

FAQs - Adobe Reader® & PDF (Windows & Mac OS)

Adobe Reader (formerly Acrobat Reader) is a free software application available across all leading desktop and mobile operating systems. Reader is the trusted standard for reliably viewing, printing and annotating PDF documents (all Sequoia CPE study materials are PDF). If you do not have Reader installed on your computing device already, download the latest version here: <http://get.adobe.com/reader/>

How to open a PDF with Reader:

Reader is able to open your PDF study materials as soon as it has been downloaded from our website to your computer.

- Step 1: Click the Download Course Materials button on your My Account page to initiate the download. Your system may automatically save the PDF in your downloads folder, or prompt you to select a folder.
- Step 2: Reader will automatically open the PDF for viewing after the download is complete. However, if Reader is not the default PDF viewing application, your system may prompt you to select an application – choose Reader.

To quickly find and open a previously downloaded PDF, search for the filename in Windows or Mac OS. Then navigate to the found folder, right-click the PDF file, and choose Open.

How to navigate a PDF with Reader:

To scroll through the document page-by-page, use the scroll feature on your mouse, arrow keys on your keyboard, or the up and down arrow buttons located in the onscreen toolbar.

To go to a specific page number, enter it into the box to the right of the up and down arrow buttons in the onscreen toolbar and press Enter/Return on your keyboard.

How to find information in a PDF with Reader:

Reader's Find tool helps search PDF content for user specified keywords or phrases.

- Step 1: Right-click anywhere on the document and choose Find from the pop-up menu.
- Step 2: In the upper right of the window, enter your search term and press Enter/Return.
- Step 3: Click the previous and next arrows to navigate between each instance.
