

Pass Your CPA Exams (Fast) with SuperfastCPA

Daily study session with your review course

2 hours in the MORNING

Question-first approach

Only watch video lectures when you need to (when you aren't getting what you need from questions)

Only work through the hardest practice SIMS (for you personally), break them into parts, and make flashcards in your own words

All through the process, be making your own flashcards for topics, formulas, concepts that are hard for you to remember, and write the flashcards in YOUR OWN WORDS

The rest of your day:

DO MINI SESSIONS!
Whenever you have even a few minutes, pull out your phone and....

Read review notes

Read them from start to finish, over and over

This repeat coverage is how you increase your retention of everything as you get closer to your exam, instead of forgetting everything!

Do mini quizzes

Listen to the audios whenever you're commuting/in your car!

Same as the review notes... listen to them from start to finish.... over and over as you go through your study window

Make these mini sessions a habit... you'll be amazed how fast you start understanding the material

Using all your little bits of spare time to study can add 2-3+ hours a day of extra exposure, which means getting 150+ extra hours in for each section, which obviously pays huge dividends and increases your chances of passing!

"Final Review"

The beauty of the repeat coverage of the mini sessions is that you won't really need a big 2-week long final review

Schedule your test on a Monday so that you can cram like crazy on the Saturday and Sunday before your exam

On test day:

Get to the testing center 1-2 hours early and do another cram session in your car

This 48 hours should consist of:

Reading our review notes 3-5 times all the way through

Going through your own flashcards several times

Doing 2 sets of 30 MCQs, then a set of 5-7 practice simulations

Do this over and over

Read through our notes again

Go through your flashcard decks again all the way through if possible
