

## Item description

WAGO-I/O-CHECK is an easy-to-use Windows application for the checking of inputs and outputs and the display of a WAGO-I/O-SYSTEM 750 node.

The software reads the configuration from the node and displays it as a graphic on the screen. The graphic can be printed together with a configuration list as documentation.

With WAGO-I/O-CHECK it is possible to display and determine the process data of the bus modules. The field wiring, including all sensors and actuators, can thus be checked before startup.

Application-specific settings, such as the baud rate or type of sensors, can be made with certain interface, Pt100 and thermocouple terminal blocks.

The coupler must be connected at a vacant serial or USB port of the PC using the communication cable supplied in the kit with the system to enable communication between WAGO-I/O-CHECK and the coupler.

## Data

### System requirements

|                             |  |
|-----------------------------|--|
| Supported operating systems | Windows XP (SP3 or later)<br>Windows 7               |
| Processor                   | 1 GHz or higher, with 32 bits (x86) or 64 bits (x64) |
| RAM memory                  | min. 1 GB RAM (recommended: 2 GB RAM or more)        |
| Hard disk storage           | min. 150 MByte                                       |

Graphics resolution

min. 1024 x 786 (recommended: 1280 x 1024 or higher)

## Delivery

Delivery type

Installation file (CD-ROM)

Included

CD-ROM with software and serial communication cable 750-920

## Commercial data

Country of origin

DE

GTIN

4045454394899

Customs Tariff No.

85234920009
