

2019 National ESEA Conference: Using School Level Finance Data for System Improvement
February 2, 2019

The superintendent has scheduled a meeting with each principal to discuss the following data. The circles on the graph all represent schools in the same district with similar levels of students qualifying for free or reduced-price lunch. Role play the conversations for the meetings with principals A, B, C, and D, and jot down key points in that conversation. Next, imagine that each principal will meet with his/her school staff on the data, and jot down key points for that conversation.

	<i>Superintendent to Principal</i>	<i>Principal to Staff</i>
School A		
School B		
School C		
School D
