Washer

PRODUCT MODEL NUMBERS

WFW3090G, WFW5090G

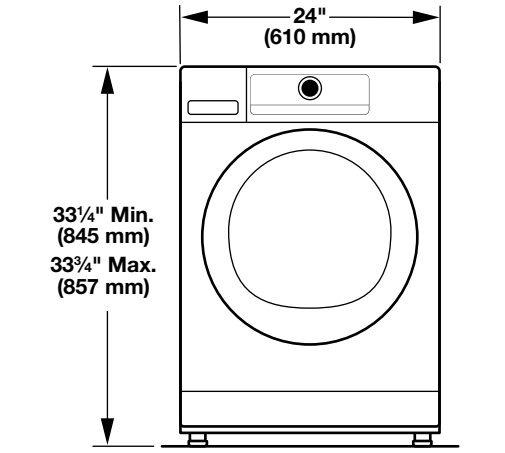

Location Requirements

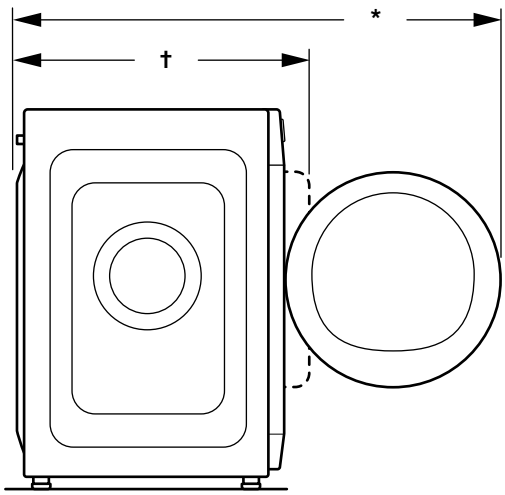

Proper installation is your responsibility.

You will need:

- A grounded electrical outlet located within 5.4 ft (1.7 m) of power cord on back of washer.
- Water faucet located within 4 ft (1.2 m) of water fill valve on washer, and water pressure of 20–100 psi (137.9–689.6 kPa).
- A level floor with maximum slope of 1" (25 mm) under entire washer. Installing on carpet or surfaces with foam backing is not recommended.
- Floor must support washer's total weight (with water and load) of 400 lbs (180 kgs).

IMPORTANT: Do not install, store, or operate washer where it will be exposed to weather or in temperatures below 32°F (0°C). Water remaining in washer after use may cause damage in low temperatures. See "Washer Maintenance" for winterizing information.

***2.3 cu. ft. models: 42 15/16" (1091 mm)**
1.9 cu. ft. models: 41 5/8" (1057 mm)

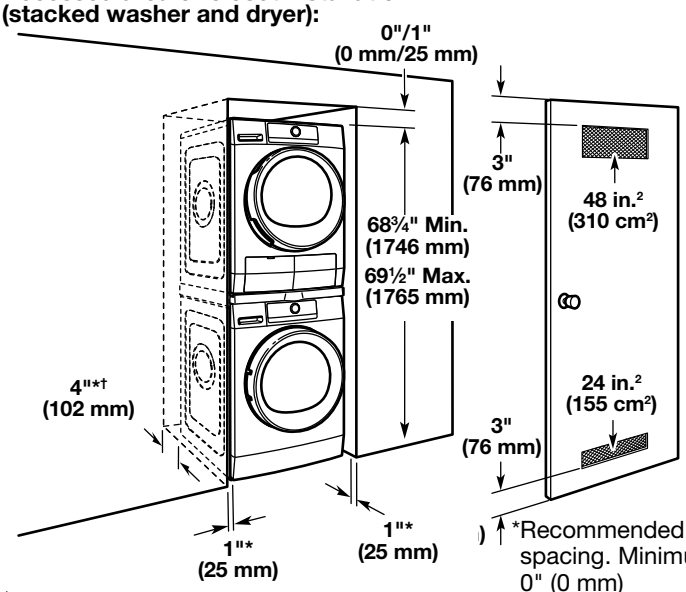

† 2.3 cu. ft. models: 25 1/8" (638 mm)
1.9 cu. ft. models: 24" (610 mm)

All dimensions show recommended spacing allowed, except for closet door ventilation openings which are the minimum required.

For each arrangement, consider allowing more space for ease of installation and servicing, and spacing for companion appliances and clearances for walls, doors, and floor moldings.

Space must be large enough to allow door to fully open. Add spacing of 1" (25 mm) on all sides of washer to reduce noise transfer. If a closet door or louvered door is installed, top and bottom air openings in door are required.

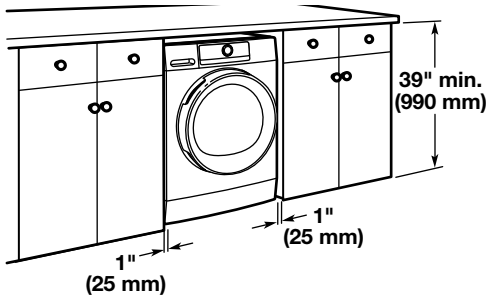

Recessed area or closet installation (stacked washer and dryer):

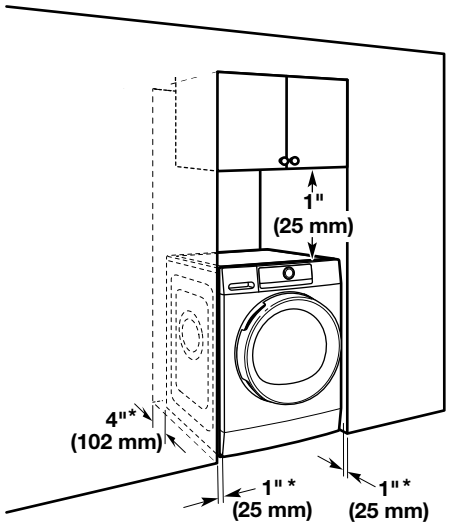

*Recommended spacing. Minimum 0" (0 mm)

†External exhaust elbow requires additional space.

Custom under counter installation:

Custom cabinet installation:

*Recommended spacing. Minimum 0" (0 mm)

1/2017

ELECTRICAL REQUIREMENTS

A 120 volt, 60 Hz., AC only, 15- or 20-amp, fused electrical supply is required. A time-delay fuse or circuit breaker is recommended. It is recommended that a separate circuit breaker serving only this appliance be provided.

Location Requirements (cont.)

Closet installation (washer only):

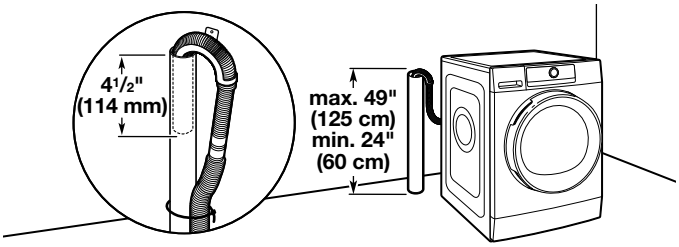

*Recommended spacing. Minimum 0" (0 mm)

Drain System

Drain system can be installed using a floor drain, wall standpipe, floor standpipe, or laundry tub. Select method you need.

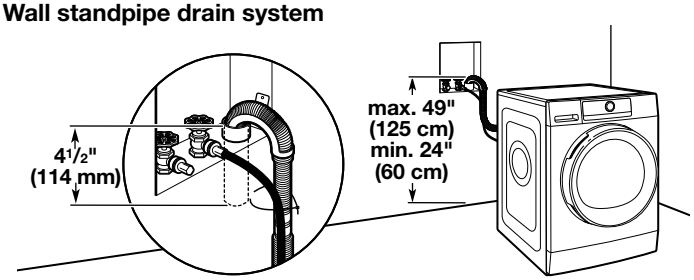

IMPORTANT: To avoid siphoning, only 4½" (114 mm) of drain hose should be inside standpipe. Always secure drain hose with cable tie.

Floor standpipe drain system

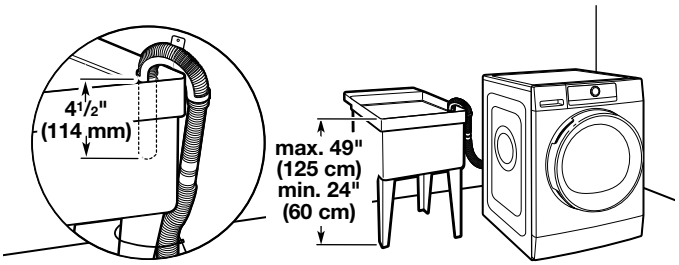

Minimum diameter for a standpipe drain: 2" (51 mm). Minimum carry-away capacity: 17 gal. (64 L) per minute. A 1/4" (6 mm) diameter to 1" (25 mm) diameter Standpipe Adapter Kit is available (Part Number 3363920). Top of standpipe must be at least 24" (60 cm) high; install no higher than 49" (125 cm) from bottom of washer. If you have an overhead sewer and need to pump higher than 96 inches, a sump pump and associated hardware are needed. See “Alternate Parts.”

Wall standpipe drain system

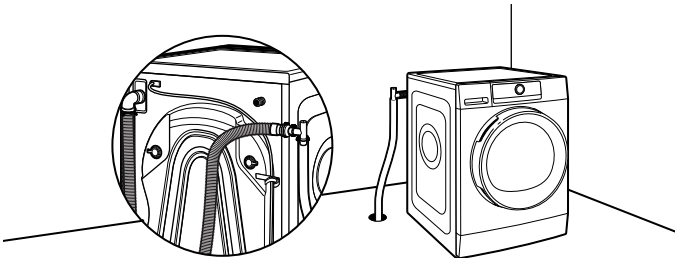

See requirements for floor standpipe drain system.

Laundry tub drain system

Minimum capacity: 20 gal. (76 L). Top of laundry tub must be at least 24" (60 cm) above floor; install no higher than 49" (125 cm) from bottom of washer.

Floor drain system

Floor drain system requires a Siphon Break Kit (Part Number 285834), 2 Connector Kits (Part Number 285835), and an Extension Drain Hose (Part Number 285863) that may be purchased separately. See “Alternate Parts.” Minimum siphon break height: 28" (710 mm) from bottom of washer. (Additional hoses may be needed.)
