JANUARY 2022 ISSUE 295

January 13th Zoom Meeting

featuring

Rusty Reneau
Strategic Accounts
Manager - Shipyards
ESAB Welding & Cutting

presenting on

ESAB Heavy Industrial Products

From Rusty: I have been involved with the welding industry for over 18 years working in different roles for distributors and manufacturers. Proud member of the AWS and have been involved with different chapters in the U.S.

My current role for the last 7 years has allowed me to focus on shipbuilding and repair. I like that this allows me to work with America's best in this industry. I cover a large territory of the west coast, gulf coast and parts of the Midwest that includes government and commercial shipbuilding. I have been able to work with different teams across ESAB to develop and implement new products and solutions for our customers that include heavy industrial equipment, filler metals and welding automation.

This will be a virtual meeting
via the Zoom video conferencing
service online

Meeting Time:

Intro 5:00 - 5:15

Program 5:15 - 6:00

Questions 6:00 - 6:15

Group chat 6:15 - 6:30

Participants will be muted
upon entry, so please
unmute yourself to speak,
although please hold most questions
about the presentation until
the end.

AWS January Quiz Question:

Which of the following is the type of Transformer used in arc welding?

- A. Step Down B. Step Up C. One-to-One D. Capable of Increasing Supply Voltage

(The answer to December's quiz question is A. Pulverized Coal Injection)

TECHNICAL QUESTIONS

We will take technical questions
about the presentation at the end.
If you have technical questions
of a different subject, please direct
them to Steve Pollard and we can
discuss.
