Glomerata

THE GLOMERATA

An Annual Published by
the Senior Class of the

Alabama Polytechnic
Institute

Auburn, Alabama

VOLUME X

1907

To

John Jenkins Wilmore,

Professor of Mechanical Engineering

as

a slight token of our appreciation
of him as an Instructor,
a Friend, and a
Gentleman.

JOHN JENKINS WILMORE

John Jenkins Wilmore

JOHNN JENKINS WILMORE, born at Winchester, Indiana, October 15, 1864. Spent early life on a farm and attended the common schools of Randolph County. Graduated from the Winchester High School in June, 1884. Attended Purdue University, graduating from the course in Mechanical Engineering in June, 1888, with the degree Bachelor of Mechanical Engineering. For work *in absentia* received the degree of Mechanical Engineer in June, 1891, from the same institution.

Was elected first assistant in the Department of Mechanics at the Alabama Polytechnic Institute in June, 1888. In September, 1891, was made acting director of the department, and in June, 1892, was appointed director. Developed the work into a course in Mechanical Engineering, and in 1895 was advanced to the position of Professor of Mechanical Engineering.

Has contributed occasional articles to engineering publications. Is a member of the American Society of Mechanical Engineers, of the American Association for the Advancement of Science, of the Society for the Promotion of Engineering Education.

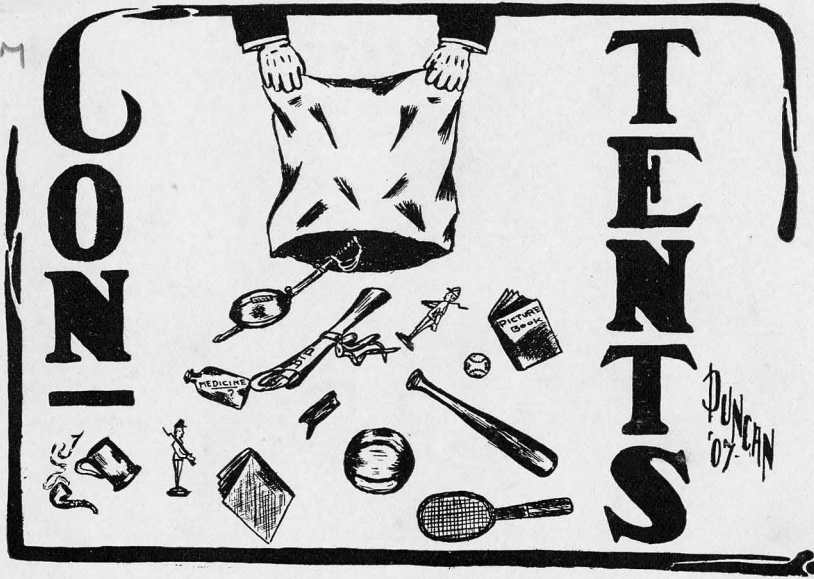

Was President of the Class of '88 in college, was class prophet at Senior Class Day, and class essayist at the Junior entertainment. Served one term as president of the oldest literary society at Purdue University and represented the society on several public occasions. Is an honorary member of the Alpha Mu chapter of the Sigma Alpha Epsilon Fraternity.

Apology

In the preparation of this volume the idea of originality has been adhered to as consistently as possible. The number of college annuals published throughout the entire country necessarily makes their scope very comprehensive, and it is indeed a difficult task to avoid in every detail suggestions that might supposedly come from this source. In no instance have we knowingly copied our material, and we ask that our effort, feeble as it is be accepted as original. For the common good of all concerned, we have no desire for our faults to be accredited to others.

EDITORS.

Presentation

The Class of 1907 presents this, the 10th volume of the Glomerata, as a fond farewell to "dear old Auburn." We hope that personal references may cause no hard feelings, and that we present college affairs just as they are. It has been our ambition to present a volume which may prove of interest, not only to the present classes in College, but also to the many alumni and friends of the Institution. If we have failed to do these things we must ask that we be criticized not too harshly and that due allowance be made for our many imperfections.

College Calendar

1906

September 5th College opens.
September 7th Y. M. C. A. reception
October 18th First midterms.
November 29th Annual debate
December 21st First term ends.

1907

January 2nd Second term begins.
January 31st Second midterms.
February 22nd Senior Class exercises.
February 22nd Oratorical contest.
February 22nd Championship football.
March 9th Second term ends.
April 11th Third midterms.
May 1st Sophomore Class Day.
May 1st Field Day.
May 18th Final examinations begin.
June 2nd Commencement sermon.
June 3d Trustees' meeting.
June 3d Junior Class orations.
June 3d Review of Battalion.
June 4th Alumni oration.
June 4th Inspection of laboratories.
June 4th Competitive Drills.
June 4th Address to Literary Societies
June 5th Commencement Address by E. B. Craighead, LL. D.
June 5th Conferring of Degrees.

The Faculty

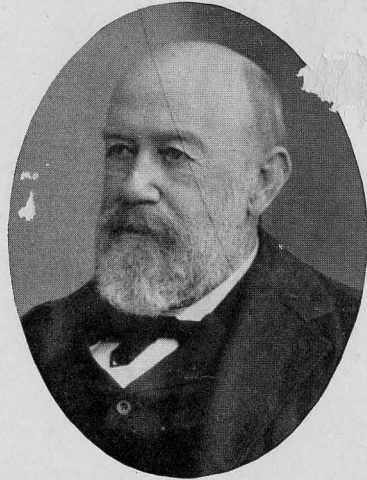

CHARLES COLEMAN THATCH,
M. A., LL. D.
President.

Graduate of Alabama Polytechnic Institute. Student Johns Hopkins University. Teacher in High Schools Hopkinsville, Ky., 1877-78. Ass't Professor Agricultural and Mechanical College at Auburn, 1878. Professor of Modern Languages in the Presbyterian College, Sherman, Tex., 1881-82. Adjunct Professor of Languages in the A. and M. College, Auburn, 1882-84. Professor of English and Modern Languages, 1884-86. Professor of English and Latin, 1886-89. Professor of Political Economy and English, 1889. President of Alabama Polytechnic Institute, 1902. Received Degree of LL. D. in 1906, conferred upon him by the University of Alabama.

JAMES HENRY LANE,
C. E., M. A., Ph. D., LL. D.

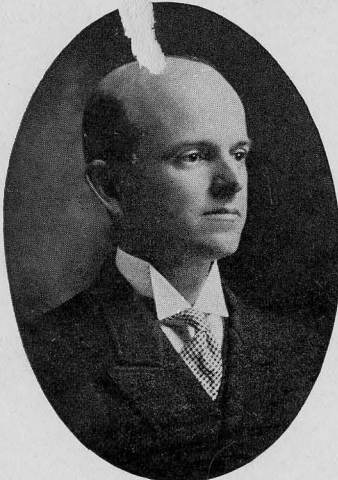

Professor of Civil Engineering and Drawing.

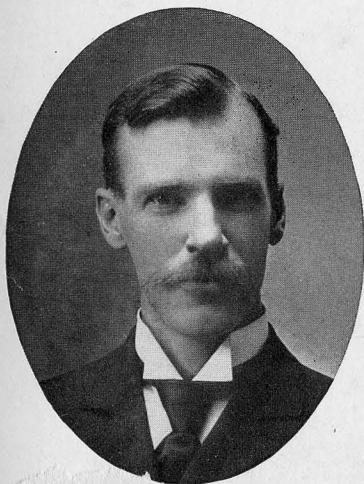

Star Graduate of V. M. I., '54. Graduated in the scientific course of U. of Va., '57. His first appointment was on the hydrographic survey of York River. Was Assistant Professor of Mathematics and Commandant in the State Seminary of Florida. Professor of Natural Philosophy and Instructor in Tactics in the N. C. Military Inst. Brigadier-General Confederate Army. Teacher in schools, Concord, N. C., and Richmond, Va. Professor in Va. A. and M., in Mo. School of Mines and Metallurgy. Supt. of Va. Mining and Mfg. Co. Appointed Professor of Civil Engineering and Commandant of A. P. I., in 1882. Now Professor Civil Engineering and Drawing. Ph.D., U. of W. Va., LL. D., Trinity College.

GEORGE PETRE, M. A., Ph. D.
Professor of History and Latin.

University of Virginia, M. A., 1887. Adjunct Professor of History and Modern Languages, Alabama Polytechnic Institute, 1887-89. Student of History and Political Economy at Johns Hopkins University for two years, taking degree of Ph. D. in 1891. Since then Professor of History and Latin, Alabama Polytechnic Institute.

BENNETT BATTLE ROSS, M. Sc.
Professor of General and Agricultural Chemistry
and State Chemist.

Alabama Polytechnic Institute, A. B., '81, M. Sc., '86. Was an engineer on the Mexican Central Railroad in Mexico for a year. Assistant Chemist in the State Laboratory at Auburn, '84-86. Professor of Chemistry, University of Louisiana, '86-93. Was appointed to his present position in 1893. Was president of the Association of Official Agricultural Chemists in 1896. State Chemist.

JOHN JENKINS WILMORE, M. E.
Professor of Mechanical Engineering and Director
of Laboratory.

Purdue University, M. E., 1888. Assistant in Mechanic Arts, Alabama Polytechnic Institute, 1888-91. Professor of Mechanical Engineering and Director of Laboratory, 1891.

CHARLES ALLEN CARY, B. Sc., D. V. M.
Professor of Physiology and Veterinary Science.

Graduate from Iowa Agricultural and Mechanical College, '85. Practiced two years at Keokuk, Iowa, and was at the same time Assistant State Veterinarian. Was Professor of Veterinary Science in the South Dakota Agricultural and Mechanical College. In January, '92, he came to the Alabama Polytechnic Institute, where he remained three months, spending the remainder of the year in Germany. Professor of Physiology, Bacteriology, and Veterinary Science, '93. State Veterinarian.

EMERSON R. MILLER, Phar. M., M. Sc.

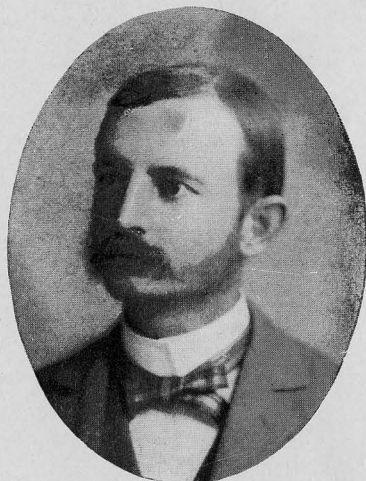

Professor of Pharmacy.

Student in Wittenberg College, Springfield, Ohio, '84-88. Principal of High School, Arkansas City, Kansas, '88-9. University of Michigan, Phar. Chemist, '92; Master Pharmacy '93; B. S., '94; M. S., '95; Instructor in Chemistry, '94-95. Assistant Professor of Pharmacy, Alabama Polytechnic Institute, '95. Professor of Pharmacy, '96. Professor of Pharmaceutical Chemistry, '06.

JOHN FREDERICK DUGGAR, M. Sc.

Professor of Agriculture.

Student in the Southern University, Greensboro, Ala., '83. Mississippi Agricultural College, B. S., '87, M. S., '88. Was Assistant Professor of Agriculture in the Texas Agricultural and Mechanical College. Afterwards Assistant Director of the South Carolina Experiment Station. Agricultural Editor of the United States Department of Agriculture, Washington, D. C., '92-96. Professor of Agriculture, Alabama Polytechnic Institute, '96.

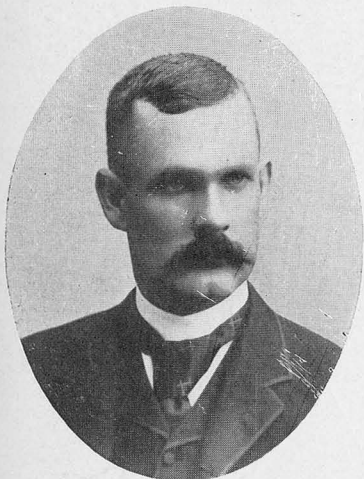

ARTHUR ST. CLAIR DUNSTAN,

M. E., C. E.

Professor of Electrical Engineering.

Alabama Polytechnic Institute, B. S., '89; M. S., '90. Graduate student Johns Hopkins, '91-92. Professor Mathematics, Scottsboro College, Scottsboro, Ala., '92-93. Alabama Polytechnic Institute, Assistant Professor Physics, '93-94. University of Kansas, Associate Professor of Electrical Engineering, '94-99. Assistant at Yerkes Observatory. Fellow of American Association for Advancement of Science. Member of Astro-Physical Society of America. Member of Honorary Scientific Society Sigma Xi. Alabama Polytechnic Institute, Professor of Electrical Engineering, '99.

JOHN EDWARD WIATT, M. A.

Professor of Modern Languages.

Richmond College, Va., B. A., '82, M. A., '83. Professor of Greek and German, Georgetown College, Ky., '85-87. Student at Johns Hopkins, '87-88. Student at University of Leipzig and Strassburg, '88-89. Statistical Expert of United States Department of Labor in France, Germany, Switzerland, Spain, and Belgium, '89-91. Since '91, engaged in teaching. Professor of Modern Languages, Alabama Polytechnic Institute, '00.

EDWIN MEAD WILCOX,

M. A., Ph. D.

Professor of Botany, and Plant Physiologist and Pathologist.

Ohio State University, B. Sc., '96. Harvard University, M. A., '98; Ph. D., '99. Ass't Botanist Ohio State University, '94-97. "Savage Scholar" in Botany, Harvard University, '97-98; Thayer Scholar, '98-99; Atkins Fellow in Economic Botany, '99-00; During this year made a trip all around the world, studying tropical agriculture with special reference to cane sugar cultivation. Professor of Botany and Entomology, Oklahoma A. and M. College, '00-01; Fellow American Association for the Advancement of Science; Member American Society of Naturalists and the Association Internationale des Botanistes; Professor of Biology, Alabama Polytechnic Institute, '01-02; Professor of Botany and Plant Physiologist and Pathologist to the Alabama Experiment Station.

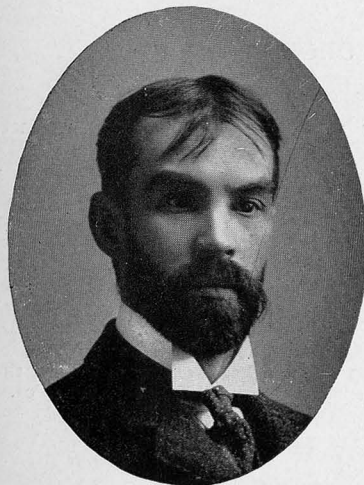

JAMES POWELL COCKE SOUTHALL,

M. A.

Professor of Physics.

University of Virginia, M. A., 1893; Instructor in Mathematics, 1890-91, at University of Virginia. Professor of Mathematics and Physics at Miller School, Albemarle, Va. Fellow by Courtesy, University of Virginia, 1898-99. Professor of Physics, Hobart College, Geneva, N. Y., 1899-1901. Professor of Physics, Alabama Polytechnic Institute, 1901.

ROGER SHERMAN MACKINTOSH,

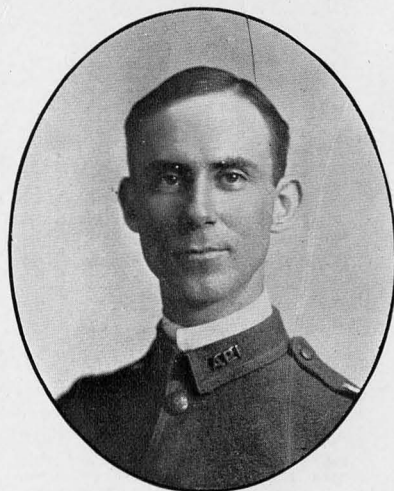

B. Agr.

Professor of Horticulture.

Minnesota School of Agriculture, '00; University of Minnesota, B. Agr., '02; Assistant in Horticulture, Minnesota Experiment Station, '02; Professor of Horticulture, Alabama Polytechnic Institute, '02; State Horticulturist.

BENJAMIN SWEAT PATRICK, M. S.
Commandant and Acting Professor of Military
Science and Tactics, and Instructor in
Mathematics.

Alabama Polytechnic, B. S., '97; M. S., '98. Full Graduate
Patrick Military Institute, '92.

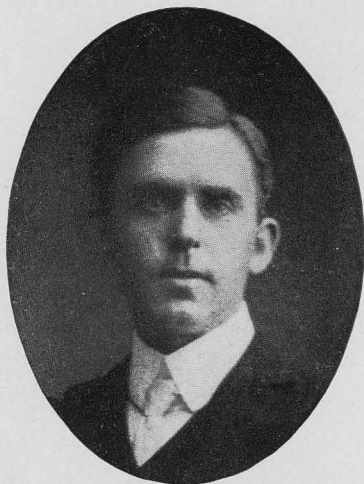

GEORGE NATHAN MITCHAM,

C. E., E. M.

Professor of Geology and Mining Engineering.

Alabama Polytechnic Institute, B. S., '97; C. E., '98; E. M., '99. Assistant Engineer Blue Creek Division Tennessee Coal, Iron, and Railway Company, '99. Resident Engineer, Construction Steel Plant, Ensley, '00. Engineer, Blue Creek Division Tennessee Coal, Iron, and Railway Company, '00-'01. Draughtsman, and Assistant to Superintendent of Shops, Wisconsin Bridge and Iron Company, Milwaukee, Wis., '01-'02. First Assistant Engineer, Pratt Mines Division, Tennessee Coal, Iron, and Railway Company, Ensley, '02-'03; Division Engineer, '03. Professor of Geology and Mining Engineering, Alabama Polytechnic Institute, '03.

CLIFFORD LEROY HARE, M. Sc.

Assistant Professor of Chemistry.

Alabama Polytechnic Institute, B. S., '91; M. S., '92. Assistant Missouri State University, '92-93. Assistant in Chemistry, Alabama Polytechnic Institute. '93-'00. Assistant Professor of Chemistry, '00.

REUBEN DAVID WEBB, M. Sc.

Instructor in English.

Alabama Polytechnic Institute, B. S., '97, M. S., '98. Teacher of English and Latin, Ninth District Agricultural School, Blountsville, Ala. First Assistant in Miller Public School, Georgia. Teacher of History and Modern Languages, Dotan City Schools. Principal Ashville High School, Ashville, Ala. Private Secretary Congressman C. W. Thompson, '01-'02. Instructor in English, Alabama Polytechnic Institute. '02.

WILLIAM WELCH HILL, E. and M. E.

Instructor in Mechanic Arts.

Alabama Polytechnic Institute, B. S., '97; M. S., '98. Worked with Bell Telephone Company, Atlanta and Birmingham '98-99. Instructor in Mechanic Arts, Alabama Polytechnic Institute, '01. Professor of Telephone Engineering, '06.

ARTHUR MCBRYDE RANSOM,

M. A., M. S.

Instructor in Chemistry.

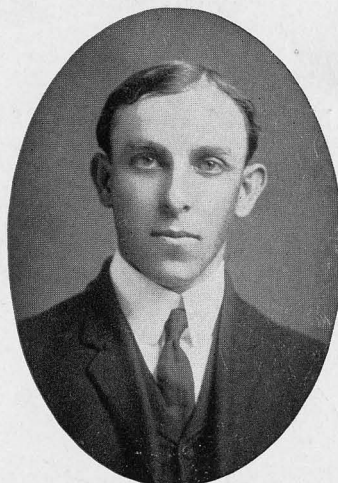

Alabama Polytechnic Institute, B. S., '98; M. S., '99. Instructor in Chemistry, '00. Chemist N. P. Pratt Laboratory, Atlanta, '00-02. Alabama Polytechnic Institute, Acting Assistant Professor of Chemistry, '02-03. Assistant in Chemistry, '03. Instructor in Chemistry, '06.

JAMES RICHARD RUTLAND,

B. S., M. S., M. A.

Librarian and Instructor in English.

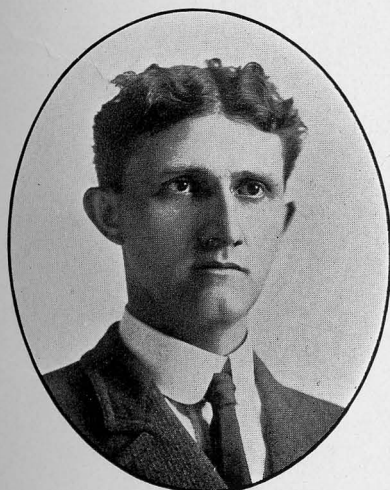

Alabama Polytechnic Institute, B. S., '00; M. S., '01. Principal Wylan Public Schools, '02-03. Teacher in Memphis Institute, '03-04. Harvard University, B. A., '04. Instructor in English, '05.

WILLIAM BEE STOKES, B. S.

Instructor in Mechanic Arts.

Alabama Polytechnic Institute, B. S., '03.

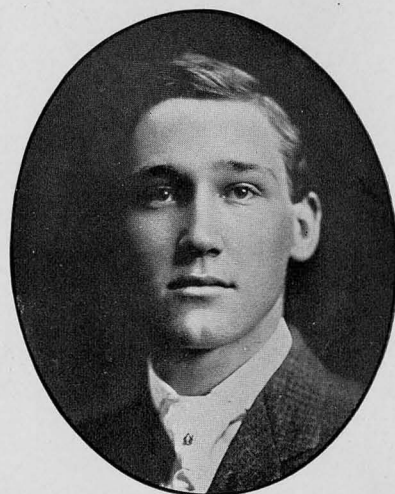

THOMAS BRAGG, M. Sc.

Assistant in Chemistry.

Alabama Polytechnic Institute, B. S., '01; M. S., '02. Assistant in Chemistry, Alabama Polytechnic Institute, '03. Instructor in Chemistry, '06.

BERNER LEIGH SHI, M. S., C. E.

Instructor in English and Mathematics.

Alabama Polytechnic Institute, B. S., '04; M. S., '05; C. E., '06.

DANIEL THOMAS GRAY, M. S.

Instructor in Animal Industry.

University of Missouri, B. S., '04; University of Illinois, M. S., '05. Instructor in Animal Industry, Alabama Polytechnic Institute, '05.

CHARLES FRANKLIN KINMAN, B. S.

Assistant in Horticulture.

Kansas Agricultural College, B. S., '04.

LUTHER NOBLE DUNCAN, B. S.

Instructor in Agriculture.

Alabama Polytechnic Institute, B. S., '00.

MICHAEL JOSEPH DONAHUE, A. B.

Physical Director and Instructor in History and Latin.

Graduated at Yale with honors, '04. Athletic Coach and Physical Director at Alabama Polytechnic Institute, '04-'07.

ALBERT LEE THOMAS, M. S., M. E.
Instructor in Mechanic Arts, and Bandmaster.

Alabama Polytechnic Institute, B. S., '04; M. S., '05;
M. E., '06.

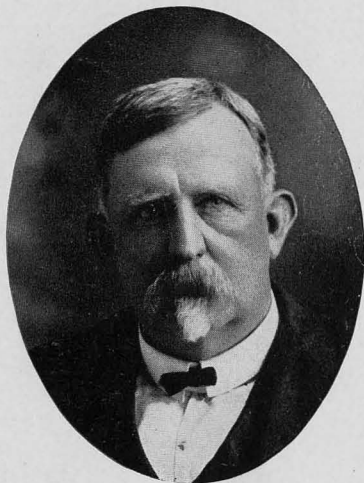

WARD GILTNER, D. V. M.

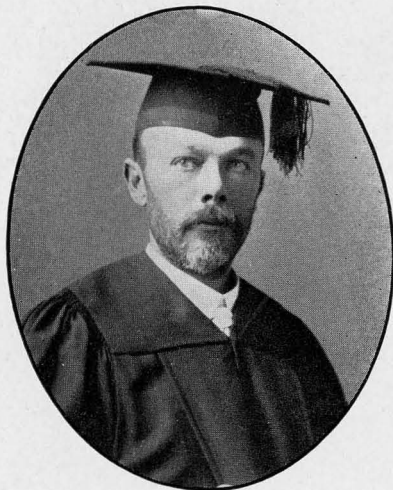

Assistant in Physiology and Veterinary Science.

Cornell University, D. V. M., '04; Member $\Sigma \Xi$ Honorary
Fraternity; Graduate and Postgraduate Ithaca High School;
Graduate with honors at Cornell. Ass't in Veterinary Science
and Bacteriology at Alabama Polytechnic Institute, '06.

J. H. DRAKE, M. D.
Surgeon.

WARREN THOMPSON CLARKE, B. S.

Professor of Entomology.

University of California, B. S., '03. Attended Stanford University, '01. Member American Association for Advancement of Science; Member $\Sigma \Xi$ Honorary Fraternity; Member American Entomological Society; Member Pacific Coast Entomological Society. Professor of Entomology, Alabama Polytechnic Institute, '06.

DALLAS TABOR HERNDON, M. S.

Instructor in History and English.

Alabama Polytechnic Institute, B. S., 1902; M. S., 1903.

ALLIE GLENN

Treasurer Alabama Polytechnic Institute.

C. C. CERTAIN, B. S.,
Electrical Engineering.

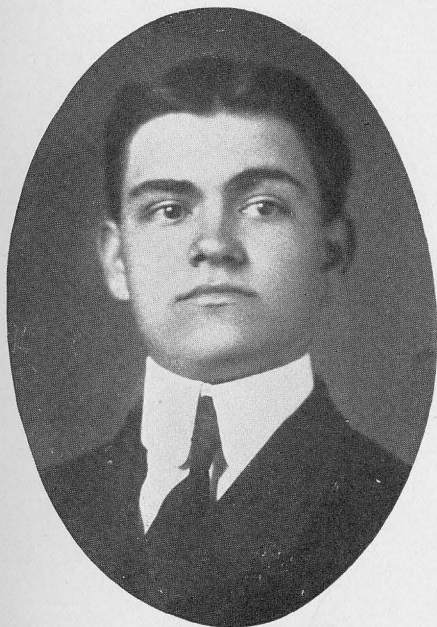

M. A. FRAZER, B. S.,
General.

F. OSBURN, B. S.,
General.

C. D. KILLEBREW, B. S.,
Civil Engineering.

T. B. RICHARDSON, B. S.,
Electrical Engineering.

N. P. RENFRO, B. S.,
General.

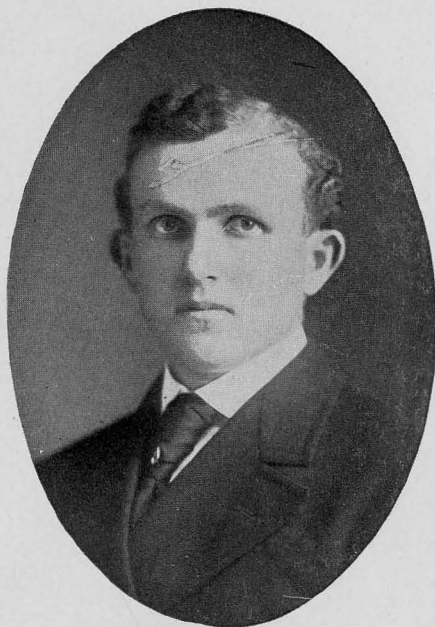

S. L. DIXON, B. S.,
Chemistry.

P. H. AVARY, B. S.
Chemistry.

W. L. MITCHELL, B. S.,
Mechanical.

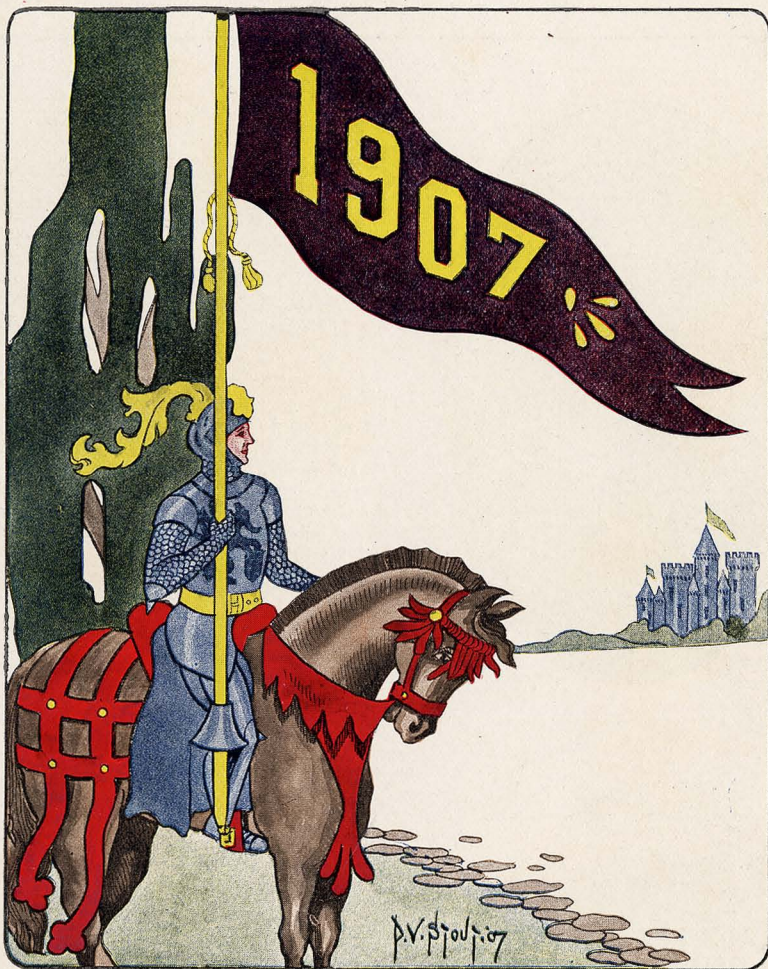

W. L. LETT, B. S.,
Botany.

C. A. M. WEBER, B. S.,
Physics.

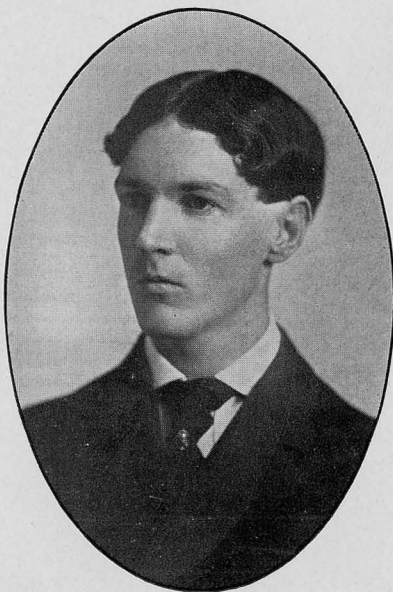

C. T. BUTLER, B. S.,
Veterinary Science.

Senior Class Officers.

JAMES ALTO YORK	President
GUY FLEMING LIPSCOMB	Vice-President
PENROSE VASS STOUT	Secretary
FLETCHER JACKSON THAGARD	Treasurer
NORMAN BURNS MCLEOD	Orator
CHARLES MELL HUDSON	Prophet
EDWARD TARLETON COLLIER	Historian
DESSIE CHLORINE WARD	Poet

JOHN DAVIDSON ALEXANDER,

FAUNSDALE, ALA.

"Alex." Civil Engineering.

"'Dear Little Alex' was a very good boy,
To his 'General' and 'Duffie' a comfort and joy."

Away back in the dark ages of sub-freshdom, "Alex" was holding down his corner of the class. Has worked hard for '07 and for Auburn on the diamond during the five years since that time, but at present is devoting all his energies toward obtaining a diploma for Mr. J. D. Alexander. Is prophesied to become a member of the Mutual Ease Society, but it would appear from his actions that he already belongs to that organization. Thoroughly in love (?) with his course, and his instructors.

Class Baseball, '03; Varsity Baseball, '06, '07; President '07 Founders.

BYRON BRECKENRIDGE BARNES,

EUTAW, ALA.

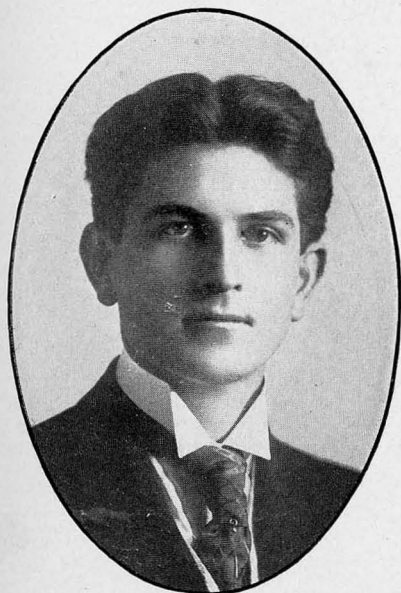

"Breck." $\Phi \Lambda \Theta$. Electrical Engineering.

Of his past "as meek as is a maid."

A short horse is soon curried. Has become famous for offering \$200 for a pass in Math. One of the neatest-looking men in college. Has a reputation of being a quiet fellow—among those who know him not. Ought to had distinction 4, 3, 2, 1.

Distinction '05; Hop Committee, '07; Floor manager, Hop Committee, '07.

NEWTON ALBERT BURGESS,

EDWARDSVILLE, ALA.

"Shag." $\Phi \Lambda \Theta$. Electrical Engineering.

"And when a woman's in the case,
You know all other things give place."

"Shag" is one of the best all-around students in college, as he takes active part in almost everything. He is so good-looking that the girls worry him almost to death, and all of them think that "Mr. Burgess is so cute." 'Tis said he is very fond of a certain little Auburn girl. He is one of the best baseball men that ever played at Auburn, and was captain of the All-Southern Baseball Team of 1906.

Class Football Team, '05, '06, '07; Varsity Baseball Team, '05, '06, '07; Advisory Board, '06, '07; Sergeant, '06; Lieutenant of Band, '07; Secretary of College Glee Club, '07; Secretary of German Club, '07; College Orchestra, '06, '07; Distinction, '05, '06; Coach of Class Baseball Team '05, '06; Trombone in Tommy Fullan's Band, '05, '06, '07.

BENJAMIN O'CONNOR CHILDS, K Σ ,

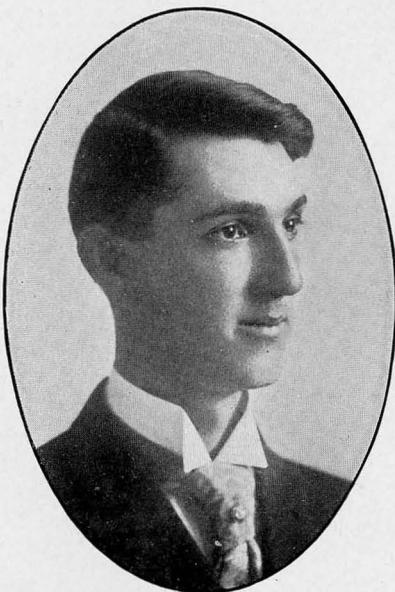

FORSYTHE, GA.

"Pat." Civil Engineering.

"One thing we know you know we know;
we know you are a peach."

One whose figure well befits him for military glory. Sometime orator and audience charmer, and has added to these accomplishments the one of being a society man. Of late he has taken a great interest in the doings of the fair sex and is coming out wonderfully. But he never will tire of teasing the ladies, or will never stop relating the wonderful sayings and achievements of Gen. Lane, and the whole civil course. An enthusiastic disciple of the General, and a fair civil engineer.

Corporal (3); Sophomore Declaimer; Sergeant "D"; Junior Orator; Lieutenant "E."

MISS WILLIE E. CHUMLEY,

COLLINSVILLE, ALA.

"Chumley." General.

"A true and noble type of womanhood."

Always bright and cheerful, has become quite popular among the student body through the influence of her charms as well as by her amiable and unselfish disposition. Never fails to wave her colors on athletic occasions. Very poetic.

Chumley is blessed with a good stock of common sense. Honorary member of Websterian Literary Society. Future occupation: A Miller.

JOHN BAYARD CLARKE,

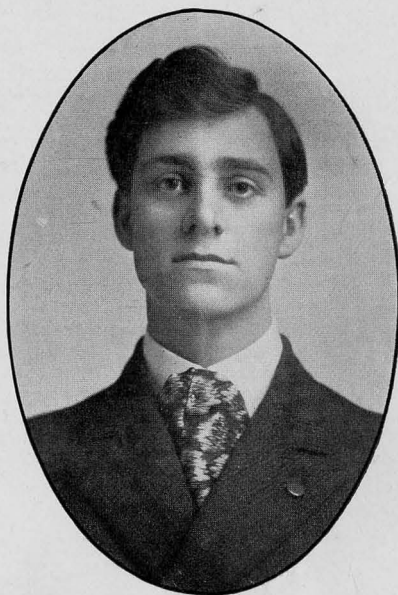

HAMILTON, ALA.

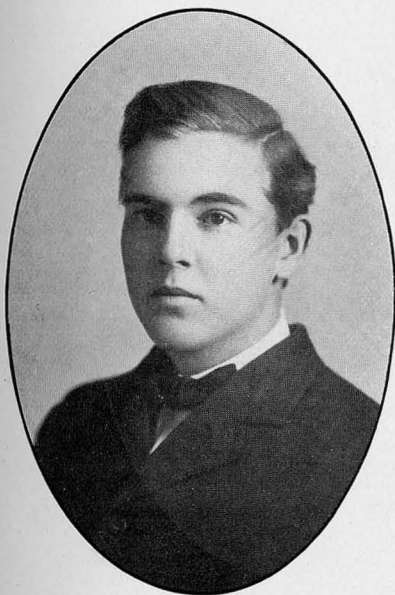

General.

"The clock had tolled the midnight hour
when Clark went to bed."

Clark studies, studies, studies, and then loves a little when he is not engaged in study. Makes excellent grades in everything. Can write anything from a love-letter to a theme, and do it well. Has won great fame as literary editor of the Orange and Blue. Has never been seen on the street, except when going from his room to College.

Distinction, '06; Lieutenant, '07; Literary Editor Orange and Blue, '07; President Websterian Society, '07; Glomerata Board.

CHARLES VAN WORMER CORNELL,

AUBURN, ALA.

"Charley." Chemistry and Metallurgy.

"Is there a heart that music cannot melt?"

His loyalty to Auburn is rivaled only by his respect for Dr. Ross, and his love for the band. Is the heart of all musical organizations, chief among which is the Methodist Choir. A great tennis player, an authority on the game, and, in fact, upon sports of all kinds. Has a reputation of being the best guesser and the luckiest man in the way of grades in all Auburn. A man of boundless common sense and ability, though not wholly in the chemical line.

Glee Club; Student Orchestra.

GEORGE WASHINGTON COKER,

MILSTEAD, ALA.

"George." Electrical Engineering.

"God bless our home."

Has that one virtue in common with all good American citizens: civic pride. Loves to tell of Tallassee and the "big mills." From all indications that is Mr. Coker's future home, and, if it is the earthly paradise he tries to make us believe, we could do no better than to betake ourselves and our families there at once. An erstwhile lover of Math and Physics, which occupation has rather been neglected of late, however. An insatiable reader, and sometime hard student.

Distinction, '06.

EDWARD TARLETON COLLIER

MONTGOMERY, ALA.

"Kid." Mining Engineering.

"God on thee
Abundantly his gifts hath also poured."

One of the best writers in college. Sometimes engages in games peculiar to the Y. M. C. A., and shifts the blame to his companions. Is capable of doing almost anything except speaking in public, where he talks in the same tone as when he is making love to a girl. Kid has as many friends as any man in College, and rightly does he deserve them.

"O! what a happiness is it to find
A friend of our own type, a brother kind!"

Class Secretary and Treasurer, '04; Distinction, '05, '06; Thomas Essay Medal, '06; Class Historian '07; Exchange Editor Orange and Blue; President Websterian Literary Society, '07; Assistant Editor-in-Chief Glomerata; 'M. W. C.'

MANLY ALLEN COLLINS,

PRAIRIEVILLE, ALA.

"Manly." Electrical Engineering.

"You are good, but from a nobler cause:
From your own knowledge, not from nature's laws."

"Mandy" is a very diligent student, and the grades he makes in Math and Physics are envied by most of his classmates. A very quiet and reserved fellow, and unless you knew him well he would go a whole day without speaking a word. Some say he is in love with a girl at home, but unless you had been told you would never find it out, as he is very timid about such subjects.

MISS ELVA LELAND COOPER,

AUBURN, ALA.

General.

"No ill have we to say of her."

She is very much devoted to her classmates. Always carries a smile and takes an optimistic view of life. Exceedingly modest. A devoted church worker. The delight of Prof. Mitcham. Very popular among all who know her. Fond of reading French and German with a certain General Course lad.

Co-ed Editor, '07; Honorary Member of Websterian Literary Society '06, '07; Member of Red-Head Club.

JULIAN JARNIGAN CULIVER,

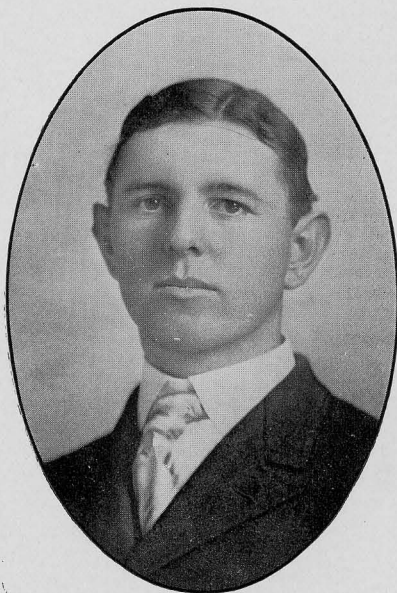

AUBURN, ALA.

Chemistry.

"God made him; therefore let him pass for a man."

You always know when he is coming your way, as he heralds his own approach. He takes a great interest in the way things are run in Auburn, and no doubt he will some day achieve great fame by being elected to the City Council of Auburn. It may be said that he carries his little hammer all the time and takes the greatest pleasure in knocking, even unto Fire-ball.

FRED CURTIS,

ATMORE, ALA.

"Fred." Chemistry and Metallurgy.

"Who mixed reason with pleasure, and wisdom
with mirth."

Is not led astray by the many vices that beset the path of the college boy. Fond of the lightest amusements only, and his behavior upon Saturday night will bear the closest inspection. In all, peaceful, and fond of home life (as embodied at the Thomas Hotel). Withal, he is somewhat of a sport. Has plenty of college spirit, and is always ready to back the teams and to talk up for his class and for Auburn things in general.

MARION BROOKS DAVIS,

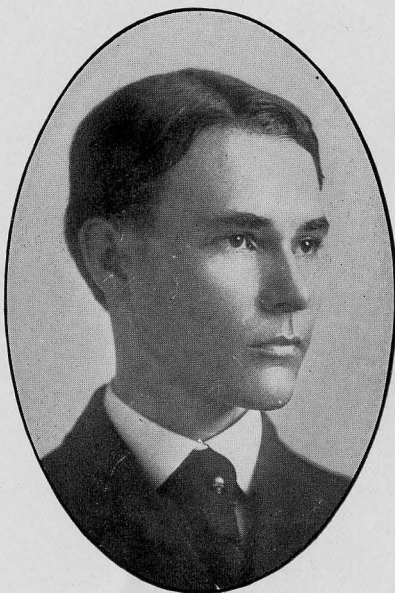

CHANCELOT, ALA.

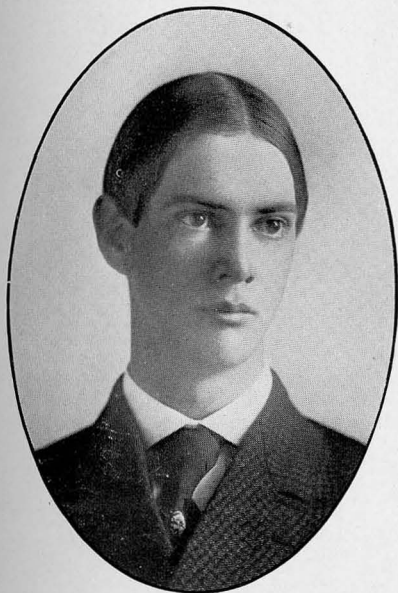

"Fido." Elective.

"Behold the mischief in thy brow."

A hard student, but never too busy for fun. Is well remembered as the one who refused to accept a stolen exam while a Freshman. A great society man. One of Cap. Alvis's pet Seniors. "Hello, Central." A very good all-around fellow.

Distinction, '05.

JOHN CAMERON DOW,

CLAYTON, ALA.

"Doe," "P——Johnnie." Pharmacy.

"He hath an lean and hungry look."

What Johnnie doesn't know about Pharmacy, Dr. Miller thinks he does, so he gets along tiptop. Is one of that happy band who can learn without study. Makes the best grades of any man his own *size* in college. Sometimes is fond of digging roots and herbs for the sake of bettering grades.

Beats the College out of \$20 every year by registering from Alabama instead of his beloved Florida.

Wanted distinction '04, '05, '06, '07; Bullet-headed, '04, '05, '06, '07. Assistant in Pharmacy, '07.

RICHARD HODGES DRAKE,

AUBURN, ALA.

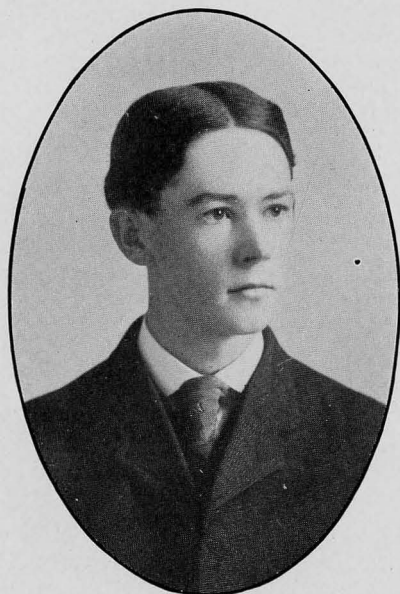

"Doc." Pharmacy.

"To all mankind a constant friend,
Provided they have cash to lend."

"Doc" is a leader in Auburn society, and is in full bloom in the summer time on moonlight picnics and camping trips at Wright's Mill. Is a fine dancer, and a musician by birth, and has played in "Tommy Fullan's Band" three years. He is a "has been" baseball pitcher, but lost his arm a few years ago. There is nothing he likes better than a fast game of tennis. It won't be many years before Doc will take his father's place as Surgeon of the College.

Treasurer of German Club, '04; Secretary of German Club, '05, '06; Assistant Floor Manager of Hop, '06; Class Baseball Team, '04, '06; Captain Class Baseball Team, '05; Corporal, '05; Sergeant, '06; Lieutenant in Tommy Fullan's Band, '07; Tennis Team, '04, '05, '06, '07; Won championship in Tennis from Marion; President Tennis Club, '07; Band Medal, '06; Orange and Blue Board, '07; Second Grand Chief of "Razor Backs," '07.

FREDERICK ROY DUNCAN,
COLUMBUS, GA.

"Dunc." Electrical Engineering.

"So may the outward shows be least themselves."

Duncan has won renown by his marvelous skill in using a pen. He first learned to draw in the English classroom by making drawings of Dr. Thatcher, afterwards he spent his Sundays at church drawing pictures of the minister and his fellow schoolmates. Some day we expect to see "Dunc" in his studio when he has taken the place of Gibson and Christy. Glomerata Artist. '07; Red-Headed, '06, '07.

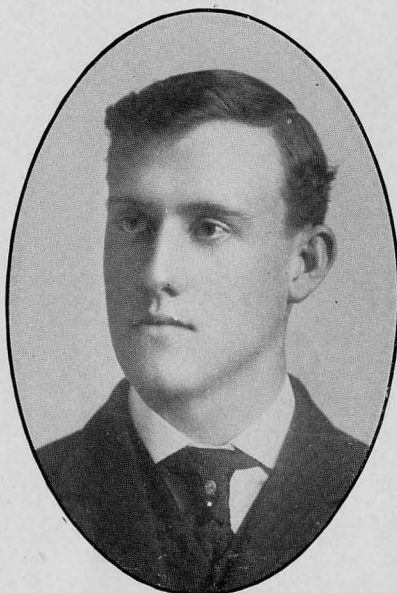

DEXTER EDGE, *S N*,
COLUMBUS, GA.

"Dex." Electrical Engineering.

"For big he was of brawn and bones."

Though this man can hardly be called a mathematics fiend, he makes grades in that study that we all pray to equal. And Math is not his only strong point. As a draughtsman Dexter is unexcelled. But let us turn to other fields of glory. We all remember a certain day upon the gridiron that was saved for us by the immense boot and the faultless play of our stalwart tackle. A true Georgia cracker, a patriotic son of the Cracker State.

Distinction, '06; Class Football, '06, '07; Advisory Board, '07; Georgia Club; President Ex-Techs.

ARTHUR DAVIS ELSBERRY,

TALLASEE, ALA.

"Arthur." *A T Q.* Electrical Engineering

Although his name indicates him to be a "berry" we rather think him a peach, especially when it comes to playing football. The wrong Elsberry "got loose" in the Senior-Junior game this year. He has accomplishments other than athletic, which by special request are left unwritten. Ran a good race for the "biggest flirt" which, no doubt, he deserves; just watch him at commencement.

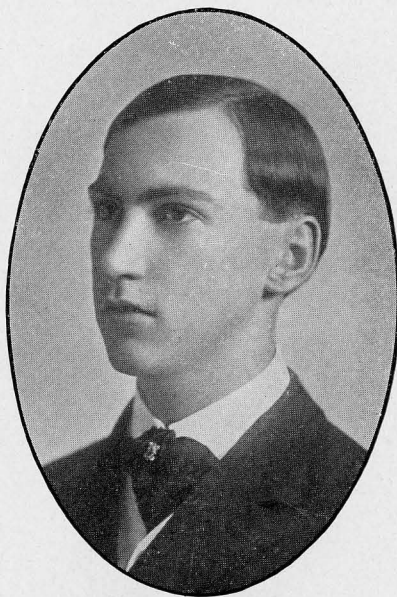

Crack Company, '06; Class Football, '06, '07; First Scrubs, '07; Assistant Treasurer German Club, '07; Biggest Eater in College, '06, '07; Websterian Literary Society, '07.

JAMES ESDALE, *II K A*,

BIRMINGHAM, ALA.

"Jim." Mining Engineering.
"A reverend, pious man."

Has established a reputation for piety and devotion. Lives out at Monte Carlo, far from the distractions of the crowds. In fact, we believe that he and Rip moved to this quiet neighborhood so as to have more time to devote to worship and prayer. Is very glad to greet his classmates after a long absence of—say, ten years or so. "My name is James Esdale, of Birmingham, Ala."

WALTER SCOTT FARLEY,

OPELIKA, ALA.

"Fott Scarley." ϕ Δ θ . Electrical Engineering.

Scott hails to us from Opelika, which says enough. Has taken great interest in military affairs since he entered college. Has always stood high in his classes, being very fond of making good grades, but says little about it. A high society man in his native burgh, which he visits quite frequently.

Corporal, '05; Sergeant, '06; First Lieutenant Co. A., '07.

J. LOCKE GASTON,

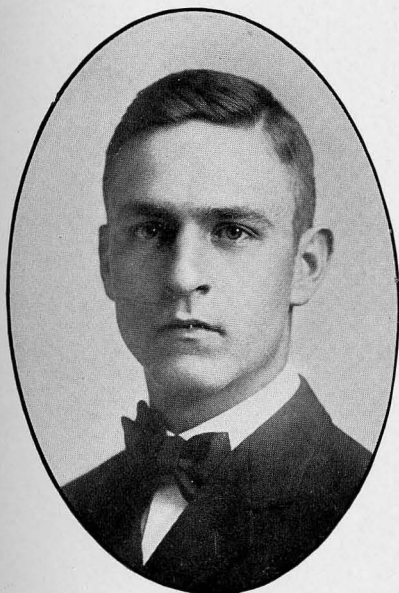

GASTONBURG, ALA.

"Gas." Electrical Engineering.

"I have set my life upon a cast,
And I will stand the hazard of the die."

"Gas" wants people to think that he is a big man, so he tells us that the crossroad he came from, (Gastonburg) was named for him. He has very little to say to anyone, and looks strictly after his own business, and loafs very little. He takes Electrical Engineering, and as he is a very sober, steady, and hard-working man, will no doubt be one of our greatest electrical engineers in a few years.

GEORGE JASPER GOLDEN, *K A*,

"Billy." Electrical Engineering.

"What's in a name?"

A "golden" opportunity from the old State of Georgia. Billy is a "hale fellow well met." One of the most congenial men in college, who enjoys having a good time and taking life easy. Billy is "It" on the question of dancing; has also been reported as being an authority on a few other topics.

Class Basketball, '06, '07; Class Baseball, '06, '07; Crack Company, '06; Floor Manager Senior German Club, '07; Georgia Club; President Hop Committee, '07; Captain and Manager Class Baseball Team, '07.

RICHARD CHILDS GOWDEY,

LIVINGSTON, ALA.

"Dick." Civil Engineering.

"Live for today; tomorrow may never come."

"Dick" is one of the best-hearted fellows one cares to know. Fond of loafing at the "Kandy Kitchen," and at "Jew Bragg's" Café, and was never known to worry about anything, and believes in taking life easy, and promoting simple life. Doesn't like any kind of animal that crawls. He takes C. E., and it is said he enjoyed life on the '06 Civil Engineering trip.

Class Baseball Team, '05, '06; Class Football Team, '07; Member of Independent Baseball Team, '05, '06, '07.

WILLIAM HARDIE, *Π K A, θ N E.*

BIRMINGHAM, ALA.

"Bill." Chemistry and Agriculture.

"His corn and cattle were his only care,
And his supreme delight a country fare."

An enthusiastic farmer and a born horse trader. And what time he is not devoting to his beloved experiment station he is working hard for the interests of the class. Has made a successful manager of various enterprises, being endowed with a fair business ability and the gift of gab. A great pal of Methuselah.

Captain Class Basketball, '04; Distinction, '04; Class Football, '05; Class Basketball, '04, '05, '06, '07; Varsity Basketball, '05; Manager Varsity Basketball, '06; Manager Varsity Track Team, '05; Corporal, '05; Sergeant, '06; Captain Company C., '07; Ass't Business Manager Orange and Blue, '07.

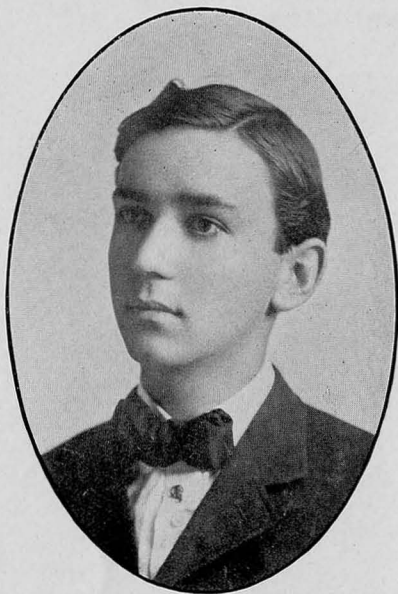

AMBROSE HARWELL,

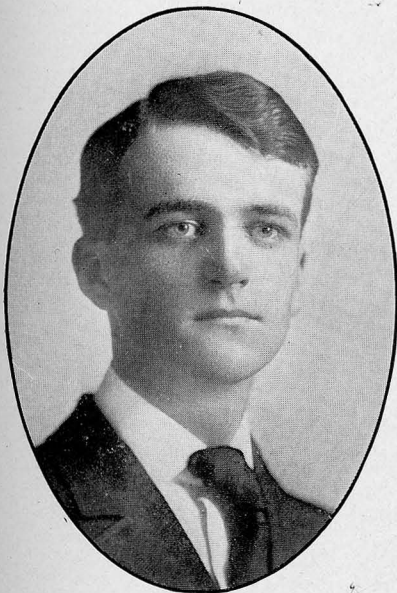

AUBURN, ALA.

"Ambrose." Civil Engineering.

"He was a good man,
And a just."

Ambrose is an Auburnite, and doesn't want to live anywhere else, unless it is in Birmingham. He takes civil engineering, as he is thinking of building a direct road to Birmingham for his private use. Was voted the biggest lover in college last year, by a large majority, and didn't like it, because he thought he should have gotten every vote. He is a sober, earnest, and steady worker, and will no doubt make a success at anything he undertakes, unless it is to get a girl to love him.

EDWIN ALEXANDER HARRISS, K Σ ,

SAVANNAH, GA.

"Ed." Electrical Engineering.

"Whatever nature has in worth denied,
She gives in large recruits of needful pride."

Harriss is known best by his nonchalant air, peculiar to himself. Popular in his class, but known very little among the lower classes. A good student, who believes in honor for honor's sake. Is a hard student about examination time, but during the interim he "loafs" quite a bit.

Sergeant, '06; Distinction, '05, '06; Hop. Committee, '06; Class Basketball, '05, '06; Advisory Board, '07; Manager Track Team, '07; Razor Back No. 5, '06, '07.

MISS MERIWEATHER HARVEY,

BLOCKTON, ALA.

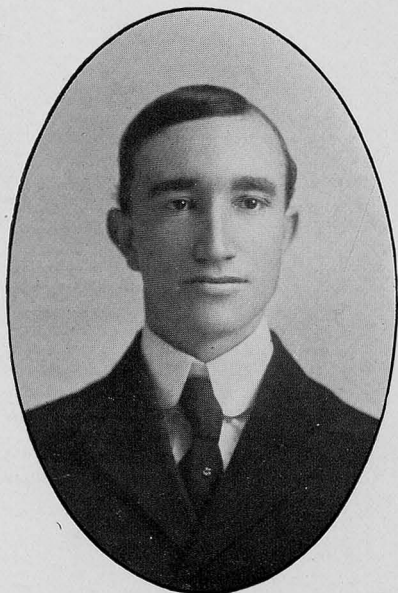

"Merie." General.

"A very congenial piece of curiosity."

Despises frivolity. "Isn't the Captain of Company K handsome!" Believes in maintaining her rights and in doing the right. A natural-born mythologist. Always eager to talk about the Conway Cabal (?). Never sends post cards to the professors. Hardest boner of Co-eds. Pretends that she is going to "IV" but makes I's. "I'm shocked to think that Napoleon wrote 1-0-0-V-E letters."

Honorary member of Websterian Literary Society; Distinction, '05.

CHARLES ROBERT HIXON,

PEROTE, ALA.

Mechanical Engineering.

"Beauty is no index to brains."

Auburn life has had a great influence upon this man, developing him into a daring ladies' man. A star at many social gatherings, and a favorite of the Co-eds. Has a reputation as a baseball player at home. A hard student, may even be called a boner at times. His class standing is beyond reproach. A camera fiend, takes numerous pictures along the bicycle path, but not always of the scenery. Is the rival of our Doctor of Electricity.

HENRY PURSER HODGES,

ODENVILLE, ALA.

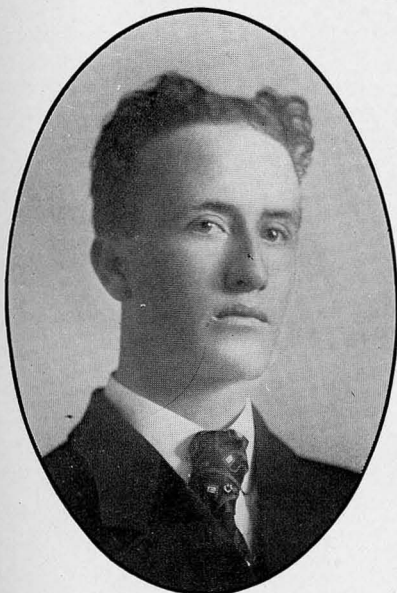

Civil Engineering.

"I was born, sir, when the crab was ascending,
And my affairs go backwards."

Hodges is a very serious man, and does not care for fun, or to have fun made out of him. Is very brave, and doesn't care whom he challenges to duels. You very seldom see him up town, as he has not cultivated the love for loafing, and is generally at home studying. He is very slow, deliberate, and rather reserved, but is a very good fellow when you know him well.

Class Football Team, '07; Member of Chain Draggers' Baseball Team, '07; Lieutenant, '07.

CHARLES MELL HUDSON,

AUBURN, ALA.

"Charley." Chemistry.

"He loveth truth and honesty,
And true and honest friends."

Charley Hudson is one of the best boys in college, morally and intellectually. Is capable of doing any task he sets himself to do. We believe he would make a success of anything. Has made a record which is envied by not a few, and set an example that all might do well to follow. About the worst thing he is guilty of is sleeping a little too much.

Highest Distinction, '04, '05; Distinction, '06; Corporal, '05; Sophomore Declaimer, '05; First Sergeant, '06; Vice-President of Wirt Literary Society, '06; Winner Wirt-Websterian Oratorical Medal, '06; Junior Speaker, '06; Class Prophet, '07; Commencement Speaker, '07.

GEORGE GRIFFIN HUGHES,

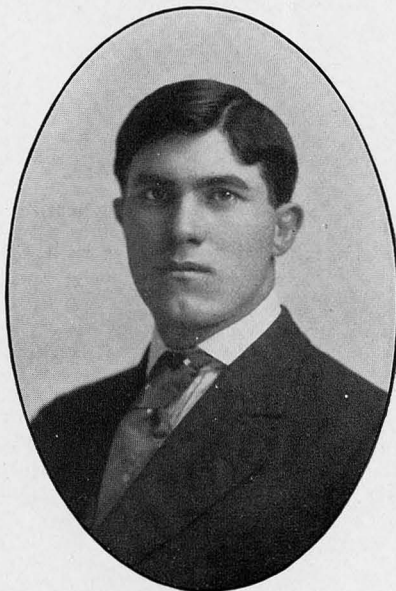

GUIN, ALA.

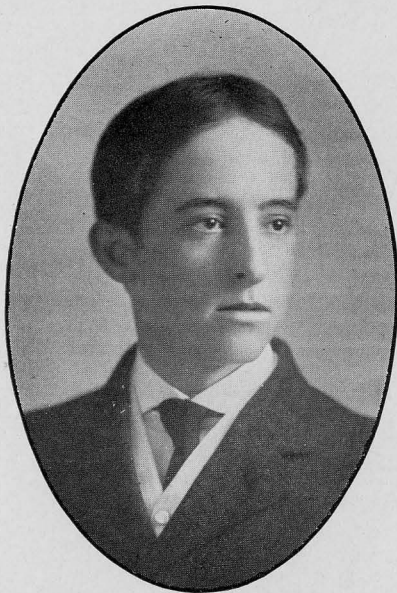

"Grif," "Old Horse." Mechanical Engineering.

"Men of muscle with hearts of oak."

Never hurries except in football, and then—Lord! Lord! look out, all ye enemies of the Orange and Blue. Is an ideal athlete in that he never allows his football to interfere with his studies, as his classroom record will show. Inspires a mighty awe in the breasts of all sub-freshmen as Professor Hughes. The right-hand man of Professor Stokes. Has never whispered a word of love, but then—.

Distinction, '04, '05; Class Football, '04; Varsity Football, '05, '06, '07; Corporal, '05; Sergeant, '06; Lieutenant '07; Manager Class Football, '06.

THOMAS ALEXANDER JOHNSTON,

MOBILE, ALA.

Electrical Engineering.

"There was none like him,
To speak of Physics and Electricity."

Has been with us for only two years, but has kept up well, and has a fair reputation as an electrician. Is a hard boner, especially of Math and Elec. Likes to tell of his achievements on Petersen's football team. Can be found during his spare hours at the telephone exchange. There is surely some attraction for him there other than the gaining of experience, for, from his language when he talks of telephony, he is not interested in that study.

Vice-President Mobile Club.

FRANK DANSBY KING,

MONTGOMERY, ALA.

"Frank." Civil Engineering.

"Of Kings the world has such a store,
That it needs an honest man."

Here is a man of Y. M. C. A. fame who has done little else since being in Auburn. Always has a pleasant word and a hard grin for his friends. At all times keeps a sharp lookout for anything wearing petticoats, etc. Has been known to neglect his studies to write a few "Words of love."

Vice-President of Y. M. C. A., '07; President of Websterian Literary Society, '07; Vice-President of "Founders of '07"; Chief Spotster of Physics Club, '07; Class Football Team, '07

MISS EMMA LENA KIRBY,

COLLINSVILLE, ALA.

"Emma." General.

"I deal not with other people's affairs."

Very expressive. A devoted companion of Miss Chumley. She is accused of making good grades in English and Psychology.

What secret import doth that diamond bear? Especially fond of gerunds and gerundines (?). The Dixon H. Lewis of our age. A fine-natured girl.

Honorary Member of Websterian Literary Society.

WILLIAM MORRIS LACEY,

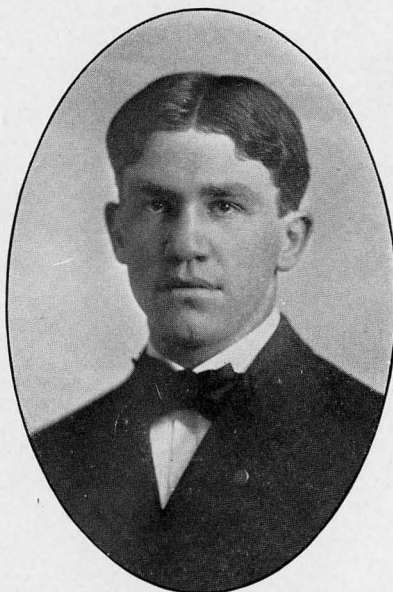

BESSEMER, ALA.

"Bill." Mining Engineering.

"Why does not beauty go with wit."

Has all the qualifications necessary for a good captain, knows his tactics from cover to cover, and is a born leader. Is beloved of his company; in fact, he has been voted one of the most popular commissioned officers in the battalion. A man of unlimited college spirit, which has been proved by much hard work on his part for Auburn. Witty, and the equal in the talking line of any speller that ever operated. Has his share of common sense, and the ideas and convictions that grow from common sense.

Class Historian, '04, '05, '06; Class Basketball, '04, '05; Manager Class Football Team, '05; Manager Class Basketball Team, '06; Assistant Mgr. Varsity Baseball Team, '06; Mgr. Varsity Baseball Team, '07; Class Football Team, '06, '07; Corporal, '05; Sergeant, '06; Captain Co. E, '07; Battalion Medal, '06; Co. A Medal, '06; Advisory Board, '06; Executive Committee A. A. A., '07; Varsity Basketball Team, '05, '06, '07; Sporting Editor Orange and Blue, '07; Athletic Editor Glomerata, '07; Passed 2d Midterm in Physics.

GUY FLEMING LIPSCOMB, Φ χ Θ ,

DEMOPOLIS, ALA.

"Lip," "Guy." Mining Engineering.

The secret of my success is constant work.

What a commandant "Lip" would make! That deep, rumbling roar of his would be the very thing to awe insignificant rats into submission. A studious lad, who had good results to show for his boning. Loves to talk of the Black Belt and its superior attractions, especially of the Queen of that section, that is, his Queen. There may be others, but he don't know it. One of the oldest and steadiest in our class. A popular officer, a first-class baseball player, and, in fact, a good all-around man.

Vice-President, '04, '05, '06, '07; Manager Class Football, '04; Manager Class Baseball, '04; Corporal, '05; First Sergeant, '06; Captain Co. A. '07; Varsity Baseball, '04; Class Football, '04; Class Baseball, '04, '05, '06, '07; Advisory Board, '04; Sophomore Declaimer, '05.

WILLIAM GASTON MARTIN,

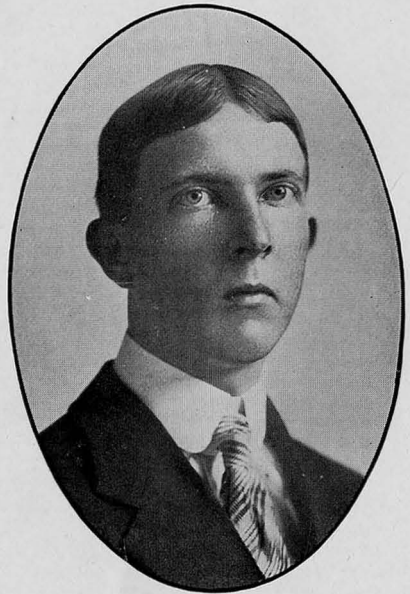

AUBURN, ALA.

"Bill." Civil Engineering.

"Thou foster child of silence and slow time."

One who does not hurt himself studying, yet makes grades that could be bragged on, yet Bill never talks about his achievements. Is a quiet, modest sort of a fellow, a typical Auburnite. Has played some good baseball for the Class of 1906, of which he was once a member, before his lucky star prevailed and he was adopted into this class. Will make a success as a civil engineer, as he has a stride that will carry a rod and chain over a great deal of country in a short while.

Class Baseball, '04.

NORMAN BURNS MCLEOD,

JACKSON, ALA.

"Mac." General.

"Such men as he be never at heart's ease
Whilst they behold a greater than themselves."

Noted for a big mouth which he makes good use of. Expresses himself on all subjects at any time. He is one of the best orators in the state:—will make a success if he doesn't get sidetracked by the weaker sex. An ardent admirer of Dr. Petrie, whom he quotes as an authority upon all affairs of love and war. A friend to those who know him; to others, none.

Highest Distinction, '04, '05; Distinction, '06; First Corporal, '05; Secretary Wirt Literary Society, '05; Sophomore Declaimer, '05; President of Wirt Literary Society, '06; Thanksgiving Debater, '06; February 22d Orator, '06; Junior Oratorical Medal, '06; Class Orator, '07; Editor-in-Chief of Orange and Blue, '07; Sergeant Major, '06; Cadet Captain and Adjutant, '07; Auburn's Representative in the State Intercollegiate Oratorical Contest, '07; Commencement Speaker, '07.

ROY PALMER MITCHELL,

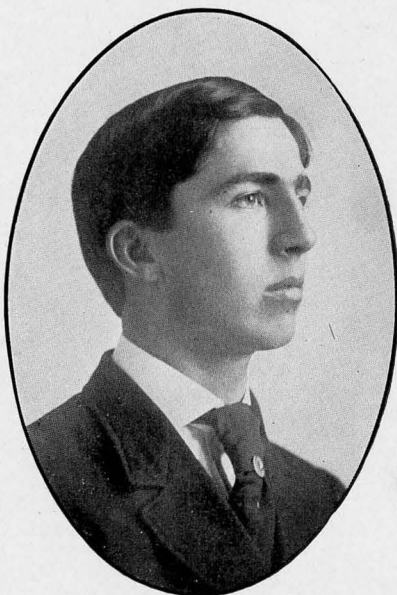

OPELIKA, ALA.

"Mitch." Mining Engineering.

"Tis better to be born lucky than rich."

Has recently made his début into society, and has become an ardent terpsichorean devotee. His calls at a certain dwelling near his ranch are numerous. Is a hard worker at times, but this occupation has never caused him to lose any sleep. From his inclinations we prophesy that Mitch will in the future hold down a counter in a dry goods store as he is not effusive in his praise of the mining profession.

M. W. C.

ALFRED HOLLEY MITCHELL,
OPELIKA, ALA.

"Mitch." Civil Engineering.

"Every man is as heaven made him,
And sometimes a great deal worse."

"Mitch" hails from the great city of Opelika, where the boys like to go at night to get inspired, but it can be said that "Mitch" did not show them the way. "Mitch" enjoys the distinction of being one of the five survivors of the founders of the Class of '07, as he entered the Sub-Freshman Class, and has been with us ever since. "Mitch" takes civil engineering, but says he is not going to follow it, as it is too much like work.

CECIL GAUSE MOORE,
MT. CARMEL, ALA.

"Skee Ge." Pharmacy.

"Who never said a foolish thing
or ever did a wise one."

A pill-roller of some little note. One-time admirer and abuser of Professor Blowe, under whom he received the rudiments of Pharmacy. Moore has a way of answering questions which leads his instructor to think that he is It. One of the most practical men in his course.

WILLIAM IRA MOORE,

PLAINS, GA.

"W. I." Electrical Engineering.

"Learned he was in mathematical lore."

For several benighted years this young man attended the Georgia Tech, from whence he came to Auburn, bringing with him an enviable reputation. We cannot but say that he has lived up to that rep. and we are proud of him. Such a mathematician as the boy is! And then, too, judging from the time he has been here, he has done as much for the class as many of our older members. "What a distinguished-looking man Mr. Moore is!"

Class Football, '07.

EUGENE CLIFT MORGAN, II K A,

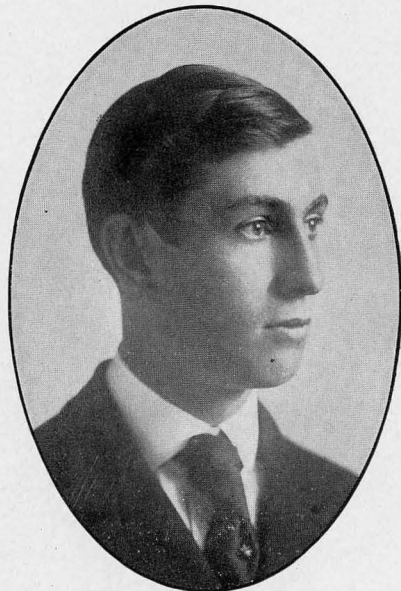

BIRMINGHAM, ALA.

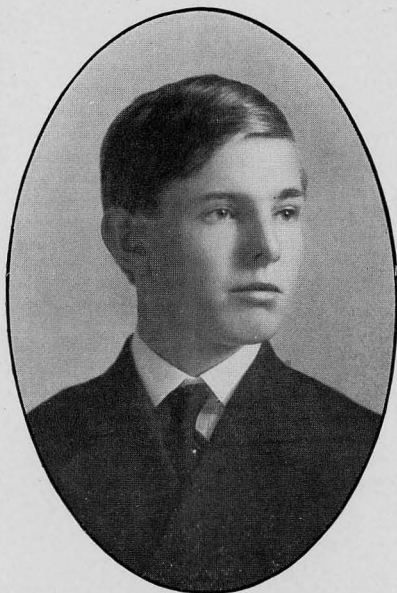

"Gene," "Rip." Mining Engineering.

"He toils not, neither does he spin."

A thoroughbred mining engineer of the Auburn type. Has the gameness and sporting blood, two qualities essential to recognition as one of the aforesaid Auburn type of miners. Rip is a typical product of Birmingham, proud of the town, and of everything it contains, and he leads us to believe that he is pretty well acquainted with the whole place. Another object of his pride is the profession of mining engineering, of which he is apt to become a worthy exponent. "Feed the miners."

M. W. C.

THOMAS GUSTAVE MUNDAY,
EUTAW, ALA.

"Thomas," "Friday." Civil Engineering.

"Wrinkles undistinguish'd pass,
For I'm ashamed to use a glass."

Thomas is a hard-working student and makes fair grades in all of his studies. He is one of Gen. Lane's hard-working students, and would rather work with a transit than to be in heaven. Is about the ugliest man that ever lived, but he says that looks count for very little. Without a doubt he will make a great success in the engineering world, and may some day be city engineer of Eutaw.

EUGENE STEWART PACE,
OXFORD, ALA.

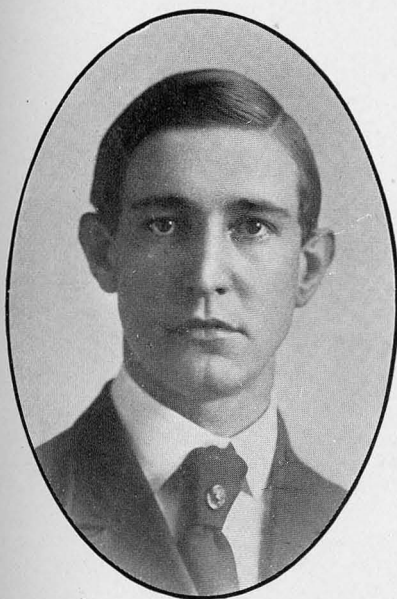

"Gene." Agriculture.

"From plows and harrows sent to seek renown."

Here is a fellow that justly deserves the praises of his friends. A great pal of Dr. Wilcox, who has said that Pace has the most brilliant mind of any man in college; maybe he has; at any rate he makes fine grades and does very little studying. Is very fond of telling wonderful tales of his native county, but always leaves out the "moonshiners."

Distinction, '05, '06; Sergeant, '06; Ass't in Botany, '06, Lieutenant, '07; Ass't in Horticulture, '07.

GEORGE HOUSTON PALMER,

OPELIKA, ALA.

"George," "C. W. P." Mining Engineering.

"On with the dance."

Is fond of "tripping the light fantastic," and his trips to Opelika with such an object in view are without number. In fact, we once started to record all such trips, but as our feeble brain furnished not enough scope to grasp such extensive proceedings, we gave up the task in despair. Plays football in the Bottom. All-ranch full back. His greatest glory lies in his position of Chief Engineer to the South African Diamond Mines, extended. (Honorary.)

Hop Committee, '07; M. W. C.

WILLIAM LEWIS PERDUE, *Σ A E*,

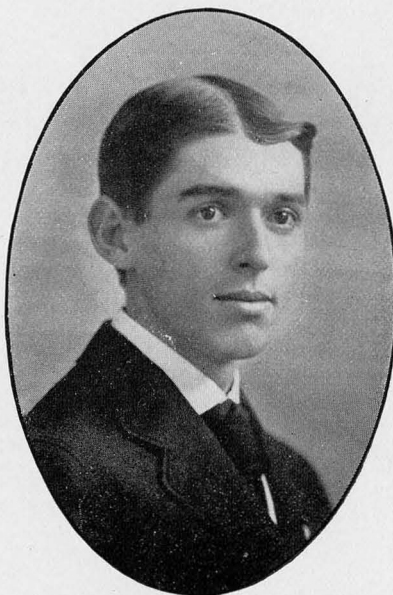

GREENVILLE, ALA.

"Doc." "Louis." Pharmacy.

"But rich he was of useful thought and work."

A man of ideas, as well as of achievements. Perhaps the brainiest that we have among us. An ardent worker for anything that pertains to the moral welfare of the student body. Loyal to the Pharmacy course; an admirer of Dr. Miller. "Doc" would make an ideal politician; a great talker, and can strike a bargain as well as anybody. Is the man that has done the greater part toward making this publication a success.

Corporal, '05; Distinction, '05, '06; Sophomore Declaimer; Sergeant, '06; Secretary of Class, '06; Thanksgiving Debater, '06; February 22d, Orator, '06; Honor System Committee, '06; Junior Commencement Speaker, '06; President Y. M. C. A., '07; President Wirt Literary Society, '07; Secretary-Treasurer Alabama Oratorical Association, '07; Ass't Editor-in-Chief Orange and Blue, '07; Editor-in-Chief Glomerata, '07; First Lieutenant, '07; Captain, '07; Commencement Speaker, '07.

BERNIE EUGENE PRATHER,

AUBURN, ALA.

Mechanical Engineering.

"When I was stamped, some coiner with his tools
made me a counterfeit."

Prather is an "Auburnite," and would rather live in Auburn than anywhere he knows of. He would rather loaf at the Kandy Kitchen than to study, any day, and yet what does he do to pass away the time while there? Not a very brilliant student, but gets along very well in his class, and always gets passes. Doesn't care for I's, but is satisfied with III's. All he wants is to get a pass in Senior Astronomy and to become an electrical engineer.

CLIFFORD BARTLETT RICHARDSON,

SHEFFIELD, ALA.

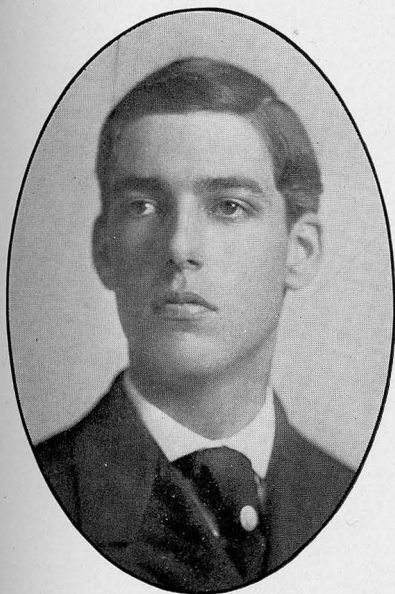

"Kid." Electrical Engineering.

"At sight of thee my gloomy soul cheers up,
My hopes revive, and gladness dawns within me."

Kid is a hale fellow well met. Always has a good word for his pals. Is quite fond of music and society, which takes quite a bit of his time. Until lately has been in the habit of making good grades, but no longer has time for study. Kid is one of the most popular men in his class, and would be more so if he had any size. Has always been a loyal supporter of '07.

Distinction, '04, '05; Varsity Track Team '04, '05; Class Baseball, '05, '06; Class Football, '06, '07; Glomerata Board; Acting Drum Major, '06, '07; Lieutenant, '07.

CHARLES SOLOMON RIPLEY,

MACON, GEORGIA.

"Rip." $\Phi \Lambda \Theta$. Electrical Engineering.

"Solomon in all his glory understood not the working of the feminine mind."

"Rip" won his reputation by his faithful work for the Orange and Blue. Very devoted to his studies—in fact, too much so for a business man. He can talk about Tactics in a way which leads us (and Col. Patrick) to think he knows what he is talking about. A disciple of Prof. Dunstan, whom he imitates even in his walk. A good "rooter" and a leader of yells on the athletic field.

Corporal, '05; Distinction, '05, '06; Sergeant, '06; Hop Committee, '06; Floor Manager Hop, '06; Ass't Floor Manager, '06; Vice-President Georgia Club, '06; Class Basketball, '06, '07; Lieutenant, '07; Ass't Floor Manager Senir Germano Club, '07; Orange and Blue Board; Business Manager Glomerata; Chief "Rooter"; President Georgia Club, '07; "Razor-Backs."

CLAUDE JONATHAN ROGERS,

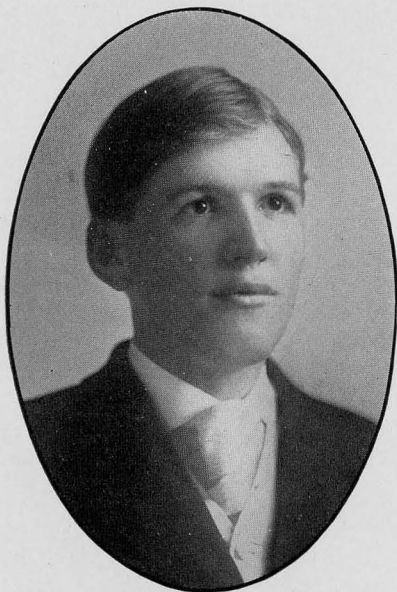

EUSLEY, ALA.

"Claude." Civil Engineering.

"Boisterous in his talk and praises."

Proud of Birmingham and Eusley. A great talker, who can spend all his energies toward detailing the virtues of the above named towns. A man of great practical experience and a leader in the civil course. Fond of dancing—a would-be society man. A favorite of General Lane, who expects great things of him. We would hate to bet that he will not be disappointed. A great frequenter of the Kandy Kitchen; a worthy candidate for membership in the Mutual Ease Society.

JAMES DOUGLAS SAMPLE, K Σ,

GADSDEN, ALA.

"Jim." Mining Engineering.

"Nature after making him, broke the mold."

Jim don't much give a rap, but he gets along better than most of us who do. Makes some of the best grades in the mining class. Is a man of varied residence, having matriculated from nearly every city in the states around Alabama. Enjoys a good reputation among the under classmen, but we Seniors know him. Achieved a name on a certain trip to Atlanta. Wants to be known as a chemist of experience. A good plug cut is his only dissipation.

Distinction, '05, '06; Lieutenant Co. E., '07; M. W. C.

JOHN PICKENS SCARBROUGH,

WHITE PLAINS, ALA.

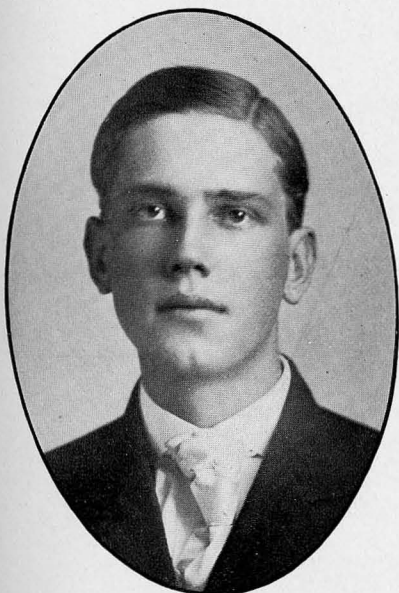

"Johnnie." Electrical Engineering.

"Let those who labor get the wealth,
And I'll get all the rest."

At last we have arrived to a man who is one of the most intellectual in college, if we are to judge by public opinion. Has never made anything but I's, Math being his specialty. Johnnie is a good fellow to have along whether you are looking for fun or for knowledge. One among many who celebrated the Senior Football victory.

Manager Class Football Team, '07; Glomerata Board.

SAMUEL ROBERT SHI,

FORSYTH, GA.

"Bob." K Σ. Electrical Engineering.

"My lord advances with majestic mien,
Smitten with a mighty pleasure to be seen."

Bob entertains his friends by telling of the wonderful prosperity of Forsyth and the country round about. Is very fond of his military glory, which he uses in vain attempts to terrify "rats." His name, Shi, refers to his personal bravery and not to his relations with the ladies.

Distinction, '06; Crack Company, '04, '05, '06; Corporal, '05; Color Sergeant, '06; best-drilled man in Company B; German Club, '07; Lieutenant, '07; Passed Senior Physics, second term, '07.

LYNN THOMAS SHOOK,

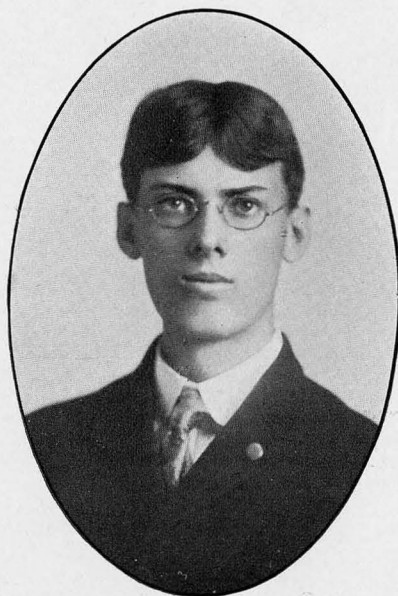

BRIDGEPORT, ALA.

"Lynn." Mining Engineering.

"He amazes us with words of strength and
thundering sound."

Lynn is a very harmless little boy. He once heard of a wicked man who bet on a football game, and he has never recovered from the shock. Is noted for his punctuality in regard to drills, roll calls, and all such military matters. Was once in love—with his pipe—but the strength of his affection was not equal to the strength of his pipe, so his love was killed. The possessor of a varied and extensive vocabulary. "God knows."

Corporal, '05; Sergeant, '06; Lieutenant, '07; M. W. C.

EDWARD HUNTER SMITH,

TUSKEGEE, ALA.

"Ed." *Σ A E*. Pharmacy.

"Hot air, 'tis true, may warm a heart,
And make a pulse beat fast."

Ed always has a joke to tell, usually without a point. Takes life easy. Will promise anything, but usually comes up lacking. Has as many friends as any man in college, some of whom he accompanies to Opelika once in a while or oftener. One of the best-natured fellows you ever met. Quite a society guy, where he shines, especially at the dances. Is very proud of his native hamlet.

Distinction, '04; Secretary German Club, '04; Corporal '05; Assistant Floor Manager German Club, '05; Floor Manager German Club, '06; Sergeant, '06; First Lieutenant, '07.

MELVILLE SOMMER,

BIRMINGHAM, ALA.

"Zip." Electrical Engineering.

"He would talk; Lord, how Zip would talk!"

We sometimes wonder why Zip has never taken much of a stand in the military world, as he is so well fitted for such an occupation by virtue of his splendid figure and general appearance. And then we suppose he was meant for an orator, as his melodious voice and flow of language would do credit to a Cicero. But all our planning is of no avail, as Zip will probably turn out to be a jackleg tailor. Zip is young in years, but old in—what? Not brains, not wisdom, surely. It must be experience, for he tells us that he knows Birmingham like a book.

PENROSE VASS STOUT, A T 2, 0 N E,

MONTGOMERY ALA.

"Pen." Civil Engineering.

"And all the beauties of the Court besides
Are mad in love, and dote upon your person."

"Pen" is one of the most popular men in college, as he is always ready to lend a helping hand. No one should care to know a finer fellow. He is the best artist in school, and likes to go to Opelika to "paint the town" for baseball games. "Pen" says "she" is the prettiest girl in all the world, and wishes that Montgomery was but 16 miles away, and as he is a good judge about such things, it must be true.

Corporal, '05; Treasurer of German Club, '05; Distinction, '05; Company C's Medal, '06; Sergeant, '06; Hop Committee, '06; Vice-President of German Club, '06; President of German Club, '07; Leader of Hop, '07; Orange and Blue Board, '07; Glomerata Board, '07; Secretary of Class, '07; Glee Club, '07; First Lieutenant, '07.

REINIER JOSEPH SWART, JR.,

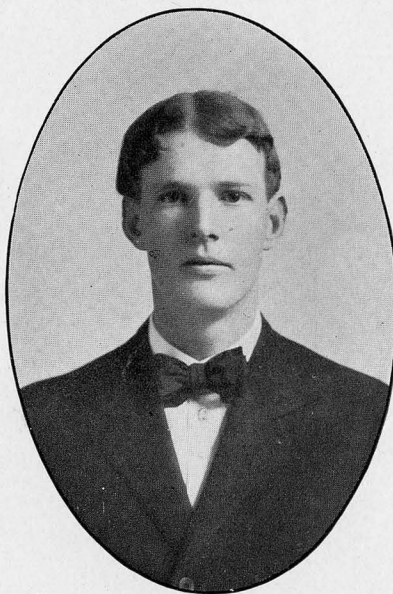

Baton Rouge, La.

"Schwartz." Civil Engineering.

"Who think too little, and who talk too much."

Swart never knows what he even wishes to do, and is therefore not responsible for his actions. Has a chronic habit of talking all the time. At heart he is one of the best fellows in college, always willing to lend a helping hand. A pal of Gen. Lane, at whose jokes he laughs louder and longer than anyone in his class. Ran a successful race for the "biggest talker," which he justly deserved.

President Wirt Society, '07; Vice-President Wirt Society, '07; Business Manager Tennis Club, '07; Hop Committee, '07; Chairman Hop Committee, '07; Class Baseball, '06; Class Basketball, '07; Varsity Baseball, '07.

WILLIAM STUART TICKNOR,

AUBURN, ALA.

"Tick." Mining Engineering.

"Tho' vanquished, he could argue still."

Chief transit man of mining class. One who works for the fun of it, or because he don't know any better. Has opinions of his own on all subjects, and very original arguments to back up these opinions. Of a military appearance and behavior. Of a very inquiring nature, and wants to find out all there is to mining. Has that quality of application that most of us lack and with that quality makes good grades.

FLETCHER JACKSON THAGARD,

GREENVILLE, ALA.

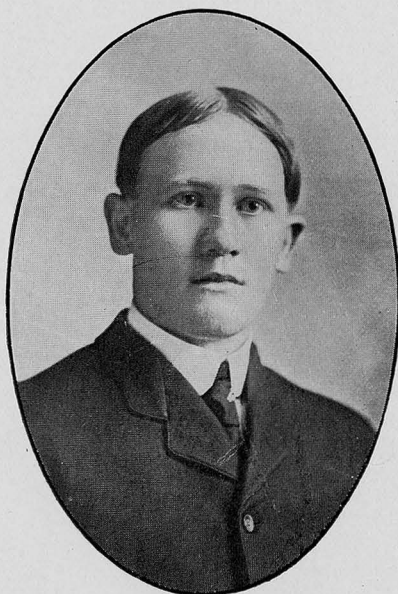

"Monk." Electrical Engineering.

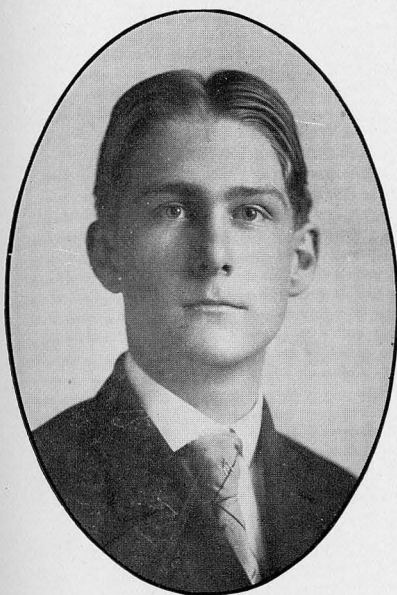

"The elements

So mixt in him, that nature might stand up,
And say to all the world—This is a man."

"Monk" is one of the most popular men in his class. Has played on the class football team for four long years, where he won the reputation of being able to look out for himself. Strongly believes in the "honor system," which he advocates for all classes good and bad. Was voted the "biggest boot" in college and ran a good race for other desirable honors.

Class Football, '04, '05, '06, '07; Captain Class Football, '05; Varsity Football, '07; Corporal, '05; Sergeant, '06; First Lieutenant, '07; President Class, '06; Advisory Board, '06, '07; Distinction, '06; Treasurer of Class, '07; Hop Committee, '07; Treasurer Hop Committee, '07.

EARNEST WOOD THORNTON, *K Σ*,
TALLEDEGA, ALA.

"Kid," "Serg." Chemistry.

"His fever's rising very high, a hundred or above,
He calls it grip, but that's a slip, the poor boy is
in love."

As his name implies, Kid is an "Earnest," hard-working student, especially in his department. Would rather give any man a dollar than to take a dime from him dishonestly. Stands in with the Physics Corps. Has made a good record for himself, especially in his studies. Is very fond of tennis and—er—a girl.

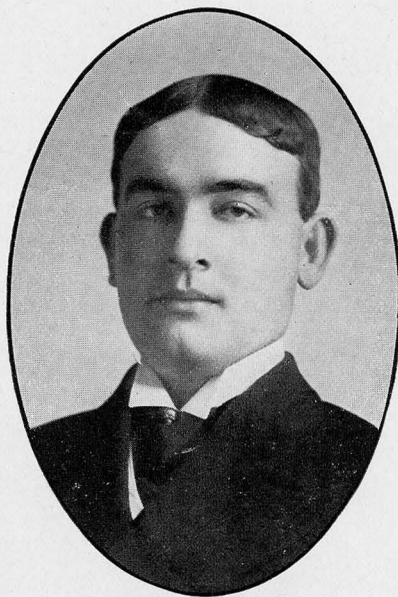

Distinction, '05, '06; Corporal, '05; Sophomore Declaimer; Quartermaster Sergeant, '06; Junior Speaker; Captain Co. B; Ass't in Chemistry, '07.

JAMES ERNEST THREADGILL,
SUNNY SOUTH, ALA.

"Methuselah," "Theta Prime." Chemistry and
Agriculture.

"With whiskered anecdotes and jokes,
And wondrous tales to tell,"

This "Gold Dust Twin" is a man who we are sure will succeed in his chosen profession, as he has had bountiful practice. You should get him to tell you of his experience as manager of an extensive dairy. When it comes to the fair sex "Thuse" is in his element. Sports several college pins and pennants, thrust upon him by the ladie(s) of his choice. Oh, the heartless flirt! How many fair hearts will be saddened and broken, —when their owners learn that your captivating manners and winning ways and graces are not for them!

SAMUEL AUGUSTUS THREADGILL,

SUNNY SOUTH, ALA.

"Theta." Civil Engineering.

"He look'd in years, yet in his years were seen
A youthful vigor, and autumnal green."

"Theta," or the other "Gold Dust Twin," comes to us from the Sunny South, and believes in letting the other one do the work. He is one of the oldest men in college, and is one of the founders of the Class of '07, and has been with us since '03. He made a great hit as a football player in the class games this year, where he did good work. "Theta" takes civil engineering, and may some day be "stake driver" in an engineering corps.

Class Football, '06, '07; Founder of '07; Member of Chain Dragers' Baseball Team, '07.

EDGAR BREWSTER VAN KEUREN, ^{KA} A,

WOODLAWN, ALA.

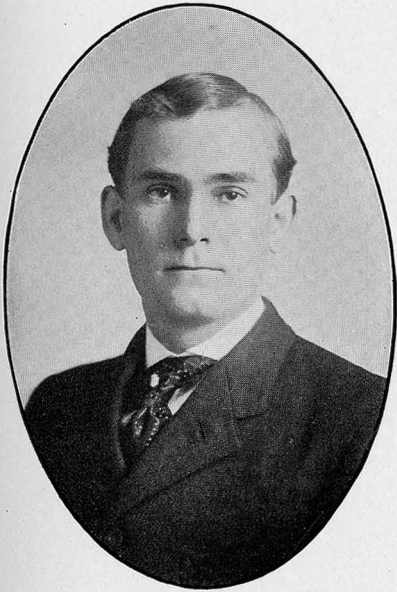

"Van." Mechanical Engineering.

"We briefly state some facts,
For if we'd put the trimmings in
Our brain we'd overtax."

A sometime Y. M. C. A. man. Likes to read, especially love stories. Has been able to complete two years' work in a year and a half, which speaks volumes for Van's mental incapacity. One of Prof. Wilmore's ardent admirers. Judging from the way he acts and dresses in Auburn, we think he must be quite a ladies' man in Woodlawn, but he does not venture into the boundaries of Auburn society.

Vulcan Club, '06, '07; German Club, '06, '07.

ADDIE GOGGANS WALKER,
GOOD WATER, ALA.
Civil Engineering.

"Here comes a girl; let me hide."

Walker hails from where the water is good, and can tell some very marvelous tales about his native town, where no one drinks anything but good water, and judging from Walker, it must be true. He has never been known to talk or speak to a girl, and says he would rather be in jail a year than have to talk to a girl an hour. He takes Civil Engineering, and the height of his ambition is to be a county surveyor.

WILLIAM PAUL WATKINS, *S A E*,
ANDERSON, S. C.

"Willie Paul," "Wat," "Doctor." Civil.
"With mirth and laughter let old wrinkles come."

A relic of Clemson, where he started a career which he has followed out. Tells many tales of his vast experiences in the Palmetto State. Enjoys the distinction of hailing from the same town as the Colonel, an honor belonging to only one man in the '07 class. A loyal friend and jovial companion, who has more true wit than any man in college. An ardent supporter of his class, having been twice captain of the champion football team.

Ass't Treasurer German Club, '06; Vice-President German Club, '07; Vice-President Hop Committee, '07; Advisory Board, '07; Captain Class Football Team, '06, '07; Sub-Varsity Football, '07; Glomerata Board.

THOMAS VANZANDT WATSON, *Φ Δ Θ*,

FORT VALLEY, GA.

"Wat." Pharmacy.

"Who mixt reason with pleasure, and wisdom
with mirth."

Wat says he is not going to follow Pharmacy for a livelihood, but will grow peaches in Georgia. Has things his way in the Pharmacy class, as he is the largest man. Must have the commandant bluffed, as he was recently appointed assistant adjutant. Has a figure well suited for military glory, which he may some day attain.

Georgia Club, '04, '05, '06, '07; Assistant Adjutant on Staff, '07; Rooms with Lawhon, '07.

HENRY BRANCH WHITAKER, *K Α*,

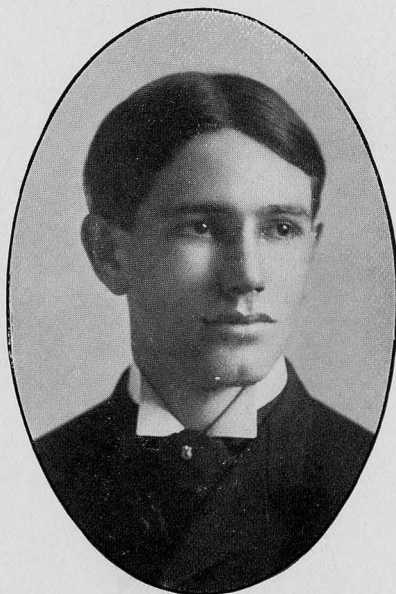

COLUMBUS, GA.

"Whit." Electrical Engineering.

"If virtue's self were lost, we might
From his mind a new copy write."

A man of character, who has not allowed his morals to become corrupted by two years of Auburn life. A hard student who takes part in athletics especially for his class. One of the stars on Auburn's Basketball Team, but tried to pick a few scraps while playing.

Varsity Basketball, '06, '07; Varsity Track Team, '06, '07; Captain Track Team, '07; Class Football, '06; Distinction, '06; Advisory Board, '07; Treasurer Senior German Club, '07; Treasurer Georgia Club, '07; Glomerata Board.

RALPH CHESTER WILLIAMS,

HATCHECHUBBEE, ALA.

"Red-Poll." Chemistry and Metallurgy.

"Powder thy radiant hair."

One who, so the ladies say, can be depended upon to do as he is asked, especially for the B. Y. P. U. About as good-natured as his head is red, and that is saying a good deal. A loyal supporter of 'the Websterian Literary Society, but of late finds his main pleasure in being chief cook of the sorrel-top aggregation. A boner of tactics, and is well versed in the art of drilling; experienced in crack company affairs.

President Red-Head Club, '07; President Websterian Literary Society, '07; Crack Company.

THOMAS McCOTRY WILLIAMS,

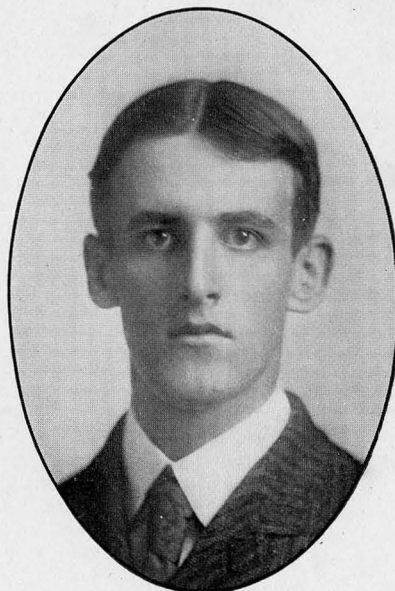

HAYNEVILLE, ALA.

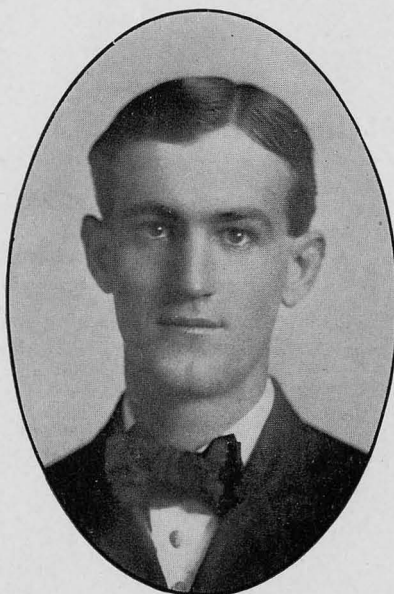

"Guillaume." General.

"Sleep on and take thy rest."

Shrill feminine voice, subject to spasmodic convulsions when asked to recite. Takes great delight in teaching "certain" Co-eds French and German. Especially attentive to history lectures.

"I'd rather be post in history than be president." Height of his ambition, "nine 6os." A jolly fellow, and a better-natured boy cannot be found.

DANIEL ELMER WILKINSON, *Σ A E*,
PENSACOLA, FLA.

"Dan," "Wilkie." Electrical Engineering.

"Remember all his virtues,
His faults forget."

Genial Dan Wilkie was voted the most popular man in college, which he justly deserved. He always speaks to everybody, and doesn't think himself to be above the average Auburn student. Has not the least bit of conceit. Has made a good record in college, especially in athletics. Is undoubtedly one of the best ends on any football team in the South. Is sometimes seen returning from "Faculty Avenue" rather late at night.

Class Football, '04; Vice-President German Club, '04; Leader German Club, '05, '06, '07; Manager Basketball, '07; Varsity Football, '05, '06, '07; Business Manager Orange and Blue, '07; Manager Class Track Team, '04; Class Basketball, '04, '05; Corporal, '05; Sergeant, '06; First Lieutenant, '07; Coach Class Football, '05, '06, '07; Varsity Baseball '05; Class Treasurer, '06; Company Medal, '06; Captain Varsity Football, '07.

EVANS BEAUCHAMP WOOD, *A T Q*,
BRUNDIDGE, ALA.

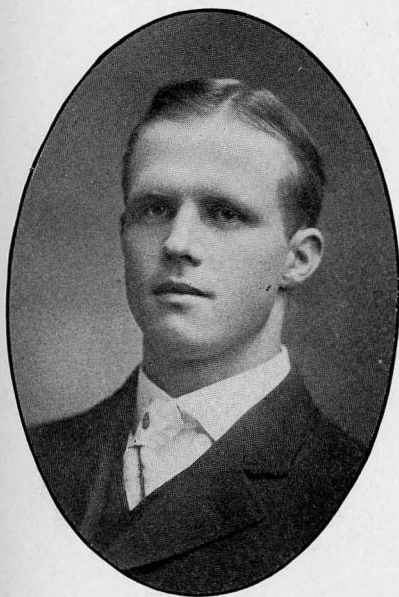

"Mattie." Agriculture.

"Let me be no assistant for a state,
But keep a farm."

Mattie is a good-natured, whole-souled boy, loving the girls. Frequently takes long rides and walks down the "Bicycle Path," where, no doubt, he has had many romantic experiences. Wood is not very wooden, as his name would lead you to believe, but is one of the wittiest men in college.

Highest Distinction, '04; Delegate to Ashville, '04, '06; Distinction, '05, '06; Second Corporal, '05; First Sergeant, '06; Secretary Wirt Literary Society, '05; Treasurer Y. M. C. A., '07; Captain and Quartermaster, '07.

EDMUND AUGUSTUS WRIGHT,

Σ A E, Θ N E,

CHATTANOOGA, TENN.

"Mr. R." Electrical Engineering.

"O vain to seek delight in earthly things,
But most in Courts where proud ambition towers."

"Mr. R." is ambitious, a great talker, and some say conceited, but when you know him well you do not notice his conceit. He is a "used to be" baseball player, and likes to tell of his great playing in Chattanooga. Nevertheless "Mr. R." is a hard worker and has done more for the Class of '07 than any one man. He holds the record for the fastest runner in college, and has won many events in track meets for Auburn.

Distinction, '04; Class President, '05; Best all-around Athletic, '05; Captain Track Team, '05, '06; First Sergeant, '06; Corporal, '05; Advisory Board, '05, '06; Secretary Advisory Board, '06, '07; Manager Varsity Football Team, '07; holds College Record for 100-yard dash.

HOMER WALLER WRIGHT,

AUBURN, ALA.

"Homer," "Jule." Pharmacy.

"Preserve the 'Wright'
The wrong let go."

Homer has been with the A. P. I. a long time—in fact, about a year too long—but the presence of such a man does the college no harm if not much good. One of a few in the Pharmacy class who is willing to abide his time. An active agent for text-books. An ardent admirer of certain resident druggists. Will no doubt be able to "beat" his way through the world, since his good training under the auspices of the Auburn Cadet "Racket-Raisers." "Chews gum."

MISS DESSIE CHLORINE WARD,

AUBURN, ALA.

"Dessie." General.

"A thing of beauty is a joy forever."

Miss Ward is our Yankee pet. She believes in having her part of fun and pastime. Very attractive to the "t'other" sex. Why, Mr. Burgess! What time is it? Let's beat. Oh, my little Sophs. She has lost her Page but found Rich. Somewhat pettish and easily offended, yet she is a sweet and charming specimen of Indiana's fairer sex.

Class Poet, '07; voted most popular Co-ed, '07. Future task: Keeping the grade book of an electrician.

JAMES ALTO YORK,

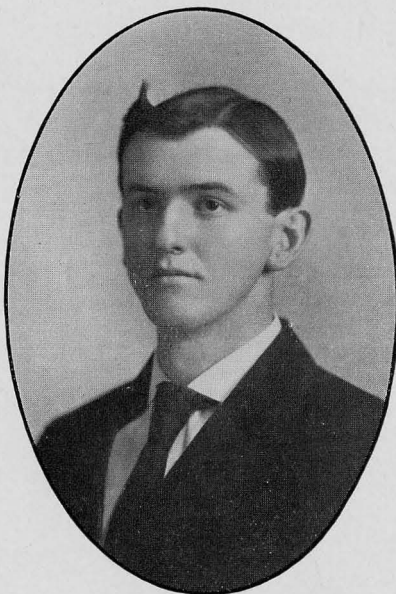

MIDLAND CITY, ALA.

"Lord York." Pharmacy.

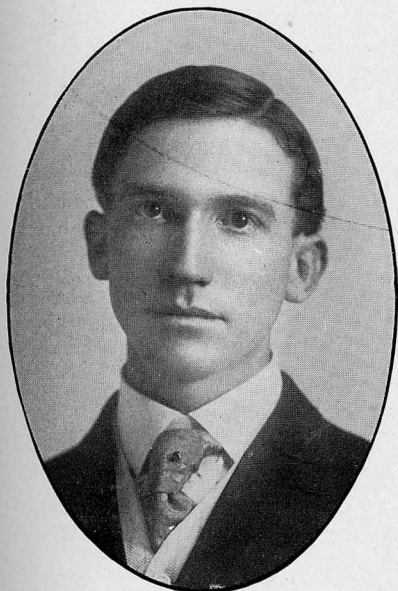

"Knowledge is proud that he has learned so much; Wisdom is humble that he knows no more."

A man who has always put his class before everything else, a loyal supporter of '07. Has deserved much more than he has received both from the student body and the faculty. Thinks very well of himself, very little of others. Stands high as to grades and in stature. Twice president of his class and for four years has played class football.

Highest Distinction, '04; Distinction, '05, '06; Class President, '04, '07; Class Football, '04, '05, '06, '07; Class Basketball, '05; Track Team, '05; Corporal, '05; Sergeant, '06; Websterian Debater, '06; Feb. 22d Orator, '06; Junior Commencement Speaker, '06; President Websterian Literary Society, '06; Treasurer Websterian Literary Society, '07; First Lieutenant, '07; Senior Commencement Speaker.

Specials

MILTON STANHOPE BRASFIELD, $\Phi \Lambda \Theta$,

DEMOPOLIS, ALA.

"Bras." Pharmacy.

"Music has a charm to soothe the savage breast."

"Bras" can beat the man that killed himself singing. Has the finest voice of any Auburn student. Will not stand by his class when it comes to "cutting" a recitation, but he is not to blame for that, as it has grown to be a habit.

Pansy Quartette, '06; Black Belt Bullies, '06; German Club, '06; President Black Belt Bullies, '07; Leader Glee Club, '07; Glee Club Quartette.

AUGUSTUS KIRBY CLEMENTS, $A T \Omega$,

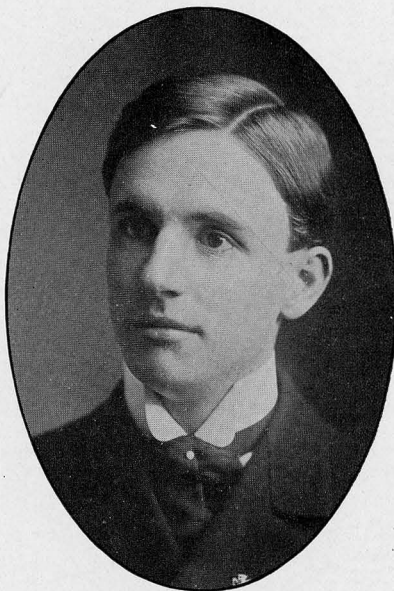

AUBURN, ALA.

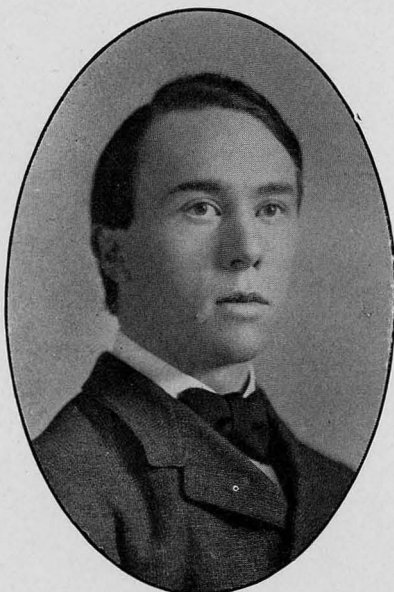

"Private," "Freak." Electrical Engineering.

"You dote on her who cares not for your love."

A good-natured young Auburnite who has in him the makings of a good—what? We started to say electrician, but must change to ladies' man. Auburn's sport. Is proud of his drilling record, and fond of relating it. His bark is worse than his bite. Loquacious, but on two subjects only—the affairs of the Elec. Course, and the fair sex. An admirer of Bull Crenshaw.

Crack Company, '06; Auburn Club.

GEORGE HARDAWAY FRAZER,

AUBURN, ALA.

"Bill." Pharmacy.

"The fighting winds would stop and admire,
Learning consent and concord from his lyre."

Bill can make the best music going on the old piano at the Kandy Kitchen. He also performs in Tommy Fullan's Band. No doubt he will turn up in some side-show or dime theater as chief musician. A hard student in Pharmacy, but doesn't like to make the same prescription over more than once.

Tommy's Band, '06, '07; Orchestra, '06; Glee Club, '07;
First Base on Pharmacy Baseball Team.

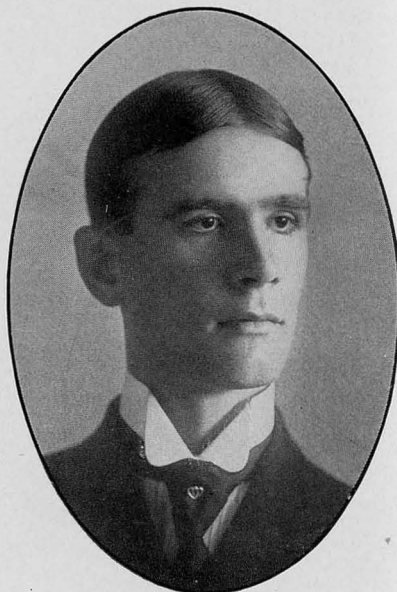

JOHN BOYKIN HEYWOOD,

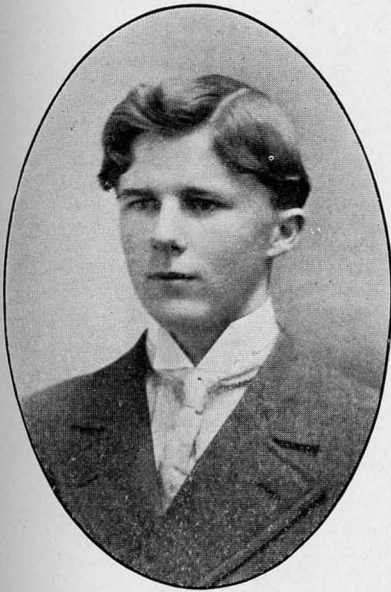

ATLANTA, GA.

"Bo." Chemistry and Metallurgy.

"Too stiff to bow, he makes salute,
Expressing his respect."

Hails from Clemson, together with several other good men of our class. Has a walk and bearing that stamps him at once as a man of would-be military reputation. Toots a horn in the band, but never toots his own horn elsewhere, for there is no more modest, unassuming fellow in our class. Though somewhat of a sport, is shy upon the subject of the ladies. A chemist of fair reputation.

ELLIOT WALKER LEWIS,

ANNISTON, ALA.

"Big Rat." Electrical Engineering.

"A six years' darling of a pigmy size."

Is known far and wide as a photographer of reputation second only to Mr. Abbott's. The latter's substitute on many occasions. Another of his achievements, or titles, as we may call it, lies in his being a first-class slide-rule artist. A hard student of Elec.; a man of practical experience in that line.

Orange and Blue photographer.

THOMAS WILLIAM LLOYD,

THOMAS, ALA.

"Tom." Mining Engineering.

"Consider his ways, and be wise."

One for whom we prophesy a great future as a mining engineer; that is, if he applies himself in the future as he has done and is doing. There is no better man in his course. An old stand-by of Professor Mitcham. In fact, all his professors like him because of his application and good work. Like other specials, seems fated to become an Auburn society man. Spends much of his time with the fair sex, though he is fond of bragging that he is proof against all such charms.

Distinction, '06.

LANGFORD JOHN LOCKE,
MONTGOMERY, ALA.

"Daddy." Electrical Engineering.

"My way has fallen into the sere, the yellow leaf."

Has knocked about the country for the better part of thirty years, so we assume. A man of varied experience, the extent of which is equaled only by his good nature.

"Daddy" is a good electrician, and perhaps one of the best practical men in the course. A football player of renown: in our Junior year games, the signal of "Locke back" was the source of terror to the opposing line. Had we such an office as class father, "Daddy's" lack of hirsute adornment would give him that title.

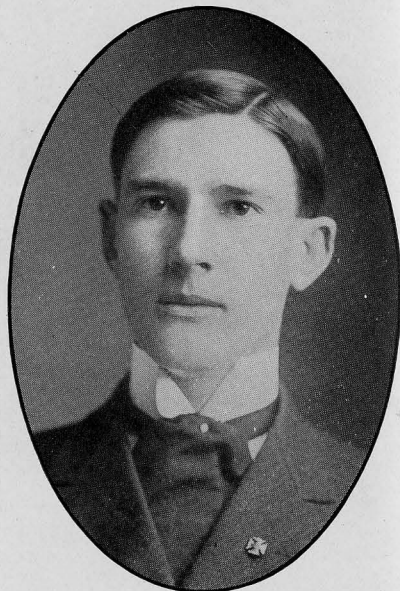

Class Football, '05, '06; Varsity Football, '07.

MARION CURTIS PARMER, *A T Q*,
FORT DEPOSIT, ALA.

"Long boy." Electrical Engineering.

"Some will go to stations high,
And some back to the plow."

Stands high in the estimation of his classmates. How high?—oh, about six feet three or four. A hard worker, who occasionally shows signs of brilliancy. Expects to return to Auburn, so as to be able to write M. S. after his name. Has the large man's share of good nature, and wears a perpetual smile. We prophesy success for this young man, but not in Elec., for we firmly believe that his sphere of life is behind the plow.

GEORGE WASHINGTON PAPOT,
EAST LAKE, ALA.

"Pap," "Pepot." Electrical Engineering.

When "Pap" goes in for a thing he does it with all his heart, and it is hard to tell which requires the most of his energies—his beloved gymnasium or his course. Once had great aspirations as a track man, but has given up such ideas.

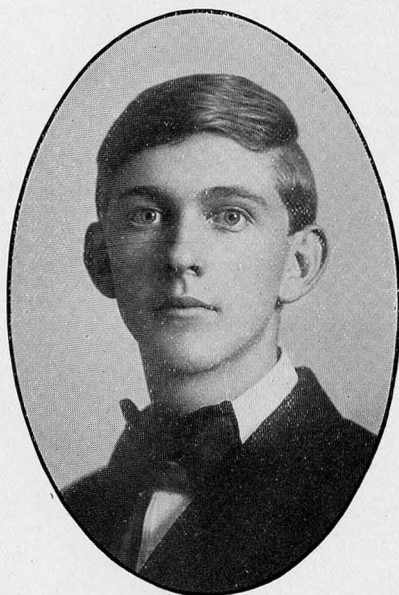

FRANK BELLOMY RUTLEDGE, K Σ,
AUBURN, ALA.

"Frank," "Kerosene Blond." Pharmacy.

"When I was young, I, like a lazy fool,
Would blear my eyes with oil, to stay away from
school."

Frank is one of Auburn's sports when it comes to wearing good clothes. He always looks as if he had jumped out of a bandbox or a coalbox. Is always telling marvelous tales of Shreveport, where he expects to land when he completes his course. A good worker, who sometimes gets too many questions in Pharmacy.

Second base on Pharmacy Baseball Team; White-headed, '87, '88, '89, '90, '91, '92, '93, '94, '95, '96, '97, '98, '99, '00, '01, '02, '03, '04, '05, '06, '07.

ORLANDO CLEVELAND TISDALE,

EVERGREEN, ALA.

"Tisy." Pharmacy.

"Frame your mind to mirth and merriment,
Which has a thousand charms, and lengthens life."

A fair representative of south Alabama, who has followed in the footsteps of the many who have hailed from that region. A good old boy, always ready for a joke or a little "side-line" fun. Does not like the idea of cutting recitations, but usually yields by the force of public sentiment. Has a hard time in Pharmacy. "Boys, I am going to get myself shipped out; I can't learn this dam stuff."

SAMUEL CARTER WEEMS,

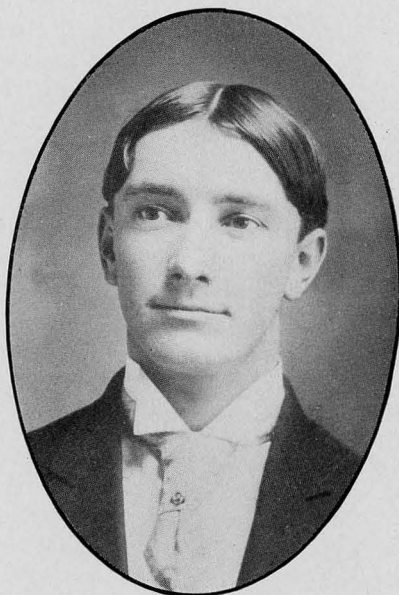

UNION SPRINGS, ALA.

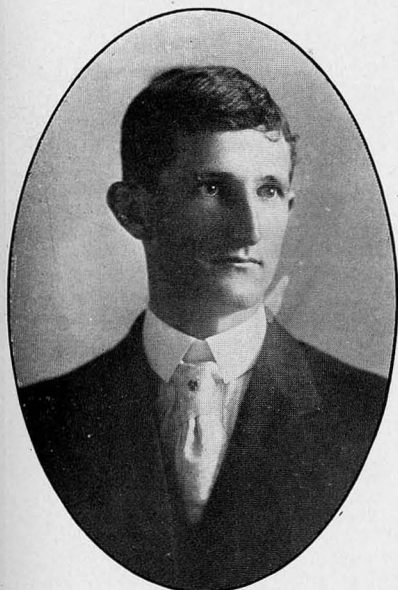

"Sam." Electrical Engineering.

"Wit and prowess to the power of love submit."

From our Freshman year Sam has headed the list of class celebrities, for during the four years his good right arm has been the source of paralysis to all batters that have faced him, and of heart failure to all supporters of those batters. Genial and friendly, Sam has been voted one of the most popular athletes in college. A zealous charmer of Auburn maids, we are told that he will have a future as an Auburn husband. We all wish Sam luck in his coming occupation.

Class Football, '05; Class Baseball, '04; Captain Class Baseball, '04; Varsity Baseball, '04, '05, '06, '07; Captain Varsity Baseball, '06, '07; Advisory Board, '07.

SAMUEL TAYLOR WHITAKER,

AUBURN, ALA.

Electrical Engineering.

The right-hand man of Professor Fullan, because of his skill as a mechanic. A hard worker along all lines connected with his course. A quiet fellow, who would never be taken for a Senior were it not for the distinguishing mark of a gold cap cord. Stands in great awe of Col. Patrick. A resident of Auburn, of which place we prophesy him a permanent fixture.

WILLIAM CHURCH WHITNER, *Σ A E*,

SANFORD, FLA.

"Church," "Whit." Electrical Engineering.

"Although he has much wit,
He is very shy of using it."

"Whit" has come from the sunny orange groves of Florida to seek renown in Auburn as a football specialist. He is one of the best-natured men in Auburn. Very fond of athletics in all forms. A congenial fellow, and a good man to hold a team together. Is accused of being very apt in learning, but on account of his interest in things other than studies he has not yet proven himself a Solomon.

Varsity Football, '06, '07; Captain Varsity Football, '07; Captain Class Baseball, '06; Class Basketball, '07; Coach Class Football, '06, '07; Varsity Baseball, '07.

In Memoriam

Mary Susan Sanford

Senior Class History

AWAY back in the dim Paleozoic era the primitive man lived and moved. Rough and uncultured, this savage was a mere bunch of fighting instincts. Daily he fought, from both necessity and revenge, and so lived through ages until enlightenment gained hold on him, until the stone age was left behind, and the brighter bronze age was reached.

In this semibarbarous state he lived for centuries, but, learning more every day, he so progressed in intellect that he stands today cultivated, enlightened, powerful. The iron age of civilization is here; all relics of our barbarism are forgotten; but the boundless future is still before us, with all its prospects of unlimited progress and development.

And as this theory of evolution can be applied to man in general, so it can be applied to even so small a unit as a college class.

We are the race that has been developed. Only four short years have we been here; yet those years seem to us to be as boundless as the ages that have elapsed since our primitive ancestors inhabited this earth. For in those years we have so advanced that from being undeveloped Freshmen, we are now qualified to receive a diploma from one of the greatest institutions of the South. This short while contains all of our past, but our future is as unlimited as that of the entire race of man. I would like to tell you what we hope for, what I know we will accomplish in that future, but that is beyond my dominion. I am only to tell of a few significant events that have occurred to the class as a whole. I could hardly start to tell of the daily incidents and adventures that each of us has undergone, which, trivial as they may seem to us now, may become of such importance as to change the whole trend of our life, but which will never cause us to regard Auburn other than in the light of a generous and bountiful friend and protector.

As Freshmen we were in the state of the primitive man, rude, uncultivated, unpolished. We were as truly a part of the stone age of college life as our ancestors were of the stone age of our civilization. As the primitive man was brought into a world of strife, so our entrance into this little universe was accompanied by the clash of arms and weapons, not deadly, it is true, but as frightful to us as were the clubs and arrows to our forefathers. But need we go over these incidents of our reception which have been related so often that the subject is worn threadbare? It is enough to say that our primitive instincts came to hand to prompt us to revenge, not upon the perpetrators of this deed, but upon those who would come after us. Our vengeance was stored up for a year, to break upon the heads of the following Freshman class.

After the first few weeks of novelty and excitement, we began to learn. In a wonderfully short while our strangeness and ignorance wore off, and it needed only the arrival of our new uniforms to lift us out of the stone age, and set us well on our way toward the bronze age of college life.

Our fighting instincts stood us in good stead on the football field. We placed one man on Coach Bates's Varsity—something that few Freshman classes had done before us. In class football we were less fortunate, but our defeated team developed men of whose work since then Auburn is justly proud.

There is little more to relate of our first year. We were rapidly learning the ways of a college man, and so progressed that in baseball we proved ourselves foes worthy of anyone's steel.

In scholarship, too, we forged ahead, so that at commencement many blue ribbons told the tale of silent classroom battles that had been fought and won.

This marked the close of our Freshman year, and we rushed off to show our uniforms to the girl at home, but somehow we failed to impress upon her and the rest of the folk just how important we really were. But do not smile—we were only Freshmen then.

September again, and the time for avenging our previous reception had come. I do not attempt to tell you how this revenge was accomplished, but I leave it to those who were "rats" in that year to say that it was done.

Oh! you may frown, you may disapprove of such an act as hazing, but I say in excuse that it was done in the first few days of our Sophomore year, before we had come under the refining influence of our new acquisitions, the Co-eds. We had hardly realized the dignities of Sophomorphism until in their presence. Since then we have never lacked inspiration or incentive, and never was a class more ardent adherents of coeducation than the one whose annals I attempt to write.

As the coming of uniforms was looked to the year before, so now we lived in anticipation of the gorgeous chevrons that we were soon to wear. But, alas! anticipation is more soul-satisfying than realization, and to only twenty-five of us were these dreams of corporalship realized.

Once more football was upon us. The varsity season of our Sophomore year will ever be remembered, as Captain Reynolds's team bucked through an unbroken line of victories, proclaiming themselves the undefeated champions of the Gulf States. And of that team, five were men of the Class of 1907.

But the five men we put on Varsity were five taken from our class team; and though, under Captain Thagard, we played one of the best games ever seen on the campus, the Freshmen defeated us, 5 to 0.

In basketball and on the track we did better, however, winning the class championship in both these events.

But whatever joys we felt during the latter part of this year, they were all changed to the most profound sorrow at the death of Dr. O. D. Smith. Never before had our class felt real sorrow, but now, with the rest of the college, and indeed, with the whole state, we had a taste of it in its deepest intensity. For Dr. Smith had made an impress upon us, as well as upon hundreds that had gone before. Noble and uplifting had been his life, and in his death Auburn lost her chiefest support.

Baseball, examinations, distinctions, come and go, and we are no longer Sophomores.

September of 1905 proclaims us full-fledged college men. We are Juniors, and are permitted to choose a course. The several courses in a way break up the class, but in no wise do they destroy our unison of feeling. For the members of our class have stood by one another with a concordance that has been seldom seen before. The honor system was adopted with not a single dissenting vote.

We receive a tinge of disappointment at first of the year upon learning that many of our classmates have been dropped from our rolls. Especially is our loss of Miss Knapp and Miss Cross felt, but, as if in reparation, Misses Chumley, Kirby, and Ward are added to our numbers. And these have proved themselves additions of whom any class may feel proud.

This is our busy year, and it passes swiftly. After a season of indifferent success in football, during which we place four men on Coach Donahue's varsity, we settle down to hard work. Class football acts as a relaxation, and we put out one of the best class teams that the college has ever seen. We won our first game against the Sophomores, and then, in the championship game, we tied the Freshmen. Again the two teams played, and another tie resulted, thus leaving the championship undecided.

This is the year of oratory with us, Juniors taking part in the Thanksgiving debate, in the oratorical contest on the 22d, and at commencement. The first event was won by the Wirt Literary Society, Mr. C. M. Hudson was awarded the medal in the second contest, while at the commencement speaking the prize went to Mr. McLeod.

In baseball this is a banner year, the series with Tech being our only defeat. But baseball is rushed through, and we enter upon the examinations that mark the close of our Junior year.

We are now Seniors! Our Freshman dreams, our Sophomore hopes, our Junior prayers are realized, and we stand forth as representatives of the most cultivated period of college life. Seniors! How glorious the name! and never a class was more worthy of that name. We have our faults: as for that, judge us lightly; we hope that our virtues will more than recompense for them. We have perhaps not acted in all things as we should. We offer in excuse our youth and inexperience. Or it may be that our instructors are not pleased with our behavior or our showing. Against this we hold our unbounded love for Auburn and for our College. We have stood together as a class, and, more, we have stood by Auburn in all things. Never was college spirit in its true form shown more than during the past football season, and that in the face of the direst reverses.

The cry "Hard Luck" has been used so often as an excuse that the expression is greeted with sneers. But Auburn can with justice use the term in regard to the football season of 1906. Under the coaching of Mr. Donahue a glorious team was developed, and great work was expected of it. Our own classmate, Whitner, led the team, and we were not disappointed as to the work—for work, and the hardest, sincerest kind of work, was not lacking—but through a series of the most palpable flukes we lost every game by the lowest possible margin.

In class football we are the victors in our game with the Juniors, defeating them 11 to 4, thus winning the right to participate in the championship game. And today, led by Capt. Watkins, we go out to do battle with the victorious Sophomores for the leadership. May the best team win. But I promise our men, in the name of the Class of 1907, to stand by them whatever the issue. We depart with a record that few classes have equaled, and with the promise of one still more glorious. But as glorious as our future record may be, as much honor as it may reflect on our college, it will only serve to pay an extremely small portion of the debt of love, honor, and reverence that we owe to Auburn, dear old Auburn, the home of our four happiest years, soon to be our alma mater.

From the prophet we will hear the future of the individual members of the class, but I will so far infringe upon his task as to give you a glimpse of the future of the body as a whole. I have been with this class for four years; I think that I know every man of it; and from what I know of them, from what I know of every Auburn man, I can safely say that the Orange and Blue will have no more earnest, ardent, willing supporters than this Class of 1907.

Senior Class Poem

Ye spirits gay, that watch each day
O'er men and maidens young,
To see that there is nothing missed
From their full share of fun—

Be kind, just now, as angels sent
From the blue vault of heaven,
Help me immortalize in song
The Class of 1907.

A class of which we're justly proud
Whose members hold their own,
And after the toil of college life
Will reap as they have sown.

But modesty forbids high praise,
So we must now forbear;
At least, I think our profs will say
That we are very fair.

Perhaps 'tis true some of our heads
A physic's crown will never fit,
And some, alas, did fail to pass
In that awful "Analyt."

But learning's road, professors say,
Has never yet been royal;
When no work attends the winning
No value has the laurel.

Surely we've done whate'er we could.
Free as Niagara's waters
Our dimes and nickels we have poured
Into the oil trust's coffers.

Full often felt, but still untold,
Is the dread of awful crams;
We never thought we needed sleep
Before the term "exams."

By sports, you know, we're all enthused;
Our echoes reach the heaven
When victory crowns the faithful ones,
The boys of 1907.

They say we failed in football,
But we do not see it so
We met beef, brawn, and muscle
With lightness, ease, and "go."

You cannot find, where'er you go
Boys with more sheer "grit"
Than Hughes and handsome "
And big old smiling "Whit

And though we had no bo.
We read with pleasure keen
That line in all the papers,
"Auburn's play is always clean."

Baseball has been more successful:
As pitcher, we've Sammy Weems;
With "Shag" and dear little "Alex,"
We conquer all the teams.

Whitaker and Lacey, whom we honor,
Bring sweet memories to all,
Of many hours spent at the "gym,"
Watching gay basketball.

We have many Daniel Websters
Who are worthy of naming too:
For example, take York and Hudson
And the "boss" of the "Orange and Blue."

The Co-eds are not very noted,
And have never risen to fame;
So, as a matter of consolation,
We'll mention each girl by name.

Full well to all is "Biddy" known,
The girl with brilliant hair;
Around her face a smile extends,
Concealing mischief there.

And for little Meri Harvey,
Whom we think is "sehr gut,"
Is pronounced by all professors
As a "scientific boot."

There's "Kirby" too, we'll ne'er forget,
Who thinks of Number One,
A girl who's very studious,
And always in for fun.

Of "Chummy," too, we're very proud;
She's noted for her curls,
A thing admired by all the boys,
And envied by the girls.

Now some of you may censure us,
And dub this college slang;
Don't be severe, for really now,
We don't deserve much blame.

In the line of least resistance,
Don't you know all Nature moves,
And, if lengthy names are shortened,
Nature is seeking easy grooves.

As now we stand on the brink of time,
Our memory turns to bygone days;
Dreaming of those "Moonlight picnics"
That our college life portrays.

For memory is a partial gleaner,
Seeing but the choicest grains,
Keeping all the dear old pleasures,
And forgetting all our pains.

Oh! the shady nooks of the bicycle path,
Where we have often strolled,
Will bring sweet thoughts to everyone,
Of scenes that ne'er grow old.

Soon the drum no more will call us
To the confines of these walls;
No more our feet will loiter,
Along the spacious halls.

But often in our dreams will steal,
The music of the college bell,
And, thrilling as no other sound,
The memory of the college yell.

Countless joys have been afforded
To these busy days and hours,
But instead of thorns and thistles
Have been scattered many flowers

Senior rights and privileges,
We leave to dear '08;
And advise the gay young '10's—
The Juniors to emulate.

Our old Exams and sentences,
Our cribs and ponies fine,
To the class that tied our football,
"Old rough and ready" '09.

Our professors who have been so
So patient, kind and good
Would that we could now repay them,
As they deserve we should!

But we want them to feel free,
And not hesitate to use
New facts that we have told them
In any way they choose.

Ah, so soon our task is ended,
Then we'll take the final step.
Think of those who've just ascended
And with fame and honor met.

Oh, the joy of each possessor
With a sheepskin in his hand!
Music thrills the entire body—
Richest boy in all the land.

In the time-worn leaves of history,
Written with a golden pen,
Will gleam the names of our companions,
Names of dear '07's men.

Standing with reluctant feet,
We long to go, yet crave to stay;
Sad to leave our Alma Mater,
Eager for the battle's fray.

See the billows madly tossing!
Look far out across the foam!
The light of truth is shining onward,
Ready to guide '07 home.

Now the days are swiftly passing,
Soon we'll bid our friends good bye,
But let us ne'er forget our duty,
To the dear old A. P. I.!

MISS DESSIE C. WARD.

Senior Class Oration

AS we pause today upon the dividing ground between two eras in our lives, and look back over the varied experiences of our college life, with its buoyancy and its pleasures, its rivalries and ambitions, its duties and generous friendships, we cannot avoid a feeling of sadness, that comes with the thought of parting. There is, however, one thought which should be uppermost in our minds, dispelling the gloom of present sadness and suffusing with a golden glow the morning sky of the future. The influence of our college days has left a lasting impression upon our minds and hearts. It pervades the inmost recesses of our natures. It has become a guiding principle in our lives. It molds our characters. It shapes our destinies.

We have met together today—the day on which the great Washington was born—to celebrate in song, in poetry, and in prophecy the past, the present, and the future of our class. But just before we pass over the threshold of life, let us consider carefully and impartially our course which is to come. Let us roll back the curtain of time and gaze down the arcades of the future.

Soon we will leave these old walls, around which cluster the pleasant memories of our schooldays, to take our places in the great rank and file of men. We are now passing over the last section of that wonderful four-spanned bridge of education. Our college days are almost gone, and we must soon face the stern realities of this world.

What is our reckoning, then? How far are we towards Cathay? Have we gained enough advantages here to enable us to plunge fearlessly into the future and seize the golden opportunities that will come to us? I will answer, *Yes*, and to spare.

The old year has slipped by degrees into the background of memory, and the fleeting moments of this new year are passing silently in rapid succession. The old century, with its miraculous development and boundless progress, has forever gone, and the 20th century has already begun to make quick strides towards that same end. The awakening of this century will soon move also into the realm of recollection, leaving only its precious heritage behind. Then the dawn of futurity will settle over the earth, and time, the tomb-builder, will destroy all things mortal, clothing the remainder with immortality. With these thoughts and reflections casting their shadows about us, we must enter into the realizations of this life seriously and earnestly.

Let us turn our thoughts and attention to the works and achievements of man for a moment. Man has drawn the lightnings of Heaven from their cerulean home, harnessed them to the triumphant car of science, and linked the Orient and Occident together by bands of electric thought. Man has girded our rock-throned mountains and flower-decked prairies with iron bolts along which rolls the massive

steam car, bearing the products of human skill and industry, from the icebound hills of Maine to the citron groves and orange bowers of Florida, and from the storm-lashed coasts of the Atlantic to the shores of the serene Pacific. Man has plowed through the stormy waves of the mighty sea with his wonderful ingenuity and has almost succeeded in reaching the pole itself where turns the axis that rotates this old world in space. Man has stirred up the Reformation in the East which has flowed on and on until it has overwhelmed all Europe with its resistless tide, dashed foam-flecked billows against the rocky shores of the western world, mingled its life-giving waters with the crystal waves that kiss the coral beach of Hindustan and wash the emerald isles that gem the azure bosom of the far-off Pacific.

But what is man? This question has been transmitted down from generation to generation and still lingers unanswered in the minds of deep-thinking men. The ancients wrestled with it, and now let us call up one of their number from his tomb in the land of Moab and ask him what is man? O Moses, thou meekest of men, arise from thy bed of perpetual slumber and tell us what is man? We gather his answer through the melting strains of Genesis; man is the acme of creation, created in the image of God himself, to have dominion over every living thing that creepeth upon the earth. But still the question is unanswered. Let us call up David from his casket of clay and inquire of him, What is man? His reply comes to us through the sweet songs of the gifted psalmist: man was made a little lower than the angels in Heaven and crowned with honor and glory. But still the question is unanswered. Now let us call up Shakespeare, the Prince of English poetry, and ask this famous sage, What is man? His response has been sent down to modern civilization through the noble mind and educated tongue of Hamlet: "What a piece of work is man! how noble in reason! how infinite in faculties! in form and moving how express and admirable! in action how like an angel! in apprehension how like a god! the beauty of the world! the paragon of animals!" But still the question is unanswered. What is man? Man is a complex, mysterious being, breathing thoughtful breath, endowed with the power to reason and think, and possessing inalienable qualities. Man is an unutterable mystery of mysteries and woman is a wonder of wonders.

There will arise in our pathway many problems and impediments. But we are Americans and can surmount them all. Never fear, true hearts! A people which has shown the quality of its genius as this nation has in the last thirteen decades will finish its work. It will go forward and not backward.

"Tramp, tramp, tramp, the boys are marching;
Cheer up, comrades—they will come."

For our America shall be the Sinai of the nations, and from the terrible thunders and lightnings of its great struggles shall proceed the divine law of liberty that shall subdue and harmonize the world.

The antagonisms of the past are dying out, and every citizen of this great country can exclaim with rising pride: "Columbia, the gem of the ocean!" Soon we will pass out to perform our part—whether humble or exalted—in the social, political, and moral life of this great nation, and, as we do, let us remember that the past has given us a heritage; that the present, becoming the past, will leave to posterity another heritage; that whatever the bequest is to be depends upon our intelligence and integrity as citizens; for the greatness of a country lies, not in its broad extent of ter-

ritory nor in its past achievements, but in the men who make up the rank and file of its citizens.

We stand today almost at the threshold. Our graduation will usher us into the midst of that active life for which we have been preparing.

The Rubicon crossed, we come this way no more. Our advantages have been above that which is the average. State, church, and society will look to us, not without reason, for deeds commensurate with our advantages.

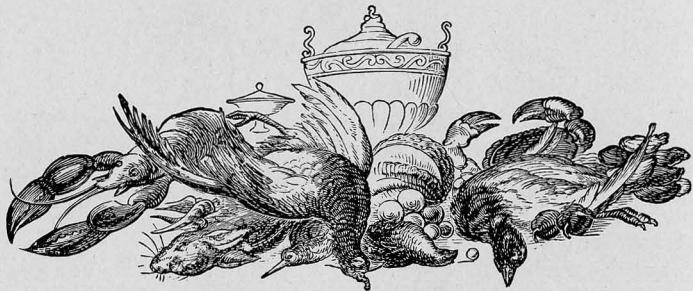

At this period of its history our country needs men with well-trained minds, men of the highest patriotism, men of the sternest virtue, to leaven the lump of shallow learning and political misconception among the masses, and to counteract the degrading influence of bounty-seekers and office-hunters. As each winter's frost leaves the locks of our fathers whiter still, so each will find us nearer that point in our lives when we must become the pillars of state and church.

Very soon we will leave that old college. Some of us will go north to struggle with engineering problems; some will go east to engage in the manufacturing industry; some will remain here and become potent factors in the development of this beautiful Southland of ours; and some will go west to search the depths of Mother Earth for hidden treasures. But wherever we are, whatever our occupations may be, let us remember that we have put our hands to the plow and must not turn back.

“The bugle call of life to men
Who must the battle now begin!
How sternly sweet that lofty song—
Defend the right, redress the wrong.”

N. B. McLEOD,
Class Orator

February 22d, 1907.

Senior Class Prophecy

SINCE my earliest recollections, I have been a student of the strange, the metaphysical, the mysterious. Especially have I been interested in the phenomena of the mind, and the influence of that organ over the other senses, and of its complete dominance over the entire physical body. I had discovered, in common with all great mentalists, hypnotists, and the learned mystics of India, that by a long-continued concentration and by a supreme effort of the will one could acquire the power to command at ease the unseen physical forces of the universe, and by their aid could visit strange lands, traverse ethereal space, and view in person the wonders of other worlds.

A few days ago, while seated under one of the large oak trees in front of the college, I was seized with an unaccountable desire for adventure, and by concentration and will power, I was at once surrounded by an intense darkness, in the midst of which I was lifted by a strange, supernatural force. For some seconds, I seemed to be carried swiftly upward, until the atmosphere became chilly and cold, and then in a horizontal westerly direction for what seemed hours, still being enveloped by such darkness that it could almost be felt. Finally, the blackness began to dissipate, and I could dimly distinguish cities, rivers, and mountains, as they passed in rapid review in the far depths below. Again I was overshadowed by gloom, and when it once more grew light, I found myself descending into a region the like of which I had never seen or imagined. No sun or moon was in the sky, and yet over everything was diffused a strange mellow light. Streams of the clearest, purest waters flowed through the richest meadows, decked with flowers of the most delicious and intoxicating odor. Here were growing stately trees loaded with tempting fruit of every hue. Near the center of the garden, for so I saw it was, stood a great branching tree weighted down with golden apples. Then I knew that I was in the garden of the Hesperides, which was in the center of the Elysian Fields, to which Jupiter and the lesser gods had been banished by the dawn of the Age of Science. Near the tree was a gushing fountain, above which was written in letters of fire, "Whosoever drinketh of this fountain can look into the vistas of the future, and read the lives and hearts of men." Here, at last, was what I desired. Seizing the golden cup from the silver pedestal in front of the fountain I took a deep draught from the sparkling waters.

But scarcely had I drained it when the garden, with its bright meadows, its fountains, and its golden apples faded away, and I found myself standing on a beautiful autumn morning by a sandy country road, on the edge of a pine field, just as the sun rose in burning splendor over the blue hills in the east.

Hardly had I noticed my surroundings, when I espied an object slowly approaching in the distance. After several minutes I saw that it was a tall, lanky fellow with a grinning face, dressed in an old straw hat, ragged black coat, and faded blue overalls. He was astride of a little scrawny animal known in the South by the unpoetic name of "mule." In his right hand he held a huge stick, with which he belabored upon the little beast at regular intervals—all, however, without apparent effect, as he seemed to be of an extremely good nature, and very much opposed to a hurrying life. On nearer approach, to my great surprise, I recognized the equestrian as one of my old classmates, "Pat" Childs. Fearing to stop him lest his beast of burden should remain stationary, I awaited with some interest a buggy which was going in the same direction, and whose sole occupant I soon discovered was Bill Hardie. I hailed him, and after exchanging greetings was offered a ride to the City of B—, which he said was just three miles distant. On questioning Hardie, I learned that he was raising sugar cane on a large scale, having contracted a liking for that product while in college. He also told me of the other members of his course. E. S. Pace was a botanist of no mean repute, having succeeded Dr. Wilcox at the A. P. I.. J. E. Threadgill had wasted his life in writing a book trying to prove that Methuselah could not possibly have lived more than five hundred years. "Mattie" Wood owned the largest millinery establishment in B—, and kept everything in the dry goods line that could in any way appeal to the feminine mind or pocketbook, his success being partly due to the fact that he had as designer and illustrator of fashions and costumes for the ladies another brilliant-headed Auburn boy, F. R. Duncan. Before we had gone a mile, we passed a shabby country store, in front of which, seated on a large goods box, were four men. The first, R. C. Gowdey, was leisurely pulling away at a meerschaum. The second, J. M. Page, presented a beautiful sight, as he was sound asleep with his mouth open drinking in the warm sunshine. The third, C. G. Moore, had a great quid of tobacco in his mouth, and was deliberately spitting at a mark nineteen feet away in the sand. The last, J. D. Alexander, was idly looking on. I asked Hardie why they were thus situated and what was their business and received the reply that they were the chief members of the Mutual Ease Society, the object of which was to discourage hurry and strenuousness and promote the simple life. A little farther on we beheld two more of the class of '07, who were winning bread by the sweat of their brow. By the roadside

were Walker and Mundy, walking behind long-eared animals turning over the sod. Mundy was still a great student of Geology, hence he was studying the strata at first hand, while Walker had found the plow handles better transits than those of Gen. Lane.

Soon we reached the city, and started up one of the main streets. Before we had gone far we saw A. D. Ellsberry pushing something in front of him. That something proved to be a diminutive carriage in which was snugly ensconced a wee specimen of humanity. Ellsberry had a radiant smile upon his face and seemed well pleased with his job. Hardly was he out of sight when we saw an automobile approaching, and in it our former popular co-ed and class poet. By her side was a large, handsome man whose face was not unfamiliar. Miss Ward, I soon learned, though ever loyal to her classmates, had shown by her life choice that the class of '06 stood highest in her affections. On leaving college she first wrote verses that the gentle Keats might have envied, and then became a great success in the financial world, her efforts at last being crowned by getting "Rich."

On account of business, Hardie soon had to leave me, and I began to stroll around in search of excitement. As the day was growing warm, I stepped into a large drug store to get some refreshments, and found three more boys of '07. Homer Wright, T. V. Watson, and J. A. York were in partnership in the drug business. They told me that Doc Drake was surgeon in a military college, and because of his docility and "riderability" had caused Scott Farley, commandant in the same institution, to resign his position in disgust, because his battalion was sadly decimated at Saturday morning drills. W. P. Watkins was commander-in-chief of the Salvation Army, and Ed Smith had organized a company to manufacture Booker's Genuine Seven-Year-Old Rye, the brand that made Tuskegee famous. I also learned that their most popular patent medicine was Dr. Brasfield's Voice Tonic, which was bought in great quantities by the Nightingale Club.

On learning that the office of the great physician Dr. W. L. Perdue was in the next building, I hunted him up and found him the same affable and courteous man that he had always been. His surroundings indicated that he had met with great success in his chosen profession. In the course of our conversation, he stated that Ed Wright had signed an agreement with Teddy Roosevelt and the Emperor of Germany to the effect that they would divide the earth between them. But Ed was not contented with such a triumvirate. Chafing under the restraints of this little world, he set out in an airship designed by E. A. Harriss and W. I. Moore for the planet Mars, there to establish a nation in which he would be king, dictator, and lord of all. But, unfortunately for the poor fellow, his head bursted on account of great internal pressure before he had proceeded far upon his adventurous voyage, and his companions had to abandon the project.

While Perdue was consulting a patient, I picked up the morning paper, and immediately became absorbed in the account of a sensational divorce case. It appeared that Mrs. J. D. Sample was suing for a divorce from her husband on the ground that he was the sorriest "sample" from the lump of humanity that she had ever seen. On looking down another column, I read a thrilling account of the greatest mining swindle of the age, which had been planned and executed in Denver by Jack Moore, E. C. Morgan, Roy Mitchell, and George Palmer, who had skipped with their money to Mexico. Grieving that my classmates had not cultivated a desire for honest work in college days I began to look for something else to divert my thoughts. On another page I saw what seemed to be a review of a popular book upon an old subject, viz., "Matrimony: Its Dangers and Its Joys," by B. B. Barnes. I was about to put the paper down when I noticed that I had overlooked something upon the first page. It was an announcement that an address would be delivered at eleven o'clock in the city auditorium by the Hon. N. B. McLeod, senator from Alabama. As it was nearly the hour, and being anxious to hear the address, I told Perdue good bye, hastened out upon the street, and started for the auditorium, overtaking on the way another one of my classmates, "Kid" Collier, who, I found, was bound for the same destination, as he was editor of one of the leading dailies in the city.

From the very nature of his profession, Collier was able to inform me of many members of our class.

One of his regular contributors was "Brosia" Harwell, whose beautiful poems upon the ever fresh and immortal theme of love touched the hearts of thousands. "Fido" Davis was a leader in society. Ticknor was one of the most exact teachers in the city schools, always compelling the little urchins to put down the last "6." Dexter Edge was manufacturing the keenest-edged razors in the country, while Bill Lacey was owner and superintendent of several large mines in the Birmingham district. C. B. Richardson was bandmaster for a circus company. Sam Weems was an Auburn husband, and the champion pitcher of the Southern League. Prather was merchandizing in Auburn. A. H. Mitchell and L. G. Weber were running a fancy poultry farm, having acquired a liking for the feathered tribe while in college. H. B. Whitaker was city electrician in a Northern city. Bob Shi had distinguished himself in the war with Japan, and had just returned to the United States, where he was adding to his glory by outkissing Hobson, the hero of the Merrimac. "Zip" Sommer was supplying a small town with electricity generated by talking into a machine which he had patented. However, his patent was not a blessing to mankind at large, as few had been found who were blessed with perpetual motion of the jawbone. Dan Wilkinson, ever ready for the daring thing, had forever immortalized his name by making a run for the North Pole, where he planted the Stars and Stripes along with the Orange and Blue. Hughes, with Collins and Van Keuren as his assistants, was superintending

the Southern Railway shops. Hodges and Rogers, with Martin in their employ, had built a great railway through the Chinese Empire. Scarborough was professor of Mathematics in a Southern university, and had devised an original method for calculating the Devil out of existence.

Burgess had met with an eventful career. After teaching school, studying electricity, and breaking hearts by the hundred, he had set his wits about him and invented an electric hairbrush, which was used with astonishing results by Prof. Wiatt and Dr. Petrie. Finally he became president of the famous college for women, Edwardsville Female Seminary. Just one thing more: though he had long since reached manhood, "Shag" was still very fond of the children.

Stout was dancing master and physical instructor in Burgess's institution, and with two such handsome men in the faculty the number of students increased so rapidly that it became necessary to increase the fees for tuition to an almost prohibitive figure. Johnson and Gaston were "moonshining" in north Alabama, and Golden was engineer on the Golden Gate Special, the fastest train in America. Hixon was traveling among the American colleges selling a book written by F. J. Thagard, the title of which was, "Practical and Scientific Booting Made Easy." Collier said Hixon was meeting with wonderful success, as the book was written by a master of the subject.

By this time we had reached the auditorium, and in a few minutes McLeod was introduced amid deafening applause. He delivered a ringing speech, advocating the rights of the masses as opposed to greed and monopoly. At first I wondered where he got his radical democratic ideas, but then I remembered that even in his Senior year in college he was a champion of the rights of the lower classes, especially the Sophomores and their co-eds.

When the address was finished we pressed forward to offer congratulations, after which Collier invited us to dine with him at Coker's Hotel. Although McLeod was living a busy political life, yet he had kept in touch with the members of his course, and while the dinner was progressing, he told me of their fate. Miss Harvey was the most prominent woman suffragist in America, and a worthy successor to the famous Miss Frances E. Willard. McLeod gave as his opinion, that, because of her efforts, every woman in the country could vote in a few years. Miss Cooper was living in a distant city, the mistress of a pastorium, over which she presided with blushing dignity. Miss Chumley had married a foreign nobleman, and was residing in South America. Clark, as others before him, had been caught by an Auburn lass, and was principal of the A. F. I. Tom Williams, after taking the remaining co-ed as his better half, rose to the high position of schoolmaster of Skerry Hollow and had also invented a small electric pocket lamp, in order not to lose his hat and way in the darkness, and that his proboscis might not come into collision with the trunk of an unfriendly tree, while making a nocturnal visit.

After dinner McLeod left on an afternoon train and I began to roam around once more alone. When I had strolled for an hour or two, I accidentally came upon Ernest Thornton as he was coming out of a bank, of which, I learned afterwards, he was president. Greetings exchanged, he offered to show me around the city and to inform me of the members of the chemical course. Though a financier by profession, yet he was still interested in the study of chemistry, as he had sent Ralph Williams to Central America to investigate the possibility of manufacturing formic acid on a large scale by the distillation of red ants. Charlie Cornell was city meat inspector, and a great tennis player, being especially careful to see that the young lady lovers of the game were not neglected. Culver was showing his college spirit by raising fine steak for the A. P. I. He allowed no beef to be sold from his farm except those between the tender ages of seventeen and twenty-nine. Fred Curtis was the third Auburn husband in the class, and had succeeded to the proprietorship of the Thomas Hotel.

Thornton and I had gone but a few blocks when we came upon an improvised stand around which was gathered a great crowd. Upon the stand we saw R. J. Swart vociferously proclaiming the merits of an article which he was holding aloft in his hands. On drawing nearer, we learned that it was Dr. Dow's Soothing Syrup, which, because of its superior merits, was driving Mrs. Winslow's preparation from the market. When Swart had finished speaking, so great was the rush for the remedy that he and his assistant, S. A. Threadgill, had difficulty in handing it out fast enough. As we could not reach them for the press, we passed on down the street, and spent the remainder of the day in talking of old times and rambling about the city.

That evening we went to hear the famous tragedian, Guy Lipscomb. Thornton told me that even in his college days Lipscomb had shown a liking for the stage by his carrying about with him an extra trunk filled with strange costumes.

The night was spent with Thornton, and as the next day was Sunday we went to hear the eloquent discourse of the Rev. Dr. C. Soloman Ripley, who, on account of his deep piety and great learning had the reputation of being the best pulpit orator in his state. Dr. Ripley announced that the Rev. James Esdale was to preach at the evening service.

When services were over, I proceeded to a hotel and was assigned to a room on the tenth floor. Picking up a paper from the table, I began to read in a listless manner, but soon became interested in a wonderful story of the two remaining members of my class. Lynn Shook had reformed from his wicked ways of youth and gone with Frank King as missionary to Africa. When they had nearly reached their destination a great storm arose, which wrecked their vessel and cast them half dead upon different parts of the neglected continent. King at once went to the interior, and by his great magnetic power won over a powerful African chief, married his three daughters, and

succeeded him as head man of the tribe. But Shook had scarcely landed when the natives seized him, tied him to a stake, and proceeded to fatten him, in the expectation of a feast in the near future. But alas for their laudable intentions! They knew not the task they had undertaken. Shook was not to be outwitted by a set of godless heathen. He deliberately and spitefully refused to take on an extra pound, much to the chagrin of his dusky friends. After laboring in vain for several weeks to increase his avoirdupois, they gave up the job as hopeless and drove him from their midst. Shook had passed away once more—this time from death into life. In writing of his experiences, he stated that the time of his bondage would have passed pleasantly enough if he had only had his pipe with him; but, unfortunately, that much desired article was lost in the shipwreck.

Just as I finished reading this wonderful adventure, I heard a terrible alarm. Rushing to the window I saw the nine stories below me on fire and the fire engine coming down the street with a frightful noise. I was immediately seized with an uncontrollable desire to jump, and out of the window I went. After falling for a quarter of a century, I hit the ground with a dull thud. On regaining consciousness I found myself in the heart of the metropolis of Loachapoka, and, taking a street car, I began my way toward the College City.

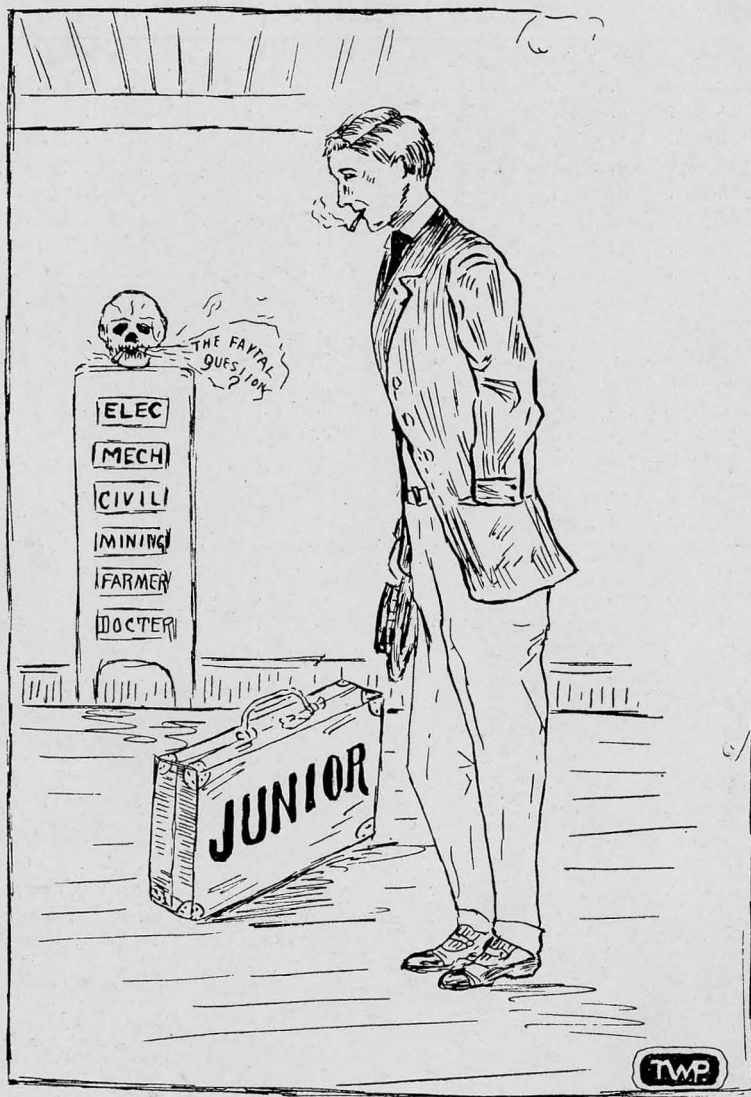

CHARLES M. HUDSON,
Prophet.

Junior Class History

TO write a history of any kind we must be in possession of the facts about which we write, and for this reason the first part of this history is somewhat traditional. The writer was not a member of the Class of '08 in its Freshman year and therefore you will have to take on faith what is written concerning that year.

It was with our class as it has been with many preceding ones. A group of about a hundred young boys were gathered at Auburn from the different parts of the State to enjoy the advantages of college training. These young men—boys, rather—were met with the same cordial reception by the “old men” that marks the beginning of every man’s college career, nor is this reception easily forgotten, for at the beginning of every year some old man has some story to relate concerning the period “when I was a rat.”

However, it did not take the old men long to find out that the newcomers who were to compose the Freshman Class were all right and did not need company every night. In a few days, entrance examinations had been finished and everyone was ready to begin work in earnest. To make their work more like real college work and to compete with the upper classes, a corporation was formed and officers elected. This corporation was, and is still, known as the Class of '08. It has never shown signs of weakness, and its prospects are brighter now than ever before.

The first thing which called the attention of the class was, of course, the regular college work, the next was the Varsity’s prospects in football. It was not long before the team was picked, and although none of '08’s men made the team, most of the scrubs were taken from our class.

After the Christmas holidays had been so delightfully spent at home and all of the boys had returned, the class team began their work. Coach Foy had the team under his direction, and while it was a light one yet it did exceedingly well. We defeated the Sophomores by a score of 5 to 0, thereby winning the right to participate in the championship game, an honor of which no Freshman class had ever boasted. We met the Seniors with a spirit of determination and played a good game. They were too heavy for us, and won the championship by a score of 5 to 0.

With the coming of spring came also the baseball season. We were more fortunate in baseball than in football, as we were able to send four of our number to Varsity. Steele, Neil, Randle, and Blanton handled '08’s end of the winning team.

Varsity had hardly laid away the bat before the plucky Freshman team began work. With “Dusty” Miller as captain, and a fine lot of fellows to help him, we won another right to the championship game by defeating the Sophomores by a score of 15 to 5. But again our hopes for the championship were crushed by the Seniors.

Commencement was at hand, and after commencement three months of vacation.

When September 5th rolled around, it found nearly all of the '08 aggregation back in Auburn, together with an unlimited supply of rats. At every train could be seen the old boys greeting their returning friends and also paying quite a little attention to the newcomers. After securing boarding places and getting organized again, due respect was paid to those who for the first time had landed in Auburn—that is, those who had not chosen to revert to the primeval stage and spend their sleepless nights in and about the woods of Auburn.

Soon all thoughts of vacation, home, and rats were lost in our work. It was not long, however, before our attention was turned to the football team. We added to its strength by sending Batson, Pickett, and Ware to Varsity and several others to the scrubs.

It was not long after midterm examinations before it could be plainly seen that nearly every Sophomore was intensely interested in a little book which he carried with him everywhere he went. In a few days it was announced that the examination for promotion to the rank of corporal would take place in two days. At last the examination came and those who had “boned” “Uncle Sam’s” “Infantry Drill Regulations” so hard were given a chance to tell what they knew. Soon after the examination, a number of those who were aspiring to the rank of corporal were sent to the surgeon. It was with “every nerve strained” that these men went to the afternoon roll call. The day came at last, and every one paid the strictest attention while the Adjutant read the promotions. It was plain that there was a sense of uneasiness among those whose names were being called. They had reason to be uneasy, too, for every man who was not a corporal was armed with a paddle. At the command “Dismiss your companies,” the paddles went into action.

Everything went smoothly into the holidays. College and college duties were fast giving away to the intense desire to see the home folks. A week spent at home, and all were back again to work.

When basketball time came around two of the star players were taken from our class—Ware and Woodruff.

Our football team was again like the preceding year, light but fast. We met the heavy Juniors and played a hard game, but, owing to the poor condition of our backs, we lost by a score of 11 to 0. This, however, was quite different from the overwhelming defeat which had been predicted.

Winter gave way to spring, and with it came again the baseball. '08 sustained her reputation by placing Steele, Marks, Weems, and Miller on Varsity, besides adding greatly to the strength of the scrubs.

Varsity was not the only winning team in college, for our class team made a record, too. With Batson at the bat and DeShazo in the box, we “weeded a row” through the Juniors which will long be remembered. The championship game was played with the Freshman team, and here again we showed our ability by winning by a score of 4 to 3. '08's spirit of loyalty was written in blazing numerals on the Gym roof by the next morning.

Nothing more of importance happened except commencement, and after that the men, who a few days before were Sophomores, returned home as real Juniors.

Most of them returned after the short vacation to take up their work again. After the usual preliminaries, work began in earnest. There were many additions

to our class. Besides a large number of new men there were several young ladies. It is needless to say that no class has ever been prouder of its Co-eds than we are of ours, Misses Knapp, Argo, and Miller.

The same old '08 spirit was taking on new life. With Winslow as president, and a crowd of energetic and ambitious fellows to back him, the class went forward with its work with renewed vigor.

We supported the Varsity football team well by sending Batson, Ware, Hill, McLure, and Woodruff to aid in "rolling the old football along."

Before term examinations, we made an important move by adopting the "Honor System," and in so doing raised the standard both of our class and college.

Christmas broke into our work, but we were glad to lay down our studies to spend a few days with the folks at home. Everyone returned after the holidays loaded down with "homesickness" and "good resolutions." These resolutions must have gone into effect, for it was only a day or so before everything was moving along nicely.

When a boy or a crowd of boys go a few weeks with nothing to divert their attention, they become somewhat restless and are on the alert for anything to break the monotony. If you have never been in this position you have no idea what a reaction takes place when the daily routine is broken by something out of the ordinary. Such a reaction took place when it was rumored that Auburn was to be represented at the Governor's inauguration. The excitement increased until it was almost unbearable. Our minds were eased, however, on hearing an order read to the effect that a special train would convey the whole battalion to Montgomery and also that we had been given places of honor in the parade. Everything went well during our stay in the city. During the services every man did his best to show Auburn up, and in the afternoon every man did his best to let the people understand what is meant by real college yelling.

Soon after our return from Montgomery, basketball claimed our attention. We watched with interest our team as it won game after game. Its success was largely due to the men who were sent from our class—Ware, Woodruff, and Gibson.

Class football again claimed our support. Our team, captained and coached by Reynolds, made a hard fight against the Seniors, but, owing to purely "hard luck," we lost the game. We made a better showing however, in basketball by winning second place, missing the championship by only one score.

Spring is here again, and so is '08 with its usual good support to Varsity baseball. The team has not been formally selected yet, but it can be safely said that we will be well represented.

We are now on our home stretch: only a few months more and final examinations will be upon us; only a few months and we will be privates of Company K or will have discarded our chevrons and have donned the shoulder straps of commissioned officers.

GAYLE ADAMS,
Historian.

History of the Class of 1909

WHEN the pendulum of time had swung round to the 6th of September, 1905, there appeared in Auburn a number of boys, who, although unknown to one another, soon formed themselves into a history-making body. We had always heard that Auburn prided herself upon being a very hospitable village, but the warmth and cordiality with which we were received surpassed and exceeded all our expectations. We soon learned that the boast was a true one, although expressed in an ambiguous manner. The experiences of our first week in Auburn will not soon sink into total oblivion. It will ever be remembered as a week of troubles, of cares, of anxious yearnings, and of strange forebodings.

But these strange apparitions soon abandoned their horrible machinations, and we were relieved of these nocturnal calls. In the meantime, however, we had become students by enrolling our names on the big register and incidentally passing out through the treasurer's office. After the Commandant had stamped our ticket with a company we were ready for a trial in the Academic Department, where we all did justice to the cause by successfully passing the entrance examinations.

With the entrance formality over, we went out to try our skill in feats of dexterity on the gridiron. Two from our number were safely lodged on Varsity. This ill-starred football expedition soon vanished, leaving no important palm to adorn memory's hall. In the midst of this activity the arrival of the uniforms was announced and we gladly donned the customary suits of gray.

After term examinations are over, we speed home to present ourselves in martial array to our parents. Two weeks were pleasantly spent at home. This recreation gave us a necessary inspiration to do wonders when we returned to Auburn, and we did them. Our class team was organized and we met the Seniors in a hard fought battle. With pluck, grit, and energy we succeeded in giving them a bitter dose of defeat, and blanked them, while we had eighteen points to the good. The Juniors were our next formidable foe. Many times the ball was taken up and down the field, but neither side could land a victory. Three days later a second game was played, but the equal aggressiveness of the two teams had not changed, and the score was 0 to 0. Thus we gained the honor of being the first Freshman class whose football team passed through the championship games undefeated.

In basketball we were not quite so successful, as we were defeated by the Sophomores 17 to 12. But our class furnished the captain for the Varsity basketball team, and the same man represented us on the Varsity baseball nine. In our first baseball game we defeated the Seniors 7 to 6, but by a mere score were ourselves foiled by the Sophomores 3 to 2 in the championship game.

Our class succeeded in winning the Track Meet over all other classes, and one from '09's number was placed on the All-Southern football eleven.

Final examinations and commencement conclude the first act in our great drama, and we hasten away, full of expectations and hopes, to spend three months with the old folks at home.

Vacation over, we are again in Auburn. We now gaze upon familiar scenes, and do not have to take refuge in the vast "contiguity of shade" which surrounds Auburn. The paddles were wielded, but we were among the wielders. This apparent fun was of short duration, because our lessons soon began and we buried ourselves in deep study.

Almost immediately the boys began to appear in football uniforms, and '09 had some of her men there. When the fortunate eleven were chosen our class had five men in the lucky number. It might be said in defense of '09's class that this year we were almost half of the Varsity team.

Now is the time when all Sophomores are specially attentive to all literary and military duties. The midnight oil is consumed, and the "Infantry Drill Regulations" is memorized. Everyone is full of hope and is eagerly waiting for the order of promotion. The cause of this unusual activity can easily be ascertained two weeks afterwards, by noticing the number wearing two gold stripes upon each sleeve. Corporals were to be appointed. Quite a number from our class tried to win the coveted honor, but only thirty were fortunate enough to gain military favor.

After the Christmas holidays, class football again held sway. Our first game was played with the Freshmen, and we measured them out a defeat in short order by a score of 6 to 0. On February 22d the championship game was played. The decorations of old gold and purple on one side and crimson and white on the other were enough to inspire these two opposing teams to fight bravely. And they did fight. As a result the score was 0 to 0. It is a remarkable fact that for three times these two teams had met each other in combat for supremacy without either gaining the advantage.

By a streak of contrariety running through the members of our team there was some misunderstanding about the chosen color-bearer for the 22d game. The obstinacy of a few wounded the feelings of another. After being chosen for a place in the midst of the Crimson and White it was hard to have to undergo a reverse decision because of the stubbornness of a select "few." Let this be said with all modesty: a thwarted decision of this character would be received coldly by anyone who possessed the true spirit.

In basketball our team went down in defeat before the skillful playing of the Juniors by the narrow margin of 14 to 13. The baseball games and the track meet lie in the future, and without the gift of prophecy it would be hard to announce the results. But if predictions are worthy of repute old '09 will be there with the goods.

Our first two years have gone, and we stand halfway between the beginning and the end. The second act of our drama has been enacted. If our future is as bright as our past we may safely say that the banner class will pass over the threshold in 1909.

IRALEE WHITAKER,
Class Historian.

Freshman Class History

Fellow Freshmen, as a class we have done well. True, we have not produced any particular athletic or intellectual wonders in this our first year in college, but this is to be considered a virtue rather than a fault. For we cannot be regarded merely as a background for any such scintillating prodigies as many Freshman classes can, but as a bunch of wholesome, loyal aspirants for college honors, each of us up to a general average, and that average equal to any that a "rat" class has ever furnished.

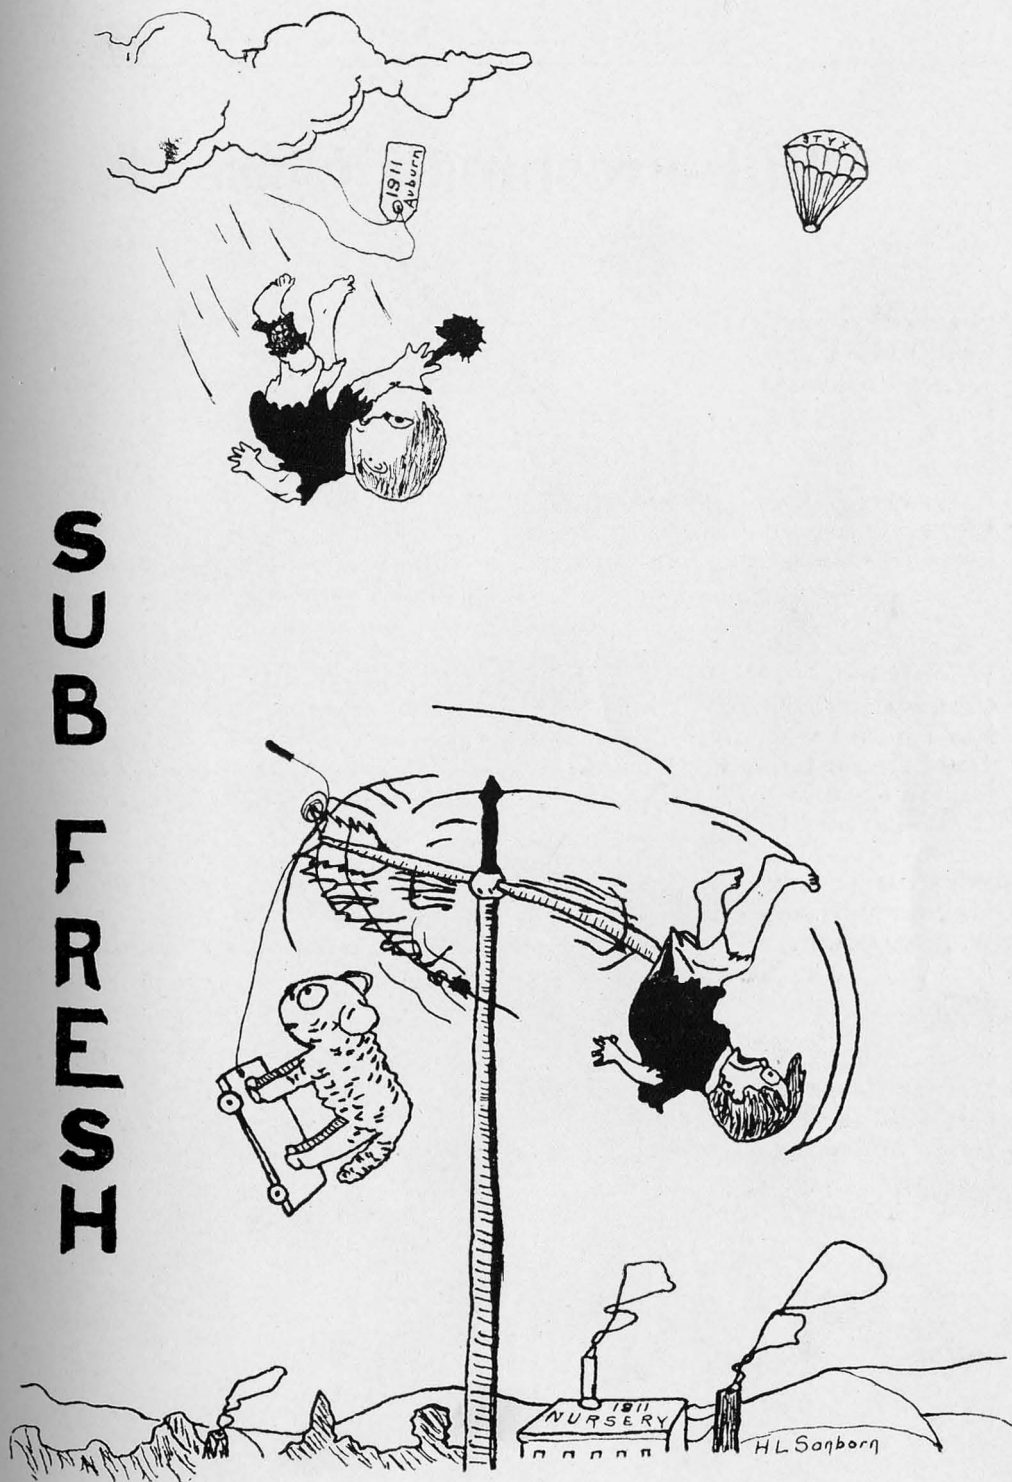

We have nothing to be ashamed of. You call us green, you upper-classmen, but we are learning, and that rapidly. We began to learn during the first few days, when the alphabet was retaught us: a—sir, b—sir, c—sir. Our athletic record is not to be disdained, though we are losers in football and basketball. The primal object of athletics—pluck, clean sport, and fairness—we have learned, while the secondary consideration of winning we leave to our future contest.

Self praise is usually considered as biased. Therefore, we will not expound upon our many virtues (?) but will state, as modesty, and, indeed, as truth, directs, that we are yet young, and weak, and inexperienced. But what we lack in wisdom, age, or strength we make up in loyalty and love for Auburn. Most revered Seniors, you boast of your college spirit as excelled by that of no other class, yet we, even we, most disdained Freshmen, love the Orange and Blue every bit as well as you. This we hope future years will show—will show that we, as much as we esteem our class, hold it as of secondary importance to our college.

We have a long road ahead, and we look forward to the great future for which we have every promise. And we sincerely hope that this promise will be fulfilled, that we in our humble walk will be able to reflect some credit and glory upon Auburn as we wax in wisdom and experience, but not (grant it, O Lord) in Sophomore-like vainglory and egotism.

P. M. DAVIS,
Historian.

Co-eds! Co-eds!!

SEVERAL days ago the following conversation was overheard. It was concerning two Senior Co-eds.

"Miss Kirby is a very quiet, pleasant, patronizing girl, isn't she?"

"Yes, I rather like Kirby for her calmness, courtesy, and cheerfulness."

"And she does not seem to take a peculiar fancy to any one of the girls, but appears to like one as much as she does another."

"Nor does Emma ever say much about her own affairs. I do not believe she has the least bit of conceit about her."

"Then, too, Kirby is so serene and sincere, a good friend,—I wonder what she is going to do after finishing college."

"Why, she thinks she'll teach school in far-away California—but that diamond doesn't look like that to me."

Thus the conversation drifted from one member of the class to another, till Mary said:—

"I always think of Miss Chumley in connection with Miss Kirby—because we met the two at the same time."

"Yes—well do I remember meeting her. I thought I had never met a more pleasant stranger."

"'Chummy' is an honorable, patriotic, and idealistic girl—who enjoys sport and entertainment of all kinds, particularly when she can obtain as many as two concert tickets on the sly."

"Indeed—Willie is a dear 'old girl'—if she is somewhat supercilious, and likes to have her way."

"But she's very comprehensive and makes fine grades. She seems to have no trouble in expressing what she knows—I imagine she'll make a splendid teacher."

"Perhaps she will, but—don't believe that her intent is to teach school always—for I think she's going to be the wife of a Miller."

Fräulein Pearl Argo—A "Shorter" girl there never was in college before! A Pearl of inestimable value—not able to be bought at any price. She never fails to see the jovial side of every question, and is ever ready to laugh if anything funny is even hinted at. A friendly, good-natured girl who has no secrets, never gets offended—except with the librarian—and is ever willing to perform any task assigned

to her. Pearl is a member of the Junior Class, but would much rather make a specialty of studying "Posts." However, German and French are her favorite studies. After finishing college it is her purpose to go to reside with an electrician in some large city of "The Empire State."

When the co-ed room gets too noisy for Miss Argo, she seeks the solitude of the library, where not a sound is heard; but presently she becomes absorbed in her neighbor's book and soon is chatting away at him about his English lesson(?), while he only sits, listens, and stares, occasionally inserting a few "yeas" and "nays" in her conversation. Then the assistant librarian goes blushing to her side and whispers, "Miss Argo, that English appears to be very interesting to you." (?)

Conundrum.—There is a young lady in the Senior Class who is noted for her intellectual brilliancy, her ability to talk fluently, and by her charms to entertain at least three gentlemen at the same time—by explaining to them that she has six lines of ancestors on which to join the D. A. Rs. However, she is a very modest and dignified girl, who detests publicity to such an extent that she could not attend Class Exercises because she did not like to be so conspicuous.

While a Sophomore she studied very diligently, and as a reward received distinction at commencement; but alas! in her Junior year she fell in love and was altogether unable to study for thinking that when she became a Senior she might have an escort without a chaperon. On the whole a very lovable girl—if she loves you. Her future occupation: To reside in Tuscaloosa and be a—school-teacher. Can you solve this?

Answer. Lady Meriwether Harvey.

"Lone Star Girl," Senorita Goldie Miller.—This golden girl comes to us from far-off Texas. She is very wealthy as far as name and hair go. She continually serves the Co-eds as a Miller grinding out dry wit which produces a smile around the charmed circle of nine.

Miller is quite fond of her classmates, but she—like most girls—has some favorites. Therefore, she is a frequent visitor to the Post Office—for the money-order clerk is quite an attraction. Goldie, our dancing Co-ed, is a very quiet, modest girl, who never talks much, but when she does begin, one may expect to hear a good speech, or something witty.

She is a happy, free-hearted person, who studies when her inclinations are in that direction. However, she must have liked to study sometime in the past, for she possesses a diploma and a first grade certificate.

Goldie tells us that she has resolved to remain a Miller throughout her life,—but I cannot believe her; for what has become of that red-headed Holle—man? Then those frequent letters from afar have some meaning.

It is the close of a long, sultry summer day early in September of 1905 when the train leaves a quiet little town of Indiana. Among the passengers is a tall, black-haired, brown-eyed maiden, whose destination is that busy little Alabama college town, "Sweet Auburn, loveliest village of the plain." Two days later the town is reached. In a few days this girl is quite busy standing entrance examinations for college. When these are over, she enters the president's office to matriculate, and thus she inscribes her name on the register—Dessie Chlorine Ward.

She does not remain in Auburn long before she captures scores of hearts by her large, bewitching, brown eyes and charming manners. She begins to take her place in church and society. In Sunday School she has a class of boys. No great events occur in her Junior life till near commencement, then comes the moment for the enchantress to decide between a Junior and a Senior. For the time being the Junior seems to have won the victory, but finally the Senior proves to be "the man."

Three short summer months pass, and the Senior returns to the A. P. I. as a "Post." Then begin the events of Miss Ward's college life. The class officers are elected—she is chosen Class Poet;—on Class Day she covers herself with glory; statistics are taken, and she is voted the most popular Co-ed.

"Dessierene" is a sweet, friendly girl, who remains ever loyal to her Northern home, but bears no special grudge against the South. On the contrary, she is rather fond of the A. P. I. as long as there is a "boy" in it, and the height of her ambition is to get "Rich."

Miss Iralee Whitaker—"Our Co-ed," according to the Sophomores. The only Co-ed in the Sophomore Class; therefore she studies hard and makes good grades. Doubtless she'll wear a Blue Ribbon on Commencement Day.

Iralee is a genial, energetic, delightful girl of sterling worth—found to be quite charming and lovable to a certain Senior. She always spends her vacant hours in the library digging away at "Trig" or Algebra (?), for this is the Adjutant's favorite haunt. Miss Whitaker is admired and revered by the Sophomores; thereupon they elected her Class Historian. "Our Co-ed" is a veritable little queen ruling over her miniature kingdom, the Sophomore Class, and her monarch, a Senior. She appears to be quite popular among the students, but none seem to care as much for her as does the Adjutant, and on the afternoon of June fourth "Her Majesty" will grace his carriage as Battalion Sponsor.

For some time henceforth she will be busily engaged prosecuting her school duties at the A. P. I.

Junior Second Term "Rat."—"Say, Bob, can you tell me who the cunning little girl is in our class, who sometimes wears that neat dress of Junior colors? Very pleasant-looking girl—sure."

Bob.—“Why, John, have you been in the Junior Class this long and haven’t found out who that girl is? She’s our Class Poet, a noble girl, who sets a person thinking when she speaks. Her conversations are uplifting and ennobling,—she’s as true as the day is long—very practical and intellectual. She never makes less than seven I’s on examinations, and is universally admired by all the professors and students on account of her intellectuality, dignity, generosity and congeniality.”

“I’m getting impatient, aren’t you ever going to tell me who she is?”

“Well, old boy, you need not fall in love with her, for she is Miss Knapp, and I knew her first.”

“I’d just like to know what she intends to do after June, ’08.”

“Says she’s going to devote her life to the good cause of imparting her knowledge of mathematics to future generations. But, I think, her school will finally be home-making for one pupil.”

“The Auburn Girl,” Leland Cooper, the girl with auburn hair, and the only Auburn girl in her class. A candid, unassuming person who has never done anything great in the world, but always striving to reach the heights which seem to be unattainable. She tries to be content whatever her lot, and takes the happenings of the world as they come. If she has troubles she endeavors to conceal them with a smile. On account of this smile she was once called a “flirt” by one of her dear professors. To be a friend to everybody and number her friends by her acquaintances is her greatest desire.

Before she entered college she loved one boy—now she says, “God bless the boys! I love them all.”

Wanted—a future occupation.

The Auburn Young Men's Christian Association

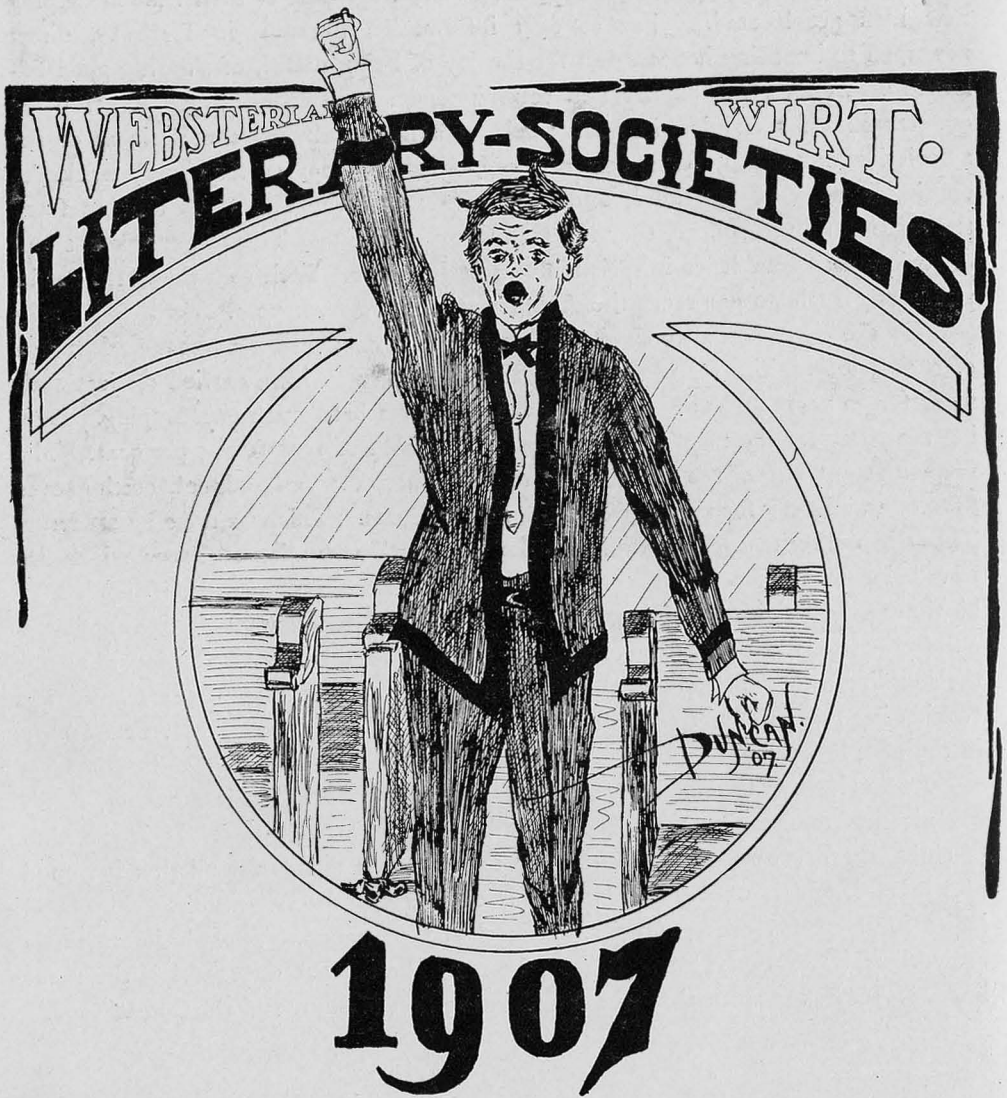

THE Association universal has for its ideal the proper development of the individual young man in body, in mind, and in spirit. Business men and scholars, preachers and farmers, all, have learned that a superior mind cannot do its full quota of work in an undeveloped body, that brute force without mental activity is of little value in any kind of labor, and that an ingenious intellect in a well-proportioned body is dangerous unless there is in the heart the will to do right. Since college men are likely to emphasize mental training to the disadvantage of physical and moral growth, it is the duty of the college associations to keep always the ideal of full, rounded manhood before those over whom it exerts an influence. That is what the Auburn association is doing. Students are urged to take part in some kind of athletics. By means of frequent social meetings the students, professors, and young ladies of the town are brought together in a pleasant way. A reading room is open to all, which contains magazines, books, and religious papers; devotional meetings are held weekly; and Bible classes, open to everybody, hold weekly meetings, where, unhampered by doctrine or sect, men discuss freely the great truths of the Bible. Thus the unformed mind of the boy is turned toward the serious duties of life and he is prepared to get the most out of life for himself and for others. This is no dream of youth, no panacea for all ills. To work a man must have health; to work effectively he must have mental training; and to work for the good of all he needs above all a Christian character. These three most needful things our members are trying to get for themselves and are helping others to get.

"Is it worth while?" we have been asked. Does the Young Men's Christian Association really do any good? The question almost answers itself. With such ideals and such purposes the organization must, of course, attract the most earnest men in college and draw them into service. Who will say that the constant association of young men with noble purposes is not productive of good? Who can estimate the good done by the Bible study, mission study, and devotional meetings? This year there are 208 members of the association, about 200 enrolled in Bible classes, 20 men in mission study, and an average attendance of 35 at the devotional meetings. The

ten or twelve leaders and forty or more active members attend to this and the various activities of the association without even so much as a thought of remuneration. Unselfishness, service to others, might be called the motto. At the beginning of the year as many as 40 or 50 members spend a very large part of their time in helping new men get located. They conduct information bureaus, haul trunks, direct new men to boarding houses,—all for the joy of being useful, of showing good fellowship. Besides, the officers and committeemen have offered them unparalleled opportunities for training in good work. Having conducted the business of the association successfully for a year or more, they are prepared for church work, for charitable work of any kind, and having overcome the difficulties that confront the organization in college, they are ready to meet the problems of government and of society with confidence in their ability to solve them. Such men the world needs, and many such go out from the Auburn association each year.

On the other hand, we should rather ask, Can we afford not to take advantage of such opportunities for usefulness? The Auburn men have carried on just such work for 32 years and never before has the prospect been more encouraging. During the past year the membership increased over that of 1905-6, 165 per cent. The finance report shows the expenditure of over \$600.00. A handbook costing over \$100.00 was issued for the benefit of the new students. This was done by students. Those in authority are not willing to let this work go undone. Preparations are now being made to secure a general secretary who can devote most, if not all, of his time to the activities of the association. It is hoped, too, that committee appointed a few years ago for the purpose of raising a building fund will use all powers to secure the building within a short time. The president and members of the faculty are considering these things and we may expect better facilities for Y. M. C. A. work in the next few years.

As we have seen, the Young Men's Christian Association is a young men's organization for young men. It is a college men's organization. It is the club of clubs, the best and most important of them all. It stands for all that is good and helpful, and is opposed to all that is dishonest and uncharitable. Manhood is its ideal—a perfect, symmetrically developed manhood. Though its methods are various, its examples many, it must be remembered that the model is the manliness of Jesus, the spirit that was found in the Son of Man and the Son of God.

All five years long we've fought a fight,
In the making of a pass,
And our glory lies not in our deeds,
But in staying with the class

Full many a score we started out,
A diploma to obtain,
But to only five are such dreams realized,
Only five efforts have not been in vain.

We stand a model to all Sub-Fresh,
We, whose strivings were earnest and true,
Sub-Fresh, our record of five hard years,
With work, is the record for you.

"I've been Working on a Levee."

Who's Who in Auburn

BY having the student body to cast their ballots, and by a careful and unprejudiced count of these ballots, we have been able to determine the following facts, which will no doubt cause the reader to think that the Auburn students have some very peculiar tastes, but he will just consider these tastes as jokes.

The average age of the Auburn student is 19 years, one month, and 15 days. He is five feet and nine inches in height, weighs 144.6 pounds, wears a number 6 $\frac{2}{3}$ shoe, and a number 7.02 hat. His favorite profession is Electrical Engineering, and Mathematics is his favorite study, while his favorite recreation is dancing with Evelyn Nesbit Thaw, while a brunette is playing "St. Louis Tickle" on a piano. His favorite refreshment is "Booker's Seven-Year-Old Rye," or "The Brand That Made Tuskegee Famous."

Football is the favorite game, but baseball is a close second. There are also a number of basketball enthusiasts.

The motto is, "Do others before they do you."

Forty-one per cent of the students dance.

Now we will consider the individuals and the impressions they have made on the student body:

There is Mike Bulger, the laziest man and the most confirmed loafer in college. He never works except when "Red" Prowell tells the truth, or when Stutzemuller is not studying, and that is so seldom that Mike never leaves the Kandy Kitchen except to go to Opelika or to his meals.

The beaming countenance of "Red" Cowden under a canopy of crimson hair proves to be the most displeasing to the eye, but "Co-ed" Prather, with his large round face and locks of greenish yellow, is a close second.

Oh! Isn't Mr. Burgess the handsomest man, though? Well, a large number of the students, including the ladies and himself, think so, but Wilkinson and his loyal supporters think different. However, "Shag's" beauty has the greatest number of admirers.

It is hardly necessary to say who is the most conceited student, for most of you have seen E. A. Wright, and anybody who has ever seen "Ed" will never have any doubts but that he is the man.

While the "Judson Glee Club" was here, it was hard to tell whether Col. Patrick or "Shag" Burgess was the biggest flirt, but taken in general, "Shag" is the biggest flirt in college, not even excepting the Commandant.

Sergeants J. L. Skinner, H. W. Allen, and Howard are all popular, but Skinner let one more man out of roll call than Allen did, thereby winning first place in the close race for the most popular noncommissioned officer. Allen and Howard being very close second and third.

The race for the most popular commissioned officer was a warmly contested one between "Bill" Lacey and "Guy" Lipscomb. But "Bill" won by a small margin.

Here comes Prof. "Bill" Stokes again. He is just as regular as clockwork—not the college clock, however. He gets greedy and takes all the votes for the most popular instructor, not giving the other instructor a chance to show what they can do.

It is strange that A. D. Elsberry, one of the smallest "runts" in college, should be the biggest eater; nevertheless, it is a fact. If Arthur had the capacity for thinking that he has for eating, he would be as intellectual as Perdue or Scarbrough, who are the two most intellectual men in Auburn.

"Brock" Tabor, in his fruitful attempt to be the biggest dude, made the best attempt at raising "sideburns." Do you think they improve his looks? If so, encourage him to keep the good work going. Chambers, and A. H. Skinner also made desperate attempts at "sideburns," and Tom Park tried hard to be the biggest dude.

Thagard is the biggest boot. Monk's ability as a boot is known by everybody from the Sub-Fresh Class to the Faculty. However, Gotlieb and Burgess have somewhat of a reputation in that line too.

Perdue has climbed to the top in spite of his bad habits. He has succeeded in making the students believe that he is the greatest Y. M. C. A. man, so we will not publicly expose him. Ask "Kid" Collier about him.

Prof. Crenshaw won first place in the race for the most popular professor, and Dr. Petrie took second place.

Prof. C. A. M. Weber, by his very frequent visits to the south end of town, has created the impression that he is the most desperate lover. But who or what does he love? Is it money or is it a "pearl?" Some of us are inclined to believe that it is the "pearl."

Go to the Kandy Kitchen tonight, boys, if you want to get your money's worth. Something entertaining,—something funny,—something beneficial. A great show: don't miss it. The chance of your life.

1st Act:—R. J. Swart, or better known as "Windy," the greatest talker in the

universe—Auburn,—will entertain you for one hour—or longer, if you don't stop him. In case of accident to "Windy's" air chamber, Zip Sommer will act his part. "Zip" is also widely known for his ability as a "wind pusher."

2d Act:—Penton, the strongest man, or the Samson of the present age, will give an exhibition of his great strength by showing you how to go through the University's line. Will he? Did he? Yes? No?

3d Act:—N. B. McLeod, the greatest orator af the day, will deliver an oration that was prepared by "Kid" Collier, the greatest writer that ever pushed a pen,—in Auburn, this year.

Specialties between acts by "Tee Square" Ellis, the wittiest man that ever trod the boards,—in the Kandy Kitchen.

Manager Lazenby will not be present at the performance tonight, as he is out "doing society." You know he is the greatest society "rat."

"Bob" Ware, of football, basketball, and Faculty Avenue fame, is the most popular athlete, with Sam Weems, the wonderful baseball twirler, second.

Miss Ward, our charming "Yankee girl," is the most popular Co-ed, but when it comes to being popular, all of them are there with the "goods."

Wilkinson, or better known as "Wilkie," wins in the race for the most popular student, by a large majority.

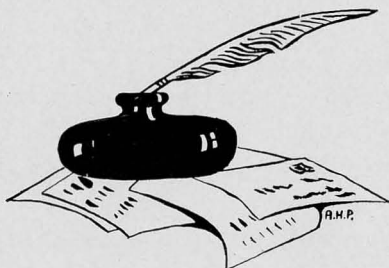

Killebrew is the most popular postgraduate, with "Poker" Renfro second.

"Judge" L. Emerson is the most solemn student, with Hughes second.

L. T. Shook says, "Give me my pipe or give me death." Shook is the greatest smoker that ever trod the campus with a pipe in his mouth.

E—N—D

C. B. RICHARDSON,
Statistics Editor.

The Philosopher

I.

I will not work when I can shirk,
For working is not best:
Let those who labor get the wealth,
And I'll get all the rest.

II.

What if I wear my same old clothes
In sunshine and in rain?
When I have worn my trousers out,
I'll wear them in again.

III.

Some politicians change their coats:
I'm never changing mine;
Let fickle fortune do her worst
I never will repine.

IV.

I'll laugh at poverty and pain;
I'll never moan or sigh;
Laughing will be the death of me
If ever I live to die.

THETA	METHUSELAH	JUDGE

To My Home Girl

Dear Lily Ann:
Do what I can,
I can't forget your pretty face,
As seen that day
I came away,
To find new charmers at this place.

Miss Matthie Matt,
Whose figure's fat;
Miss Trig, so angular and plane;
Miss Chemie Stree—
The charming three
Despotic rule o'er me maintain.

But Lily Ann,
As I'm a man,
I'll break these charmers, spells and chain,
And I'll come back
Rack-e-te-yack,
And see you Xmas day again.

Lily Ann's Answer

Don't think you'll make me jealous, Tom,
With all your silly talk:
That college widow, Matthie Matt,
Has dried up on the stalk.

And Chemie Stree—oh, she's one, too—
And that queer old Miss Trig—
They'll do to pass the time at school,
But they're not worth a fig.

When there at school my father wrote
About that same old three:
No Mormon he, no Mormon you,
And you'll come back to me.

Senior Class Diary

- Sept. 5—College opens—Seniors at last.
 7—All officers appear with shoulder bars on.
 9—All Seniors beat Church.
 13—Capt. Wood is taken for a Freshman.
 26—Lieut. Smith as O. D. mistakes Dr. Cary for a Freshman.
- Oct. 2—Gen. Lane tells the Senior Civils a new joke.
 9—Barnes is broke: lost money on football game and can't pay his board.
 23—Watkins gets a place to room.
 24—Wilkerson works a calculus problem.
 30—Red Prowel tells the truth.
- Nov. 3—Dress parade. Officers keep step.
 10—More money lost on football game.
 14—Clark loafs at the Kandy Kitchen ten minutes.
 29—Football season closed: Auburn beat University of Georgia out of
 last place
- Dec. 1—"Shag" Burgess passes a baby on street without noticing her.
 9—Brasfield beats Pharmacy with the rest of his Class.
 15—Exam. in Physics, Five Seniors passed.
- Dec. 21—"Count" Shi succeeds in dressing in three hours and catches train
 for city of Forsythe.
 22—"Fido" Davis succeeds in getting up a flirtation with a Cox College
 girl on way home.
 25—Ripley sends a \$5.00 box of candy and gets a ten-cent handkerchief
 in exchange.

- Jan. 2—Lipscombe arrives with a trunk of ladies' wearing apparel.
 5—Perdue cuts Y. M. C. A. meeting.
 13—Shook joins the Y. M. C. A.
 23—Senior Mining Class attends Elec. recitation.
- Feb. 5—Whitner gets to morning Roll Call on time.
 9—"Zip" Summer and Swart have a heated argument on the value
 of hot air.
 18—McLeod fails to make a speech at class meeting.
 27—Elsberry is sick: didn't eat but twelve biscuits for dinner.
- March 6—"Monk" Thagard's "boat" fails to work on Prof. Wilmore.
 9—The Supreme Court of Alabama meets in Auburn, with Judge South
 all on the bench.
 15—No more "spots" in Physics.
 21—Colonel appears in his new uniform and entertains the Judson Glee
 Club.
- April 1—It was found out, that some few think Mr. R. is conceited.
 11—Mid-term exam's begin.
 13—Glomerata Board fours out.
 15—Glomerata sent to press. Thank God!

Report of Cadet Capt. G. F. Lipscomb— O. D. April 1, 1907

- STOUT, P. V.—Lieut. "C"—Riding home in express wagon.
SMITH, E. H. C.—Lieut. "B"—Pulling above wagon.

Wants

For space rates apply to Advertising Manager.

WANTED—Twenty-five bottles of soothing syrup to keep the babies quiet.—“Shag” Burgess.

WANTED—Ranch to swear he was insane.—Red. Prowell

WANTED—To know why George Palmer is called papa.

WANTED—Coaching, by Nick Carter, in detective work.—Adams and Cowden.

WANTED—A uniform cap.—Poker Renfro.

FOUND—An excellent recipe for turning hair gray. For information apply to Board of
Editors Glomerata.

WANTED—Ed Bragg to stay away from Faculty Avenue.—Bob Ware.

WANTED—Some one to tell him he is handsome.—Dan Wilkinson.

WANTED—Same.—Red Cowden.

FOR SALE—My abilities as baseball coach.—R. J. Swart.

WANTED—Something to eat.—A. D. Ellsberry.

LOST—Several passes on final examination. When last heard of were in possession of Prof.
Southall. By returning same, he will greatly oblige astronomy class.

LOST—All our love for the University of Alabama. Whoever has it is welcome to it. Au-
burn Baseball Team.

FOUND—The key to somebody's heart. Owner can have same by identifying his property.—

A Co-Ed. P. S.—Not more than forty applicants can be accommodated at one time.

WANTED—To know the capacity of Dewitt Gibson's and Arthur Ellsberry's appetites.—

Bragg's Ranch.

WANTED—A Junior who did not have spots on second term examinations—Professor South-
all.

WANTED—To know why Shug Dixon uses an umbrella.

WANTED—Commencement.—Everybody.

WANTED—No more Glomerata.—Board of Editors.

WANTED—The ladies to know that he is a man.—Kid Collier.

WANTED—Another banquet.—Mining Engineers.

WANTED—An old-time revival.—M. W. C.'s.

WANTED—To know what has caused "Alex" to reform since his Sophomore year.

WANTED—A vessel to hold his winnings—"Breck" Barnes.

Answer These

How often have we heard the complaint of the impractical nature of examination questions propounded by our professors! How often we have longed for less theory and more of the problems that can be solved by the application of our boundless (?) common sense! And so, as a benefit to the student body, and as a hint to the hard-hearted faculty, we have endeavored to set forth a few examples of the future examination paper, the nature and solutions of which we rest assured are familiar to all Auburn students.—Editor's note.

I.

Required the tensile and compressive strength of the average Auburn biscuit. (Data too familiar to be quoted.)

II.

What effect will the sound waves caused by the vibrations of the half-hour bell ringing at 7:15 A. M. have on the peace of mind of sleeping student? State carefully and fully.

III.

When you do, why do you? When you don't, why not? If so, why so? if not, why not? State how, when, where.

IV.

A soda check falling from infinity on night of February 30th, 11:51 P. M., will acquire what velocity upon reaching roof of gymnasium? What velocity at 10:10 A. M., same date? Explain carefully; draw nice, accurate diagram.

V.

Explain theory of increasing weight of Springfield rifle, after it has been carried about drill grounds for several hours.

VI.

A man walks from Auburn to Opelika and back. His stay in Opelika is of two hours' duration. Plot neatly and accurately his course, both on first and second portions of trip. Which is more direct?

VII.

What can you say of Mathematics? [NOTE—The problem is stated: "What can you *SAY*." Please don't *WRITE* your opinions; they may not look well in print.]

VIII.

Tell *WHAT YOU KNOW* about any subject whatever? [As this is necessarily a hard question, requiring all the concentration of the students' faculties, the examination will close with it.

PLEDGE (also a revised version)—I state, upon my honor as a gentleman, that I have tried my darnedest to prove that I am absolutely and totally ignorant upon any subject whatever.

“Au Revoir”

I.

“My days are numbered, I must go,”
Quoth Nineteen Hundred Seven,
“To join the phantoms of the past,
Within that far-off heaven.”

II.

A good year I have been to some,
To others, very bad,
Many regret to see me go,
And not a few are glad.

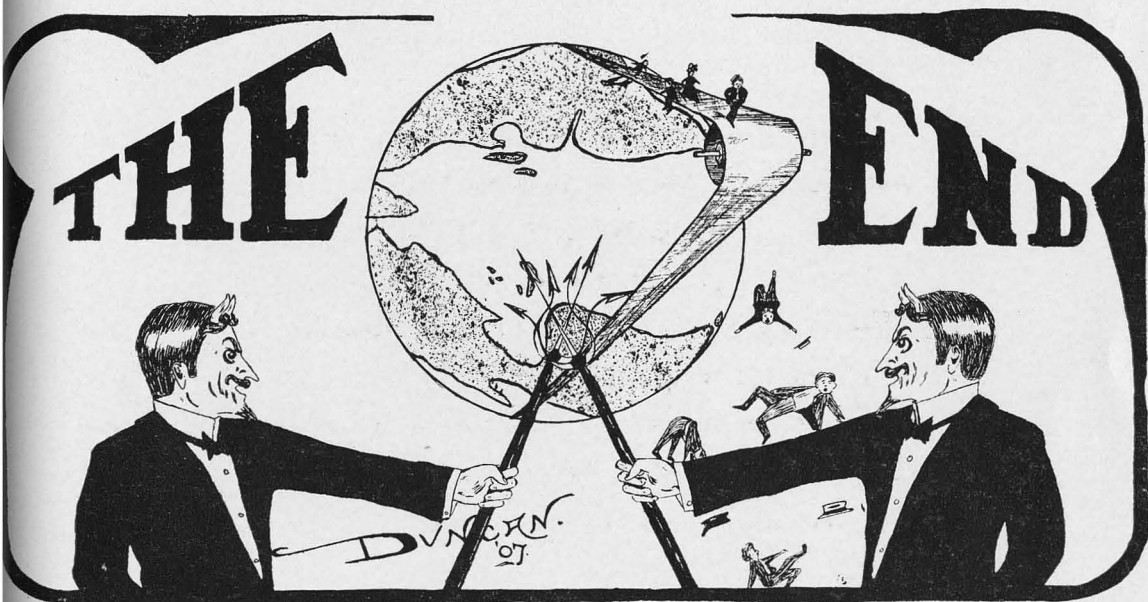

III.

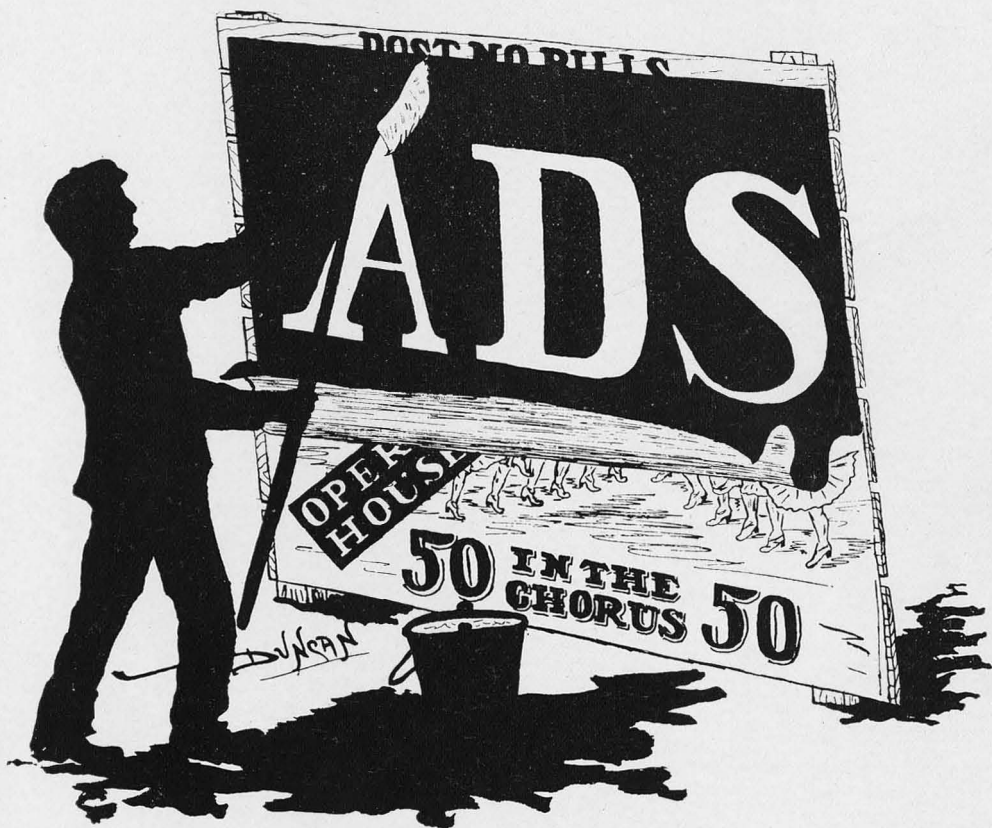

’Tis ever thus with human kind:
All never are agreed;
For some will praise what others blame,
Some shun what others need.

IV.

And so with smile and frowns and tears,
With darkness and with light,
To suit the varied moods of men,
I vary my ‘Good night.’ ”

With this we leave you; this is our good-
bye to the joys and sorrows of Auburn Col-
lege life. And whether praise or blame has
been the part of this Glomerata, the farewell
token of the Class of 1907, we hope that you
will consider it an earnest effort to keep Au-
burn ever in mind, and thus repay in some
small way the debt of love, honor, and rever-
ence that we owe to our alma mater.

Highest Awards

Grand Prize, St. Louis, 1904

Gold Medal, Portland, 1905

Alabama Polytechnic Institute

OPENS WEDNESDAY, SEPTEMBER 4TH, 1907

COURSES OF INSTRUCTION : The courses of instruction include the Physical, Chemical, and Natural Sciences, with their applications ; Agriculture, Mechanics, Astronomy, Mathematics, Civil and Electrical Engineering, Mining Engineering, Drawing, English, French, German, and Latin Languages, History, Political Economy, Mental Science, Physiology, Veterinary Science, and Pharmacy. There are eight degree courses: (1) Civil; (2) Electrical; (3) Mechanical; (4) Mining Engineering; (5) Agriculture; (6) Chemistry; (7) Pharmacy; (8) Latin-Science.

LABORATORY INSTRUCTION : Laboratory instruction and practical work are given in the following departments: I, Chemistry; II, Engineering, Field Work, Surveying, etc.; III, Agriculture ; IV, Botany; V, Mineralogy; VI, Biology; VII, Technical Drawing; VIII, Mechanic Arts; IX, Physics; X, Electrical Engineering; XI, Veterinary Science; XII, Mechanical Engineering; XIII, Pharmacy; XIV, Mining Engineering; XV, Horticulture; XVI, Entomology.

ATTENDANCE : The attendance last year was 600, representing twelve States and three foreign countries; 64 counties of Alabama were represented.

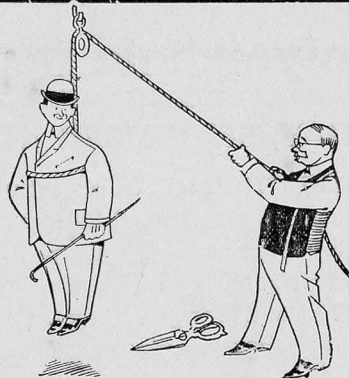

LOCATION : The College is located in the town of Auburn, sixty miles east of Montgomery, on the line of the Western Railroad.

BOARDING : The College has no barracks or dormitories, and the students board with families of the town of Auburn, and thus enjoy all the protecting and beneficial influences of the family circle.

EXPENSES : There is no charge for tuition for residents of Alabama. Incidental fee per session, \$5.00; library fee per session, \$2.00; surgeon's fee per session, \$5.00; laundry fee per session, \$12.50; laboratory fees in junior and senior years, \$5.00 per laboratory; board per month, \$12.00 to \$15.00. At houses rented by the College, board can be secured at \$11.00 per month. These fees are payable on matriculation.

SPECIAL ATTENTION GIVEN MAIL ORDERS

Beautiful forms and compositions are not made by chance, nor can they ever, in any material, be made at small expense.

A composition for cheapness, and not for excellence of workmanship, is the most frequent and certain cause of the rapid decay and entire destruction of arts and manufactures.

—Ruskin

OUR claim to your consideration lies in the fact that we have applied to our own business the thought contained in this quotation from one of the world's greatest thinkers and practical workers.

If there is anything attractive beyond the ordinary, in the page arrangement, cover decoration, presswork, and general harmony which distinguish our work, be assured it has not been due to chance.

We leave nothing to chance. Every line, page, volume, as it comes from our establishment is the result of a carefully laid, conscientiously executed plan.

The thought and the supervision which our system provides is your guarantee of excellence.

If you have anything to be printed, write us; if we undertake it we will do it well.
