Maintain a Germ-Free Zone!

DID YOU KNOW?

It's been reported that every square inch of your phone has around 25,000 germs. That's more disgusting than a toilet seat. That makes your phone one of the dirtiest objects you come in contact with everyday.

Good thing we have a product that will help protect you!

UV02 - Keep your phone, keys, or other small gadgets sanitized with the **UV Box**. This box has a UV light that sterilizes your items quick and effectively. Just plug it in, connect to a power supply and close the lid. This is great for any office, waiting room or tradeshow booth.

As low as \$38.22

UV03 - Another option for sanitizing your items is the **UV Box Deluxe**. This box has a deeper pocket to allow you to sterilize more items. Like the UV Box, just plug it in and connect to a power supply. In a few moments, your items will be germ free and ready for use. This box has a nice imprint area on top for showing off your logo and would make a great self promo item!

As low as \$42.53

SC21-US - Our best selling promo product of all time is the **Spray & Wipe**. The anti-microbial spray keeps phones free of germs and grime. Just **spray** on your phone and **wipe** the germs away with microfiber cloth that's attached. These are one of the most useful promotional products on the market!

As low as \$2.58
