

Get more for your business from Samsung Knox Premium.

Solution brief

Samsung Knox Premium QuickStart Service

Samsung Knox® Premium offers exceptional protection and management, but how do you get it up and running without a full IT team? Setting Knox Premium up properly is key to harnessing its full potential. Samsung's QuickStart Service experts can help assess your needs, then guide you through the setup of Knox Premium Enterprise Mobility Management (EMM) – so you get it just the way you need it.

**Our solution is tailored for small and medium-sized businesses.**

With Samsung Knox Premium and its QuickStart Service, you can work more productively and more securely. Remotely control your mobile devices, deploy applications to your employees or implement a secure email and data partition.

**Saving time saves you money.**

Thoroughly understanding and deploying any IT solution to achieve maximum benefit takes time. That's time you could be using to grow your business. Samsung QuickStart Service can speed deployment and help prevent time-consuming mistakes.

**Pick the level of management that's right for you.**

What level of mobile management do you need? Samsung offers three simple packages: QuickStart 1 Control, QuickStart 2 Application Control and QuickStart 3 Secure Control. Its experts will help you determine which features of Knox Premium will benefit you most and will help you select the right solution.

Simplify ordering and billing.

You can get QuickStart Service through Verizon Wireless, so there are no new contacts to deal with and all your ordering and billing is handled by the Verizon systems you already know.

Getting started is quick and easy.

1. Select the QuickStart Service that you think best matches your specific needs, and tell your Verizon Wireless business specialist
2. Samsung will contact you and confirm that your purchase is the best fit for you and your organization
3. Samsung will schedule a time to walk you through the Knox Premium setup and configuration so you can easily make adjustments later

Tackle tricky problems with custom deployment services.

Samsung QuickStart Service is limited to configurations of fewer than 500 devices for QuickStart 1 and QuickStart 2 (no device limit for QuickStart 3).

Why Verizon

According to a Gartner report on mobile device security, Samsung Knox is the only platform with "strong" ratings for every security control listed in the Corporate Managed Security category.¹ Combine that security with America's largest and most reliable 4G LTE network and you'll give your business an edge.

Our network was rated #1 in overall network performance for the eleventh consecutive testing period among the four national wireless companies in the United States by RootMetrics in its National RootScore® Report.² In fact, more businesses choose Verizon than any other wireless carrier.³
