreement (the "Lease Agreement") with S Real Estate Holdings LLC to allow the Company to expand into new corporate offices located at 5950 Priestly Drive, Carlsbad, California. The building is used for administrative purposes, but could also be used for research and development purposes if such space is needed in the future. The lease initially covered approximately 4,653 square feet, starting on March 1, 2011, and was amended to cover approximately 8,199 square feet effective July 1, 2011, and to cover approximately 9,848 square feet effective January 1, 2013. The lease expired on February 29, 2016, and the Company extended the term of the lease for one year, see Note 12, Subsequent Events. The Company began paying rent at an initial rate of \$5,118 per month and the rate was amended effective July 1, 2011 and January 1, 2013 to account for additional square footage occupied by the Company. As of December 31, 2015, the base rent was \$12,192 per month. The monthly base rent will increase by 3% annually on the anniversary date of the agreement. The Company is also obligated to pay a portion of the utilities for the building and increases in property tax and insurance.

S Real Estate Holdings LLC is owned by Dr. Russell Kern, the Company's Executive Vice President and Chief Scientific Officer and a director, and was previously owned by Dr. Andrey Semechkin, the Company's Chief Executive Officer and Co-Chairman of the Board of Directors. The Lease Agreement was negotiated at arm's length and was reviewed by the Company's outside legal counsel. The terms of the lease were reviewed by a committee of independent directors, and the Company believes that, in total, those terms are consistent with the terms that could be obtained for comparable facilities from an unaffiliated party.

On December 23, 2015, International Stem Cell Corporation's wholly owned subsidiary, Lifeline Cell Technology LLC ("LCT" or "Tenant") and St. John Properties, Inc. ("St. John" or "Landlord"), have entered into a seven year lease agreement ("Lease") for the warehouse and office space ("Premises"). The Lease shall commence on the July 1, 2016. Concurrently with the execution of the Lease, LCT and St. John have entered into an Early Occupancy Letter Agreement ("EOL Agreement") pursuant to which LCT shall be permitted to occupy certain Suites of the Premises starting February 15, 2016 and additional Suite starting March 1, 2016.

The Company incurred rent expense of \$289,000 and \$315,000 for the years ended December 31, 2015 and 2014, respectively.

[Table of Contents](#)

Future minimum lease payments required under operating leases that have initial or remaining non-cancelable lease terms in excess of one year as of December 31, 2015, are as follows (in thousands):

	Amount
2016	\$ 214
2017	143
2018	137
2019	134
Thereafter	468
Total	<u>\$ 1,096</u>

Marketing Agreement

In September 2011, the Company signed a Marketing Agreement (“agreement”) with an effective date of June 30, 2011, superseding the terms of a previous arrangement with a third party marketing organization. According to the agreement, the third party marketing organization will continue to provide assistance to Lifeline Skin Care, Inc., (“LSC”) a wholly-owned subsidiary of International Stem Cell, to sell skin care products through various specific proprietary mailings. In exchange for such services, the Company will pay 20% of net revenues for Direct Sales (as defined in the agreement) generated from the proprietary mailings. In addition, the Company agreed to pay 10% of net revenues for Referral Sales. The agreement specifies that the parties do not intend to create a joint venture, and that either party may terminate the agreement upon 30-day written notice. In addition, the agreement provided for two tranches of common stock warrants issued by the Company for the benefit of the third party marketing organization for 667 shares each, with strike prices of \$225.00 and \$300.00, respectively, with vesting over four quarters, and warrant term of five years. Subsequently in July 2012, the Company renegotiated the commission structure to reflect slightly lower rates, 18% on net revenues derived from direct sales and 9% on net revenues derived from referral sales.

LSC incurred \$14,000 and \$51,000 as commission expenses during the years ended December 31, 2015 and 2014, respectively, under the terms of this arrangement and agreement.

Customer Concentration

During the year ended December 31, 2015 for the Biomedical market segment, one major customer accounted for approximately 24% of consolidated revenues. During the year ended December 31, 2014 for the Biomedical market segment, one major customer accounted for 21% of consolidated revenues. No other single customer accounted for more than 10% of revenues for any period presented.

11. Segments and Geographic Information

The Company’s chief operating decision-maker reviews financial information presented on a consolidated basis, accompanied by disaggregated information by each reportable company’s statement of operations. The Company operates the business on the basis of three reporting segments, the parent company and four wholly-owned subsidiaries:

International Stem Cell Corporation, a research and development company, for the Therapeutic Market for clinical applications of hpSCs for the treatment of various diseases such as Parkinson’s disease, liver diseases and corneal blindness;

Cyto Therapeutics, PTY LTD, a research and development company, for the Therapeutic Market, which will conduct clinical trials in Australia for the use of hpSCs in the treatment of Parkinson’s disease;

Lifeline Skin Care, Inc. for the Cosmetic Market, which develops, manufactures and markets a category of cosmetic skin care products based on biotechnology with human stem cells;

[Table of Contents](#)

Lifeline Cell Technology, LLC for the Biomedical Market, which develops, manufactures and commercializes primary human cell research products including over 160 human cell culture products, including frozen human “primary” cells and the reagents (called “media”) needed to grow, maintain and differentiate the cells.

Revenues, Expenses and Operating Income (loss)

The Company does not measure the performance of its segments on any asset-based metrics. Therefore, segment information is presented only for operating income (loss). Revenues, expenses and operating income (loss) by market segment were as follows (in thousands):

	For the Years Ended December 31,	
	2015	2014
Revenues:		
Cosmetic market	\$ 3,503	\$ 3,507
Biomedical market	4,048	3,510
Total revenues	7,551	7,017
Operating expenses:		
Therapeutic market	6,234	9,695
Cosmetic market	3,087	3,253
Biomedical market	2,794	2,749
Total operating expenses	12,115	15,697
Operating income (loss):		
Therapeutic market	(6,234)	(9,695)
Cosmetic market	416	254
Biomedical market	1,254	761
Total operating loss	<u><u>\$ (4,564)</u></u>	<u><u>\$ (8,680)</u></u>

Geographic Information

The Company’s wholly-owned subsidiaries are located in Maryland; California and Melbourne, Australia, and have customer and vendor relationships worldwide. Significant revenues in the following regions are those that are attributable to the individual country within the region to which the product was shipped (in thousands):

	For the Years Ended December 31,	
	2015	2014
North America	\$ 6,127	\$ 5,632
Asia	999	943
Europe	388	393
All other regions	37	49
Total	<u><u>\$ 7,551</u></u>	<u><u>\$ 7,017</u></u>

12. Subsequent Events

On January 8, 2016, to obtain funding for working capital purposes and to refinance the indebtedness incurred on December 10, 2015, the Company issued an unsecured, non-convertible promissory note in the principal amount of \$3,810,000 (the “Note”) to Dr. Andrey Semechkin in return for Dr. Semechkin (i) surrendering the note issued to him by the Company on December 10, 2015 in the principal amount of \$3,110,000, and (ii) providing an additional \$700,000 of funds to the Company. Dr. Semechkin is the Company’s Co-Chairman and Chief Executive Officer. The principal amount under the Note accrues interest at a rate of One Half of One Percent (0.50%) per annum. The Note is due and payable March 10, 2016, but may be pre-paid by the Company without penalty at any time.

Table of Contents

On January 8, 2016, the Company entered into a Note Conversion Agreement with Dr. Andrey Semechkin, the Company's Co-Chairman and Chief Executive Officer (the "Conversion Agreement"). The Conversion Agreement provides for the conversion of the outstanding principal amount and all accrued and unpaid interest under, the promissory note issued to Dr. Semechkin on January 8, 2016 into shares of the Company's common stock (the "Common Stock"), Series A warrants to purchase shares of Common Stock and Series B warrants to purchase shares of Common Stock (collectively, the "Warrants" and, together with the Common Stock, the "Securities") on the terms and conditions equivalent to those offered to purchasers under the Company's proposed offering set forth on the Registration Statement on Form S-1 (No. 333-205193).

In connection with the Conversion Agreement, the Company also entered into a Registration Rights Agreement (the "Registration Rights Agreement") with Dr. Semechkin which provides Dr. Semechkin with the right on one occasion to request registration of the common stock issued or issuable as part of the Securities, together with other shares of common stock issued to (or issuable on conversion of shares of preferred stock or exercise of warrants held by) Dr. Semechkin, his affiliates and members of his immediate family, but only at such time as the Company meets the requirements for the registration of securities on Form S-3, or such other registration statement allowing for an offering to be made on a continuous basis pursuant to Rule 415 of the Securities Act of 1933, as amended, and providing for the incorporation by reference (similar to Form S-3) of future filings pursuant to the Securities Exchange Act of 1934, as amended.

On February 8, 2016, the Company entered into a Corporate Guarantee Agreement ("Guarantee") with St. John Properties, Inc. ("St. John"). The Company leases warehouse and office spaces from St. John related to its subsidiary, Lifeline Cell Technology ("LCT"). Pursuant to such lease agreement St. John agreed to pay approximately \$183,000 for certain capital improvements to the leased facility ("Capital Expenses"), provided that LCT continues to occupy the facility for the duration of the lease. Under the terms of the Guarantee the Company is obligated to reimburse St. John for the Capital Expenses if LCT ceases to occupy the facility in breach of the lease. The Company's maximum obligation under the Guarantee will not exceed the then current value of the Capital Expenses or the initial cost of approximately \$183,000, whichever is less, and shall be reduced by approximately \$26,000 per year until the expiration of the Lease, at which point the Guarantee shall become null and void.

On February 26, 2016, the Company entered into an amendment to its existing facilities lease with Jason Court Partners, LLC. The amendment extended the term of the lease for five years, subject to the Company's right to terminate the lease after three years with six month advance written notice

On March 3, 2016, the Company entered into an amendment to its existing facilities lease with S Real Estate Holding LLC (an affiliate of our CEO and Executive Vice President and Chief Scientific Officer). The amendment extended the term of the lease for one year (until February 28, 2017) and provided for a 3% increase in monthly rent.

On March 9, 2016, to refinance the indebtedness incurred on January 8, 2016, the Company issued an unsecured, non-convertible promissory note in the principal amount of \$3,810,000 to Dr. Andrey Semechkin in return for Dr. Semechkin (i) surrendering the note issued to him by the Company on January 8, 2016 in the principal amount of \$3,810,000. The principal amount under the Note accrues interest at a rate of One Half of One Percent (0.50%) per annum. The Note is due and payable April 10, 2016. On March 15, 2016, the entire principal amount of promissory note issued on March 9, 2016, was converted to 3,810 shares of Series I-2 Preferred Stock, pursuant to a securities purchase agreement (the "Securities Purchase Agreement"), dated as of March 9, 2016.

Table of Contents

On March 9, 2016, the Company, entered into a Securities Purchase Agreement (the “Purchase Agreement”) with three investors, which included two institutional investors and Andrey Semechkin, the Company’s Chief Executive Officer and Co-Chairman providing for the issuance (the “Offering”) of (i) 2,000 shares of Series I-1 convertible preferred stock (the “Series I-1 Preferred Stock”) issuable to the institutional investors at a price of \$1,000 per share, (ii) 4,310 shares of Series I-2 convertible preferred stock (the “Series I-2 Preferred Stock”, and together with the Series I-1 Preferred Stock, the “Preferred Stock”) issuable to Andrey Semechkin at a price of \$1,000 per share, (iii) Series A Warrants (the “Series A Warrants”) to purchase up to approximately 3.6 million shares of common stock at an initial exercise price of \$3.64 per share with a term of five years, (iv) Series B Warrants (the “Series B Warrants”) to purchase up to approximately 3.6 million shares of common stock at an initial exercise price of \$1.75 per share with a term of six months and (v) Series C Warrants (the “Series C Warrants”, together with the Series A Warrants and the Series B Warrants, collectively, the “Investor Warrants”) to purchase up to approximately 3.6 million shares of common stock at an initial exercise price of \$1.75 per share with a term of twelve months. The closing of the Offering occurred on or about March 15, 2016 (the “Closing Date”), subject to satisfaction of customary closing conditions set forth in the Purchase Agreement. The Purchase Agreement also contains representations, warranties, indemnification and other provisions customary for transactions of this nature. The Company received cash proceeds of \$2.5 million on the closing date.

Rodman & Renshaw, a unit of H.C. Wainwright & Co., LLC. (the “Placement Agent”) acted as the exclusive placement agent for the Offering pursuant to a placement agency engagement letter, dated as of March 9, 2016, by and between the Placement Agent and the Company (the “Engagement Letter”). Upon the closing of the Offering, pursuant to the Engagement Letter, the Placement Agent received a placement agent fee of \$200,000 and a warrant to purchase approximately 343,000 shares of common stock (the “Placement Agent Warrant”, together with the Investor Warrants, the “Warrants”) as well as the reimbursement of fees and expenses up to \$50,000. Similar to the Series A Warrant, the Placement Warrant will have an initial exercise price of \$3.64 per share, be immediately exercisable and will terminate on five years after the date of issuance.

Subject to certain ownership limitations with respect to the Series I-1 Preferred Stock, the Preferred Stock is convertible at any time into shares of Common Stock at an initial conversion price of \$1.75 per share. The Preferred Stock is non-voting, is only entitled to dividends in the event that dividends are paid on the Common Stock, and will not have any preferences over the Common Stock, except that the Preferred Stock shall have preferential liquidation rights over the Common Stock. Other than the Series I-1 Preferred Stock having a beneficial ownership limitation, the Series I-1 Preferred Stock and Series I-2 Preferred Stock are substantially identical. The conversion price of the Preferred Stock is subject to certain resets as set forth in the Certificates of Designation, including the date of any future amendment to the certificate of incorporation with respect to a reverse stock split, the effectiveness dates of the registration statements and, in certain instances, the six and twelve month anniversaries of the Closing Date.

The Warrants are immediately exercisable and the exercise price of the Warrants is subject to certain reset adjustments as set forth in the forms of Warrant, including the date of any future amendment to the Company’s certificate of incorporation with respect to a reverse stock split, the effectiveness dates of the registration statements and, in certain instances, the six and twelve month anniversaries of the date of issuance of the Warrants.

The Company has also entered into a registration rights agreement (the “Registration Rights Agreement”) with the institutional investors pursuant to which the Company is obligated to file, within forty-five calendar days of the closing of the Offering, a registration statement to register the resale of (i) 200% of the shares of Common Stock issuable upon conversion of the Preferred Stock sold to the institutional investors, (ii) 100% of the shares of Common Stock issuable upon exercise of the Series A Warrants held by the institutional investors, and (iii) 200% of the shares of Common Stock issuable upon exercise of the Series B Warrants and Series C Warrants held by the institutional investors. Additionally, the Registration Rights Agreement provides for certain monetary penalties if the registration statements are not filed or declared effective prior to certain dates as set forth in the Registration Rights Agreement.

[Table of Contents](#)

On March 24, 2016, the Company, granted a total of approximately 1 million shares of stock options at an exercise price of \$3.75 to certain of the Company's officers and employees.

PART II
INFORMATION NOT REQUIRED IN THE PROSPECTUS

ITEM 13. OTHER EXPENSES OF ISSUANCE AND DISTRIBUTION

The following table sets forth the fees and expenses incurred or expected to be incurred by International Stem Cell Corporation in connection with the issuance and distribution of the common stock being registered hereby. All of the amounts shown are estimated except the SEC registration fee. Estimated fees and expenses can only reflect information that is known at the time of filing this registration statement and are subject to future contingencies, including additional expenses for future offerings.

Securities and Exchange Commission registration fee	\$ 3,170
Transfer agent's fees and expenses	\$ —
Printing and engraving expenses	\$15,000
Legal fees and expenses	\$25,000
Accounting fees and expenses	\$10,000
Miscellaneous expenses	\$26,830
Total	<u>\$80,000</u>

ITEM 14. INDEMNIFICATION OF DIRECTORS AND OFFICERS

Section 145 of the Delaware General Corporation Law authorizes a court to award, or a corporation's board of directors to grant, indemnity to directors and officers in terms sufficiently broad to permit such indemnification under certain circumstances for liabilities (including reimbursement for expenses incurred) arising under the Securities Act.

As permitted by the Delaware General Corporation Law, the Company's certificate of incorporation includes a provision to indemnify any and all persons it has power to indemnify under such law from and against any and all of the expenses, liabilities or other matters referred to in or covered by such law. In addition, the Company's certificate of incorporation includes a provision whereby the Company shall indemnify each of the Company's directors and officer in each and every situation where, under the Delaware General Corporation law the Company is not obligated, but is permitted or empowered to make such indemnification, except as otherwise set forth in the Company's bylaws. The Company's certificate of incorporation also includes a provision which eliminates the personal liabilities of its directors for monetary damages for breach of fiduciary duty as a director, except for liability (1) for any breach of the director's duty of loyalty to the Company or its stockholders, (2) for acts or omissions not in good faith or that involve intentional misconduct or a knowing violation of law, (3) under Section 174 of the Delaware General Corporation Law or (4) for any transaction from which the director derived an improper personal benefit.

As permitted by the Delaware General Corporation Law, the Company's bylaws provide that (1) it is required to indemnify its directors to the fullest extent permitted by the Delaware General Corporation Law and may, if and to the extent authorized by the Board of Directors, indemnify its officers, employees or agents and any other person whom it has the power to indemnify against liability, reasonable expense or other matters and (2) the Company shall advance expenses to its directors and officer who are entitled to indemnification, as incurred, to its directors and officers in connection with a legal proceeding, subject to limited exceptions.

ITEM 15. RECENT SALES OF UNREGISTERED SECURITIES

During the three-year period preceding the date of the filing of this registration statement, we have issued securities in the transactions described below without registration under the Securities Act.

(a) Issuance of stock for cash.

Table of Contents

These securities were offered and sold by us in reliance upon exemptions from the registration statement requirements provided by Section 4(a)(2) of the Securities Act and/or Regulation D under the Securities Act as transactions by an issuer not involving a public offering.

From December 11, 2013 through May 13, 2014 we sold 65,778 shares of common stock to Lincoln Park for an aggregate of \$1,837,920 under the Purchase Agreement with Lincoln Park.

On May 29, 2014, the Company issued 22,223 shares of common stock to two accredited investors, each of whom was an executive officer of the Company, for an aggregate of \$500,000.

On June 26, 2014, the Company issued 36,667 shares of common stock to two accredited investors, each of whom was an executive officer of the Company, for an aggregate of \$550,000.

On August 6, 2014, the Company issued 40,000 shares of common stock to two accredited investors, each of whom was an executive officer of the Company, for an aggregate of \$600,000.

From August 29, 2014 through October 10, 2014, the Company issued 800 shares of common stock to three executive officers of the Company, for an aggregate of \$12,000.

On September 10, 2014, the Company issued 29,630 shares of common stock to two accredited investors, each of whom serves on the board of directors and serves as executive officer for a total purchase price of \$400,000.

On October 14, 2014, the Company issued a total of 2,500 shares of its Series H Convertible Preferred Stock, par value \$0.001 with a stated value of \$1,000 per share, convertible into 258,519 shares of common stock based upon an initial conversion price of \$9.67, Series A Warrants to purchase up to 258,519 shares of common stock at an initial exercise price of \$13.82 per share for a term of 5 1/2 years, Series B warrants to purchase up to 258,519 shares of common stock at an initial exercise price of \$9.67 per share for a term of six months, and Series C warrants to purchase up to 258,519 shares of common stock at an initial exercise price of \$9.67 per share for a term of twelve months, for total proceeds of \$2,500,000. The securities were issued to four accredited investors, two of whom were executive officers and directors of the Company.

On March 15, 2016, the Company issued a total of 6,310 shares of its Series I Preferred stock, with a stated value of \$1,000 per share, convertible into 3,605,714 shares of common stock based upon an initial conversion price of \$1.75 per share, Series A Warrants to purchase up to 3,605,714 shares of common stock at an initial exercise price of \$3.64 per share for a term of five years, Series B Warrants to purchase up to 3,605,714 shares of common stock at an initial exercise price of \$1.75 per share for a term of six months, and Series C Warrants to purchase up to 3,605,714 shares of common stock at an initial exercise price of \$1.75 per share for a term of twelve months. These securities were issued to three accredited investors, including our CEO and Co-Chairman and two institutional investors who had previously purchased securities from us, for total proceeds of \$6,310,000.

(b) Issuances of stock on conversion of preferred stock.

From November 26, 2014 through August 7, 2015, holders of Series H-1 Preferred Stock converted 2,000 shares of preferred stock to 424,291 shares of common stock. On November 23, 2015, holders of Series H-2 Preferred Stock converted 500 shares of preferred stock to 278,816 shares of common stock. All of these transactions were exempt issuances pursuant to Section 3(a)(9) of the Securities Act.

(c) Issuances upon conversion or exercise of warrants.

From January 1, 2013 through November 24, 2015, we issued a total of 669,362 shares of common stock upon exercise or conversion of previously issued warrants. The issuances upon conversion were exempt from registration pursuant to Section 3(a)(9) of the Securities Act and the issuance upon exercise were exempt from registration pursuant to Section 4(a)(2) of the Securities Act.

[Table of Contents](#)

(d) Issuance on exchange of warrants.

On June 16, 2014, the Company completed a series of exchange transactions with the holders of its Series A Warrants and Placement Agent Warrants that had been issued as part of a public offering consummated in July 2013. The Company issued a total of 297,772 shares of common stock to the warrant holders in exchange for the cancellation of warrants to purchase 243,699 shares of common stock and the placement agent warrants for purchase of 4,445 shares of common stock and warrants. These shares were issued in exchange for previously issued securities in a transaction exempt from registration pursuant to Section 3(a)(9) of the Securities Act.

ITEM 16. EXHIBITS

A list of exhibits filed herewith is contained in the exhibit index that immediately precedes such exhibits. These exhibits are included with this filing.

ITEM 17. UNDERTAKINGS

The undersigned registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

(i) To include any prospectus required by Section 10(a)(3) of the Securities Act;

(ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement;

(iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement;

provided, however, that paragraphs (a)(1)(i) and (a)(1)(ii) do not apply if the registration statement is on Form S-3 or Form S-8, and the information required to be included in a post-effective amendment by those paragraphs is contained in periodic reports filed by the registrant pursuant to Section 13 or Section 15(d) of the Exchange Act that are incorporated by reference in the registration statement.

(2) That, for the purpose of determining any liability under the Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(5) The undersigned registrant hereby undertakes that, for the purposes of determining liability to any purchaser:

(i) If the registrant is relying on Rule 430B:

(A) Each prospectus filed by the registrant pursuant to Rule 424(b)(3) shall be deemed to be part of the registration statement as of the date the filed prospectus was deemed part of and included in the registration statement; and

(B) Each prospectus required to be filed pursuant to Rule 424(b)(2), (b)(5), or (b)(7) (§ 230.424(b)(2), (b)(5), or (b)(7) of this chapter) as part of a registration statement in reliance on Rule 430B relating to an offering made pursuant to Rule 415(a)(1)(i), (vii), or (x) (§ 230.415(a)(1)(i), (vii), or (x) of this chapter) for the purpose of providing the information required by section 10(a) of the Securities Act of 1933 shall be deemed to be part of and included in the registration statement as of the earlier of the date such form of prospectus is first used after effectiveness or the date of the first contract of sale of securities in the offering described in the prospectus. As

Table of Contents

provided in Rule 430B, for liability purposes of the issuer and any person that is at that date an underwriter, such date shall be deemed to be a new effective date of the registration statement relating to the securities in the registration statement to which that prospectus relates, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such effective date.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

The undersigned registrant hereby undertakes that:

(1) For purposes of determining any liability under the Securities Act of 1933, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the registrant pursuant to Rule 424(b) or under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective.

(2) For the purpose of determining any liability under the Securities Act of 1933, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, as amended, the registrant has caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in Carlsbad, California on, April 20, 2016.

INTERNATIONAL STEM CELL

International Stem Cell Corporation
5950 Priestly Drive
Carlsbad, CA 92008

Ladies and Gentlemen:

You have requested our opinion with respect to certain matters in connection with the registration under the Securities Act of 1933, as amended, by International Stem Cell Corporation, a Delaware corporation (the “**Company**”), by means of a Registration Statement on Form S-1 (the “**Registration Statement**”) being filed with the Securities and Exchange Commission (the “**Commission**”) covering up to an aggregate of 7,999,999 shares of common stock, par value \$0.001 per share (“**Common Stock**”), consisting of (i) 2,285,714 shares of Common Stock issuable upon conversion of the Company’s Series I-1 Preferred Stock (ii) 1,142,857 shares of Common Stock issuable upon exercise of Series A Warrants (the “**Series A Warrants**”), (iii) 2,285,714 shares of Common Stock issuable upon exercise of Series B Warrants (the “**Series B Warrants**”) and (iv) 2,285,714 shares of Common Stock issuable upon exercise of Series C Warrants (the “**Series C Warrants**”, together with the Series A Warrants and the Series B Warrants, collectively, the “**Warrants**”).

In connection with this opinion, we have examined and relied upon the Registration Statement and the related Prospectus, the Company’s Certificate of Incorporation, as amended, and Amended and Restated Bylaws, as currently in effect, and the originals or copies certified to our satisfaction of such other documents, records, certificates, memoranda and other instruments as in our judgment are necessary or appropriate to enable us to render the opinion expressed below.

In rendering this opinion, we have assumed the genuineness and authenticity of all signatures on original documents; the genuineness and authenticity of all documents submitted to us as originals; the conformity to originals of all documents submitted to us as copies; the accuracy, completeness and authenticity of certificates of public officials; and the due authorization, execution and delivery of all documents where due authorization, execution and delivery are prerequisites to the effectiveness of such documents.

Based on the foregoing, and subject to the qualifications stated herein, we are of the opinion that:

1. With respect to the Common Stock to be issued upon conversion of the Series I-1 Preferred Stock, when such Common Stock has been issued and delivered in accordance with the terms of the Series I-1 Preferred Stock, such Common Stock will be validly issued, fully paid, and non-assessable.

2. With respect to the Common Stock to be issued upon exercise of the Warrants, when (a) the Company has received the exercise prices for such Common Stock in accordance with the terms of the applicable Warrant, and (b) such Common Stock has been issued and delivered in accordance with the terms of the applicable Warrant, such shares of Common Stock will be validly issued, fully paid and nonassessable.

In addition to the qualifications set forth above, the foregoing opinion is further qualified as follows:

(a) The foregoing opinion is rendered as of the date hereof. We assume no obligation to update such opinion to reflect any facts or circumstances that may hereafter come to our attention or changes in the law which may hereafter occur.

(b) We are members of the Bar of the State of California and we do not express any opinion herein concerning any law other than the Delaware General Corporation Law, the substantive law of the State of California and the substantive federal securities laws of the United States of America. We express no opinion as to the laws of any other state or jurisdiction of the United States or of any foreign jurisdiction. We have made no inquiry into the laws and regulations or as to laws relating to choice of law or conflicts of law principles. The opinion expressed herein is subject to the effect of judicial decisions which may permit the introduction of parol evidence to modify the terms or the interpretation of agreements.

(c) We express no opinion as to compliance with the securities (or blue sky) laws of any jurisdiction.

(d) This opinion is limited to the matters set forth herein, and no other opinion should be inferred beyond the matters expressly stated.

We consent to the reference to our firm under the caption “Legal Matters” in the Prospectus and to the inclusion of this opinion as an exhibit to the Registration Statement. In giving our consent, we do not thereby admit that we are in the category of persons whose consent is required under Section 7 of the Securities Act or the rules and regulations of the Commission thereunder.

Very truly yours,

/s/ DLA Piper LLP (US)

DLA Piper LLP (US)

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

As independent registered public accountants, we hereby consent to the use of our report dated March 30, 2016, relating to the consolidated financial statements of **International Stem Cell Corporation and Subsidiaries** (which report includes an explanatory paragraph relating to the uncertainty of the Company's ability to continue as a going concern), as of and for the years ended December 31, 2015 and 2014, in this Registration Statement on Form S-1, and to the reference to us under the heading "Experts" in this Registration Statement.

/s/ Mayer Hoffman McCann P.C.
