

Thanks so much for all your support this past year. I have just finished my first semester of SENIOR year at the illustrious Tuskegee University where I am pursuing my dreams of becoming a veterinarian. I have had a good semester, being invited to become a part of the prestigious Tuskegee Pre-Veterinary Medical Scholars Program again. This past semester has been filled with many science related courses and many community service related activities. This semester's courses included lectures and labs in the following courses: Organic Chemistry 2 Lecture & Lab, Physics 2 Lab, Bio-Statistics, Companion Animals, and Animal Behavior. With this extensive course load, I managed to become the President of the new Student Chapter of the National Association of Black Veterinarian as well as participate as the UNCF Student Ambassador for Tuskegee University. I continued actively working with the Tuskegee Pre-Alumni Council, Tuskegee Univ. Pre-Vet Club and the Sister-to-Sister Mentoring Network. To continue my passion for Girl Scouts, I served as an assistant Girl Scout Troop leader for a troop that meets in Auburn, Alabama. As important, I was selected to be a part of the Tuskegee Pre-Veterinary Medical Scholars Program that allowed me to shadow and assist doctors in the Tuskegee Veterinary School and Hospital). Next semester, I plan to continue my coursework in animal science and graduate in May 2021 (Cum Laude). During the summer 2021, I will travel abroad to study in Thailand and work with veterinarians to heal animals (e.g., elephants, cats, dogs, tigers). Thank you again for your support. Happy holidays.

Maya Sullivan
