## 65" Digital Signage Network Displays

### Title Safe Zone

To prevent any important content from getting cut-off around the edge of the displays, content creators should use a "Title Safe Zone". This boundary starts 10% in from each edge of the frame and ensures that all content within those borders is visible on the displays. All essential text, logos, and titles should be within this inner boundary. We can provide a Title Safe Zone template if needed.

### File Specifications

**FINAL OUTPUT RESOLUTION** 1920 x 1080 at 72 pixels/inch composition

**COLOR SPACE** RGB

**FORMATS ACCEPTED** JPEG (preferred), Microsoft PowerPoint\*, PNG

**MOTION FILE TYPES** MP4 with H.264 compression only

**AUDIO** Although the MCEC Digital Signage Network is capable of playing content with audio, we recommend that content producers not include audio in their content.

**VIDEO LENGTH** Exactly 15 or 30 seconds (all videos are scheduled in 15 second increments)

**VIDEO SIZE** Less than 200 MB

*\* When creating content in PowerPoint, please make sure the document is an 'On-screen Show (16:9)'. This setting is listed under 'Page Setup'. The slides will be converted to JPEGs and played as static images. All animations added in PowerPoint will be lost.*
