WAGO-I/O-CHECK; USB-Set

759-302/000-923

Item description

WAGO-I/O-CHECK is an easy-to-use Windows application for the checking of inputs and outputs and the display of a WAGO-I/O-SYSTEM 750 node.

The software reads the configuration from the node and displays it as a graphic on the screen. The graphic can be printed together with a configuration list as documentation.

With WAGO-I/O-CHECK it is possible to display and determine the process data of the bus modules. The field wiring, including all sensors and actuators, can thus be checked before startup.

Application-specific settings, such as the baud rate or type of sensors, can be made with certain interface, Pt100 and thermocouple terminal blocks.

The coupler must be connected at a vacant serial or USB port of the PC using the communication cable supplied in the kit with the system to enable communication between WAGO-I/O-CHECK and the coupler.

Data System requirements

Supported operating systems	Windows XP (SP3 or later) Windows 7
Processor	1 GHz or higher, with 32 bits (x86) or 64 bits (x64)
RAM memory	min. 1 GB RAM (recommended: 2 GB RAM or more)
Hard disk storage	min. 150 MByte
Graphics resolution	min. 1024 x 786 (recommended: 1280 x 1024 or higher)
