

 Tailored solution

SET TOP BOX Take Back Program

A truly one-stop-shop solution across EMEA

Sims Recycling Solutions offers high capacity services including the repair of HDD throughout EMEA. Your requests will be managed in our Webportal which enables you to monitor the proceedings of our integrated services including your individual shipments. All of this will be combined with detailed reporting so you will have a complete and transparent overview on your SET TOP BOX Take Back Program.

Of course we will see to it that your products are received and stored in a secure environment where these data carrying devices will be safely processed. Serial numbers of the STB can be registered as well as that of the HDD, and the two can be linked throughout the entire process.

Your Benefits:

- 24/7 visibility on your shipments with our Global WEEE Portal.
- 24/7 control & reports on your Take Back Program.
- Safe & secure handling with transparent processes.
- Single point of contact managing your requirements.
- Highest yield and revenue for resale of HDD.
- Sustainable recycling solutions.

SET TOP BOX Take Back Program

Our processes are compliant with the EU's WEEE Directive and national regulations. Additionally the majority of our sites are ISO 9001, 14001, OHSAS 18001 and Weelabex or R2 certified.

This is how your SET TOP BOX Take Back Program could look like:
