

**SOUND MIND INVESTING FUND (SMIFX)
SMI DYNAMIC ALLOCATION FUND (SMIDX)
SMI 50/40/10 FUND (SMILX)***

Each a Series of Valued Advisers Trust

Statement of Additional Information

February 28, 2019

This Statement of Additional Information (“SAI”) is not a prospectus. It should be read in conjunction with the prospectus (“Prospectus”) of the Sound Mind Funds (the “Funds”) dated February 28, 2019. This SAI incorporates by reference the annual report to shareholders of the Sound Mind Funds for the fiscal year ended October 31, 2018. A free copy of the Prospectus or annual report can be obtained by writing the transfer agent at Ultimus Fund Solutions, LLC 225 Pictoria Dr., Suite 450, Cincinnati, Ohio 45246, or by calling Shareholder Services at (877) 764-3863 or (877) SMI-Fund. A Prospectus or annual report can also be downloaded from the Funds’ website: www.SMIFund.com.

* Prior to April 27, 2018, the Fund was named the SMI Conservative Allocation Fund.

DESCRIPTION OF THE TRUST AND FUNDS

Each of the Sound Mind Investing Fund (“SMI Fund”), the SMI Dynamic Allocation Fund, and the SMI 50/40/10 Fund are organized as open-end diversified series of Valued Advisers Trust (the “Trust”) (each a “Fund” and collectively, the “Funds”). The Funds’ policies with respect to diversification are fundamental and may not be changed without shareholder approval or as otherwise allowed by applicable rules, guidelines, orders and interpretations of the Securities and Exchange Commission (“SEC”) and its staff.

The SMI Fund commenced operations as a separate series (the “Predecessor Fund”) of the Unified Series Trust. On February 28, 2013, the Predecessor Fund was reorganized as a new series of the Trust. The Trust is a management investment company established under the laws of Delaware by an Agreement and Declaration of Trust dated June 13, 2008 (the “Trust Agreement”). The Trust Agreement permits the Trustees to issue an unlimited number of shares of beneficial interest of separate series without par value. Each Fund is one of a series of funds currently authorized by the Trustees. The investment adviser to the Funds is SMI Advisory Services, LLC (the “Advisor”).

Effective April 27, 2018, the SMI Conservative Allocation Fund changed its name from the SMI Conservative Allocation Fund to the SMI 50/40/10 Fund. Also, effective April 27, 2018, in conjunction with shareholder approval of a reorganization of another mutual fund also designated as the SMI 50/40/10 Fund (the “Merged Fund”) into the SMI Conservative Allocation Fund (the “Merger”), the SMI Conservative Allocation Fund adopted the investment strategies previously employed by the Merged Fund and changed its name to the SMI 50/40/10 Fund. The Merger closed on April 27, 2018. The SMI Conservative Allocation Fund is the legal survivor of the Merger, and the Merged Fund is the accounting survivor of the Merger.

The Funds do not issue share certificates. All shares are held in non-certificate form registered on the books of each Fund and the Fund’s transfer agent for the account of the shareholder. Each share of a series represents an equal proportionate interest in the assets and liabilities belonging to that series with each other share of that series and is entitled to such dividends and distributions out of income belonging to the series as are declared by the Trustees. The shares do not have cumulative voting rights or any preemptive or conversion rights, and the Trustees have the authority from time to time to divide or combine the shares of any series into a greater or lesser number of shares of that series so long as the proportionate beneficial interest in the assets belonging to that series and the rights of shares of any other series are in no way affected. In case of any liquidation of a series, the holders of shares of the series being liquidated will be entitled to receive as a class a distribution out of the assets, net of the liabilities, belonging to that series. Expenses attributable to any series are borne by that series. Any general expenses of the Trust not readily identifiable as belonging to a particular series are allocated by or under the direction of the Trustees in such manner as the Trustees determine to be fair and equitable. No shareholder is liable to further calls or to assessment by the Trust without his or her express consent.

Any Trustee of the Trust may be removed by vote of the shareholders holding not less than two-thirds of the outstanding shares of the Trust. The Trust does not hold an annual meeting of shareholders. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each whole share he owns and fractional votes for fractional shares he

owns. All shares of each Fund have equal voting rights and liquidation rights. The Trust Agreement can be amended by the Trustees, except that certain amendments that could adversely affect the rights of shareholders must be approved by the shareholders affected. All shares of a Fund are subject to involuntary redemption if the Trustees determine to liquidate the Fund. An involuntary redemption will create a capital gain or a capital loss, which may have tax consequences about which you should consult your tax advisor.

For information concerning the purchase and redemption of shares of each Fund, see “How to Buy Shares” and “How to Redeem Shares” in the Funds’ prospectus. For a description of the methods used to determine the share price and value of each Fund’s assets, see “Determination of Net Asset Value” in the Funds’ prospectus and this SAI.

Each Fund may authorize one or more brokers or other intermediaries (an “Intermediary”) to receive on its behalf purchase and redemption orders. Such Intermediaries would be authorized to designate others to receive purchase and redemption orders on the Fund’s behalf. A Fund will be deemed to have received a purchase or redemption order when an authorized Intermediary or, if applicable, its authorized designee, receives the order.

Customer orders will be priced at the applicable Fund’s net asset value next computed after they are received by an authorized Intermediary and accepted by the Fund. The performance of each Fund may be compared in publications to the performance of various indices and investments for which reliable performance data is available. The performance of each Fund may be compared in publications to averages, performance rankings, or other information prepared by recognized mutual fund statistical services. The Funds’ annual report will contain additional performance information and will be made available to investors upon request and without charge.

ADDITIONAL INFORMATION ABOUT FUND INVESTMENTS AND RISK CONSIDERATIONS

This section contains additional information regarding some of the investments the Funds may make and some of the techniques they may use. The Funds will invest primarily in other investment companies and ETFs (defined below) (collectively “Underlying Funds”) – to the extent any of the investments or techniques are described, they may indicate the investments and techniques that the Funds generally will do directly or indirectly through investments in Underlying Funds.

A. Investment Company Securities. Subject to the restrictions and limitations of the Investment Company Act of 1940, as amended (the “1940 Act”) and any SEC exemptive orders thereunder, each Fund will invest primarily in the securities of other investment companies (Underlying Funds). Each Fund may invest in other mutual funds, money market funds, and exchange-traded funds (“ETFs”), including ETFs that hold a portfolio of securities which closely tracks the price performance and/or dividend yield of various indices, and other closed-end funds. When a Fund invests in other investment companies, it will indirectly bear its proportionate share of any fees and expenses payable directly by the investment company. In connection with its investments in other investment companies, a Fund will incur higher expenses, many of which may be duplicative. For example, shareholders may incur expenses associated with capital gains distributions by the Fund as well as the Underlying Funds in which

the Fund invests. Shareholders may also incur increased transaction costs as a result of the Fund's portfolio turnover rate and/or because of the high portfolio turnover rates in the Underlying Funds. A Fund is not required to hold securities for any minimum period and, as a result, may incur short-term redemption fees and increased trading costs. When selecting Underlying Funds for investment, the Funds will not be precluded from investing in an Underlying Fund with a higher than average expense ratio. Each Fund is independent from any of the Underlying Funds in which it invests and it has no voice in or control over the investment strategies, policies or decisions of the Underlying Funds. A Fund's only option is to liquidate its investment in an Underlying Fund in the event of dissatisfaction with the fund.

The 1940 Act restricts investments by registered investment companies, such as the Funds, in the securities of other investment companies, including ETFs. However, pursuant to exemptive orders issued by the Securities and Exchange Commission to various ETF sponsors, a Fund is permitted to invest in these ETFs beyond the limits set forth in the 1940 Act subject to certain terms and conditions set forth in the applicable exemptive order, including a condition that the Fund enter into an agreement with the relevant ETF prior to investing beyond the 1940 Act's limits. As a result, each Fund may invest a substantial portion of its assets in a single Underlying Fund, or each Fund may own a substantial portion of the outstanding shares of an Underlying Fund. At certain times, an underlying fund may limit a Fund's ability to sell its shares of the Underlying Fund. In such cases, unless the related Underlying Fund also is traded on a national exchange (e.g., an ETF), the portion of the investment subject to the restriction will be considered illiquid.

B. Equity Securities. Each Fund invests in Underlying Funds that primarily hold a portfolio of equity securities. Equity securities are common stocks, preferred stocks, convertible preferred stocks, convertible debentures, American Depositary Receipts, rights and warrants. Convertible preferred stock is preferred stock that can be converted into common stock pursuant to its terms. Convertible debentures are debt instruments that can be converted into common stock pursuant to their terms. Warrants are options to purchase equity securities at a specified price valid for a specific time period. Rights are similar to warrants, but normally have shorter durations.

C. Fixed Income Securities. Each Fund may invest in Underlying Funds that hold a portfolio of fixed income securities. Fixed income securities include corporate debt securities, high yield debt securities, convertible debt securities, municipal securities, U.S. government securities, mortgage-backed securities, asset-backed securities, zero coupon bonds, financial industry obligations, repurchase agreements, and participation interests in such securities. Preferred stock and certain common stock equivalents may also be considered to be fixed income securities. Fixed income securities are generally considered to be interest rate sensitive, which means that their value will generally decrease when interest rates rise and increase when interest rates fall. Securities with shorter maturities, while offering lower yields, generally provide greater price stability than longer term securities and are less affected by changes in interest rates.

1. **Corporate Debt Securities.** Corporate debt securities include bonds, notes, debentures and investment certificates issued by corporations and other business organizations, including business trusts and equipment trusts, in order to finance their credit needs. Corporate debt securities include commercial paper which consists of short term (usually from 1 to 270 days)

unsecured promissory notes issued by corporations in order to finance their current operations. The Advisor considers corporate debt securities to be of investment grade quality if they are rated at the time of purchase BBB- and Baa3 or higher by two out of the following three rating organizations: Standard & Poor's Ratings Group ("S&P"), Fitch Ratings ("Fitch"), or Moody's Investors Service, Inc. ("Moody's"), or, if unrated, determined by the Advisor to be of comparable quality. In determining the investment rating of a particular security, the Advisor typically adopts the higher rating of any two of S&P, Fitch and Moody's. Investment grade debt securities generally have adequate to strong protection of principal and interest payments. In the lower end of this category, credit quality may be more susceptible to potential future changes in circumstances and the securities have speculative elements. If the rating of a portfolio security by any two of S&P, Fitch or Moody's drops below investment grade, the Advisor will dispose of the security as soon as practicable (depending on market conditions) unless the Advisor determines based on their own credit analysis that the security provides the opportunity of meeting the Funds' objective without presenting excessive risk.

2. High Yield Debt Securities ("Junk Bonds"). Subject to the limitation on illiquid investments, each Fund may invest in Underlying Funds that hold securities that are below investment grade. The widespread expansion of government, consumer and corporate debt within the U.S. economy has made the corporate sector, especially cyclically sensitive industries, more vulnerable to economic downturns or increased interest rates. An economic downturn could severely disrupt the market for high yield securities and adversely affect the value of outstanding securities and the ability of the issuers to repay principal and interest.

The prices of high yield securities have been found to be more sensitive to interest rate changes than higher-rated investments, and more sensitive to adverse economic changes or individual corporate developments. Also, during an economic downturn or substantial period of rising interest rates, highly leveraged issuers may experience financial stress which would adversely affect their ability to service their principal and interest payment obligations, to meet projected business goals, and to obtain additional financing. If the issuer of a security owned by an Underlying Fund defaulted, the fund could incur additional expenses to seek recovery. In addition, periods of economic uncertainty and changes can be expected to result in increased volatility of market prices of high yield securities and may affect a Fund's net asset value. Furthermore, in the case of high yield securities structured as zero coupon or pay-in-kind securities, their market prices are affected to a greater extent by interest rate changes and thereby tend to be more volatile than securities which pay interest periodically and in cash. High yield securities also present risks based on payment expectations. For example, high yield securities may contain redemption or call provisions. If an issuer exercises these provisions in a declining interest rate market, the security may have to be replaced with a lower yielding security, resulting in a decreased return for investors. Conversely, a high yield security's value will decrease in a rising interest rate market, as will the value of the Funds' or Underlying Funds' assets. If the Funds or Underlying Funds experience unexpected net redemptions, this may force them to sell their respective high yield securities without regard to their investment merits, thereby decreasing the asset base upon which the expenses can be spread and possibly reducing the rate of return.

In addition, to the extent that there is no established retail secondary market, there may be thin trading of high yield securities, and this may have an impact on the Funds' or Underlying Funds' ability to accurately value high yield securities and the assets and on the ability to dispose of the securities. Adverse publicity and investor perception, whether or not based on fundamental

analysis, may decrease the values and liquidity of high yield securities especially in a thinly traded market.

There are also special tax considerations associated with investing in high yield securities structured as zero coupon or pay-in-kind securities. For example, a Fund reports the interest on these securities as income even though it receives no cash interest until the security's maturity or payment date. Also, the shareholders are taxed on this interest even if the respective Fund does not distribute cash to them. Therefore, in order to pay taxes on this interest, shareholders may have to redeem some of their shares to pay the tax or the respective Fund may sell some of its assets to distribute cash to shareholders. These actions are likely to reduce the respective Fund's assets and may thereby increase its expense ratio and decrease its rate of return.

Finally, there are risks involved in applying credit ratings as a method for evaluating high yield securities. For example, credit ratings evaluate the safety of principal and interest payments, not market value risk of high yield securities. Also, since credit rating agencies may fail to timely change the credit ratings to reflect subsequent events, a Fund (in conjunction with the Advisor) will continuously monitor the issuers of high yield securities to determine if the issuers will have sufficient cash flow and profits to meet required principal and interest payments, and to assure the securities' liquidity so the respective Fund can meet redemption requests.

3. U.S. Government Securities. U.S. government securities may be backed by the credit of the government as a whole or only by the issuing agency. U.S. Treasury bonds, notes, and bills and some agency securities, such as those issued by the Federal Housing Administration and the Government National Mortgage Association ("GNMA"), are backed by the full faith and credit of the U.S. government as to payment of principal and interest and are the highest quality government securities. Other securities issued by U.S. government agencies or instrumentalities, such as securities issued by the Federal Home Loan Banks and the Federal Home Loan Mortgage Corporation, are supported only by the credit of the agency that issued them, and not by the U.S. government. Securities issued by the Federal Farm Credit System, the Federal Land Banks, and the Federal National Mortgage Association ("FNMA") are supported by the agency's right to borrow money from the U.S. Treasury under certain circumstances, but are not backed by the full faith and credit of the U.S. government.

Each Fund other than the SMI Fund may also invest in Underlying Funds that hold Treasury Inflation-Protected Securities ("TIPS"). TIPS are a special type of treasury note or bond that was created in order to offer bond investors protection from inflation. The value of the TIPS is automatically adjusted to the inflation rate as measured by the Consumer Price Index ("CPI"). If the CPI goes up by half a percent the value of the bond would go up by half a percent. If the CPI falls, the value of the bond does not fall because the government guarantees that your original investment will stay the same. TIPS decline in value when real interest rates rise. In certain interest rate environments, such as when real interest rates are rising faster than nominal interest rates, TIPS may experience greater losses than other fixed income securities with similar duration.

4. Mortgage-Backed Securities. Each Fund other than the SMI Fund may invest in Underlying Funds that hold mortgage-backed securities. Mortgage-backed securities represent an interest in a pool of mortgages. These securities, including securities issued by FNMA and GNMA, provide investors with payments consisting of both interest and principal as

the mortgages in the underlying mortgage pools are repaid. Unscheduled or early payments on the underlying mortgages may shorten the securities' effective maturities. The average life of securities representing interests in pools of mortgage loans is likely to be substantially less than the original maturity of the mortgage pools as a result of prepayments or foreclosures of such mortgages. Prepayments are passed through to the registered holder with the regular monthly payments of principal and interest, and have the effect of reducing future payments. To the extent the mortgages underlying a security representing an interest in a pool of mortgages are prepaid, there may be a loss (if the price at which the respective security was acquired was at a premium over par, which represents the price at which the security will be sold upon prepayment). In addition, prepayments of such securities will reduce the share price of the Fund or Underlying Fund to the extent the market value of the securities at the time of prepayment exceeds their par value. Furthermore, the prices of mortgage-backed securities can be significantly affected by changes in interest rates. Prepayments may occur with greater frequency in periods of declining mortgage rates because, among other reasons, it may be possible for mortgagors to refinance their outstanding mortgages at lower interest rates. In such periods, it is likely that any prepayment proceeds would be reinvested at lower rates of return.

5. Asset-Backed Securities. Asset-backed securities are undivided fractional interests in pools of consumer loans (unrelated to mortgage loans) or other assets (such as equipment leases) held in a trust. Payments of principal and interest are passed through to certificate holders and are typically supported by some form of credit enhancement, such as a letter of credit, surety bond, limited guaranty or senior subordination. The degree of credit enhancement varies, but generally amounts to only a fraction of the asset-backed or receivable-backed security's par value until exhausted. If the credit enhancement is exhausted, certificate holders may experience losses or delays in payment if the required payments of principal and interest are not made to the trust with respect to the underlying loans. The value of these securities also may change because of changes in the market's perception of the creditworthiness of the servicing agent for the loan pool, the originator of the loans or the financial institution providing the credit enhancement. Asset-backed and receivable-backed securities are ultimately dependent upon payment of loans by individuals or businesses, and the certificate holder generally has no recourse against the entity that originated the loans. The underlying loans are subject to prepayments which shorten the securities' weighted average life and may lower their return. As prepayments flow through at par, total returns would be affected by the prepayments: if a security were trading at a premium, its total return would be lowered by prepayments, and if a security were trading at a discount, its total return would be increased by prepayments.

6. Zero Coupon and Pay-in-Kind Bonds. Each Fund other than the SMI Fund may invest in Underlying Funds that hold zero coupon and pay-in-kind bonds. Corporate debt securities and municipal obligations include so-called "zero coupon" bonds and "pay-in-kind" bonds. Zero coupon bonds do not make regular interest payments. Instead they are sold at a deep discount from their face value. Income will accrue on such bonds for tax and accounting purposes, in accordance with applicable law. This income will be distributed to shareholders. Because no cash is received at the time such income is accrued, other portfolio securities may be liquidated to satisfy distribution obligations. Because a zero coupon bond does not pay current income, its price can be very volatile when interest rates change. In calculating its dividend, the Funds take into account as income a portion of the difference between a zero coupon bond's purchase price and its face value.

The Federal Reserve creates Separate Trading of Registered Interest and Principal of Securities (“STRIPS”) by separating the coupon payments and the principal payment from an outstanding Treasury security and selling them as individual securities. A broker-dealer creates a derivative zero by depositing a Treasury security with a custodian for safekeeping and then selling the coupon payments and principal payment that will be generated by this security separately. Examples are Certificates of Accrual on Treasury Securities (CATs), Treasury Investment Growth Receipts (TIGRs) and generic Treasury Receipts (TRs). These derivative zero coupon obligations are not considered to be government securities unless they are part of the STRIPS program. Original issue zeros are zero coupon securities issued directly by the U.S. government, a government agency or by a corporation.

Pay-in-kind bonds allow the issuer, at its option, to make current interest payments on the bonds either in cash or in additional bonds. The value of zero coupon bonds and pay-in-kind bonds is subject to greater fluctuation in response to changes in market interest rates than bonds which make regular payments of interest. Both of these types of bonds allow an issuer to avoid the need to generate cash to meet current interest payments. Accordingly, such bonds may involve greater credit risks than bonds which make regular payment of interest. Even though zero coupon bonds and pay-in-kind bonds do not pay current interest in cash, income is required to be accrued on such investments and to distribution of such amounts is required at least annually to shareholders. Thus, to satisfy dividend requirements, other investments may need to be liquidated. There is no limit on the amount of zero coupon bonds that a Fund may purchase; however, the Funds will not invest more than 5% of their respective net assets in pay-in-kind bonds.

7. When-Issued, Delayed Delivery and Forward Transactions. When-issued, delayed delivery and forward transactions generally involve the purchase of a security with payment and delivery at some time in the future (i.e., beyond normal settlement). New issues of stocks and bonds, private placements and U.S. government securities may be sold in this manner. Interest is not earned on such securities until settlement, and the investor bears the risk of market value fluctuations between the purchase and settlement dates. Cash or liquid assets will be segregated having an aggregate value equal to the purchase price until payment is made.

Forward commitments also include “to be announced” (TBA) mortgage-backed securities, which are contracts for the purchase or sale of mortgage-backed securities to be delivered at a future agreed upon date, whereby the specific mortgage pool numbers or the number of pools that will be delivered to fulfill the trade obligation or terms of the contract are unknown at the time of the trade. Underlying Funds may also enter into buy/sell back transactions (a form of delayed delivery agreement). In a buy/sell back transaction, a trade to sell securities at one price is entered into and simultaneously another trade is entered into to buy the same securities at another price for settlement at a future date. Although an investor generally intends to acquire or dispose of securities on a forward commitment, when-issued or delayed delivery basis, an investor may sell these securities or its commitment before the settlement date if deemed advisable.

When purchasing a security on a forward commitment, when-issued or delayed-delivery basis, an investor assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuation, and takes such fluctuations into account when determining its net asset value. Securities purchased on a forward commitment, when-issued or delayed-delivery

basis are subject to changes in value based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates. Accordingly, securities acquired on such a basis may expose an investor to risks because they may experience such fluctuations prior to actual delivery. Purchasing securities on a forward commitment, when-issued or delayed delivery basis may involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Investment in these types of securities may increase the possibility that short-term gains subject to federal taxation or short-term losses will be incurred if portfolio transactions are engaged in in order to the commitment.

Because when-issued, delayed delivery and forward transactions may be viewed as creating leverage, a Fund or Underlying Fund could lose more than it invested, federal securities laws, regulations and guidance may require it to earmark assets to reduce the risks associated with derivatives or to otherwise hold instruments that offset obligations under the derivatives instrument. This process is known as "cover." A Fund will not enter into any derivative transaction unless it can comply with SEC guidance regarding cover, and, if SEC guidance so requires, a Fund will earmark cash or liquid assets with a value sufficient to cover its obligations under a derivative transaction or otherwise "cover" the transaction in accordance with applicable SEC guidance. If a large portion of a Fund's assets is used for cover, it could affect portfolio management or the Fund's ability to meet redemption requests or other current obligations. The leverage involved in certain derivative transactions may result in a Fund's net asset value being more sensitive to changes in the value of the related investment.

D. Foreign Securities.

1. General. To the extent that a Fund invests in Underlying Funds that hold portfolios of foreign equity or fixed income securities, it will be subject to certain considerations and risks that are not typically associated with investing in Underlying Funds that invest solely in domestic securities. There may be less publicly available information about a foreign issuer than a domestic one, and foreign companies are not generally subject to uniform accounting, auditing and financial standards and requirements comparable to those applicable to U.S. companies. There may also be less government supervision and regulation of foreign securities exchanges, brokers and listed companies than exists in the United States. Interest and dividends paid by foreign issuers may be subject to withholding and other foreign taxes, which may decrease the net return on such investments as compared to dividends and interest paid by domestic companies or the U.S. government. There may be the possibility of expropriations, seizure or nationalization of foreign deposits, confiscatory taxation, political, economic or social instability or diplomatic developments that could affect assets held in foreign countries. Finally, the establishment of exchange controls or other foreign governmental laws or restrictions could adversely affect the payment of obligations.

Securities trading on overseas markets present time zone arbitrage opportunities when events affecting portfolio security values occur after the close of the overseas market, but prior to the close of the U.S. market. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's net asset value ("NAV") by short term traders.

2. Emerging Markets Securities. Each Fund may invest in Underlying Funds that hold emerging market securities. Each Fund may purchase ETFs that invest in, or other investment companies that invest and/or are located in, emerging markets.

Investing in emerging market securities imposes risks different from, or greater than, risks of investing in foreign developed countries. These risks include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; possible repatriation of investment income and capital. In addition, foreign investors may be required to register the proceeds of sales; future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and devaluation may occur subsequent to investments in these currencies by the Funds. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries.

Additional risks of emerging markets securities may include: greater social, economic and political uncertainty and instability; more substantial governmental involvement in the economy; less governmental supervision and regulation; unavailability of currency hedging techniques; companies that are newly organized and small; differences in auditing and financial reporting standards, which may result in unavailability of material information about issuers; and less developed legal systems. In addition, emerging securities markets may have different clearance and settlement procedures, which may be unable to keep pace with the volume of securities transactions or otherwise make it difficult to engage in such transactions. Settlement problems may result in missed attractive investment opportunities, holding a portion of assets in cash pending investment, or delayed in disposing of a portfolio security. Such a delay could result in possible liability to a purchaser of the security.

3. Sovereign Debt. Sovereign debt differs from debt obligations issued by private entities in that, generally, remedies for defaults must be pursued in the courts of the defaulting party. Legal recourse is therefore limited. Political conditions, especially a sovereign entity's willingness to meet the terms of its debt obligations, are of considerable significance. Also, there can be no assurance that the holders of commercial bank loans to the same sovereign entity may not contest payments to the holders of sovereign debt in the event of default under commercial bank loan agreements.

A sovereign debtor's willingness or ability to repay principal and pay interest in a timely manner may be affected by a variety of factors, including among others, its cash flow situation, the extent of its foreign reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the sovereign debtor's policy toward principal international lenders and the political constraints to which a sovereign debtor may be subject. A country whose exports are concentrated in a few commodities could be vulnerable to a decline in the international price of such commodities. Increased protectionism on the part of a country's trading partners, or political changes in those countries, could also adversely affect its exports. Such events could diminish a country's trade account surplus, if any, or the credit standing of a particular local government or agency. Another factor bearing on the ability of a country to repay sovereign debt is the level of the country's international reserves. Fluctuations in the level of these reserves can affect the amount

of foreign exchange readily available for external debt payments and, thus, could have a bearing on the capacity of the country to make payments on its sovereign debt.

With respect to sovereign debt of emerging market issuers, investors should be aware that certain emerging market countries are among the largest debtors to commercial banks and foreign governments. At times, certain emerging market countries have declared moratoria on the payment of principal and interest on external debt.

Certain emerging market countries have experienced difficulty in servicing their sovereign debt on a timely basis, which led to defaults on certain obligations and the restructuring of certain indebtedness. Restructuring arrangements have included, among other things, reducing and rescheduling interest and principal payments by negotiating new or amended credit agreements or converting outstanding principal and unpaid interest to Brady Bonds, and obtaining new credit to finance interest payments. Holders of sovereign debt may be requested to participate in the rescheduling of such debt and to extend further loans to sovereign debtors, and the interests of holders of sovereign debt could be adversely affected in the course of restructuring arrangements or by certain other factors referred to below. Furthermore, some of the participants in the secondary market for sovereign debt may also be directly involved in negotiating the terms of these arrangements and may therefore have access to information not available to other market participants. Obligations arising from past restructuring agreements may affect the economic performance and political and social stability of certain issuers of sovereign debt. There is no bankruptcy proceeding by which sovereign debt on which a sovereign has defaulted may be collected in whole or in part.

Foreign investment in certain sovereign debt is restricted or controlled to varying degrees. These restrictions or controls may at times limit or preclude foreign investment in such sovereign debt and increase the costs and expenses of the Funds. Certain countries in which the Underlying Funds may invest require governmental approval prior to investments by foreign persons, limit the amount of investment by foreign persons in a particular issuer, limit the investment by foreign persons only to a specific class of securities of an issuer that may have less advantageous rights than the classes available for purchase by domiciliaries of the countries, or impose additional taxes on foreign investors. Certain issuers may require governmental approval for the repatriation of investment income, capital or the proceeds of sales of securities by foreign investors. In addition, if a deterioration occurs in a country's balance of payments, the country could impose temporary restrictions on foreign capital remittances. The respective Fund could be adversely affected by delays in, or a refusal to grant, any required governmental approval for repatriation of capital, as well as by the application to the respective Fund of any restrictions on investments. Investing in local markets may require the Underlying Funds to adopt special procedures, seek local government approvals or take other actions, each of which may involve additional costs to the respective Fund investing in those Underlying Funds.

E. Options. The Underlying Funds in which the Funds invest may enter into option transactions. The Underlying Funds may mainly purchase and sell options on securities indices. An option involves either (a) the right or the obligation to buy or sell a specific instrument at a specific price until the expiration date of the option, or (b) the right to receive payments or the obligation to make payments representing the difference between the closing price of a market index and the exercise price of the option expressed in dollars times a specified multiple until the expiration date of the option. Options are sold (written) on securities and market indices. The

purchaser of an option on a security pays the seller (the writer) a premium for the right granted but is not obligated to buy or sell the underlying security. The purchaser of an option on a market index pays the seller a premium for the right granted, and in return the seller of such an option is obligated to make the payment. Options are traded on organized exchanges and in the over-the-counter market. The use of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions.

Options on securities indices are similar to options on a security or other instrument except that, rather than settling by physical delivery of the underlying instrument, they settle by cash settlement, i.e., an option on an index gives the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the index upon which the option is based exceeds, in the case of a call, or is less than, in the case of a put, the exercise price of the option. This amount of cash is equal to the excess of the closing price of the index over the exercise price of the option, which also may be multiplied by a formula value. The seller of the option is obligated, in return for the premium received, to make delivery of this amount. The gain or loss on an option on an index depends on price movements in the instruments making up the market, market segment, industry or other composite on which the underlying index is based, rather than price movements in individual securities, as is the case with respect to options on securities.

Because certain derivatives may be viewed as creating leverage, that is, the amount invested may be smaller than the full economic exposure of the derivative instrument and a Fund or Underlying Fund could lose more than it invested, federal securities laws, regulations and guidance may require a Fund or Underlying Fund to earmark assets to reduce the risks associated with derivatives or to otherwise hold instruments that offset the Fund's obligations under the derivatives instrument. This process is known as "cover." A Fund will not enter into any derivative transaction unless it can comply with SEC guidance regarding cover, and, if SEC guidance so requires, a Fund will earmark cash or liquid assets with a value sufficient to cover its obligations under a derivative transaction or otherwise "cover" the transaction in accordance with applicable SEC guidance. If a large portion of a Fund's assets is used for cover, it could affect portfolio management or the Fund's ability to meet redemption requests or other current obligations. The leverage involved in certain derivative transactions may result in a Fund's net asset value being more sensitive to changes in the value of the related investment.

F. Credit Default Swaps Products. Each Fund other than the SMI Fund may invest in Underlying Funds that utilize credit default swaps ("CDS"). CDS are bilateral financial contracts that transfer the credit risk of a third party reference entity or group of entities from one party to another. A buyer of a CDS receives credit protection or sheds credit risk, whereas the seller of a CDS is selling credit protection or assuming credit risk. The seller typically receives a predetermined periodic payment from the other party in consideration for guaranteeing to make a specific payment to the buyer should the third party reference entity suffer a default event. If a default event occurs, the seller would be required to pay the par value of a referenced debt obligation to the counterparty in exchange for a default debt obligation. CDS are marked-to-market daily based on the mean of bid and asked quotes as obtained from multiple dealers, and changes in value, as well as the accrual of the periodic coupon payments, are recorded as "unrealized gain or loss on credit default swap agreements." Gains or losses on swap agreements are realized upon termination of the swap contract and the periodic coupon payments. In addition to being exposed to the credit risk of the underlying reference entity, CDS are subject to

counterparty risk, market risk and interest rate risk. CDS utilized by the Funds or Underlying Funds may not perform as expected or in a manner similar to the high-yield bond markets. The respective Fund will enter into CDS only with counterparties that the Advisor reasonably believes are capable of performing under the CDS.

Credit default swap products provide an additional avenue by which to add value to the portfolio. There are two primary products utilized in this space. First, credit default swap index products offer a superior tool by which to attain broad market exposure in a risk-controlled and cost effective manner. The three main products used include the investment grade index (125 names), the high yield index (100 names) and the loan index (100 names). Index products allow the respective Fund to attain broad exposure while significantly reducing idiosyncratic risk (company-specific risk). As an example, a 5% position in the high yield index translates to 0.05% exposure to each constituent company. This avenue typically accounts for the majority trading volume in credit default swap products. In general, the value of the credit default swap index product will go up or down in response to changes in the perceived credit risk and default experience of the basket of issuers, instead of the exchange of the stream of payments for the payment of the notional amount (if a Credit Event occurs) that is the substance of a single name credit default swap. Second, single name credit default swaps are used to gain exposure to a particular company when it is more economically attractive than traditional bonds. Moreover, a single name credit default swap provides an avenue by which to express a negative view of a company.

G. Cash Equivalents. Each Fund may invest in Underlying Funds that invest in cash and high-quality short-term fixed-income securities. All money market instruments can change in value when interest rates or an issuer's creditworthiness change dramatically. These short-term fixed-income securities are described below:

1. **Repurchase Agreements.** Repurchase agreements are agreements by which the Funds purchase a security and obtain a simultaneous commitment from the seller to repurchase the security at an agreed upon price and date. The resale price is in excess of the purchase price and reflects an agreed upon market rate unrelated to the coupon rate on the purchased security. Repurchase agreements must be fully collateralized and can be entered into only with well-established banks and broker-dealers that have been deemed creditworthy by the Advisor. Repurchase transactions are intended to be short-term transactions, usually with the seller repurchasing the securities within seven days. Repurchase agreements that mature in more than seven days are subject to the Funds' limit on illiquid investments. When the respective Fund enters into a repurchase agreement it may lose money if the other party defaults on its obligation and the respective Fund is delayed or prevented from disposing of the collateral. The Funds also might incur a loss if the value of the collateral declines, and it might incur costs in selling the collateral or asserting its legal rights under the agreement. If a defaulting seller filed for bankruptcy or became insolvent, disposition of collateral might be delayed pending court action.

2. **Bank Obligations.** Bank obligations include bankers' acceptances, negotiable certificates of deposit and non-negotiable time deposits, including U.S. dollar-denominated instruments issued or supported by the credit of U.S. or foreign banks or savings institutions. Although each of the Funds other than the SMI Fund may invest in Underlying Funds that invest in money market obligations of foreign banks or foreign branches of U.S.

banks only where the Advisor determines the instrument to present minimal credit risks, such investments may nevertheless entail risks that are different from those of investments in domestic obligations of U.S. banks due to differences in political, regulatory and economic systems and conditions. All investments in bank obligations are limited to the obligations of financial institutions having more than \$1 billion in total assets at the time of purchase, and investments by the respective Fund in the obligations of foreign banks and foreign branches of U.S. banks will not exceed 10% of the respective Fund's total assets at the time of purchase. The Funds may also make interest-bearing savings deposits in commercial and savings banks in amounts not in excess of 10% of its net assets.

3. Commercial Paper. Each of the Funds other than the SMI Fund may invest in Underlying Funds that hold commercial paper. Commercial paper will consist of issues rated at the time of investment as A-1 and/or P-1 by S&P, Moody's or similar rating by another nationally recognized rating agency. In addition, the Funds may acquire unrated commercial paper and corporate bonds that are determined by the Advisor at the time of purchase to be of comparable quality to rated instruments that may be acquired by the respective Fund as previously described.

4. Investment Company Securities. (See A Above). Each Fund may invest in Underlying Funds such as money market funds and short-term bond funds.

H. Preferred and Other Hybrid Securities. Each Fund may invest in Underlying Funds that invest in preferred and other hybrid securities. Hybrids are instruments that combine features of corporate debt securities and preferred stock. They may have perpetual ("replacement language" requiring the issuer to replace the security at maturity making the security perpetual) or long-dated (a minimum of 30 years but usually longer than 60 years) maturities (maturing at face value). They may make periodic fixed or variable interest payments (generally quarterly) and may allow the issuer to defer (cumulative issues) or skip (non-cumulative issues) interest payments for up to 10 years without being in default. Hybrids are junior in the capital structure (above common stock and preferred equity but below all debt, including trust preferreds). Hybrid issuers are primarily banks and insurance companies.

Trust preferreds (or capital securities) which are created when a holding company issues a junior subordinated note that is purchased by an off-balance sheet trust entity. The trust entity (usually wholly-guaranteed by the holding company) then issues participation shares (or capital securities) in itself. Capital securities are generally allowed to defer interest (cumulative), have a final maturity, and are not convertible to preferred stock.

I. Foreign Currency Securities. Each Fund may invest in Underlying Funds that invest in forward foreign currency exchange contracts. The Underlying Funds may engage in foreign currency exchange transactions. The value of the respective Fund's portfolio securities that are invested in non-U.S. dollar denominated instruments as measured in U.S. dollars may be affected favorably or unfavorably by changes in foreign currency exchange rates, and the respective Fund may incur costs in connection with conversions between various currencies. The Funds will conduct its foreign currency exchange transactions either on a spot (i.e., cash) basis at the spot rate prevailing in the foreign currency exchange market, or through forward contracts to purchase or sell foreign currencies. A forward foreign currency exchange contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed

number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are traded directly between currency traders (usually large commercial banks) and their customers.

When an Underlying Fund enters into a contract for the purchase or sale of a security denominated in a foreign currency, it may desire to establish the cost or proceeds relative to another currency. The forward contract may be denominated in U.S. dollars or may be a “cross-currency” contract where the forward contract is denominated in a currency other than U.S. dollars. However, this tends to limit potential gains which might result from a positive change in such currency relationships.

The forecasting of a short-term currency market movement is extremely difficult and the successful execution of a short-term hedging strategy is highly uncertain. The Funds may enter into such forward contracts if, as a result, not more than 10% of the value of its total assets would be committed to such contracts. Under normal circumstances, consideration of the prospect for currency parities will be incorporated into the longer-term investment decisions made with regard to overall diversification strategies. However, the Trustees believe that it is important to have the flexibility to enter into forward contracts when the Advisor determines it to be in the best interests of the respective Fund.

Generally, the Underlying Funds will not enter into a forward foreign currency exchange contract with a term of greater than 180 days. At the maturity of the contract, the respective Fund may either sell the portfolio security and make delivery of the foreign currency, or may retain the security and terminate the obligation to deliver the foreign currency by purchasing an “offsetting” forward contract with the same currency trader obligating the respective Fund to purchase, on the same maturity date, the same amount of the foreign currency.

It is impossible to forecast with absolute precision the market value of portfolio securities at the expiration of the contract. Accordingly, it may be necessary for the respective Fund to purchase additional foreign currency on the spot market (and bear the expense of such purchase) if the market value of the security is less than the amount of foreign currency the respective Fund is obligated to deliver and if a decision is made to sell the security and make delivery of the foreign currency. Conversely, it may be necessary to sell on the spot market some of the foreign currency received upon the sale of the portfolio security if its market value exceeds the amount of foreign currency the respective Fund is obligated to deliver.

If the respective Fund retains the portfolio security and engages in an offsetting transaction, the respective Fund will incur a gain or a loss (as described below) to the extent that there has been movement in forward contract prices. If the respective Fund engages in an offsetting transaction, it may subsequently enter into a new forward contract to sell the foreign currency. Should forward prices decline during the period between entering into a forward contract for the sale of a foreign currency and the date a Fund enters into an offsetting contract for the purchase of the foreign currency, the respective Fund will realize a gain to the extent the price of the currency the respective Fund has agreed to sell exceeds the price of the currency it has agreed to purchase. Should forward prices increase, the respective Fund will suffer a loss to the extent the price of the currency the respective Fund has agreed to purchase exceeds the price of the currency the respective Fund has agreed to sell.

The Funds' dealings in forward foreign currency exchange contracts will be limited to the transactions described above. None of the Funds are required to enter into such transactions with regard to its foreign currency-denominated securities and will not do so unless deemed appropriate by the Advisor. It should also be realized that this method of protecting the value of the respective Fund's portfolio securities against a decline in the value of a currency does not eliminate fluctuations in the underlying prices of the securities held by the respective Fund. It simply establishes a rate of exchange which one can achieve at some future point in time. Additionally, although such contracts tend to minimize the risk of loss due to a decline in the value of the hedged currency, at the same time, they tend to limit any potential gain which might result should the value of such currency increase.

J. Real Estate Securities. Each of the Funds other than the SMI Fund that invest in Underlying Funds investing in real estate securities will be subject to risks similar to those associated with the direct ownership of real estate, including: i) declines in the value of real estate, ii) risks related to general and local economic conditions, iii) dependency on management skill, iv) heavy cash flow dependency, v) possible lack of availability of mortgage funds, vi) overbuilding, vii) extended vacancies of properties, viii) increased competition, ix) increases in property taxes and operating expenses, x) changes in zoning laws, xi) losses due to costs resulting from the clean-up of environmental problems, xii) liability to third parties for damages resulting from environmental problems, xiii) casualty or condemnation losses, xiv) limitations on rents, xv) changes in neighborhood values and the appeal of properties to tenants, xvi) changes in interest rates and tax laws.

Investing in Real Estate Industries Companies. Investors also will be subject to certain risks associated with Real Estate Industries Companies. For example, the value of an investment in Real Estate Industries Companies that directly own real property may be affected by changes in the value of that property, while Real Estate Industries Companies that invest in mortgages and other debt instruments related to real estate may be affected by the quality of any credit extended. Credit risk is the possibility that an issuer will default on a security by failing to pay interest or principal when due. If this happens, the Fund could lose money. Real Estate Industries Companies depend on management skills and generally may not be diversified. These Real Estate Industries Companies also are dependent on the income generated by the underlying properties to meet operating expenses, and they are subject to borrower default and to self-liquidation. In addition, some REITs possibly could fail to qualify for tax-free pass-through of income or to maintain their exemptions from registration under the 1940 Act.

The above factors also may adversely affect a borrower's or a lessee's ability to meet its obligations to the REIT. In the event of a default by a borrower or lessee, the REIT may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments.

REITs, particularly REITs that invest in mortgages, are subject to interest rate risk. When interest rates decline, the value of a REIT's investment in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT's investment in fixed-rate obligations can be expected to decline. In contrast, as interest rates on adjustable-rate mortgage loans are reset periodically, yields on a REIT's investments in such loans gradually will align themselves to reflect changes in market interest rates. This causes the value of these investments

to fluctuate less dramatically in response to interest rate fluctuations than investments in fixed-rate obligations.

K. Illiquid Securities. Each Fund may invest up to 15% of its net assets in illiquid securities. Certain illiquid securities may require pricing at fair value as determined in good faith under the supervision of the Board of Trustees. A Fund may be subject to significant delays in disposing of illiquid securities, and transactions in illiquid securities may entail registration expenses and other transaction costs that are higher than those for transactions in liquid securities. The term “illiquid securities” for this purpose means securities that cannot be disposed of within seven days in the ordinary course of business at approximately the amount at which the Fund has valued the securities. Restricted securities, i.e., securities subject to legal or contractual restrictions on resale, may be illiquid. However, some restricted securities (such as securities issued pursuant to Rule 144A under the Securities Act of 1933 and certain commercial paper) may be treated as liquid, although they may be less liquid than registered securities traded on established secondary markets.

L. Futures Contracts. Each Fund may invest in Underlying Funds that may purchase and sell futures contracts to hedge against changes in prices. The Underlying Funds may utilize Treasury futures to hedge against interest rate risk and inflation risk.

The Underlying Funds may engage in futures transactions for speculative or hedging purposes. The Funds may also write call options and purchase put options on futures contracts as a hedge to attempt to protect securities in its portfolio against decreases in value. When the Funds write a call option on a futures contract, it is undertaking the obligation of selling a futures contract at a fixed price at any time during a specified period if the option is exercised. Conversely, as purchaser of a put option on a futures contract, the Funds are entitled (but not obligated) to sell a futures contract at the fixed price during the life of the option.

When the Underlying Funds purchase futures contracts, an amount of cash and cash equivalents equal to the underlying commodity value of the futures contracts (less any related margin deposits) will be segregated on the books and records of the Funds to collateralize the position and thereby insure that the use of such futures contract is unleveraged. When the Funds sell futures contracts or related option contracts, it will either own or have the right to receive the underlying future or security, or will make deposits to collateralize the position as discussed above. When the Funds use futures and options on futures as hedging devices, there is a risk that the prices of the securities subject to the futures contracts may not correlate perfectly with the prices of the securities in the Funds’ portfolio. This may cause the futures contract and any related options to react differently than the portfolio securities to market changes. In addition, the Advisor could be incorrect in its expectations about the direction or extent of market factors such as stock price movements. In these events, the Funds may lose money on the futures contract or option. It is not certain that a secondary market for positions in futures contracts or for options will exist at all times. Although the Advisor will consider liquidity before entering into these transactions, there is no assurance that a liquid secondary market on an exchange or otherwise will exist for any particular futures contract or option at any particular time. The Funds’ ability to establish and close out futures and options positions depends on this secondary market. These Funds are being operated by an investment adviser that has claimed an exemption from registration with the Commodity Futures Trading Commission as a commodity pool operator under the Commodity Exchange Act, and therefore the investment adviser is not subject to

registration or regulation as a commodity pool operator under that Act. This claim of exemption from registration as a commodity pool operator is pursuant to Rule 4.5 promulgated under the Commodity Exchange Act. Specifically, in accordance with the requirements of Rule 4.5(b)(1), the Fund will limit its use of commodity futures contracts and commodity options contracts to no more than (i) five percent (5%) of the Fund's liquidation value being committed as aggregate initial premium or margin for such contracts or (ii) one hundred percent (100%) of the Fund's liquidation value in aggregate net notional value of commodity futures, commodity options and swaps positions.

INVESTMENT LIMITATIONS

A. Fundamental. The investment limitations described below have been adopted by the Trust with respect to the Funds and are fundamental ("Fundamental"), i.e., they may not be changed without the affirmative vote of a majority of the outstanding shares of a Fund. As used in the prospectus and this SAI, the term "majority of the outstanding shares" of a Fund means the lesser of (1) 67% or more of the outstanding shares of the Fund present at a meeting, if the holders of more than 50% of the outstanding shares of the Fund are present or represented at such meeting; or (2) more than 50% of the outstanding shares of the Fund. Other investment practices which may be changed by the Board of Trustees without the approval of shareholders to the extent permitted by applicable law, regulation or regulatory policy are considered non-fundamental ("Non-Fundamental").

1. Borrowing Money. The Funds will not borrow money, except (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of a Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of a Fund's total assets at the time when the borrowing is made. This limitation does not preclude a Fund from entering into reverse repurchase transactions, provided that the Fund has asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions.

2. Senior Securities. The Funds will not issue senior securities. This limitation is not applicable to activities that may be deemed to involve the issuance or sale of a senior security by a Fund, provided that the Fund's engagement in such activities is consistent with or permitted by the 1940 Act, the rules and regulations promulgated thereunder or interpretations of the Securities and Exchange Commission ("SEC") or its staff.

3. Underwriting. The Funds will not act as underwriter of securities issued by other persons. This limitation is not applicable to the extent that, in connection with the disposition of portfolio securities (including restricted securities), a Fund may be deemed an underwriter under certain federal securities laws.

4. Real Estate. The SMI Fund and SMI 50/40/10 Fund will not purchase or sell real estate. This limitation is not applicable to investments in marketable securities which are secured by or represent interests in real estate. This limitation does not preclude a Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts).

The SMI Dynamic Allocation Fund may not purchase or sell real estate unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from investing in securities or other investment companies backed by real estate (e.g., REITS) or securities of companies engaged in the real estate business, including publicly traded partnerships).

5. Commodities. The SMI Fund will not purchase or sell commodities unless acquired as a result of ownership of securities or other investments. This limitation does not preclude a Fund from purchasing or selling options or futures contracts, from investing in securities or other instruments backed by commodities or from investing in companies which are engaged in a commodities business or have a significant portion of their assets in commodities.

The SMI Dynamic Allocation Fund and SMI 50/40/10 Fund will not purchase or sell commodities unless acquired as a result of ownership of securities or other investments. This limitation does not preclude the Fund from purchasing or selling options or futures contracts, from investing in securities or other instruments backed by commodities, including interest in exchange traded grantor trusts, or from investing in companies which are engaged in a commodities business or have a significant portion of their assets in commodities.

6. Loans. The Funds will not make loans to other persons, except (a) by loaning portfolio securities, (b) by engaging in repurchase agreements, or (c) by purchasing nonpublicly offered debt securities. For purposes of this limitation, the term “loans” shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities.

7. Concentration. Each of the SMI Fund and SMI Dynamic Allocation Fund will not invest 25% or more of its total assets in a particular industry (other than investment companies). This limitation is not applicable to investments in obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities or repurchase agreements with respect thereto.

The SMI 50/40/10 Fund will not invest 25% or more of its net assets in a particular industry (other than investment companies). This limitation is not applicable to investments in obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities or repurchase agreements with respect thereto.

8. Diversification. With respect to 75% of their total assets, each of the SMI Fund and SMI Dynamic Allocation Fund will not purchase securities issued by any one issuer (other than cash, cash items, or securities issued or guaranteed by the government of the United States or its agencies or instrumentalities) if, as a result at the time of such purchase, more than 5% of the value of the Fund’s total assets would be invested in the securities of that issuer, or if it would own more than 10% of the outstanding voting securities of that issuer.

In regard to the SMI 50/40/10 Fund, with respect to 75% of its total assets, the Fund will not purchase securities issued by any one issuer (other than cash, cash items, securities of other investment companies, or securities issued by the government of the United States or its agencies or instrumentalities) if, as a result at the time of such purchase, more than 5% of the value of the

Fund's total assets would be invested in the securities of that issuer, or if it would own more than 10% of the outstanding voting securities of that issuer.

With respect to the percentages adopted by the Trust as maximum limitations on each Fund's investment policies and limitations, an excess above the fixed percentage will not be a violation of the policy or limitation unless the excess results immediately and directly from the acquisition of any security or the action taken. This paragraph does not apply to the borrowing policy set forth in paragraph 1 above.

Notwithstanding any of the foregoing limitations, any investment company, whether organized as a trust, association or corporation, or a personal holding company, may be merged or consolidated with or acquired by the Trust, provided that if such merger, consolidation or acquisition results in an investment in the securities of any issuer prohibited by said paragraphs, the Trust shall, within ninety days after the consummation of such merger, consolidation or acquisition, dispose of all of the securities of such issuer so acquired or such portion thereof as shall bring the total investment therein within the limitations imposed by said paragraphs above as of the date of consummation.

B. Non-Fundamental. The following limitations have been adopted by the Trust with respect to the Funds and are Non-Fundamental (see "Investment Limitations - Fundamental" above).

1. **Pledging.** Each Fund will not mortgage, pledge, hypothecate or in any manner transfer, as security for indebtedness, any assets of the Fund except as may be necessary in connection with borrowings described in Fundamental limitation (1) above. Margin deposits, security interests, liens and collateral arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investments and techniques are not deemed to be a mortgage, pledge or hypothecation of assets for purposes of this limitation.

2. **Margin Purchases.** Each Fund will not purchase securities or evidences of interest thereon on "margin." This limitation is not applicable to short-term credit obtained by a Fund for the clearance of purchases and sales or redemption of securities, or to arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investments and techniques.

3. **Illiquid Securities.** Each Fund will not invest more than 15% of its net assets in securities that are illiquid or restricted at the time of purchase.

4. **Loans of Portfolio Securities.** The Funds will not make loans of portfolio securities.

INVESTMENT ADVISER

The Advisor is SMI Advisory Services, LLC, 4400 Ray Boll Blvd., Columbus, IN 47203. The Advisor is a joint venture between Omnium Investment Company, LLC, and Marathon Partners, LLC. Omnium Investment Company was formed in 2005 and is managed by Anthony Ayers and Eric Collier. Marathon Partners was formed in 2005 by Austin Pryor, Mark Biller and the other senior personnel of Sound Mind Investing, a Christian non-denominational financial

newsletter. Austin Pryor is the majority owner of Sound Mind Investing, LLC, and Mark Biller serves as Executive Editor of the Sound Mind Investing newsletter and online services. The Sound Mind Investing newsletter was first published in 1990. The newsletter provides investment recommendations to thousands of subscribers using a variety of investment strategies, including the Stock Upgrading, Bond Upgrading, Sector Rotation, and Dynamic Allocation strategies used to manage the Funds.

Under the terms of the investment advisory agreement with respect to each Fund (the “Advisory Agreements”), the Advisor is responsible for managing each Fund’s investments. As compensation for its management services, each Fund is obligated to pay the Advisor a fee based on the Fund’s average daily net assets as follows:

Fund Assets	Sound Mind Investing Fund	SMI Dynamic Allocation Fund	SMI 50/40/10 Fund
\$1 - \$100 million	1.00%	1.00%	0.90%
\$100,000,001 - \$250 million	1.00%	1.00%	0.80%
\$250,000,001 - \$500 million	0.90%	0.90%	0.70%
Over \$500 million	0.80%	0.80%	0.60%

Prior to April 27, 2018, management fees for the Merged Fund were 1.00% for the first \$250 million in average daily net assets, 0.90% for the next \$250 million in average daily net assets and 0.80% for average daily net assets over \$500 million.

The Advisor has contractually agreed to waive its management fee and/or reimburse certain Fund operating expenses of each Fund, but only to the extent necessary so that net operating expenses, (excluding interest, taxes, brokerage commissions, other expenses which are capitalized in accordance with generally accepted accounting principles, extraordinary expenses, dividend expense on short sales, 12b-1 fees, and acquired fund fees and expenses), with respect to the SMI Fund do not exceed 1.50% of the SMI Fund’s average daily net assets, with respect to the SMI Dynamic Allocation Fund do not exceed 1.45% of the SMI Dynamic Allocation Fund’s average daily net assets, and with respect to the SMI 50/40/10 Fund do not exceed 1.15% of the SMI 50/40/10 Fund’s average daily net assets. The contractual arrangement for the SMI Fund, SMI Dynamic Allocation Fund and SMI 50/40/10 Fund is in effect through February 29, 2020. Each waiver or reimbursement by the Advisor is subject to repayment by the applicable Fund within the three years following the date of such waiver or reimbursement, provided that the Fund is able to make the repayment without exceeding the expense limitation in place at the time of the waiver or reimbursement and the expense limitation in place at the time of the repayment.

The following table describes the advisory fees paid to the Advisor by the Funds during the fiscal periods indicated.

Fund	Fiscal Year Ended	Advisory Fees Accrued	Total Expenses Reimbursed and/or Fees Waived	Net Advisory Fees Paid
Sound Mind Investing Fund	October 31, 2016	\$2,071,995	\$0	\$2,071,995
	October 31, 2017	\$1,971,157	\$0	\$1,971,157
	October 31, 2018	\$1,937,839	\$0	\$1,937,839
SMI Dynamic Allocation Fund	October 31, 2016	\$1,875,182	\$0	\$1,875,182
	October 31, 2017	\$1,639,954	\$0	\$1,639,954
	October 31, 2018	\$1,501,667	\$0	\$1,501,667
SMI 50/40/10 Fund	October 31, 2016	\$168,695	\$52,177	\$116,518
	October 31, 2017	\$191,808	\$20,157	\$171,651
	October 31, 2018	\$403,566	\$66,696	\$336,870

Each Advisory Agreement will continue in effect from year to year only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the applicable Fund's outstanding voting securities and by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on such Advisory Agreement. Each Advisory Agreement provides that the Advisor under such agreement shall not be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for the Fund, except for willful misfeasance, bad faith or negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder. The Advisor retains the right to use the name Sound Mind Investing in connection with another investment company or business enterprise with which the Advisor is or may become associated. A Fund's right to use the name Sound Mind Investing automatically ceases 90 days after termination of its Agreement and may be withdrawn by the Advisor on 90 days written notice.

The Advisor, not the Funds, may pay certain financial institutions (which may include banks, broker-dealers and other industry professionals) a fee for providing distribution related services and/or for performing certain administrative servicing functions for Fund shareholders to the extent these institutions are allowed to do so by applicable statute, rule or regulation. These financial institutions may charge their customers fees for offering these services to the extent permitted by applicable regulatory authorities, and the overall return to those shareholders availing themselves of the bank services will be lower than to those shareholders who do not. Each Fund may from time to time purchase securities issued by financial institutions that provide such services; however, in selecting investments for the Funds, no preference will be shown for such securities.

About the Portfolio Managers

The Advisor’s investment team is jointly and primarily responsible for the day-to-day management of the Funds. Eric Collier, Anthony Ayers and Mark Biller (each a “Portfolio Manager,” or collectively, the “Portfolio Managers”) comprise the Advisor’s investment team.

Management of Other Accounts. As of October 31, 2018, each of the Portfolio Managers was responsible for managing the following types of accounts, in addition to the Funds:
Eric Collier, Anthony Ayers, and Mark Biller

Account Type	Number of Accounts		Assets Under Management (in millions)	
	Total	Subject to a Performance Fee	Total	Subject to a Performance Fee
Registered Investment Companies	3	0	\$400 Million	\$0
Other Pooled Investment Vehicles	0	0	\$0	\$0
Other Accounts	220	0	\$100 Million	\$0

Compensation. The Portfolio Managers do not receive a salary or other compensation from the Advisor, but share in the Advisor’s profits based upon their indirect respective ownership of the Advisor. Mr. Biller shares in any profits of the Advisor indirectly through his ownership of Marathon Partners, LLC, while Mr. Collier and Mr. Ayers indirectly share in any profits of the Advisor through their indirect ownership of Omnium Investment Company, LLC via their ownership of the parent company, Omnium Capital, LLC. The Advisor is a joint venture between Marathon Partners and Omnium Investment Company.

The Portfolio Managers receive compensation from other sources, as described below. For his duties as Executive Editor of the Sound Mind Investing newsletter, Mr. Biller receives a fixed annual salary.

Mr. Collier and Mr. Ayers each receive a salary from Omnium Management Company, the managing company for Omnium Capital, LLC. Omnium Capital is the parent company of the co-owner of the Advisor, Omnium Investment Company. In addition, as part owners of Omnium Capital, they share in its net profits, which are allocated based upon each person’s ownership interest.

In his role as Executive Editor of the Sound Mind Investing Newsletter, Mr. Biller recommends Stock Upgrading, Bond Upgrading, Dynamic Allocation, and Sector Rotation investment strategies that are similar to the strategies used to manage a significant portion of each Fund’s assets. Each Fund’s underlying investments may change frequently, because its portfolio is monitored daily, while the Newsletter is only published monthly. This means that Mr. Biller’s recommendations to newsletter subscribers and his purchases and sales on behalf of the Funds with respect to the portion managed using each of these four strategies may not be the same. The Funds may invest in certain mutual funds, ETFs and other securities before the recommendations to invest in those funds are disseminated to newsletter subscribers.

In their roles as portfolio managers of the Advisor’s separately managed accounts (“SMAs”), the managers recommend Bond Upgrading, Dynamic Allocation, and Sector Rotation investment strategies and the managers can also be instructed by clients to use Stock Upgrading in the SMAs. Due to the difficulties associated with implementing Stock Upgrading in an SMA, for assets less than \$500,000, the SMI Fund will be used in SMAs to achieve exposure to Stock Upgrading. For amounts over \$500,000, underlying securities will be used to implement the Stock Upgrading strategy. Although these four strategies are used in the SMAs, in some instances the SMAs will use different securities than those used by the Funds in obtaining exposure to a particular sector or asset class. When the same securities are traded in both the SMAs and the Funds, the Advisor has a fixed structure in place which ensures that neither SMAs nor the Funds are given preferential treatment regarding which group trades first.

Each Portfolio Manager may engage in portfolio management activities for his own personal account(s) and/or the accounts of family members for no compensation.

As of October 31, 2018, the Portfolio Managers owned shares of each Fund in the following ranges:

Portfolio Manager	Sound Mind Investing Fund	SMI Dynamic Allocation Fund	SMI 50/40/10 Fund
Eric Collier	\$10,001 - \$50,000	\$50,001 - \$100,000	\$100,001 - \$500,000
Anthony Ayers	\$1 - \$10,000	\$1 - \$10,000	None
Mark Biller	\$100,001 - \$500,000	None	\$100,001 - \$500,000

TRUSTEES AND OFFICERS

The Board of Trustees supervises the business activities of the Trust and is responsible for protecting the interests of shareholders. The Chairperson of the Board of Trustees is Andrea N. Mullins, who is not an “interested person” of the Trust, as that term is defined under the 1940 Act. The Board of Trustees has considered the overall leadership structure of the Trust and has established committees designed to facilitate the governance of the Trust by the Trustees generally and the Board’s role with respect to risk oversight specifically. The Trust’s committees are responsible for certain aspects of risk oversight relating to financial statements, the valuation of the Trust’s assets, and compliance matters. The Board of Trustees also has frequent interaction with the service providers and Chief Compliance Officer of the Trust with respect to risk oversight matters. The Trust’s Chief Compliance Officer (the “CCO”) reports directly to the Board generally with respect to the CCO’s role in managing the compliance risks of the Trust. The CCO may also report directly to a particular committee of the Board depending on the subject matter. The Trust’s principal financial officer reports to the Audit Committee of the Board on all financial matters affecting the Trust, including risks associated with financial reporting. Through the committee structure, the Trustees also interact with other officers and service providers of the Trust to monitor risks related to the Trust’s operations. The Trust has determined that its leadership structure is appropriate based on the size of the Trust, the Board of Trustees’ current responsibilities, each Trustee’s ability to participate in the oversight of the Trust and committee transparency.

The Trustees are experienced businesspersons who meet throughout the year to oversee the Trust’s activities, review contractual arrangements with companies that provide services to the Fund and review performance. Each Trustee serves as a trustee until termination of the Trust unless the Trustee dies, resigns, retires or is removed.

The following table provides information regarding each of the Independent Trustees.

Name, Address*, Age, Position with Trust**, Term of Position with Trust	Principal Occupation During Past 5 Years and Other Directorships	Other Directorships
Ira P. Cohen, 59 Independent Trustee Since June 2010	Current: Independent financial services consultant (since February 2005); Executive Vice President of Asset Management Services, Recognos Financial (since August 2015).	Trustee and Audit Committee Chairman, Griffin Institutional Access Credit Fund (since January 2017); Trustee and Audit Committee Chairman, Griffin Institutional Real Estate Access Fund (since May 2014); Trustee, Angel Oak Funds Trust (since October 2014) (4 portfolios); Trustee, Chairman, and Nominating and Governance Committee Chairman, Angel Oak Strategic Credit Fund (since December 2017).
Andrea N. Mullins, 51 Independent Trustee Since December 2013 Chairperson since March 2017	Current: Private investor; Independent Contractor, SWM Advisors (since April 2014).	Trustee, Angel Oak Funds Trust (since February 2019) (4 portfolios); Trustee, Angel Oak Strategic Credit Fund (since February 2019).

* The address for each trustee and officer is 225 Pictoria Dr., Suite 450, Cincinnati, Ohio 45246.

** As of the date of this SAI, the Trust consists of 12 series.

The following table provides information regarding the Trustee who is considered an “interested person” of the Trust, as that term is defined under the 1940 Act. Based on the experience of the Trustee, the Trust concluded that the individual described below should serve as a Trustee.

Name, Address*, Age, Position with Trust**, Term of Position with Trust	Principal Occupation During Past 5 Years	Other Directorships
Mark J. Seger*** , 57 Trustee Since March 2017	Current: Vice Chairman and Co-Founder, Ultimus Fund Solutions, LLC and its subsidiaries (since 1999).	None.

* The address for each trustee and officer is 225 Pictoria Dr., Suite 450, Cincinnati, Ohio 45246.

** As of the date of this SAI, the Trust consists of 12 series.

*** Mr. Seger is considered an “interested person” of the Trust because of his relationship with the Trust’s administrator, transfer agent, and distributors.

The Trust’s committees are responsible for certain aspects of risk oversight relating to financial statements, the valuation of the Trust’s assets, and compliance and governance matters. The Board of Trustees currently has established three standing committees: the Audit Committee; the Pricing Committee; and the Governance and Nominating Committee.

The Trust’s Audit Committee consists of the Independent Trustees. The Audit Committee is responsible for overseeing each Fund’s accounting and financial reporting policies and practices, its internal controls and, as appropriate, the internal controls of certain service providers; overseeing the quality and objectivity of the Fund’s financial statements and the independent audit of the financial statements; and acting as a liaison between the Fund’s independent auditors and the full Board of Trustees. During the 2018 calendar year, the Audit Committee met five times.

The Pricing Committee of the Board of Trustees is responsible for reviewing and approving the Funds’ fair valuation determinations, if any. The members of the Pricing Committee are all of the Trustees, except that any one member of the Pricing Committee constitutes a quorum for purposes of reviewing and approving a fair value. During the 2018 calendar year, the Pricing Committee met four times.

The Governance and Nominating Committee consists of the Independent Trustees and oversees general Trust governance-related matters. The Governance and Nominating Committee’s purposes, duties and powers are set forth in its written charter, which is included in Exhibit C – the charter also describes the process by which shareholders of the Trust may make nominations. During the 2018 calendar year, the Governance and Nominating Committee met four times.

Trustee Qualifications

Generally, no one factor was decisive in the original selection of an individual to join the Board. Among the factors the Board considered when concluding that an individual should serve on the Board were the following: (1) the individual’s business and professional experience and accomplishments; (2) the individual’s ability to work effectively with the other members of the Board; and (3) how the individual’s skills, experience and attributes would contribute to an appropriate mix of relevant skills and experience on the Board. In respect of each Trustee, the

individual’s substantial professional accomplishments and prior experience, including, in some cases, in fields related to the operations of the Trust, were a significant factor in the determination that the individual should serve as a Trustee of the Trust. In addition to the information provided above, below is a summary of the specific experience, qualifications, attributes or skills of each Trustee and the reason why he was selected to serve as Trustee:

Ira P. Cohen – Mr. Cohen has over 38 years of experience in the financial services industry, including in an executive management role. He was selected to serve as Trustee of the Trust based primarily on his comprehensive understanding of the investment management industry’s operations and distribution related matters.

Andrea N. Mullins – Ms. Mullins has over 24 years of experience in the mutual fund industry, including experience in management, accounting and financial reporting.

Mark J. Seger - Mr. Seger has over 31 years of experience in the financial services industry, including extensive experience in an executive management role with two different mutual fund servicing companies, including the Trust’s administrator. Mr. Seger was selected to serve as Trustee of the Trust based primarily on his extensive knowledge of mutual fund operations, including the regulatory framework under which the Trust must operate.

The following table provides information regarding the Officers of the Trust.

Name, Address*, Age, Position with Trust**, Term of Position with Trust	Principal Occupation During Past 5 Years	Other Directorships
Adam T. Kornegay , 33 Principal Executive Officer and President Since April 2018	Current: Assistant Vice President, Business Development Director, Ultimus Fund Solutions, LLC (since March 2015). Previous: Vice President, Citigroup, Inc. (July 2009 to February 2015).	None.
Brandon R. Kipp , 35 Chief Compliance Officer Since October 2017	Current: Senior Fund Compliance Officer, Ultimus Fund Solutions, LLC (since July 2017). Previous: Assistant Vice President and Compliance Manager, UMB Fund Services, Inc. (March 2014 to July 2017); Officer and Lead Fund Administrator, UMB Fund Services, Inc. (May 2012 to March 2014).	None.

Name, Address*, Age, Position with Trust**, Term of Position with Trust	Principal Occupation During Past 5 Years	Other Directorships
<p>Carol J. Highsmith, 54 Vice President Since August 2008</p> <p>Secretary Since March 2014</p>	<p>Current: Assistant Vice President, Ultimus Fund Solutions, LLC (since December 2015).</p> <p>Previous: Employed in various positions with Huntington Asset Services, Inc. (n/k/a Ultimus Asset Services, LLC) (November 1994 to December 2015), most recently Vice President of Legal Administration (2005 to December 2015).</p>	None.
<p>Matthew J. Miller, 42 Vice President Since December 2011</p>	<p>Current: Assistant Vice President, Relationship Management, Ultimus Fund Solutions, LLC (since December 2015).</p> <p>Previous: Employed in various positions with Huntington Asset Services, Inc. (n/k/a Ultimus Asset Services, LLC) (July 1998 to December 2015), most recently Vice President of Relationship Management (2005 to December 2015).</p>	None.
<p>Bryan W. Ashmus, 46 Principal Financial Officer and Treasurer Since December 2013</p>	<p>Current: Vice President and Director of Financial Administration, Ultimus Fund Solutions, LLC (since December 2015).</p> <p>Previous: Vice President and Manager of Financial Administration, Huntington Asset Services, Inc. (n/k/a Ultimus Asset Services, LLC) (September 2013 to December 2015); Vice President, Fund Administration, Citi Fund Services Ohio, Inc. (from May 2005 to September 2013).</p>	None.
<p>Stephen L. Preston, 52 AML Officer since June 2017</p>	<p>Current: Chief Compliance Officer, Unified Financial Securities, LLC (since April 2018); Chief Compliance Officer, Ultimus Fund Solutions, LLC (since June 2011); Chief Compliance Officer of Ultimus Fund Distributors, LLC (since June 2011).</p>	None.

* The address for each trustee and officer is 225 Pictoria Dr., Suite 450 Cincinnati, Ohio 45246.

** As of the date of this SAI, the Trust consists of 12 series.

The table below shows for each Trustee, the amount of Fund equity securities beneficially owned by each Trustee, and the aggregate value of all investments in equity securities of the Funds of the Trust, as of December 31, 2018 and stated as one of the following

ranges: A = None; B = \$1-\$10,000; C = \$10,001-\$50,000; D = \$50,001-\$100,000; and E = over \$100,000.

Name of Trustee	Dollar Range of Equity Securities in the Funds	Aggregate Dollar Range of Equity Securities in all Registered Investment Companies Overseen by the Trustees in Family of Investment Companies
<u>Non-Interested Trustees</u>		
Ira P. Cohen	A	A
Andrea N. Mullins	A	A
<u>Interested Trustee</u>		
Mark J. Seger	A	A

Compensation. Set forth below are estimates of the annual compensation to be paid to the Trustees by the Fund on an individual basis and by the Trust on an aggregate basis. Trustees' fees and expenses are Trust expenses and the Fund incurs its pro rata share of expenses based on the number of existing series in the Trust. As a result, the amount paid by the Fund will increase or decrease as series are added or removed from the Trust.

Independent Trustees	Aggregate Compensation from each Fund	Pension or Retirement Benefits Accrued As Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from Trust*
Ira P. Cohen**	\$2,842	\$0	\$0	\$34,100
Andrea N. Mullins***	\$2,933	\$0	\$0	\$35,200

*As of the date of this SAI, the Trust consists of 12 series. Each series, including each of the Funds, pays a portion of the overall Independent Trustee compensation expenses, which is based on the total number of series in the Trust and the total assets of each series relative to the overall assets of the Trust. The amount for the Aggregate Compensation from each Fund may be higher or lower depending on the allocation over relative net assets of the series in the Trust. Effective January 1, 2019, each Independent Trustee receives base compensation of \$33,000. Each Independent Trustee also receives additional compensation for serving as the chairperson of one or more of the Trust's standing committees and for participating in special meetings of the Board.

**For the fiscal year ended October 31, 2018, Mr. Ira P. Cohen received \$12,681 from the Funds.

***For the fiscal year ended October 31, 2018, Ms. Andrea N. Mullins received \$13,040 from the Funds.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

The beneficial ownership, either directly or indirectly, of more than 25% of the voting securities of a fund creates a presumption of control of a fund, under Section 2(a) (9) of the Investment Company Act of 1940. As a controlling shareholder, each of these persons could control the outcome of any proposal submitted to the shareholders for approval, including changes to a Fund's fundamental policies or the terms of the management agreement with the Advisor.

As of February 1, 2019, the following persons were deemed to be control persons or principal shareholders of the Funds:

Name and Address	% Ownership	Type of Ownership
Sound Mind Investing Fund		
National Financial Services Corp. 200 Liberty St. World Financial Center New York, NY 10281	24.58%	Record
Charles Schwab & Co. 101 Montgomery St. San Francisco, CA 94104	6.88%	Record
TD Ameritrade, Inc. P.O. Box 2226 Omaha, NE 68103	16.70%	Record
SMI Dynamic Allocation Fund		
National Financial Services Corp. 200 Liberty St. World Financial Center New York, NY 10281	32.79%	Record
Charles Schwab & Co. 101 Montgomery St. San Francisco, CA 94104	13.56%	Record
TD Ameritrade, Inc. P.O. Box 2226 Omaha, NE 68103	19.98%	Record
SMI 50/40/10 Fund		
National Financial Services Corp. 200 Liberty St. World Financial Center New York, NY 10281	29.44%	Record
Charles Schwab & Co. 101 Montgomery St. San Francisco, CA 94104	9.06%	Record
TD Ameritrade, Inc. P.O. Box 2226 Omaha, NE 68103	8.12%	Record

As of February 1, 2019, the Trustees and officers of the Trust did not own any shares of any of the Funds. It is not known whether National Financial Services Corporation (“NFSC”) or any of the underlying beneficial owners owned or controlled beneficially more than 25% of the voting securities of any of the Funds. As a result, NFSC may be deemed to control the Sound Mind Investing Fund, and the SMI Dynamic Allocation Fund.

PORTFOLIO TURNOVER

Each Fund may sell portfolio securities without regard to the length of time they have been held when, in the opinion of the Advisor, investment considerations warrant such action. A Fund's portfolio turnover rate is the percentage of its portfolio that is bought and sold to exchange for other securities and is expressed as a percentage of its total assets. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions. The table below provides information regarding the portfolio turnover rate for each of the Funds for the fiscal years ended October 31, 2017 and 2018.

Fund	Fiscal Year Ended October 31, 2017	Fiscal Year Ended October 31, 2018
Sound Mind Investing Fund	176%	164%
SMI Dynamic Allocation Fund	247%	61%
SMI 50/40/10 Fund	212%	155%

The Funds are managed using quantitative strategies. Consequently, all portfolio trades are dictated by the respective Fund's strategies. The decrease in portfolio turnover with respect to the SMI Dynamic Allocation Fund was a result of the market dynamics triggering fewer trades.

ANTI-MONEY LAUNDERING COMPLIANCE PROGRAM

Customer identification and verification is part of each Fund's overall obligation to prevent money laundering under federal law. The Trust has, on behalf of the Funds, adopted an anti-money laundering compliance program designed to prevent each Fund from being used for money laundering or financing of terrorist activities (the "AML Compliance Program"). The Trust has delegated the responsibility to implement the AML Compliance Program to the Funds' transfer agent, Ultimus Fund Solutions, LLC, subject to oversight by the Trust's Chief Compliance Officer and, ultimately, by the Board of Trustees.

When you open an account with a Fund, the Fund's transfer agent will request that you provide your name, physical address, date of birth, Social Security number or tax identification number. You may also be asked for other information that, in the transfer agent's discretion, will allow the Fund to verify your identity. Entities are also required to provide additional documentation. This information will be verified to ensure the identity of all of persons opening an account with each Fund. Each Fund reserves the right to (i) refuse, cancel or rescind any purchase or exchange order, (ii) freeze any account and/or suspend account activities, or (iii) involuntarily redeem your account in cases of threatening conduct or suspected fraudulent or illegal activity. These actions will be taken when, in the sole discretion of the Funds' transfer agent, they are deemed to be in the best interest of a Fund, or in cases where a Fund is requested or compelled to do so by governmental or law enforcement authority.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Subject to policies established by the Board of Trustees of the Trust, the Advisor is responsible for each Fund’s portfolio decisions and the placing of each Fund’s portfolio transactions. In executing transactions and selecting brokers or dealers for each Fund, the Advisor will seek to obtain the best overall terms available for the Fund. In assessing the best overall terms available for any transaction, the Advisor shall consider such factors as it deems relevant, including the ability of the broker or dealer to settle the trade promptly and accurately, the financial condition of the broker or dealer, the Advisor’s past experience with similar type trades, and the reasonableness of the commission, if any, both for the specific transaction and on a continuing basis, and other factors that may be unique to a particular order. Recognizing the value of these judgmental factors, the Advisor may select brokers who charge brokerage commission that is higher than the lowest commission that might otherwise be available for any given trade. The sale of Fund shares may not be considered when determining the firms that are to execute brokerage transactions for the Funds. The Advisor will not use “soft dollar” commissions or rebates by brokerage firms of commissions generated by securities transactions of the Funds executed through those firms to pay expenses of the Advisor.

For the fiscal year ended October 31, 2018, the Advisor did not direct any brokerage transactions on behalf of the Funds to brokers on the basis of research services provided by such brokers.

The following table provides information regarding brokerage commissions paid by the Sound Mind Investing Fund during the fiscal years indicated.

Fund	Fiscal Year Ended October 31, 2016	Fiscal Year Ended October 31, 2017	Fiscal Year Ended October 31, 2018
Sound Mind Investing Fund	\$13,789	\$12,896	\$16,986

The following table provides information regarding brokerage commissions paid by the SMI Dynamic Allocation Fund during the fiscal years indicated.

Fund	Fiscal Year Ended October 31, 2016	Fiscal Year Ended October 31, 2017	Fiscal Year Ended October 31, 2018
SMI Dynamic Allocation Fund	\$23,623	\$31,304	\$10,362

The following table provides information regarding brokerage commissions paid by the SMI 50/40/10 Fund during the fiscal periods indicated.

Fund	Fiscal Year Ended October 31, 2016	Fiscal Year Ended October 31, 2017	Fiscal Year Ended October 31, 2018
SMI 50/40/10 Fund	\$2,995	\$2,788	\$5,429

CODES OF ETHICS

The Trust, the Advisor, and the Funds' Distributor have each adopted a Code of Ethics (the "Codes") pursuant to Rule 17j-1 of the 1940 Act, and the Advisor's Code of Ethics also conform to Rule 204A-1 under the Investment Advisers Act of 1940. The personnel subject to the Codes are permitted to invest in securities, including securities that may be purchased or held by a Fund. You may obtain copies of the Codes, free of charge, by calling Shareholder Services at (877) 764-3863. You may also obtain copies of the Trust's Code from documents filed with SEC and available on the SEC's web site at www.sec.gov.

DISCLOSURE OF PORTFOLIO HOLDINGS

Each Fund is required to include a schedule of portfolio holdings in its annual and semi-annual reports to shareholders, which is sent to shareholders within 60 days of the end of the second and fourth fiscal quarters and which is filed with the Securities and Exchange Commission (the "SEC") on Form N-CSR. Each Fund also is required to file a schedule of portfolio holdings with the SEC on Form N-Q within 60 days of the end of the first and third fiscal quarters. The Fund must provide a copy of the complete schedule of portfolio holdings as filed with the SEC to any shareholder of a Fund, upon request, free of charge. This policy is applied uniformly to all shareholders of the Funds without regard to the type of requesting shareholder (i.e., regardless of whether the shareholder is an individual or institutional investor).

Each Fund releases portfolio holdings to third party servicing agents on a daily basis in order for those parties to perform their duties on behalf of the Fund. These third party servicing agents include the Advisor, Distributor, Transfer Agent, Fund Accounting Agent, Administrator and Custodian. The Fund also may disclose portfolio holdings, as needed, to auditors, legal counsel, proxy voting services (if applicable), printers, pricing services, parties to merger and reorganization agreements and their agents, and prospective or newly hired investment advisers or sub-advisers. The lag between the date of the information and the date on which the information is disclosed will vary based on the identity of the party to whom the information is disclosed. For instance, the information may be provided to auditors within days of the end of an annual period, while the information may be given to legal counsel or prospective advisers at any time. This information is disclosed to all such third parties under conditions of confidentiality. "Conditions of confidentiality" include (i) confidentiality clauses in written agreements, (ii) confidentiality implied by the nature of the relationship (e.g., attorney-client relationship), (iii) confidentiality required by fiduciary or regulatory principles (e.g., custodial relationships) or (iv) understandings or expectations between the parties that the information will be kept confidential.

Additionally, each Fund has ongoing arrangements to release portfolio holdings to Morningstar, Inc., Lipper, Inc., Bloomberg, Standard & Poor's, Thomson Reuters and Vickers-Stock ("Rating Agencies") in order for those organizations to assign a rating or ranking to the Fund. In these instances, portfolio holdings will be supplied within approximately 15 days after the end of the month. The Rating Agencies may make the Fund's top portfolio holdings available on their websites and may make the Fund's complete portfolio holdings available to their subscribers for a fee. Neither the Funds, the Advisor, nor any of their affiliates receive any portion of this fee. Information released to Rating Agencies is released under conditions of confidentiality and it is subject to prohibitions on trading based on the information. Each Fund

also may post its complete portfolio holdings to its website, if applicable, within approximately 15 days after the end of the month. The information will remain posted on the website until replaced by the information for the succeeding month. If a Fund does not have a website or the website is for some reason inoperable, the information will be supplied no more frequently than quarterly and on a delayed basis.

From time to time, employees of the Advisor also may provide oral or written information (portfolio commentary) about the Funds, including, but not limited to, how a Fund's investments are divided among various sectors, industries, countries, investment styles and capitalization sizes, and among stocks, bonds, currencies and cash, security types, bond maturities, bond coupons and bond credit quality ratings. This portfolio commentary may also include information on how these various weightings and factors contributed to Fund performance. Employees of the Advisor may also provide oral or written information (statistical information) about various financial characteristics of a Fund or its underlying portfolio securities including, but not limited to, alpha, beta, R-squared, coefficient of determination, duration, maturity, information ratio, Sharpe ratio, earnings growth, payout ratio, price/book value, projected earnings growth, return on equity, standard deviation, tracking error, weighted average quality, market capitalization, percent debt to equity, price to cash flow, dividend yield or growth, default rate, portfolio turnover, and risk and style characteristics. This portfolio commentary and statistical information about a Fund may be based on the Fund's portfolio as of the most recent quarter-end or the end of some other interim period, such as month-end. The portfolio commentary and statistical information may be provided to various persons, including members of the press, brokers and other financial intermediaries that sell shares of the Fund, shareholders in the applicable Fund, persons considering investing in the Fund or representatives of such shareholders or potential shareholders, such as fiduciaries of a 401(k) plan or a trust and their advisor. The nature and content of the information provided to each of the persons described in this paragraph may differ.

The Advisor may manage products sponsored by companies, and provides services for individuals, other than the Trust, including institutional investors and high net worth persons. In many cases, these other products and service offerings are managed in a similar fashion to the Funds and thus have similar portfolio holdings. The sponsors of these other products or owners of separate accounts that are managed by the Advisor may disclose or have access to the portfolio holdings of their products and separate accounts at different times than the Funds disclose their portfolio holdings.

Except as described above, each Fund is prohibited from entering into any arrangements with any person to make available information about the Fund's portfolio holdings without the prior authorization of the Chief Compliance Officer and the specific approval of the Board. The Advisor must submit any proposed arrangement pursuant to which the Advisor intends to disclose a Fund's portfolio holdings to the Board, which will review such arrangement to determine whether the arrangement is in the best interests of Fund shareholders. Additionally, the Advisor, and any affiliated persons of the Advisor, are prohibited from receiving compensation or other consideration, for themselves or on behalf of a Fund, as a result of disclosing the Fund's portfolio holdings. Finally, each Fund will not disclose portfolio holdings as described above to third parties that the Fund knows will use the information for personal securities transactions.

The Trust maintains written policies and procedures regarding the disclosure of its portfolio holdings to ensure that such disclosure is for a legitimate business purpose and is in the best interests of the Funds' shareholders. The Board reviews these policies and procedures on an annual basis. Compliance will be periodically assessed by the Board in connection with a report from the Trust's Chief Compliance Officer. There may be instances where the interests of the Trust's shareholders respecting the disclosure of information about portfolio holdings may conflict or appear to conflict with the interests of the Advisor, any principal underwriter for the Trust or an affiliated person of the Trust (including such affiliated person's investment adviser or principal underwriter). In such situations, the conflict must be disclosed to the Board.

PROXY VOTING POLICY

The Trust and the Advisor each have adopted proxy voting policies and procedures reasonably designed to ensure that proxies are voted in shareholders' best interests. As a brief summary, the Trust's policy delegates responsibility regarding proxy voting to the Advisor, subject to the Advisor's proxy voting policy and the supervision of the Board of Trustees. The Advisor votes each Fund's proxies in accordance with its proxy voting policy, subject to the provisions of the Trust's policy regarding conflicts of interests. The Trust's Proxy Voting Policy and Procedure is attached as Exhibit A. The Advisor's Proxy Voting Policy and Procedure is attached as Exhibit B.

The Trust's policy provides that, if a conflict of interest between the Advisor or its affiliates and a Fund arises with respect to any proxy, the Advisor must fully disclose the conflict to the Board of Trustees and vote the proxy in accordance with the Board's instructions. The Board shall make the proxy voting decision that in its judgment, after reviewing the recommendation of the Advisor, is most consistent with the Advisor's proxy voting policies and in the best interests of Fund shareholders.

You may also obtain a copy of the Trust's and the Advisor's proxy voting policy by calling Shareholder Services at (877) 764-3863 to request a copy, or by writing to Ultimus Fund Solutions, LLC, the Funds' transfer agent, at 225 Pictoria Dr., Suite 450, Cincinnati, Ohio 45246. A copy of the policies will be mailed to you within three days of receipt of your request. You also may obtain a copy from Fund documents filed with the SEC, which are available on the SEC's web site at www.sec.gov. A copy of the votes cast by each Fund with respect to portfolio securities for each year ended June 30th will be filed by the Funds with the SEC on Form N-PX. The Funds' proxy voting records will be available to shareholders free of charge upon request by calling or writing the Funds as described above or from the SEC's web site.

DETERMINATION OF NET ASSET VALUE

The net asset value of the shares of each Fund is determined as of the close of trading (normally 4:00 p.m. Eastern time) on each day the Trust, its custodian, and transfer agent are open for business and on any other day on which there is sufficient trading in a Fund's securities to materially affect the net asset value. The Trust is open for business on every day on which the New York Stock Exchange ("NYSE") is open for trading. The NYSE is closed on Saturdays, Sundays and the following holidays: New Year's Day, Martin Luther King, Jr. Day, President's

Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas. For a description of the methods used to determine the net asset value (share price), see “Determination of Net Asset Value” in the Prospectus.

Equity securities generally are valued by using market quotations furnished by a pricing service. Securities that are traded on any stock exchange are generally valued by the pricing service at the last quoted sale price. Lacking a last sale price, an exchange traded security is generally valued by the pricing service at its last bid price. Securities traded in the NASDAQ over-the-counter market are generally valued by the pricing service at the NASDAQ Official Closing Price. Options traded on major exchanges are valued at the last quoted sales price on their primary exchange or, if there is no sale on the applicable exchange on such day, then the last quoted bid price as of the close of such exchange will be used. When market quotations are not readily available (including when they are not reliable), such securities may be valued at a fair value pursuant to guidelines established by the Board of Trustees. The Board of Trustees annually approves the pricing services used by the fund accounting agent. Fair valued securities held by a Fund (if any) are reviewed by the Board of Trustees on a quarterly basis.

Fixed income securities generally are valued by using market quotations, but may be valued on the basis of prices furnished by a pricing service. A pricing service utilizes electronic data processing techniques based on yield spreads relating to securities with similar characteristics to determine prices for normal institutional-size trading units of debt securities without regard to sale or bid prices. When prices are not readily available from a pricing service (including when they are not reliable), securities may be valued at fair value as determined pursuant to guidelines established by the Board of Trustees. Short-term investments in fixed income securities with maturities of less than 60 days when acquired, or which subsequently are within 60 days of maturity, may be valued by using the amortized cost method of valuation, which the Board has determined will represent fair value.

REDEMPTION IN-KIND

The Funds do not intend to redeem shares in any form except cash. However, if the amount being redeemed is over the lesser of \$250,000 or 1% of a Fund’s net asset value, pursuant to a Rule 18f-1 plan filed by the Trust on behalf of the Funds, each Fund has the right to redeem your shares by giving you the amount that exceeds the lesser of \$250,000 or 1% of the Fund’s net asset value in securities instead of cash. In the event that an in-kind distribution is made, a shareholder may incur additional expenses, such as the payment of brokerage commissions, on the sale or other disposition of the securities received from the Fund.

STATUS AND TAXATION OF THE FUNDS

The following discussion is a summary of certain U.S. federal income tax considerations affecting the Funds and their shareholders. The discussion reflects applicable federal income tax laws of the U.S. as of the date of this SAI. These tax laws may be changed or subject to new interpretations by the courts or the Internal Revenue Service (the “IRS”), possibly with retroactive effect. No attempt is made to present a detailed explanation of all U.S. income, estate or gift tax, or foreign, state or local tax concerns affecting the Funds and their shareholders (including shareholders owning large positions in the Funds). The discussion set forth herein

does not constitute tax advice. Investors are urged to consult their own tax advisers to determine the tax consequences to them of investing in the Funds.

In addition, no attempt is made to address tax concerns applicable to an investor with a special tax status such as a financial institution, REIT, insurance company, regulated investment company (“RIC”), individual retirement account, other tax-exempt entity, dealer in securities or non-U.S. investor. Furthermore, this discussion does not reflect possible application of the alternative minimum tax to noncorporate shareholders. Unless otherwise noted, this discussion assumes shares of the Funds are held by U.S. shareholders and that such shares are held as capital assets.

A “U.S. shareholder” is a beneficial owner of shares of a Fund that is for U.S. federal income tax purposes:

- a citizen or individual resident of the United States (including certain former citizens and former long-term residents);
- a corporation or other entity treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any state thereof or the District of Columbia;
- an estate, the income of which is subject to U.S. federal income taxation regardless of its source; or
- a trust with respect to which a court within the United States is able to exercise primary supervision over its administration and one or more U.S. shareholders have the authority to control all of its substantial decisions or the trust has made a valid election in effect under applicable Treasury regulations to be treated as a U.S. person.

A “Non-U.S. shareholder” is a beneficial owner of shares of a Fund that is an individual, corporation, trust or estate and is not a U.S. shareholder. If a partnership (including any entity treated as a partnership for U.S. federal income tax purposes) holds shares of a Fund, the tax treatment of a partner in the partnership generally depends upon the status of the partner and the activities of the partnership. A prospective shareholder who is a partner of a partnership holding Fund shares should consult its tax advisors with respect to the purchase, ownership and disposition of its Fund shares.

Taxation as a RIC

Each Fund intends to qualify each year for treatment as a RIC under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Internal Revenue Code”). There can be no assurance that a Fund actually will so qualify. A Fund will qualify as a RIC if, among other things, it meets the source-of-income and the asset-diversification requirements. With respect to the source-of-income requirement, a Fund must derive in each taxable year at least 90% of its gross income (including tax-exempt interest) from (i) dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gains from options, futures and

forward contracts) derived with respect to its business of investing in such shares, securities or currencies, and (ii) net income derived from an interest in a “qualified publicly traded partnership.” A “qualified publicly traded partnership” is generally defined as a publicly traded partnership under Internal Revenue Code section 7704. However, for these purposes, a qualified publicly traded partnership does not include a publicly traded partnership if 90% or more of its income is described in (i) above. Income derived from a partnership (other than a qualified publicly traded partnership) or trust is qualifying income to the extent such income is attributable to items of income of the partnership or trust which would be qualifying income if realized by a Fund in the same manner as realized by the partnership or trust.

If a RIC fails this 90% income test, as long as such failure is due to reasonable cause and not willful neglect, such RIC is required to disclose the failure to the IRS and pay a tax equal to the excess of the gross income which is not derived from the sources described in (i) and (ii) above over 1/9 of the gross income that is described above.

With respect to the asset-diversification requirement, a Fund must diversify its holdings so that, at the end of each quarter of its taxable year (i) at least 50% of the value of the Fund’s total assets is represented by cash and cash items, U.S. government securities, the securities of other RICs and other securities, if such other securities of any one issuer do not represent more than 5% of the value of the Fund’s total assets or more than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund’s total assets is invested in the securities of (other than U.S. government securities or the securities of other RICs) (a) one issuer, (b) two or more issuers that are controlled by the Fund and that are engaged in the same, similar or related trades or businesses, or (c) one or more qualified publicly traded partnerships.

If a RIC fails this asset-diversification test, such RIC, in addition to other cure provisions, has a 6-month period to correct any failure without incurring a penalty if such failure is “de minimis.”

However, if a RIC does not satisfy the “de minimis” cure provisions, it can still cure a failure it: (a) the RIC files with the Treasury Department a description of each asset that causes the RIC to fail the diversification tests; (b) the failure is due to reasonable cause and not willful neglect; and (c) the failure is cured within six months (or such other period specified by the Treasury). In such cases, a tax is imposed on the RIC equal to the greater of: (a) \$50,000 or (b) an amount determined by multiplying the corporate tax rate by the amount of net income generated during the period of diversification test failure by the assets that caused the RIC to fail the diversification test.

If a Fund satisfies the income and asset-diversification tests above and distributes to its shareholders, for each taxable year, at least 90% of the sum of (i) its “investment company taxable income” as that term is defined in the Internal Revenue Code (which includes, among other things, dividends, taxable interest, the excess of any net short-term capital gains over net long-term capital losses and certain net foreign exchange gains as reduced by certain deductible expenses) without regard to the deduction for dividends paid, and (ii) the excess of its gross tax-exempt interest, if any, over certain deductions attributable to such interest that are otherwise disallowed, then the Fund will be relieved of U.S. federal income tax on any income of the Fund, including long-term capital gains, distributed to shareholders. However, any ordinary income or

capital gain retained by the Fund will be subject to U.S. federal income tax at the corporate income tax rate. Each Fund intends to distribute at least annually substantially all of its investment company taxable income, net tax-exempt interest, and net capital gain.

Each Fund will generally be subject to a nondeductible 4% federal excise tax on the portion of its undistributed ordinary income with respect to each calendar year and undistributed capital gains if it fails to meet certain distribution requirements with respect to the one-year period ending on October 31 in that calendar year. In order to avoid the 4% federal excise tax, the required minimum distribution is generally equal to the sum of (i) 98% of the Fund's ordinary income (computed on a calendar year basis), (ii) 98.2% of the Fund's capital gain net income (generally computed for the one-year period ending on October 31) and (iii) any prior year undistributed income realized, on which the Fund paid no federal income tax in preceding years. Each Fund generally intends to make distributions in a timely manner in an amount at least equal to the required minimum distribution and therefore, under normal market conditions, does not expect to be subject to this excise tax.

To the extent that a Fund has capital loss carryforwards from prior tax years, those carryforwards will reduce the Fund's current net capital gains and thus reduce the amount of the Fund's distribution of capital gain dividends. Capital loss carryforwards are reduced to the extent they offset current-year net realized capital gains, whether a Fund retains or distributes such gains. A RIC is permitted to carry forward net capital losses indefinitely and may allow losses to retain their original character (as short or as long-term). These capital loss carryforwards may be utilized in future years to offset net realized capital gains of a Fund, if any, prior to distributing such gains to shareholders.

Each Fund may be required to recognize taxable income in circumstances in which it does not receive cash. For example, if a Fund holds debt obligations that are treated under applicable tax rules as having original issue discount (such as debt instruments with payment in kind interest or, in certain cases, with increasing interest rates or that are issued with warrants), the Fund must include in income each year a portion of the original issue discount that accrues over the life of the obligation regardless of whether cash representing such income is received by the Fund in the same taxable year. Because any original issue discount accrued will be included in the Fund's "investment company taxable income" (discussed below) for the year of accrual, the Fund may be required to make a distribution to its shareholders to satisfy the distribution requirement, even though it will not have received an amount of cash that corresponds with the income earned.

Gain or loss realized by a Fund from the sale or exchange of warrants acquired by the Fund as well as any loss attributable to the lapse of such warrants generally will be treated as capital gain or loss. Such gain or loss generally will be long-term or short-term, depending on how long the Fund held a particular warrant. Upon the exercise of a warrant acquired by the Fund, the Fund's tax basis in the stock purchased under the warrant will equal the sum of the amount paid for the warrant plus the strike price paid on the exercise of the warrant. Except as set forth in "Failure to Qualify as a RIC," the remainder of this discussion assumes that each Fund will qualify as a RIC for each taxable year.

Failure to Qualify as a RIC

If a Fund is unable to satisfy the 90% distribution requirement or otherwise fails to qualify as a RIC in any year, it will be subject to corporate level income tax on all of its income and gain, regardless of whether or not such income was distributed. Distributions to the Fund's shareholders of such income and gain will not be deductible by the Fund in computing its taxable income. In such event, the Fund's distributions, to the extent derived from the Fund's current or accumulated earnings and profits, would constitute ordinary dividends, which would generally be eligible for the dividends-received deduction available to corporate shareholders, and non-corporate shareholders would generally be able to treat such distributions as "qualified dividend income" eligible for reduced rates of U.S. federal income, provided in each case that certain holding period and other requirements are satisfied.

Distributions in excess of a Fund's current and accumulated earnings and profits would be treated first as a return of capital to the extent of the shareholders' tax basis in their Fund shares, and any remaining distributions would be treated as a capital gain. To qualify as a RIC in a subsequent taxable year, the Fund would be required to satisfy the source-of-income, the asset diversification, and the annual distribution requirements for that year and dispose of any earnings and profits from any year in which the Fund failed to qualify for tax treatment as a RIC. Subject to a limited exception applicable to RICs that qualified as such under the Internal Revenue Code for at least one year prior to disqualification and that re-qualify as a RIC no later than the second year following the non-qualifying year, the Fund would be subject to tax on any unrealized built-in gains in the assets held by it during the period in which the Fund failed to qualify for tax treatment as a RIC that are recognized within the subsequent 10 years, unless the Fund made a special election to pay corporate-level tax on such built-in gain at the time of its re-qualification as a RIC.

Taxation of U.S. Shareholders

Distributions paid to U.S. shareholders by a Fund from its investment company taxable income (which is, generally, the Fund's ordinary income plus net realized short-term capital gains in excess of net realized long-term capital losses) are generally taxable to U.S. shareholders as ordinary income to the extent of the Fund's earnings and profits, whether paid in cash or reinvested in additional shares. Such distributions (if designated by the Fund) may qualify (i) for the dividends received deduction in the case of corporate shareholders under Section 243 of the Internal Revenue Code to the extent that the Fund's income consists of dividend income from U.S. corporations, excluding distributions from tax-exempt organizations, exempt farmers' cooperatives or REITs or (ii) in the case of individual shareholders, as qualified dividend income eligible to be taxed at reduced rates under Section 1(h)(11) of the Internal Revenue Code to the extent that the Fund receives qualified dividend income, and provided in each case certain holding period and other requirements are met.

Qualified dividend income is, in general, dividend income from taxable domestic corporations and qualified foreign corporations (e.g., generally, foreign corporations incorporated in a possession of the United States or in certain countries with a qualified comprehensive income tax treaty with the United States, or the stock with respect to which such dividend is paid is readily tradable on an established securities market in the United States). A qualified foreign corporation generally excludes any foreign corporation, which for the taxable

year of the corporation in which the dividend was paid, or the preceding taxable year, is a passive foreign investment company.

Distributions made to a U.S. shareholder from an excess of net long-term capital gains over net short-term capital losses (“capital gain dividends”), including capital gain dividends credited to such shareholder but retained by a Fund, are taxable to such shareholder as long-term capital gain if they have been properly designated by the Fund, regardless of the length of time such shareholder owned the shares of the Fund. Long-term capital gain rates applicable to individuals are 0%, 15%, 20% or 25% depending on the nature of the capital gain and the individual’s taxable income.

Distributions in excess of a Fund’s earnings and profits will be treated by the U.S. shareholder, first, as a tax-free return of capital, which is applied against and will reduce the adjusted tax basis of the U.S. shareholder’s shares and, after such adjusted tax basis is reduced to zero, will constitute capital gain to the U.S. shareholder (assuming the shares are held as a capital asset).

Generally, not later than sixty days after the close of its taxable year, each Fund will provide the shareholders with a written notice designating the amount of any qualified dividend income or capital gain dividends and other distributions.

Under the 2017 legislation commonly known as the Tax Cuts and Jobs Act (“TCJA”), “qualified REIT dividends” (i.e., ordinary REIT dividends other than capital gain dividends and portions of REIT dividends designated as qualified dividend income) are treated as eligible for a 20% deduction by noncorporate taxpayers. Proposed regulations issued by the IRS, which can be relied on currently, enable a Fund to pass through the special character of “qualified REIT dividends” to a shareholder provided both the Fund and a shareholder meet certain period requirements with respect to their shares.

For purposes of determining (i) whether the annual distribution requirement is satisfied for any year and (ii) the amount of capital gain dividends paid for that year, a Fund may, under certain circumstances, elect to treat a dividend that is paid during the following taxable year as if it had been paid during the taxable year in question. If a Fund makes such an election, the U.S. shareholder will still be treated as receiving the dividend in the taxable year in which the distribution is made. However, any dividend declared by a Fund in October, November or December of any calendar year, payable to shareholders of record on a specified date in such a month and actually paid during January of the following year, will be treated as if it had been received by the U.S. shareholders on December 31 of the year in which the dividend was declared.

If more than 50% of the value of a Fund’s assets at the close of the taxable year consist of stock or securities in foreign corporations (including certain foreign ETFs or foreign index mutual funds) and certain other requirements are met, the Fund may elect to pass-through to its shareholders the amount of foreign income tax paid by the Fund instead of claiming it on its tax return. If such an election is made, each shareholder will include in gross income his proportional share of the foreign taxes paid by the Fund. Investors may either deduct their pro-rata amount of such taxes paid in computing their taxable income or use it as a foreign tax credit

against federal income tax. If a Fund makes the election, it will furnish the shareholders with a written notice after the close of its taxable year.

Each Fund intends to distribute all realized capital gains, if any, at least annually. If, however, a Fund were to retain any net capital gain, the Fund may designate the retained amount as undistributed capital gains in a notice to shareholders who, if subject to U.S. federal income tax on long-term capital gains, (i) will be required to include in income as long-term capital gain, their proportionate shares of such undistributed amount, and (ii) will be entitled to credit their proportionate shares of the federal income tax paid by the Fund on the undistributed amount against their U.S. federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. If such an event occurs, the tax basis of shares owned by a shareholder of the Fund will, for U.S. federal income tax purposes, generally be increased by the difference between the amount of undistributed net capital gain included in the shareholder's gross income and the tax deemed paid by the shareholders.

Sales and other dispositions of the shares of the Funds generally are taxable events. U.S. shareholders should consult their own tax adviser with reference to their individual circumstances to determine whether any particular transaction in the shares of a Fund is properly treated as a sale or exchange for federal income tax purposes, as the following discussion assumes, and the tax treatment of any gains or losses recognized in such transactions. The sale or other disposition of shares of a Fund will generally result in capital gain or loss to the shareholder equal to the difference between the amount realized and his adjusted tax basis in the shares sold or exchanged, and will be long-term capital gain or loss if the shares have been held for more than one year at the time of sale. Any loss upon the sale or exchange of shares held for six months or less will be treated as long-term capital loss to the extent of any capital gain dividends received (including amounts credited as an undistributed capital gain dividend) by such shareholder with respect to such shares. A loss realized on a sale or exchange of shares of a Fund generally will be disallowed if other substantially identical shares are acquired within a 61-day period beginning 30 days before and ending 30 days after the date that the shares are disposed. In such case, the basis of the shares acquired will be adjusted to reflect the disallowed loss. Present law taxes both long-term and short-term capital gain of corporations at the rates applicable to ordinary income of corporations. For non-corporate taxpayers, short-term capital gain will currently be taxed at the rate applicable to ordinary income, while long-term capital gain generally will be taxed at a maximum rate of 20%. Capital losses are subject to certain limitations.

Each Fund has chosen average cost as its standing (default) tax lot identification method for all shareholders. A tax lot identification method is the way each Fund will determine which specific shares are deemed to be sold when there are multiple purchases on different dates at differing net asset values, and the entire position is not sold at one time. A Fund's standing tax lot identification method is the method covered shares will be reported on your Consolidated Form 1099 if you do not select a specific tax lot identification method. You may choose a method different than a Fund's standing method and will be able to do so at the time of your purchase or upon the sale of covered shares. Please refer to the appropriate Internal Revenue Service regulations or consult your tax advisor with regard to your personal circumstances.

For those securities defined as "covered" under current Internal Revenue Service cost basis tax reporting regulations, a Fund is responsible for maintaining accurate cost basis and tax

lot information for tax reporting purposes. The Funds are not responsible for the reliability or accuracy of the information for those securities that are not "covered." The Funds and their service providers do not provide tax advice. You should consult independent sources, which may include a tax professional, with respect to any decisions you may make with respect to choosing a tax lot identification method.

Certain U.S. shareholders, including individuals and estates and trusts, are subject to an additional 3.8% Medicare tax on all or a portion of their "net investment income," which should include dividends from the Funds and net gains from the disposition of shares of the Funds. U.S. shareholders are urged to consult their own tax advisors regarding the implications of the additional Medicare tax resulting from an investment in the Funds.

Original Issue Discount, Pay-In-Kind Securities, and Market Discount. Some debt obligations with a fixed maturity date of more than one year from the date of issuance (and zero-coupon debt obligations with a fixed maturity date of more than one year from the date of issuance) that may be acquired by a Fund may be treated as debt obligations that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in the Fund's taxable income (and required to be distributed by the Fund) over the term of the debt obligation, even though payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security.

Some debt obligations (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by a Fund in the secondary market may be treated as having "market discount." Very generally, market discount is the excess of the stated redemption price of a debt obligation (or in the case of an obligations issued with OID, its "revised issue price") over the purchase price of such obligation. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt obligation having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt obligation. Alternatively, a Fund may elect to accrue market discount currently, in which case the Fund will be required to include the accrued market discount in the Fund's income (as ordinary income) and thus distribute it over the term of the debt security, even though payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security. The rate at which the market discount accrues, and thus is included in the Fund's income, will depend upon which of the permitted accrual methods the Fund elects. In the case of higher-risk securities, the amount of market discount may be unclear. (The Tax Cuts and Jobs Act requires certain taxpayers to recognize items of gross income for tax purposes in the year in which the taxpayer recognizes the income for financial accounting purposes. For financial accounting purposes, market discount must be accrued currently on a constant yield to maturity basis regardless of whether a current inclusion election is made. While the exact scope of this provision is not known at this time, it could cause a Fund to recognize income earlier for tax purposes than would otherwise have been the case prior to the enactment of the Tax Cuts and Jobs Act.)

Some debt obligations (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by a Fund may be treated as having "acquisition discount" (very generally, the excess of the stated redemption price over the purchase price), or OID in the case of certain types of debt obligations. A Fund will be required to include the acquisition discount, or OID, in income (as ordinary income) over the term of the debt obligation, even though

payment of that amount is not received until a later time, upon partial or full repayment or disposition of the debt security. The Fund may make one or more of the elections applicable to debt obligations having acquisition discount, or OID, which could affect the character and timing of recognition of income.

In addition, payment-in-kind securities will, and commodity-linked notes may, give rise to income that is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.

If a Fund holds the foregoing kinds of securities, it may be required to pay out as an income distribution each year an amount that is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution than they would in the absence of such transactions.

Investments in Commodities. Gains from the disposition of commodities, including precious metals, will neither be considered qualifying income for purposes of satisfying the source-of-income requirement nor qualifying assets for purposes of satisfying the asset-diversification requirement. Also, the IRS has issued a revenue ruling which holds that income derived from commodity-linked swaps is not qualifying income for purposes of the source-of-income requirement. In a subsequent revenue ruling, as well as in a number of follow-on private letter rulings (upon which only the fund that received the private letter ruling may rely), the IRS provides that income from certain alternative investments which create commodity exposure, such as certain commodity-linked or structured notes or a corporate subsidiary that invests in commodities, may be considered qualifying income under the Internal Revenue Code. In September 2016, the IRS announced that it will no longer issue private letter rulings on questions relating to the treatment of a corporation as a RIC that require a determination of whether a financial instrument or position, such as a commodity-linked or structured note, is a security under section 2(a)(36) of the 1940 Act. (A financial instrument or position that constitutes a security under section 2(a)(36) of the 1940 Act generates qualifying income for a corporation taxed as a regulated investment company.) This caused the IRS to revoke the portion of any rulings that required such a determination, some of which were revoked retroactively and others of which were revoked prospectively as of a date agreed upon with the IRS. A RIC may gain exposure to commodities through investment in a QPTP, such as an exchange-traded fund or ETF that is classified as a partnership and which invests in commodities. Accordingly, the extent to which a fund invests in commodities or commodity-linked derivatives may be limited by the source-of-income requirement and the asset-diversification requirement, which the fund must continue to satisfy to maintain its status as a regulated investment company. A fund also may be limited in its ability to sell its investments in commodities, commodity-linked derivatives, and certain ETFs or be forced to sell other investments to generate income due to the source-of-income requirement. If a fund does not appropriately limit such investments or if such investments (or the income earned on such investments) were to be recharacterized for U.S. tax purposes, the fund could fail to qualify as a regulated investment company. In lieu of potential disqualification, a fund is permitted to pay a tax for certain failures to satisfy the asset-diversification requirement or source-of-income requirement, which, in general, are limited to those due to reasonable cause and not willful neglect.

Tax-Exempt Shareholders. If a shareholder of a Fund is a tax-exempt organization, it is generally not subject to federal income tax on distributions from the Fund or on sales or exchanges of Fund shares. This general exemption from tax does not apply to the “unrelated business taxable income” or UBTI of an exempt organization. UBTI includes dividends, interest, and gains from sales and other dispositions of property held for investment to the extent that such items are attributable to “debt financed property.” For example, UBTI could result if shares in a Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of Internal Revenue Code Section 514(b). A deduction from one activity that produces UBTI cannot be used to offset income from a different activity that produces UBTI for the same taxable year. UBTI in excess of \$1,000 in any year is taxable and will require a member to file a federal income tax return on Form 990-T. In addition, private foundations that are exempt from federal income tax may nonetheless be subject to excise tax on their net investment income and certain private colleges and universities that are exempt from federal income tax may be subject to an excise tax based on the investment income they earn. Shareholders should ask their own tax advisors for more information on their own tax situation.

At the time a private foundation or certain private colleges or universities purchase Fund shares, the Fund’s net asset value may reflect undistributed income or undistributed capital gains. A subsequent distribution of such amounts, although constituting a return of investment, would be classified as a taxable distribution whether reinvested in additional shares or paid in cash. This is sometimes referred to as “buying a dividend.” In addition, a Fund’s net asset value may, at any time, reflect net unrealized appreciation, which may result in future taxable distributions. (Private colleges and universities with at least 500 students (more than 50% of which are located in the United States) and non-exempt use assets with a value at the close of the preceding year of at least \$500,000 per full-time student may be subject to a 1.4% excise tax on their net investment income.)

Furthermore, a tax-exempt shareholder may recognize UBTI if a Fund recognizes “excess inclusion income” derived from direct or indirect investments in residual interests in Real Estate Mortgage Investment Conduits (“REMICs”) or equity interests in Taxable Mortgage Pools (“TMPs”) if the amount of such income recognized by a Fund exceeds the Fund’s investment company taxable income (after taking into account deductions for dividends paid by the Fund). Special tax consequences also apply to charitable remainder trusts (“CRTs”) that invest in regulated investment companies that invest directly or indirectly in residual interests in REMICs or equity interests in TMPs. Under legislation enacted in December 2006, a CRT (as defined in section 664 of the Internal Revenue Code) that realizes any UBTI for a taxable year, must pay an excise tax annually of an amount equal to such UBTI. Under IRS guidance issued in October 2006, a CRT will not recognize UBTI solely as a result of investing in a Fund that recognizes “excess inclusion income.” Rather, if at any time during any taxable year a CRT (or one of certain other tax-exempt shareholders, such as the United States, a state or political subdivision, or an agency or instrumentality thereof, and certain energy cooperatives) is a record holder of a share in a Fund that recognizes “excess inclusion income,” then the regulated investment company will be subject to a tax on that portion of its “excess inclusion income” for the taxable year that is allocable to such shareholders, at the corporate income tax rate. The extent to which this IRS guidance remains applicable in light of the December 2006 legislation is unclear. To the extent permitted under the 1940 Act, a Fund may elect to specially allocate any

such tax to the applicable CRT, or other shareholder, and thus reduce such shareholder's distributions for the year by the amount of the tax that relates to such shareholder's interest in the Fund. The Funds have not yet determined whether such an election will be made. CRTs and other tax-exempt investors are urged to consult their tax advisers concerning the consequences of investing in the Funds.

Passive Foreign Investment Companies. A passive foreign investment company ("PFIC") is any foreign corporation: (i) 75% or more of the gross income of which for the taxable year is passive income, or (ii) the average percentage of the assets of which (generally by value, but by adjusted tax basis in certain cases) that produce or are held for the production of passive income is at least 50%. Generally, passive income for this purpose means dividends, interest (including income equivalent to interest), royalties, rents, annuities, the excess of gains over losses from certain property transactions and commodities transactions, and foreign currency gains. Passive income for this purpose does not include rents and royalties received by the foreign corporation from an active business and certain income received from related persons.

Equity investments by a Fund in certain PFICs could potentially subject the Fund to a U.S. federal income tax or other charge (including interest charges) on the distributions received from the PFIC or on proceeds received from the disposition of shares in the PFIC. This tax cannot be eliminated by making distributions to Fund shareholders. However, a Fund may elect to avoid the imposition of that tax. For example, if a Fund is in a position to and elects to treat a PFIC as a "qualified electing fund" (i.e., make a "QEF election"), the Fund will be required to include its share of the PFIC's income and net capital gains annually, regardless of whether it receives any distribution from the PFIC. Alternatively, the Fund may make an election to mark the gains (and to a limited extent losses) in its PFIC holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed by the Fund to avoid taxation. Making either of these elections therefore may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund's total return. Dividends paid by PFICs will not be eligible to be treated as "qualified dividend income."

Because it is not always possible to identify a foreign corporation as a PFIC, a Fund may incur the tax and interest charges described above in some instances.

Foreign Currency Transactions. A Fund's transactions in foreign currencies, foreign currency-denominated debt obligations and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned. Any such net gains could require a larger dividend toward the end of the calendar year. Any such net losses will generally reduce and potentially require the recharacterization of prior ordinary income distributions. Such ordinary income treatment may accelerate Fund distributions to shareholders and increase the distributions taxed to shareholders as ordinary income. Any net ordinary losses so created cannot be carried forward by the Fund to offset income or gains earned in subsequent taxable years.

Foreign Taxation. Income received by a Fund from sources within foreign countries, including securities held by the RICs and ETFs in which the Fund invests, may be subject to withholding and other taxes imposed by such countries. Dividends and interest received by a RIC's holding of foreign securities may give rise to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. If the RIC in which a Fund invests is taxable as a RIC and meets certain other requirements, which include a requirement that more than 50% of the value of such RIC's total assets at the close of its respective taxable year consists of stocks or securities of foreign corporations, then the RIC should be eligible to file an election with the IRS that may enable its shareholders, including the Fund in effect, to receive either the benefit of a foreign tax credit, or a tax deduction, with respect to any foreign and U.S. possessions income taxes paid the by Fund, subject to certain limitations.

A "qualified fund of funds" is a RIC that has at least 50% of the value of its total interests invested in other RICs at the end of each quarter of the taxable year. If a Fund satisfied this requirement or if it meets certain other requirements, which include a requirement that more than 50% of the value of the Fund's total assets at the close of its taxable year consist of stocks or securities of foreign corporations, then the Fund should be eligible to file an election with the IRS that may enable its shareholders to receive either the benefit of a foreign tax credit, or a tax deduction, with respect to any foreign and U.S. possessions income taxes paid by the Fund, subject to certain limitations.

Foreign Shareholders. Absent specific statutory exemptions, as described below, dividends paid by a Fund to a shareholder that is not a "U.S. person" within the meaning of the Internal Revenue Code (such shareholder, a "foreign shareholder") are subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate). However, notwithstanding such exemptions from U.S. withholding at the source, any dividends and distributions of income and capital gains, including the proceeds from the sale of your Fund shares, will be subject to backup withholding at a rate of 24% if you fail to properly certify that you are not a U.S. person.

In general, capital gain dividends reported by a Fund to shareholders as paid from its net long-term capital gains, other than long-term capital gains realized on disposition of US real property interests (see the discussion below), are not subject to U.S. withholding tax unless you are a nonresident alien individual present in the U.S. for a period or periods aggregating 183 days or more during the calendar year.

Ordinary dividends paid by a Fund to foreign investors on the income earned on portfolio investments in (i) the stock of domestic and foreign corporations and (ii) the debt of foreign issuers are subject to U.S. withholding tax.

Generally, dividends reported by a Fund to shareholders as interest-related dividends and paid from its qualified net interest income from U.S. sources are not subject to U.S. withholding tax. "Qualified interest income" includes, in general, US source (1) bank deposit interest, (2) short-term original discount, (3) interest (including original issue discount, market discount, or acquisition discount) on an obligation that is in registered form, unless it is earned on an obligation issued by a corporation or partnership in which the Fund is a 10-percent shareholder

or is contingent interest, and (4) any interest-related dividend from another regulated investment company. Similarly, short-term capital gain dividends reported by a Fund to shareholders as paid from its net short-term capital gains, other than short-term capital gains realized on disposition of U.S. real property interests (see the discussion below), are not subject to U.S. withholding tax unless you were a nonresident alien individual present in the U.S. for a period or periods aggregating 183 days or more during the calendar year. Each Fund reserves the right to not report interest-related dividends or short-term capital gain dividends. Additionally, a Fund's reporting of interest-related dividends or short-term capital gain dividends may not be passed through to shareholders by intermediaries who have assumed tax reporting responsibilities for this income in managed or omnibus accounts due to systems limitations or operational constraints.

If the income from a Fund is effectively connected with a U.S. trade or business carried on by a foreign shareholder, then ordinary income dividends, capital gain dividends and any gains realized upon the sale or redemption of shares of the Fund will be subject to U.S. federal income tax at the rates applicable to U.S. citizens or domestic corporations and require the filing of a nonresident U.S. income tax return.

Special U.S. tax certification requirements may apply to foreign shareholders both to avoid U.S. backup withholding imposed at a rate of 24% and to obtain the benefits of any treaty between the U.S. and the shareholder's country of residence. In general, if you are a foreign shareholder, you must provide a Form W-8 BEN (or other applicable Form W-8) to establish that you are not a U.S. person, to claim that you are the beneficial owner of the income and, if applicable, to claim a reduced rate of, or exemption from, withholding as a resident of a country with which the U.S. has an income tax treaty. A Form W-8 BEN provided without a U.S. taxpayer identification number will remain in effect for a period beginning on the date signed and ending on the last day of the third succeeding calendar year unless an earlier change of circumstances makes the information on the form incorrect. Certain payees and payments are exempt from backup withholding.

The tax consequences to a foreign shareholder entitled to claim the benefits of an applicable tax treaty may be different from those described herein. Foreign shareholders are urged to consult their own tax advisors with respect to the particular tax consequences to them of an investment in a Fund, including the applicability of foreign tax.

Backup Withholding. Each Fund generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and redemption proceeds paid to any individual shareholder who fails to properly furnish the Fund with a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify to the Fund that he or she is not subject to such withholding. The backup withholding tax rate is 24%.

Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the IRS.

FATCA. Payments to a shareholder that is either a foreign financial institution ("FFI") or a non-financial foreign entity ("NFFE") within the meaning of the Foreign Account Tax

Compliance Act (“FATCA”) may be subject to a 30% withholding tax on income dividends. After December 31, 2018, FATCA withholding also would have applied to certain capital gain distributions, return of capital distributions, and the proceeds arising from the sale of Fund shares; however, based on proposed regulations issued by the IRS, which can be relied on currently, such withholding is no longer required unless final regulations provide otherwise (which is not expected). The FATCA withholding tax generally can be avoided: (a) by an FFI, subject to any applicable intergovernmental agreement or other exemption, if it enters into a valid agreement with the IRS to, among other requirements, report required information about certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI and (b) by an NFFE, if it: (i) certifies that it has no substantial U.S. persons as owners or (ii) if it does have such owners, reports information relating to them. Each Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of a Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

Tax Shelter Reporting Regulations. Under U.S. Treasury regulations, if a shareholder recognizes a loss with respect to a Fund’s shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all regulated investment companies. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

Shareholder Reporting Obligations with Respect to Foreign Financial Assets. Specified individuals and specified domestic entities that have an interest in a “specified foreign financial asset” above a certain threshold amount must disclose annually their interests in such assets on IRS Form 8938, which is filed with their U.S. federal income tax return.

Shares Purchased through Tax-Qualified Plans. Special tax rules apply to investments through defined contribution plans and other tax-qualified plans. Shareholders should consult their tax advisers to determine the suitability of shares of a Fund as an investment through such plans, and the precise effect of an investment on their particular tax situation.

Summary

The foregoing is a general and abbreviated summary of the provisions of the Internal Revenue Code and the Treasury regulations in effect as they directly govern the taxation of the Funds and their shareholders. These provisions are subject to change by legislative and administrative action, and any such change may be retroactive. Shareholders are urged to consult their tax advisers regarding specific questions as to U.S. federal income, estate or gift taxes, or foreign, state, local taxes or other taxes.

CUSTODIAN

Huntington National Bank, 41 South High Street, Columbus, Ohio 43215, is Custodian of each Fund's investments. The Custodian acts as the Funds' depository, safekeeps portfolio securities, collects all income and other payments with respect thereto, disburses funds at the Funds' request and maintains records in connection with its duties.

FUND SERVICES

Ultimus Fund Solutions, LLC ("Ultimus"), 225 Pictoria Dr., Suite 450, Cincinnati, Ohio 45246, acts as the Funds' transfer agent, dividend disbursing agent, fund accountant, and administrator. Ultimus is the parent company of the Distributor. The officers of the Trust also are officers and/or employees of Ultimus.

Ultimus maintains the records of each shareholder's account, answers shareholders' inquiries concerning their accounts, processes purchases and redemptions of each Fund's shares, acts as dividend and distribution disbursing agent, and performs other transfer agent and shareholder service functions.

In addition, Ultimus provides the Funds with fund accounting services, which includes certain monthly reports, record keeping and other management-related services.

Ultimus also provides the Funds with administrative services, including all regulatory reporting and necessary office equipment, personnel and facilities.

The following table provides information regarding transfer agent, fund accounting and administrative services fees paid by the Funds during the fiscal periods indicated. The amounts given include reimbursement for various out-of-pocket expenses, and may include amounts paid to various third parties as compensation for sub-transfer agency services.

Sound Mind Investing Fund	Fiscal Year Ended October 31, 2016	Fiscal Year Ended October 31, 2017	Fiscal Year Ended October 31, 2018
Transfer Agent Fees	\$35,512*	\$32,215*	\$29,406
Fund Accounting Fees	\$27,048	\$26,703	\$26,662
Administration Fees	\$47,344	\$47,967	\$48,000

*This amount does not include certain out-of-pocket expenses paid by the Fund.

SMI Dynamic Allocation Fund	Fiscal Year Ended October 31, 2016	Fiscal Year Ended October 31, 2017	Fiscal Year Ended October 31, 2018
Transfer Agent Fees	\$15,315*	\$14,035*	\$12,152
Fund Accounting Fees	\$24,656	\$22,077	\$20,625
Administration Fees	\$43,162	\$39,661	\$37,136

*This amount does not include certain out-of-pocket expenses paid by the Fund.

SMI 50/40/10 Fund	Fiscal Year Ended October 31, 2016	Fiscal Year Ended October 31, 2017	Fiscal Year Ended October 31, 2018
Transfer Agent Fees	\$5,289*	\$6,674*	\$9,191
Fund Accounting Fees	\$2,200	\$2,588	\$6,047
Administration Fees	\$3,857	\$4,650	\$10,872

*This amount does not include certain out-of-pocket expenses paid by the Fund.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The firm of Cohen & Company, Ltd., (“Cohen”), 1350 Euclid Avenue, Suite 800, Cleveland, Ohio, 44115, has been selected as the Independent Registered Public Accounting Firm for the Funds for the fiscal year ended October 31, 2019. Cohen will perform an annual audit of each Fund’s financial statements and will provide financial, tax and accounting services as requested, in accordance with applicable laws and regulations.

LEGAL COUNSEL

Stradley Ronon Stevens & Young, LLP serves as legal counsel to the Trust and Funds. Its address is 2600 One Commerce Square, Philadelphia, PA 19103-7098.

DISTRIBUTOR

Unified Financial Securities, LLC (the “Distributor”), 9465 Counselors Row, Suite 200, Indianapolis, Indiana 46240, is the exclusive agent for distribution of shares of the Funds. The Distributor is a wholly-owned subsidiary of Ultimus Fund Solutions, LLC.

The Distributor is obligated to sell the shares of each Fund on a best efforts basis only against purchase orders for the shares. Shares of each Fund are offered to the public on a continuous basis.

FINANCIAL STATEMENTS

The financial statements and the report of the Independent Registered Public Accounting Firm required to be included in the Statement of Additional Information are incorporated herein by reference to the Funds’ Annual Report to Shareholders for the fiscal year ended October 31, 2018. You can obtain the Annual Report without charge by calling Shareholder Services at (877) 764-3863 or upon written request to:

Ultimus Fund Solutions, LLC

Cincinnati, Ohio 45246-0707

EXHIBIT A

VALUED ADVISERS TRUST PROXY VOTING POLICY AND PROCEDURE

The Valued Advisers Trust (the “Trust”) is registered as an open-end management investment company under the Investment Company Act of 1940, as amended (“1940 Act”). The Trust offers multiple series (each a “Fund” and, collectively, the “Funds”). Consistent with its fiduciary duties and pursuant to Rule 30b1-4 under the 1940 Act (the “Proxy Rule”), the Board of Trustees of the Trust (the “Board”) has adopted this proxy voting policy on behalf of the Trust (the “Policy”) to reflect its commitment to ensure that proxies are voted in a manner consistent with the best interests of the Funds’ shareholders.

Delegation of Proxy Voting Authority to Fund Advisers

The Board believes that the investment advisor of the Fund (each an “Advisor” and, collectively, the “Advisors”), as the entity that selects the individual securities that comprise its Fund’s portfolio, is the most knowledgeable and best-suited to make decisions on how to vote proxies of portfolio companies held by that Fund. The Trust shall therefore defer to, and rely on, the Advisor of the Fund to make decisions on how to cast proxy votes on behalf of such Fund.

The Trust hereby designates the Advisor of the Fund as the entity responsible for exercising proxy voting authority with regard to securities held in the Fund’s investment portfolio. Consistent with its duties under this Policy, each Advisor shall monitor and review corporate transactions of corporations in which the Fund has invested, obtain all information sufficient to allow an informed vote on all proxy solicitations, ensure that all proxy votes are cast in a timely fashion, and maintain all records required to be maintained by the Fund under the Proxy Rule and the 1940 Act. Each Advisor shall perform these duties in accordance with the Advisor’s proxy voting policy, a copy of which shall be presented to this Board for its review. Each Advisor shall promptly provide to the Board updates to its proxy voting policy as they are adopted and implemented.

Conflict of Interest Transactions

In some instances, an Advisor may be asked to cast a proxy vote that presents a conflict between the interests of the Fund’s shareholders, and those of the Advisor or an affiliated person of the Advisor. In such case, the Advisor is instructed to abstain from making a voting decision and to forward all necessary proxy voting materials to the Trust to enable the Board to make a voting decision. When the Board is required to make a proxy voting decision, only the Trustees without a conflict of interest with regard to the security in question or the matter to be voted upon shall be permitted to participate in the decision of how the Fund’s vote will be cast. In the event that the Board is required to vote a proxy because an Advisor has a conflict of interest with respect to the proxy, the Board will vote such proxy in accordance with the Advisor’s proxy voting policy, to the extent consistent with the shareholders’ best interests, as determined by the Board in its discretion. The Board shall notify the Advisor of its final decision on the matter and the Advisor shall vote in accordance with the Board’s decision.

Availability of Proxy Voting Policy and Records Available to Fund Shareholders

If the Fund has a website, the Fund may post a copy of its Advisor's proxy voting policy and this Policy on such website. A copy of such policies and of the Fund's proxy voting record shall also be made available, without charge, upon request of any shareholder of the Fund, by calling the applicable Fund's toll-free telephone number as printed in the Fund's prospectus. The Trust's administrator shall reply to any Fund shareholder request within three business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery.

Each Advisor shall provide a complete voting record, as required by the Proxy Rule, for each series of the Trust for which it acts as adviser, to the Trust's administrator within 15 days following the end of each calendar quarter. The Trust's administrator will file a report based on such record on Form N-PX on an annual basis with the Securities and Exchange Commission no later than August 31st of each year.

EXHIBIT B

SMI Advisory Services, LLC Proxy Voting Policy and Procedures

A. Policy

Proxy voting is an important right of shareholders and reasonable care and diligence must be undertaken to ensure that such rights are properly and timely exercised. When SMI-AS has discretion to vote the proxies of its clients, it will vote those proxies in the best interest of its clients and in accordance with these policies and procedures.

B. Proxy Voting Procedures

All proxies received by SMI-AS will be sent to the Chief Compliance Officer (CCO). The CCO will:

Keep a record of each proxy received.

Forward the proxy to a portfolio manager.

Determine which accounts managed by SMI-AS holds the security to which the proxy relates.

Provide a portfolio manager with a list of accounts that hold the security and the date by which SMI-AS must vote the proxy in order to allow enough time for the completed proxy to be returned to the issuer prior to the vote taking place.

Absent material conflicts (see Section IV), the Portfolio Manager & CCO will determine how SMI-AS should vote the proxy. The CCO is responsible for completing the proxy and mailing the proxy in a timely and appropriate manner.

SMI-AS may retain a third party to assist it in coordinating and voting proxies with respect to client securities. If so, the Compliance Officer shall monitor the third party to assure that all proxies are being properly voted and appropriate records are being retained.

C. Voting Guidelines

In the absence of specific voting guidelines from a client, SMI-AS will vote proxies in the best interest of each particular client, which may result in different voting results for proxies for the same issuer. SMI-AS believes that voting proxies in accordance with the following guidelines is in the best interest of its client.

Generally, SMI-AS will vote in favor of routine corporate housekeeping proposals, including election of directors (where no corporate governance issues are implicated), selection of auditors, and increases in or reclassification of common stock.

Generally, SMI-AS will vote against proposals that make it more difficult to replace members of the issuer's board of directors, including proposals to stagger the board, cause management to be overrepresented on the board, introduce cumulative voting, introduce unequal voting rights, and create supermajority voting.

For other proposals, SMI-AS shall determine whether a proposal is in the best interest of its clients and may take into account the following factors, among others:

Whether the proposal was recommended by management and SMI-AS opinion of management;

Whether the proposal acts to entrench existing management; and

Whether the proposal fairly compensates management for past and future performance.

SMI-AS reserves the right to add to these factors as it deems necessary in order to ensure that further categories of proposals are covered and that the general principles in determining how to vote all proxies are fully stated.

D. Conflicts of Interest

The CCO will identify any conflicts that exist between the interests of SMI-AS and its clients. This examination will include a review of the relationship of SMI-AS and its affiliates with the issuer of each security [and any of the issuer's affiliates] to determine if the issuer is a client of SMI-AS or an affiliate of SMI-AS or has some other relationship with SMI-AS or a client of SMI-AS.

If a material conflict exists, SMI-AS will determine whether voting in accordance with the voting guidelines and factors described above is in the best interest of the client. SMI-AS will also determine whether it is appropriate to disclose the conflict to the affected clients and, except in the case of clients that are subject to the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), give the clients the opportunity to vote their proxies themselves. In the case of ERISA clients, if the Investment Management Agreement reserves to the ERISA client the authority to vote proxies when SMI-AS determines it has a material conflict that affects its best judgment as an ERISA fiduciary, SMI-AS will give the ERISA client the opportunity to vote the proxies themselves.

E. Disclosure

SMI-AS will disclose in its Form ADV Part II that clients may contact the Compliance Officer, via e-mail or telephone at (812) 376-7320 Ext. #2, in order to obtain information on how SMI-AS voted such client's proxies, and to request a copy of these policies and procedures. If a client requests this information, the Compliance Officer will prepare a written responses to the client that lists, with respect to each voted proxy that the client has inquired about, (1) the name of the issuer; (2) the proposal voted upon and (3) how SMI-AS voted the client's proxy.

A concise summary of these Proxy Voting Policies and Procedures will be included in SMI-AS Form ADV Part II, and will be updated whenever these policies and procedures are

updated. The CCO will arrange for a copy of this summary to be sent to all existing clients, either as a separate mailing or along with a periodic account statement or other correspondence sent to clients.

F. Record Keeping

The CCO will maintain files relating to SMI-AS proxy voting procedures. Records will be maintained and preserved for five years from the end of the fiscal year during which the last entry was made on a record, with records for the first two years kept in the offices of SMI-AS. Records of the following will be included in the files:

Copies of these proxy voting policies and procedures and any amendments thereto.

A copy of each proxy statement that SMI-AS receives provided however that SMI-AS may rely on obtaining a copy of proxy statements from the SEC's EDGAR system for those proxy statements that are so available. SMI-AS may also choose to have a third party retain a copy of the proxy statements, provided that third party undertakes to provide a copy of the proxy statement promptly upon request.

A record of each vote that SMI-AS casts. SMI-AS may also rely on a third party to retain a copy of the votes cast, provided that third party undertakes to provide a copy of the record promptly upon request.

A copy of any document SMI-AS created that was material to making a decision how to vote proxies, or that memorializes that decision.

A copy of each written client request for information on how SMI-AS voted such client's proxies, and a copy of any written response to any (written and oral) client request for information on how SMI-AS voted its proxy.

EXHIBIT C

Governance and Nominating Committee Charter Valued Advisers Trust

Governance and Nominating Committee Membership

1. The Governance and Nominating Committee (the “Committee”) of Valued Advisers Trust (“Trust”) shall be composed entirely of Independent Trustees.

Governance and Functions

1. The Committee shall assist the Board in adopting fund governance practices and reviewing the Trust’s fund governance standards.
2. To carry out this purpose, the Committee shall have the following duties and powers:
 - a. To periodically review workload, size, and composition of the Board;
 - b. To periodically review the qualifications and independence of the members of the Board;
 - c. To periodically review the compensation of the Independent Trustees;
 - d. To monitor, as necessary, regulatory developments, rule changes and industry best practices in fund governance;
 - e. To periodically review the Trust’s committee structure and consider if additional committees or changes to existing committees are needed or warranted; and
 - f. To report its activities to the Board and to make such recommendations with respect to the above and other matters as the Committee may deem necessary or appropriate.

Board Nominations and Functions

1. The Committee shall make recommendations for nominations for Independent Trustees members on the Board of Trustees (the “Board”) to the incumbent Independent Trustees members and to the full Board. The Committee also shall evaluate candidates’ qualifications and make recommendations for “interested” members on the Board to the full Board. The Committee shall evaluate candidates’ qualifications for Board membership and their independence from the investment advisers to the Trust’s series portfolios and the Trust’s other principal service providers. Persons selected as Independent Trustees must not be “interested person” as that term is defined in the Investment Company Act of 1940, as amended (the “1940 Act”), nor shall an Independent Trustee have any affiliations or associations that shall preclude them from voting as an Independent Trustee on matters involving approvals and continuations of

Rule 12b-1 Plans, Investment Advisory Agreements and such other standards as the Committee shall deem appropriate. The Committee shall also consider the effect of any relationships beyond those delineated in the 1940 Act that might impair independence, e.g., business, financial or family relationships with investment advisers or service providers. See Appendix A for Procedures with Respect to Nominees to the Board.

2. The Committee shall periodically review Board governance procedures and shall recommend any appropriate changes to the full Board.
3. The Committee may adopt from time to time specific, minimum qualifications that the Committee believes a candidate must meet before being considered as a candidate for Board membership and shall comply with any rules adopted from time to time by the U.S. Securities and Exchange Commission (the "SEC") regarding investment company nominating committees and the nomination of persons to be considered as candidates for Board membership. The Committee shall periodically review Independent Trustee compensation and shall recommend any appropriate changes to the Independent Trustees as a group.

Committee Nominations and Functions

1. The Committee shall make recommendations to the full Board for nomination for membership on all committees of the Board and shall review committee assignments at least annually.
2. The Committee shall review, as necessary, the responsibilities of any committees of the Board, whether there is a continuing need for each committee, whether there is a need for additional committees of the Board, and whether committees should be combined or reorganized. The Committee shall make recommendations for any such action to the Board.

Other Powers and Responsibilities

1. The Committee shall meet as often as it deems appropriate.
2. The Committee shall have the resources and authority appropriate to discharge its responsibilities, including authority to retain special counsel and other experts or consultants at the expense of the Trust.
3. The Committee shall report its activities to the Board and make such recommendations as the Committee may deem necessary or appropriate.
4. A majority of the Committee's members will constitute a quorum. At any meeting of the Committee at which a quorum is present, the decision of a majority of the members present and voting will be determinative as to any matter submitted to a vote. The Committee may meet in person or by telephone, and a majority of the members of the Committee may act by written consent to the extent not inconsistent with the Trust's by-laws. In the event of any inconsistency between this Charter and the Trust's organizational documents, the provisions of the Trust's organizational documents shall be given precedence.

5. The Committee shall review this Charter at least annually and recommend any changes to the Board.

Adopted: April 23, 2010

Amended: June 8, 2016

Amended: June 7, 2018

APPENDIX A
VALUED ADVISERS TRUST

PROCEDURES WITH RESPECT TO NOMINEES TO THE BOARD

- I. *Identification of Candidates.* When a vacancy on the Board of Trustees exists or is anticipated, and such vacancy is to be filled by an Independent Trustee, the Governance and Nominating Committee shall identify candidates by obtaining referrals from such sources as it may deem appropriate, which may include current Trustees, management of the Trust, counsel and other advisors to the Trustees, and shareholders of the Trust who submit recommendations in accordance with these procedures.
- II. *Shareholder Candidates.* The Governance and Nominating Committee shall, when identifying candidates for the position of Independent Trustee, consider any such candidate recommended by a shareholder if such recommendation contains: (i) sufficient background information concerning the candidate, including evidence the candidate is willing to serve as an Independent Trustee if selected for the position; and (ii) is received in a sufficiently timely manner as determined by the Governance and Nominating Committee in its discretion. Shareholders shall be directed to address any such recommendations in writing to the attention of the Governance and Nominating Committee, c/o the Secretary of the Trust. The Secretary shall retain copies of any shareholder recommendations which meet the foregoing requirements for a period of not more than 12 months following receipt. The Secretary shall have no obligation to acknowledge receipt of any shareholder recommendations.
- III. *Evaluation of Candidates.* In evaluating a candidate for a position on the Board of Trustees, including any candidate recommended by shareholders of the Trust, the Governance and Nominating Committee shall consider the following: (i) the candidate's knowledge in matters relating to the mutual fund industry; (ii) any experience possessed by the candidate as a director or senior officer of public companies; (iii) the candidate's educational background; (iv) the candidate's reputation for high ethical standards and professional integrity; (v) any specific financial, technical or other expertise possessed by the candidate, and the extent to which such expertise would complement the Board's existing mix of skills, core competencies and qualifications; (vi) the candidate's perceived ability to contribute to the ongoing functions of the Board, including the candidate's ability and commitment to attend meetings regularly and work collaboratively with other members of the Board; (vii) the candidate's ability to qualify as an Independent Trustee and any other actual or potential conflicts of interest involving the candidate and the Trust; and (viii) such other factors as the Governance and Nominating Committee determines to be relevant in light of the existing composition of the Board and any anticipated vacancies. Prior to making a final recommendation to the Board, the Governance and Nominating Committee shall conduct personal interviews with those candidates it concludes are the most qualified candidates.
