Thank you for purchasing the Dome Z-Wave Water Main Shut-Off, which works with your Z-Wave Certified Controller to let you control your water main while on vacation, or have it automatically shut off in case of leaks or other emergencies.

Including/Connecting into the Z-Wave Network:
1. For proper inclusion, bring the Water Main Shut-Off to the final location where it will be used. *
2. Follow the instructions for your Z-Wave controller to enter inclusion mode.
3. Make sure the Water Main Shut-Off is powered on, and when prompted by your controller, press the “open/close” button quickly 3 times in a row. The LED will stop blinking and stay on continuously upon successful inclusion.

CAUTION
Upon inclusion, the motor will engage and start turning automatically. To avoid serious injury, keep your fingers and hands clear of the CONTROL ARM and its path, only gripping the unit firmly by either the MOUNTING BRACKET or the top of the MOTOR ASSEMBLY.

*For non Z-Wave Plus networks, please consult the owner’s manual for your primary controller to determine the best method and location for adding the Water Main Shut-Off to your Z-Wave network.

Installation:
The Water Main Shut-Off can be installed on any preexisting ½” to 1 ½” brass ball valve, at least 5” away from any walls or other obstruc-
tions. Examine Figure 3 and make sure there is enough room in your plumbing installation to accommodate the Shut-Off.
1. Make sure the valve is comfortably usable by hand before continuing further.
2. Unscrew the screws on both HOSE CLAMPS completely so their ends are free, insert both of them into the MOUNTING BRACKET, and let them hang loosely.
3. Remove the protective film covering the CONTROL ARM screws and spread the CON-
4. Make sure both the ball valve and the Water Main Shut-Off are in the “open” position (where the handle is inline with the pipe, not at a right angle to it,) and slide the CONTROL ARM around the valve’s handle (fig 4.)
5. Loosely tighten the hose clamps around the pipe on the opposite side of the valve handle so it remains movable (fig 3.)
(continued on next page)
8. Squeeze the CONTROL ARM support if you require further support. Please visit www.domeha.com/

6. Position the bolt of the Water Main Shut-Off From Vise System.

5. Square the control arm around the valve handle to assembly snugly with the four screws previously covered by the protective rubber cap (fig 6.) and pull it outward by the keychain ring. The CONTROL ARM will disengage from the hinge. Remove the Water Main Shut-Off From Vise System.

4. Loosen the hinge with a hex key wrench and move the motor and move freely. The MOTOR CLUTCH on the underside of your device (fig 6,) and pull it upward by the keychain ring. The CONTROL ARM will disengage from the hinge.

3. Unplug the power from your device. The Water Main Shutoff can be operated manually in the event of a power outage, in the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference which may cause undesired operation. This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference which may cause undesired operation. The Water Main Shutoff's memory will be erased to factory settings. A flashing light indicates a mode. Follow the instructions for your Z-Wave certified Controller to enter exclusion mode. When prompted, press the "open/close" button on the Shut-Off quickly 3 times in a row. To restore your Water Main Shut-Off to Factory Settings

1. Press and hold the open/close button for at least 10 seconds then release. The Shutoff will motor and move freely. Beware that resetting your device will disconnect it from your system. only the original retail purchaser (the "Purchaser") that the DOME Win

2. Locate the MOTOR CLUTCH on the underside of your device (fig 6,) and pull it upward by the keychain ring. The CONTROL ARM will disengage from the hinge.
