Super Steel is capable of providing a broad range of prototyping, manufacturing, production fabricating, coating and assembly services to a variety of markets including agricultural, construction, industrial, power generation and transportation. Along with process engineering, design for manufacturing (DFM), project management and development services, Super Steel maintains an extensive manufacturing infrastructure capable of providing solutions to a diverse portfolio of customers.

We are currently looking for a Quality Technician who also possesses a current CWI credential.

Job Purpose:

Perform a variety of quality assurance tests and inspections on products, materials, components, parts, etc. at various stages of the production process to ensure compliance with quality and reliability standards. Record and analyze data, communicate results, perform statistical analysis as needed.

Essential Duties and Responsibilities Include the Following:

1. Performs various quality tests using basic measurement devices and test equipment; develop new test set-ups and/or test methods.
2. Analyzes, interprets and professionally communicates test results.
3. Troubleshoots production development problems related to parts and/or assembly; recommends improvements or solutions.
4. Assists in the verification of implemented quality improvements to the manufacturing process.
5. Using problem solving techniques, reports root cause of product and/or part failures.
6. Provides technical assistance and training in quality techniques and services.
7. Reviews customer complaints to determine where emphasis should be placed to prevent recurrence; modifies deficient aspects of system as appropriate.
8. Completes other duties as assigned.

Qualifications:

Education and/or Experience:

The position requires an Associate’s degree or equivalent experience. Minimum of three years of experience in Quality Control, Engineering or related field is required.

Certification: AWS CWI (having successfully passed testing to the D1.1 Code)

Knowledge, Skills and Abilities:

Good verbal and written comprehension, the ability to thrive in a team environment, and the ability to work with minimal supervision is required. Knowledge of quality practices and procedures per ISO9001:2015 requirements and the use of portable CMM’s (Romer or Faro) is a major benefit. Ability to set-up, calibrate and use basic measurement devices is required.

Additional Characteristics: (It is important that all Super Steel employees demonstrate the following competencies in the course of completing the job.)
· *Integrity* is the ability to maintain a high degree of certainty between what is said and done.

· *Motivation* is the drive to succeed within the cultural demands of the organization.

· *Understanding* is the ability to know how to prioritize the work and to see how independent action affects others in the organization.

· *Implementation* is the ability to take an idea or concept or plan and successfully execute it within the constraints of the organization.

· *Innovation* is the ability to acquire information and to use the information to develop new decision-making paradigms.
