## Safety Precautions

## Crimping Method

Always use the specified Crimping Tool or Applicator to wire the crimped contacts.
Refer to the instruction sheet that is provided separately for details.

## Contact Insertion Method

Confirm the orientation of the crimped contacts and then insert them all the way to the back of the Socket. After insertion, confirm that the lances are securely set in the lance holes on the socket housing.

## Contact Replacement Method

To remove contacts that have been incorrectly inserted, always use the XY2E-0003 Contact Removal Tool.

1. Insert the end of the Removal Tool into the lance hole in the socket housing and press the lance all the way inside the socket housing.
2. While pressing in on the lance, pull out the Contact.
3. Insert a new Contact.

Note: Do not use any Contacts that have been removed.
