

AWS Presents:

Welding Challenges: Jacking Up

The Ekofisk Offshore Platform

Join us for a brief presentation on challenges faced by Phillips Petroleum Co. when it was discovered that their offshore platforms were settling and shrinking into the seabed of the North Sea. Lives hung in the balance of engineers and welders who fought issues with magnetism, pressure, water, enormous forces, and more. Come learn about this historical event from one of the engineers tasked with this job.

Presented at:
Oklahoma Technical College
41st & Sheridan
(4444 S Sheridan Rd)

November 19th, 2019

American Welding Society

Dinner and Technical Meeting at 6:30
