## Section 1 – Conflict Minerals Disclosure

### Item 1.01. Conflict Minerals Disclosure and Report

#### ***Introduction***

This report is being filed by Commercial Metals Company (together with its consolidated subsidiaries, “**CMC**”) for the calendar year ended December 31, 2024, in compliance with Rule 13p-1 (the “**Rule**”) of the Securities Exchange Act of 1934, as amended.

The Rule was adopted by the United States (the “**U.S.**”) Securities and Exchange Commission (the “**SEC**”) to establish reporting and disclosure requirements in support of mandates under Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010.

#### ***Company Overview***

CMC is an innovative solutions provider helping build a stronger, safer and more sustainable world. Through an extensive manufacturing network principally located in the U.S. and Central Europe, CMC offers products and technologies to meet the critical reinforcement needs of the global construction sector. CMC’s solutions support early-stage construction across a wide variety of applications, including infrastructure, non-residential, residential, industrial and energy generation and transmission. CMC’s operations are conducted through three operating and reportable segments: North America Steel Group, Europe Steel Group and Emerging Businesses Group.

#### ***Conflict Minerals Disclosure***

CMC conducted a centrally coordinated product review to identify conflict minerals, as defined by the SEC, which exist in products manufactured and sold by CMC, and which are necessary to the functionality or production of those products. For the calendar year ended December 31, 2024, CMC engaged procurement and product experts across all product lines and business units to conduct the review.

With regard to products manufactured and sold by CMC, it is CMC’s finding that any conflict minerals contained in such products originated solely from scrap metal sources and are unnecessary to the functionality or production of such products. Although some residual amount of the derivatives of tin, tantalum or tungsten may be present in steel products manufactured and sold by CMC, such conflict minerals come from scrap metal sources. Further, such conflict minerals are not necessary to the functionality or production of the steel products manufactured by CMC.

#### **Reasonable Country of Origin Inquiry**

CMC conducted a reasonable country of origin inquiry (“**RCOI**”) in good faith and in full consideration of the SEC’s guidance for the calendar year ended December 31, 2024. Specifically, CMC identified the suppliers of any such raw materials and requested vendor certifications, in the form of the Conflict Minerals Reporting Template specifically designed to determine whether conflict minerals originated in the Democratic Republic of the Congo or an adjoining country, as defined by the SEC, (collectively, the “**Covered Countries**”) or were obtained from recycled or scrap sources, as defined by the SEC. This information was accumulated and summarized to determine whether further due diligence procedures were necessary, and to determine the applicable Form SD reporting requirements. Given the results, no further due diligence procedures were required.

---

Reasonable Country of Origin Inquiry Conclusion

CMC has evaluated the results of the RCOI in good faith and in full consideration of the SEC's guidance, and finds no reason to believe that any conflict minerals present in steel products manufactured and sold by CMC are necessary to the functionality or production of those products or originated in the Covered Countries.
