

Simplifying dispatch management helps keep your workforce productive and ready.

Verizon Dispatch Console for Push to Talk Plus

Verizon Dispatch Console for Push to Talk Plus (PTT+) makes it easy and affordable to manage, locate and communicate with your mobile push-to-talk workforce. Near-instant communication with individuals or groups, an integrated live map, and the ability to record or monitor group discussions means you're ready to run jobs more smoothly and efficiently, and to foster better collaboration.

Enjoy better dispatch management and workforce productivity.

Our Dispatch Console gives you the capabilities you need to simplify PTT+ dispatch management and improve workforce productivity.

- **Advanced PTT+ calling**
Make or receive one-to-one and group calls (up to 250 members)
- **Talk group monitoring**
Monitor talk activity on any set of talk groups you choose
- **GPS locator**
Quickly locate team members with an integrated GPS and a live map. You can also click on map markers to initiate PTT+ calls
- **Broadcast calls**
Place one-way preemptive calls to up to 500 members
- **Talk group scanning and prioritization**
Scan for any active discussions and prioritize specific talk groups
- **Discussions recording**
Automatically record every call joined by the dispatcher or record on demand

Easily locate, manage and communicate with your mobile Push to Talk Plus workforce.

Flexible installation

You can choose from the following console installation options:

- **System-wide**
Allows any dispatcher to use any available console station
- **User-based**
Assigns a specific console station to a specific dispatcher

Customize your Push to Talk Plus experience.

With Group Advanced, a new, optional add-on feature bundle, you have the flexibility to create the Push to Talk Plus experience that's right for you.

Group Advanced includes:

- **Large groups**
Create groups of up to 3,000 members
- **Urgent calling**
Interrupt any ongoing Push to Talk Plus call by giving calls the highest priority on the Push to Talk Plus platform

Group Command includes:

- **Group Advanced**
Urgent calling, large groups, and more
- **User check**
Allow authorized PTT+ clients and dispatchers to obtain helpful user information such as presence and location, device signal strength and device battery level
- **Discreet listening**
Enable authorized users to remotely listen to any PTT+ call
