

See How Famous Dave's Used SkyTab to Power Curbside Pickup

Famous Dave's implemented SkyTab at five restaurant locations to create a makeshift drive-thru and curbside payment solution for guests. SkyTab enabled these locations to create a "Parking Lot Host Stand" in which guests could walk or drive up to get their orders. This was all set up within two days of ordering the devices from Shift4. Famous Dave's has over 125 restaurants across the country and plans to expand this program to its other locations based on the success of these pilot locations.

“The SkyTab solution is so simple, effective, and helped streamline our order pickup process so much, we are rolling it out to other locations as quickly as possible.”

- Jeff Eccles, Vice President of Information Technology at Famous Dave's
