## Breakup video share chat

By Jericho McCune, a videophone of science fiction, becoming a reality, web designers are finding it difficult to keep track of social needs. Online chat becomes less personal as users become more and more video chats, so that anonymous usernames on the other side can become faces and sounds. Designing video chat software from scratch is a monumental task for any web developer. Fortunately, there are many software solutions that can be installed on the site's servers and fired up to get the job done. Install red5chat open source solution for video chat Red5chat is fully customizable and the source code is well documented to make it easier for users to customize. To install the host server software must be a dedicated server of Windows or Linux that enables PHP and MySQL, it comes with a full registration feature, so that anyone who uses the service must register with the site before the language filter, the ability to view up to four web cakes at the same time and a host of other features, try the demo version AVChat. Buying the full version will cost between \$95 to \$799 as of 2010, depending on how strong the software is. The cheapest version can support connections up to 20 times, while the most expensive models have no connection. AVChat Ltd has both the ability to chat with voice and video, as well as the space around the chat area to place ads. A permanent room can be created from a simple admin interface. But powerful with all versions of the software. 123 Flash Chat allows users to chat on a computer or iPad, the ability to reskin to chat rooms by hitting the space for ads, making money and personal user icons. In addition, game packages can be added to chat clients so that users can while away time lulling conversations. When you really need a long-distance phone call or a simple voice chat, pale compared to a one-on-one video chat. You can look your other important distance in the eye while you talk; your parents can see their grandchildren growing up; and under the right circumstances, video chat can also be a wonderful tool for calling and collaborating related to work. The question is, which tools should you use to get the most out of your calls? Earlier this week, we asked you to share your favorite video chat application, and today we're back with five top answers. Read on to see the best video chat tools, then vote for your loved ones, Google Video Chat (on the web, Windows/Mac operating system. It launched a video chat within Gmail earlier this week and it became a popular option for video chat (that's the power of GOOG!), its rapid popularity has no small part due to its seamless integration with Gmail - if you already have a Gmail account, using it as a brainless one, you'll need to install a free plugin to get started with its video chat. Google, but this one works no matter which operating system you're using. Video chat integration isn't available on all accounts, but if that doesn't happen, it should come to a Gmail account near you soon. It's a web-based video chat application. In addition to the standard homepage, you can log in and start video chat with everyone through your web browser. TokBox has created a name by

integrating it with other services, for example, you can install the TokBox extension for Facebook Firefox to start a quick video call with your Facebook friends. Similarly, if you are a fan of online instant messaging apps, you can use the instant messaging app If you want desktop components, TokBox also has the Adobe AIR desktop app on their homepage. With the launch of Skype 4.0 Beta on Windows, skype video chat is bigger and better than ever. Skype's cross-platform compatibility and smooth video are generally an important element that allows users to return to Skype for their video chat needs. For sharing and viewing files between video chat and backdrop features that allow users to customize what's behind it (ex: you're in Paris) down: iChat Available only in OS X. Vsee (Windows only),Vsee is a free Windows video conferencing app. So, as their demo video explains, you can work with colleagues in Photoshop documents (even if the person doesn't have Photoshop installed) through screen sharing, and you can share that file (or any document for that matter) by dragging the file into your video chat. Now that you've seen the best of your friends' choices, it's time to vote for your favorites. This week's commendable mention went out to Meebo and Digsby, both of which support video chats through The New Year. Whether your fave will do a short list or not tell. More about the video chat app you love in videolifehacker OriginalsWith reviews Everything from our mobile phones to laptops to keychain jewelry that comes with sports video cameras these days, a lot of people are sharing digital videos. The following video sites make it easy to share your videos. Photo by Jakob Montrasio.Earlier this week, we asked you to share your favorite video sharing site and tell us what makes it your favorite. We've read your vote comments and now we're back sharing popular video sharing sites. A decade ago, sharing high-definition video over the Internet was unheard of. Now we swap videos with Read moreblip.tv (Basic: Free, Pro: \$96/year) Blip.tv is a video sharing service aimed at people who produce web shows. Websites are not designed for or marketed to people who upload a single video or viral video content. The site focuses on users who constantly produce videos and includes revenue sharing to help independent producers make money. Both the basic and professional accounts are limited to a 1GB file size, but one of the benefits of a professional account is that you get additional conversion priorities and conversion time per episode, which allows you to use higher quality videos. Professional service is really necessary if you constantly upload a lot of long videos and need a priority conversion, so the free service should cover the needs of almost everyone other than the one who produces a full web-based television series. YouTube (free) YouTube has reached a widespread level in the video sharing market for millions of Internet users. YouTube is not only introduced to video sharing. However, there are no restrictions on the number of videos you can upload, as long as they follow the 2GB/10min rule, you can't edit videos when you upload videos to YouTube, but you'll be annotated with more information and links you can embed and customize the player for free. Plus: \$60/year) Vimeo is a video sharing service with a strong focus on community and creativity. You cannot host commercial content on Vimeo. Vimeo account has two flavors, a free basic account and 500MB of videos uploaded per week, including one HD video per week. Basic accounts also help you embed and share your work, as well as set limits. Upgrading to an Plus account will kick your upload cap. 5GB remove restrictions In HD movies allow you to embed HD movies and keep creating albums, groups and channels without Limited The A Plus account also extends your privacy controls and allows you to customize the embedded player. Viddler (free), if you are limited to the length of some video sharing sites, Viddler has no restrictions. As long as your files are 500MB or less, you can make it as long as you want (500MB holds many web cam quality videos). In addition to the 500MB limit, you are limited to storage and 2GB of bandwidth per month. If you sign up for an affiliate account instead of a personal account, your video will be overlaid with ads, but restrictions. Storage and bandwidth will be deleted for both personal and partner accounts for free. Dailymotion (free)Dailymotion There are two different accounts for content sharers. A basic account allows you to upload videos up to 1GB if you're sharing original content. The Motionmaker account is intended for publishing Creative Commons videos and allows you to upload HD content. Technical information on various video sharing sites is often embedded in the help file and is not particularly clear in most cases. If you are choosing a very specific service, such as whether you can upload .mov files without converting or not, or the site supports 256kb audio, we recommend checking this chart in Wikipedia to see if the site meets your needs. Now that you have the chance to see the top five contenders for the crown of the best video-sharing site, then it's time to cast your vote in the poll below: Can't believe your favorite sites didn't make the top five, or maybe we missed mentioning the features you like the most? Mute in comments with tips and tricks to share your videos Techniques
