

Committed to your recovery and success

Verizon 5G Ultra Wideband Network—rebuilding the Panhandle with a faster, stronger network.

As the strongest hurricane to ever come ashore along the Florida Panhandle, Hurricane Michael devastated Panama City and nearby communities. The rebuild has begun, and we're proud to serve alongside others in helping to restore communication services and support the local communities.

While our network is still operational across the Panhandle, we too experienced unprecedented damage to our fiber infrastructure. Our engineers have worked around the clock to repair this, and our network is functioning once again for our customers.

In the shadow of this storm, we've decided to do more for the people and businesses in the area. That's why we are rebuilding our network in the Panama City and surrounding areas to include Verizon 5G. This will make this area one of the first five locations in the U.S. with access to the world's first and only 5G Ultra Wideband Network. In the end, your community will enjoy ultra-fast speed up to 20 times faster than today's 4G.

It's time to rebuild the Panhandle, including bringing you Verizon 5G Ultra Wideband to help you create opportunities, accelerate innovation and reimagine your businesses and industries. We look forward to continuing to serve your community for years to come.

Capture the true value of 5G.

If there's anything Verizon can do to help you in the wake of Hurricane Michael or if you want to learn more about how your business can capture the true value of 5G on the best-built platform for the future, contact your Verizon sales representative or visit www.verizon.com/about/our-company/5g.
