

Farm Manager 2019 Farm Season

About

Sassafras Creek Farm is a small acreage, USDA certified-organic, diversified, vegetable market farm in Leonardtown, Maryland, located south of Washington, D.C. We are a husband and wife team growing over 30 types of vegetables, small fruit and grains. We are dedicated to producing exceptionally delicious organic foods, providing meaningful employment, teaching employees and beginning farmers about small scale sustainable farming. We take great pride in protecting our natural resources and operating a profitable farm business.

We use modern, scale-appropriate equipment, facilities and systems to help increase production efficiencies and improve product quality. We believe in working smarter not harder. Facilities and equipment include: three seasonal high tunnels, a propagation greenhouse, washing and packing barn, walk-in coolers, tractors, mechanical seeders, rotary spader, mechanical cultivator, water wheel transplanter, bed-shapers, no-till cover crop seeder, boom sprayer, flail mower, fertilizer spreader and root harvester.

Our vegetables and grains are sold at a local farmer's market and to natural food stores, farm-to-table restaurants, other farms' CSAs, local bakers and caterers. We grow and sell year-round. The farm was established in 2011 and is veteran-owned/operated.

Duties and Responsibilities

The Farm Manager will direct, lead, manage and assist all Crew Members and assist the Farmer/Owner on a wide-range of tasks that includes, but is not limited to:
