Is cat healthy?

No

If cat is sick or injured, call Animal Control or bring to shelter.

Yes

How long have you seen the cat?

Short time:
Cat could have been recently acquired by someone in the neighborhood, or an indoor cat that accidentally got out.

If you are feeding the cat:

Stop feeding or cat may not go home

If you are not feeding the cat:

Take to shelter or veterinarian and scan for chip. Ask neighbors, put up flyers in neighborhood and at veterinary hospitals, check/post on Craigslist and Pet message board. If the cat comes and goes, it most likely belongs to someone. If you know someone has abandoned cat, and you don’t want the cat, try rehoming cat.

Long time:
Cat is a “neighborhood cat”.

If you are feeding the cat:

Have the cat spayed or neutered. If you can no longer care for the cat, rehome cat, or see if there is someone in the neighborhood who can take over care.

If you are not feeding the cat:

If they are kittens that cannot eat on their own and there is no mother, call or bring to shelter.
