

Hillside Prairie Gardens

Preservation season is upon us! Bulk **TOMATOES** (including Romas), **BASIL**, **GARLIC**, **ONIONS**, **HOT PEPPERS**, **KALE** (great in soups and hearty winter stews!), pick-your-own **APPLES** and **RASPBERRIES**, and possibly **PIE PUMPKINS** are available for purchase. Please contact us regarding quantities and pricing – certain items are somewhat limited.

We will also be offering a **FALL AND WINTER STORAGE SHARE** again this year, with long-storing items such as **ONIONS**, **GARLIC**, **POTATOES**, **WINTER SQUASH**, and **SWEET POTATOES** that should last you well into the cold, dark months of our wonderful northern climate. For those of you who may be interested, more information (pick-up, price, poundage, etc.) can be found on our website in the next couple of weeks, as we know more about end-of-season inventory and figure out how many shares we can actually fill – If you know you would like to reserve one, be sure to let us know soon!

CARROTS, **POTATOES**, **PEPPERS**, **TOMATOES**, and **ONIONS** have comprised the bulk of the shares this last month or so, with a few guest appearances thrown in from time to time, like **APPLES**, **HERBS**, and the odd *Allium*, *Brassica*, or *Cucurbit*. And really, who can forget the heroic **CUCUMBER**, who hasn't taken a week off yet this whole summer?! Now that's dedication.

Since we've been fairly fortunate weather-wise these last few weeks and have had the benefit of both rain and warmth for ripening, CSA shares will go into the first week of October – another three weeks. In the final harvests, you'll get to enjoy some fun and festive new items: **FINGERLINGS**, **RADISHES**, **SPINACH**, and, of course, **PUMPKINS**! Autumn, it seems, is just around the corner...
