

3 Easy Steps to Make Your Weed Wheel

1. Print the Weed Wheel with pages one and two on one sheet (front and back) and page three on a separate sheet (65 weight or heavier card stock works best).
2. Cut out the largest wheel (page 1) and the smallest wheel (page 3) along the outer edges of the wheels' outlines.

Make sure **not** to cut the "Weed Wheel" side as doing this would cut off some of the management strategies listed on the front side of the wheel.

You will have two wheels, one large and one small (see pictures at right).

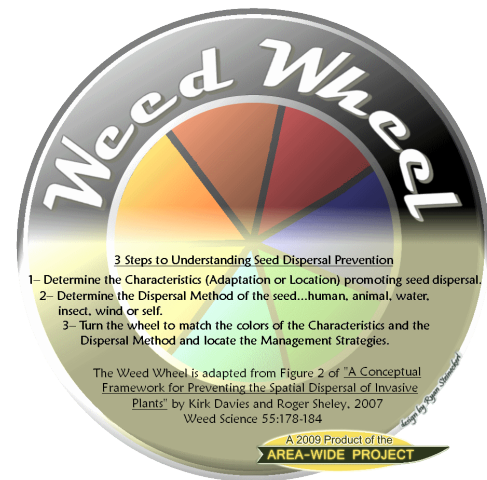

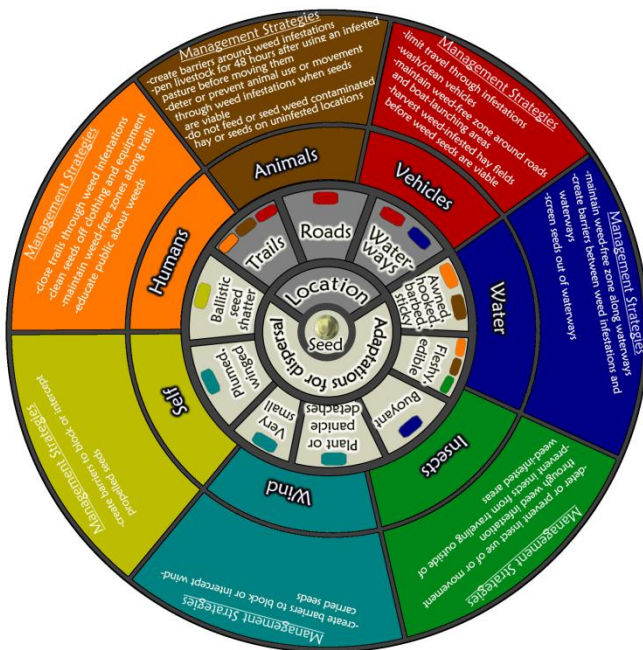

3. Use a small paper fastener, or brad, to attach the small wheel to the largest wheel (see the picture below).

The finished product should look something like this:

(front)

(back)

Start preventing the dispersal of invasive plants!
