01. simple
02. innovative
03. fun
the sky is not the limit

We have always been, and always will be about experiences—by creating unique products to separate you from the noise, simplifying your life, and together building a non-traditional family in an industry that has been stagnant for years.

Our passion for experiences, however, does not end with the absolute best, most unique, and innovative screens in the galaxy, but by also partnering our dealers with a forward thinking company that actually cares. We are not just in the business of revolutionary product development, we’re in the business of revolutionary partner development.

7 fixed

900% better contrast

900% – published by S&V magazine, introduced in 2008, Black Diamond® is our award-winning, proprietary ambient light rejecting screen material which preserves the contrast ratio from the projector and enables a much more accurate image representation than a matte white or gray screen can achieve.

classic fixed frame style

All of our screens are completely hand-built and 7 Series Fixed is no exception. We wrap our 3.5” fixed frames with a fine velvet material which ensures that the frame is as unobtrusive as possible during your viewing experience.

size

Max: 120” (3048mm) in 16:9

Ships unassembled – some assembly is required.
5 fixed

our 5 Series Fixed frames, which start life as a 3.5" aluminum extrusion, are built entirely by hand, including the hand wrapped fine velvet material.

We include an even greater sense of immersion when watching 2.35:1 movies. The slight curvature of the screen gives the impression of the image wrapping around you, involving you in the action to an even greater degree.

---

**quality and value**

One of the most difficult things to do as a manufacturer is to provide high-quality product at affordable prices. Series Fixed meets both of those objectives and gives the "every day man" access to the big screen experience.
big screen and small price

We couldn’t skimp on the quality when it came to engineering our value oriented 1 Series Fixed. We had to have both quality and affordability in one package, and to accomplish this, we designed a system that could be both built quickly, but also with the same high-quality standards we design into every product we make.

size
Max: 133” (3378mm) in 16:9
Standard sizes only

installation adjustment
Ships unassembled – some assembly is required.

frame
- 3.5” aluminum extrusion hand wrapped in velvet

HDTV ratio
1 Series Fixed is available in the most popular aspect ratio, 16:9, which is the same as most flat-panel televisions. That means that you can have up to a 133-inch TV and get the big screen experience for less than you think.

### Control

"Alexa, turn on movie time."

For the ultimate freedom, any of our RTS products can be integrated into the Amazon Echo ecosystem allowing voice commands to control your screen.

Amazon, Alexa and all related logos are trademarks of Amazon.com, Inc. or its affiliates.

### Mobile app

Complete control in the palm of your hands.

Automate any of our RTS products based on the astronomical clock, and set scenes to engage multiple systems at the touch of a button.

*ALR = Ambient Light Rejection*
seating distance
Not sure how big of a screen you need based on your seating distance? With our seating distance calculator you can instantly get the correct screen sizes using the visual acuity scale established by the ITU (International Telecommunications Union) based on UHD/4K resolution.

projector wizard
Will your projector fit the available space? What about your screen? To find out, use the Projector Wizard which includes specifications for every single projector ever made. Literally.

screen wizard
After you’ve determined which projector and/or screen is appropriate for your space, you can then use our screen wizard tool to determine which screen material is best for your space. Simply enter your ambient light value you obtained by using the free Whitegoods app, your screen size and projector lumens and our calculator will recommend exactly which material will work for your environment.

screen calculator
Once you know the material that is recommended for your space, our Screen Calculator will take that information and generate a PDF drawing of your screen in mere seconds, not weeks. You can then email the quote or print the PDF of your drawing directly from the calculator.
