

Golf Outing Check-In Software

Automates Player Check-In & CC Capture, Increases Event Day Revenues, Eliminates Auction Check-Out Congestion and Enhances Player Experience.

EVENT SOFTWARE

Many of Great Golf Events' clients have implemented this Event Software to streamline check-in - while capturing each player's credit card. Since credit cards are swiped and captured at check-in, players never have to reach into their pocket during the event – they simply identify themselves with their unique VIP number, recorded on a poker chip, assigned to them at check-in. The implementation of this software significantly increases event-day revenues; eliminates silent and live auction check-out congestion; and facilitates all the accounting for tracking sales & generating receipts. Bottom-line, having player and dinner guest credit cards on-file makes it easier for them to spend and enhances their event experience.

Live Demonstration Available Upon Request

Training and Support are handled by Greater Giving (*the developer of the software*) and Great Golf Events. Great Golf Events prepares the software for pre-event training and event-day check-in.

Yearly License Fee:

Sold Directly through Greater Giving

- Software License: \$395
- Merchant Fees
 - Visa, MC & Discover - 1.8%
 - AMEX - 2.5%
