SWITCH TO THE FUTURE

Electronic Relays and Actuators: Multi and Single Function

Call and reset switches for bathrooms

Bathroom lighting control

Bedroom light control

Living room light control

Office lighting control

Remote climate control

13
SERIES

13.81 - Quiet electronic step relay - Rail mount - 1 Pole

13.91 - Quiet electronic step relay and timing step relay Switch box mount - 1 Pole

- Fixed time (10 minutes) timing function selectable (13.91)
- Use with 3 or 4 wire connection, with automatic recognition by the relay
- Control input can be continuously applied
- Longer mechanical and electrical life, and much quieter than electromechanical step relays
- "Zero crossing" load switching
- Can be mounted behind blanking plates, as widely used in residential wiring systems such as; BTicino: Axolute, Matix, Living and Magic, Gewiss: GW24, Vimar: Plana and Idea … (13.91)
- 35 mm rail (EN 60715) mount (13.81)
- Cadmium free contact material

13.81/91
Screw terminals

13.81

- 1 NO (SPST-NO)
- 35 mm rail (EN 60715) mount
- 17.5 mm wide

13.91

- 1 NO (SPST-NO)
- Step relay and timing step relay (10 minutes)
- For mounting within residential switch boxes

For outline drawing see page 19, 20

Contact specification

13.01 - Electronic step/monostable relay
Rail mount - 1 Pole

13.61 - Multifunction step/monostable relay
with reset command - Rail mount 1 Pole

- Selectable Step or Monostable operation (13.01)
- Multifunction (Step, Timing step, Monostable, Light ON) (13.61)
- Reset feature, for centralized off command (13.61)
- Set feature, for centralized on command (13.61.0.024)
- Control input can be continuously applied
- Longer mechanical and electrical life, and much quieter than electromechanical step relays
- 12…24 V AC/DC and 110…240 V AC supply versions (13.61)
- Suitable for SELV applications and available also for supply 12 and 24 V AC/DC (13.01)
- "Zero-crossing" load switching (13.61)
- 35 mm rail (EN 60715) mount
- Cadmium free contact material

13.01/61

Multi and Single function electronic relays with Bluetooth

13.22 - Electronic multifunction relay 2 Pole
- Round wall box (ie: Ø 60 mm) mounting
- 21 available functions (step relays, timer, staircase timer) for lighting and fan motor control

13.72 - Electronic multifunction relay 2 Pole
- Wall mounting, compatible with most popular Italian residential switch boxes: AVE, BTicino, Gewiss, Simon-Urmet, Vimar
- 21 available functions: step relays, timing (1s - 24h), electric shutter, blind or curtain control

13.S2 - Electronic roller shutter actuator
- Round wall box (ie: Ø 60 mm) mounting
- For electric shutter, blind or curtain control
- 2 contacts NO 6 A - 230 V AC independent and programmable channels
- 2 inputs for wired pushbuttons (one input per channel)
- Transmission range: approximately 10 m in free space and without obstacles

13.22/S2/72
Screw terminals

NOTE: with 110…125 V AC supply, the Ratings (AC1, AC15 and lamp loads) must be reduced by 50 % (e.g. 100 W instead of 200 W)

For outline drawing see page 20

NEW 13.22 YESLY

- Offering a variety of ON/OFF functions associated with lighting and fan motor control
- Transmission protocol Bluetooth Low Energy (BLE)
- Safe connection with 128-bit encryption
- App programming with iOS or Android Smartphone: Finder TOOLBOX
- Can be managed through standard pushbuttons, BEYON and Type 013.B9 wireless buttons

NEW 13.72 YESLY

- Offering a variety of ON/OFF functions associated with lighting, electric shutters, blinds or curtains
- Transmission protocol Bluetooth Low Energy (BLE)
- Safe connection with 128-bit encryption
- App programming with iOS or Android Smartphone: Finder TOOLBOX
- Can be managed through standard pushbuttons, BEYON and Type 013.B9 wireless buttons

NEW 13.S2 YESLY

- Suitable for electric shutters, blind or curtain control
- Transmission protocol Bluetooth Low Energy (BLE)
- Safe connection with 128-bit encryption
- App programming with iOS or Android Smartphone: Finder TOOLBOX
- Can be managed through standard pushbuttons, BEYON and Type 013.B9 wireless buttons

Bluetooth single channel multifunction relay NEW **13.21.8.230.B000**   NEW **13.21.8.230.S000**

YESLY   **BLISS2**

Type 13.21.8.230.B000
- BLE communication protocol
- Round wall box (ie: Ø 60 mm) mounting
- 12 available functions
- Up to 8 scenarios
- Pushbutton Phase or Neutral connection

Radio frequency remote actuator for BLISS2

Type 13.21.8.230.S000
- 868 MHz long-range radio frequency transmission
- Multi-zone heating/cooling function
- Hygrostat function combined with the Bliss2 thermostat
- Compatible with the BLISS2 smart thermostat

13.21
Screw terminals

13.21.8.230.B000	**13.21.8.230.S000**
• 1 CO (SPDT) 16 A 250 V AC	• 1 CO (SPDT) 16 A 250 V AC
• Bluetooth Low Energy (BLE) transmission protocol	• Compatible with Bliss2 smart thermostat
• 128-bit encrypted connection	• Heating/cooling systems - direct or solenoid control
• Programmable via TOOLBOX App Finder compatible with iOS and Android operating systems	• It can be used in dehumidification or forced ventilation systems
• It can be connected to wired buttons or to BEYON and 013B9 wireless buttons	
• Recess mounting

Functions for types 13.01, 13.11, 13.12, 13.81, 13.91

Type	Functions	
13.01	B2-B3 11-14	**Monostable.** On closure of a switch between terminals (B2-B3) the output contact will close, and remain so, until the switch opens.
	B1-B2 11-14	**Step relay (bistable).** After every impulse (B1-B2), the output contact changes state - alternately switching from open to closed and vice versa.
13.11 **13.12**	S R 11 - 14 21 - 24 (13.12 only)	**Call and Reset relay.** On momentary closure of the Set switch (S), the output contact closes. Only a momentary closure of the Reset switch (R) will open the output contact.
13.81		**(RI) Step relay.** After every impulse, the output contact changes state - alternately switching from open to closed and vice versa.
13.91		**(RI) Step relay.** After every impulse, the output contact changes state - alternately switching from open to closed and vice versa.
	10' <10'	**(IT) Timing step relay.** On initial impulse the output contact closes and timing starts for the pre-set duration (fixed 10 min); On expiry of the time delay, the output contact opens. During the timing period it is possible to immediately open the contact with a further impulse.

Operating mode setup for type 13.91

RI → IT

3"

IT → RI

3"

a) Remove the supply voltage
b) Press the control button
c) Apply the supply to the relay, keeping the button closed. After 3 second, the light will flash twice to indicate the selection of the "IT" function, or flash once for "RI" function.

Functions for type 13.61

Type	Functions		
13.61.8.230			

(RM) Monostable.
On closure of a switch between terminal 3 and Line (or Neutral, in case of 3-wire connection) the output contact will close, and remain so, until the switch opens.

T≥3s.

(IT) Timing step relay.
On initial impulse the output contact closes and timing starts for the pre-set duration T; On expiry of the time delay, the output contact opens.
During the timing period it is possible to immediately open the contact with a further impulse.
Switch-off delay time: 30s…20min.

T≥3s.

T   t<T   t<T

(RI) Step relay.
After every impulse, the output contact changes state - alternately switching from open to closed and vice versa.

T≥3s.

☼ Light ON.
With this function set - the output contact stays permanently closed.

T≥3s.

13.61.0.024

(RM) Monostable.
On closure of a switch between terminal 3 and Line (or Neutral, in case of 3-wire connection) the output contact will close, and remain so, until the switch opens.

T≥3s.

T≥1s.

(iT) Timing step relay.
On initial impulse the output contact closes and timing starts for the pre-set duration T; On expiry of the time delay, the output contact opens.
During the timing period it is possible to immediately open the contact with a further impulse.
Switch-off delay time: 30s…20min.

T≥3s.

T≥1s.

T   t<T   t<T   T

(RI) Step relay.
After every impulse, the output contact changes state - alternately switching from open to closed and vice versa.

T≥3s.

T≥1s.

☼ Light ON.
With this function set - the output contact stays permanently closed.

T≥3s.

T≥1s.

K

Functions for type 13.22, 13.72 and 13.21.8.230.B000

Relay settings

Multifunction electronic relays can be configured with the Finder TOOLBOX App, available for iOS or Android systems.
This product is ready-to-use preset with the factory setting (RI) Step relay on both channels.

Type	Functions	
13.21-B000 13.22 13.72		**(RM) Monostable relay.** On closure of the switch the output will close, and remain so, until the switch opens.
		(RI) Step relay (pushbutton control). After every impulse, the output contact changes state - alternately switching from open to closed and vice versa.
		(RIa) Step relay - lighting switch control (Type 13.22 and 13.21.8.230.B000 only). Each time a lighting switch is activated, the output contact changes state. The output state can also be changed using YESLY wireless pushbutton, a smartphone, or voice assistants. Ideal for converting a traditional lighting system using one, two, or four way switches, into a Smart system. (See page 17).
		(LE) Asymmetric flasher (starting pulse on) with control signal. Power is permanently applied to the relay. Closing Signal Switch (S) causes the output contacts to transfer immediately and cycle between ON (T1) and OFF (T2), until opened.
		(DE) Interval with control signal on. Power is permanently applied to the relay. On momentary or maintained closure of Signal Switch (S), the output contacts transfer, and remain so for the duration of the preset delay, after which they reset.
		(BE) Staircase timer. On initial impulse the output contact closes and timing starts for the pre-set duration; subsequent impulses during the timing period will extend the timing period by the full pre-set value. On expiry of the time delay, the output contact opens.
		(ME) Staircase timer + Staircase maintenance. In addition to the Staircase timer function (BE), an impulse of ≥ 5 seconds will close the output contact for 60 minutes, after which time the contact will open. Ideal for maintenance or cleaning activities. The 60 minute timing can be interrupted by a further impulse of ≥ 5 seconds, when the output contact then opens.
		(BP) Staircase timer with switch off early warning. On initial impulse the output contact closes and the timing starts for the pre-set duration. After the timing period, the output contact blinks off once; 10 seconds later the contact blinks off twice, and after a further 10 seconds the contact opens. During the pre-set and 20 second warning time, it is possible, by a further impulse, to extend the time by the full pre-set value.
		(MP) Staircase timer with switch off early warning + staircase maintenance. In addition to the Staircase timer function (BP), an impulse of ≥ 5 seconds will close the output contact for 60 minutes, after which time the output contact blinks off once; 10 seconds later the contact blinks off twice, and after a further 10 seconds the contact will open. Ideal for maintenance or cleaning activities. The 60 minute timing can be interrupted by a further impulse of ≥ 5 seconds, when the output contact then opens.

K

Functions for type 13.22, 13.72, 13.21.8.230.B000 and 13.S2

Type	Functions

13.21-B000
13.22
13.72

(IT) Timing step relay.
On initial impulse the output contact closes and timing starts. On expiry of the time delay, the output contact opens. During the timing period it is possible to immediately open the contact with a further impulse.

(IP) Timing step relay with switch off early warning.
On initial impulse the output contact closes and timing starts. After the timing period, the output contact blinks off once; 10 seconds later the contact blinks off twice, and after a further 10 seconds the contact opens.
During the pre-set and 20 second warning time, it is possible to immediately open the output contact by a further impulse.

(FZ) Timing monostable.
The output will be closed when the switch is closed, except where the switch is closed for greater than the preset time T_1 - in which case the output contact opens.

13.22
13.72

(VB) Bathroom light + fan.
Channels Ch1 and Ch2 both close when the P1 command is pressed. At the expiry of T_1 Ch1 opens and after a further delay of T_2, Ch2 opens.
Ch1 can be prematurely opened by another press of P1.

(CP) Ringbell + light.
A press to P1 closes Ch1 for the pre-set time T_1. While Ch1 is closed Ch2 executes a blinking function, at a rate set by T_2. Subsequent presses to P1 extends the Ch1 closed time by re-triggering T_1.

13.S2
13.72

(TP) Roller shutter.
A short press (<1 second) to P1 ("up" pushbutton) initiates a 500ms delay before Ch1 closes for time T_1. Pressing P1 again within time period T_1 will immediately open Ch1 contact. If P1 is closed for more than 1 second the Ch1 contact will open immediately P1 opens.
The same operation applies to P2 and Ch2 contact, used to control the "down" function.

Sequences

P1 (SET): press to advance through the sequence

P2 (RESET): press to return to Step 1
