Idaho State Coordinator for Title IX-A Homeless Education and Title I, Part D Neglected, Delinquent, & At-Risk Programs
Idaho Department of Education
SPeck@sde.idaho.gov
Agenda

• Presenter Introductions
• Overview of McKinney-Vento Act
• Demo of ED Data Express
• Panel Discussion
• Q&A
Overview of McKinney-Vento Act

• The McKinney-Vento Homeless Assistance Act (McKinney-Vento Act) was signed into law in 1987 requiring states to review and revise policies to ensure the immediate school enrollment of homeless children and youth; most recently reauthorized by Title IX, Part A of the Every Student Succeeds Act.

• The U.S. Department of Education allocates McKinney-Vento funding annually to states based on the state’s proportion of the Title I, Part A federal allocation. States must subgrant funds competitively to school districts within the state to be used for program implementation at the district level.

• The McKinney-Vento Act requires State educational agencies (SEAs) to ensure that each homeless child and youth has equal access to the same free, appropriate public education as other children and youths.

What is the greatest challenge your SEA or LEAs face when trying to use data for program management?
ED Data Express contains the privacy-protected student performance data collected by the Department of Education.

ED Data Express was redesigned with 3 main goals in mind: security, performance, and usability.

Each dashboard has at least one main visualization, typically a U.S. map which drills down into the school district-level of a State or local educational agency.
The grant program dashboards present information on funding, program participation, and performance.

The visualizations update based on the filters a user selects.
Panel Question #2

How does data inform whether a program is working? How can data be used for program planning and development?
The download functionality allows users to export privacy-protected data based on the following set of filters: (1) Grant program; (2) State; (3) School year; (4) Reporting level (State or district); and (5) Type of data.
Demo of ED Data Express

https://eddataexpress.ed.gov

- Contextual information in the form of data notes is also available for download.
Panel Question #3

What are ways data can be used for collaboration within and across states?
What data success story are you most proud of at the local level and state level?
Q&A
