

Meadow Haven Farm  
invites you to...

# MEET YOUR MEAT

## FROM THE GROUND UP

**ALL OF OUR ANIMALS (AND THE LAND THEY ARE RAISED ON) ARE:**

**NITRATE-FREE!**

**Chemical-Free!**  
(no nasty "-cides")

**Antibiotic-Free!**

**Pasture Raised**

**DELICIOUS!!!!!!!**

**Cattle** is 100% grass-fed and finished, we rotationally graze, and we work to have stockpiled grasses through the summer, putting up our own hay for winter feed.

Free-range **chickens** live in movable "huts", surrounded by a light-weight fence, electrified to keep out predators. They find shelter or move outside, depending on the weather and their mood, and they eat grasses, weeds, and all the bugs they can catch.

**Pigs** enjoy the freedom of a 5-6 acre pasture lot with a "wallow" (mud pits!), shade, and plenty of water.

## OUR ANIMALS GRAZE ON GRASS

## WE USE SOIL THAT IS...

Rich in minerals and organic matter; **Organically Certified** (no pesticides, herbicides, fungicides, or chemical human-made fertilizers; we use the built-in soil fertility and rich sources of added nutrients through animal manures; and we apply extra calcium in natural mined forms, along with approved trace mineral amendments.
