

GOOGLE POWERS ICE

Googlers demand Safety & Transparency

→ Sign the petition @ googlers-against-ice.com ←

What we know:

- Cloud helps stitch together Customs and Border Protection (CBP) surveillance systems *and* powers Palantir's ImmigrationOS which Immigration and Customs Enforcement (ICE) uses to track immigrants
- Google GenAI is being used by Department of Homeland Security (DHS) and CBP
- The Play Store has blocked the most effective ICE tracking apps
- YouTube has been running ICE recruitment and "self-deport" ads
- Despite recent murders at the hands of ICE and CBP, Sundar has remained *silent*

What we demand:

1. *Acknowledge* the danger and violence that workers face each day
2. *Host* an emergency Q&A session for workers regarding our DHS & military contracts
3. *Protect* all Googlers — from cafeteria workers to data center employees
4. *Disclose* ties and declare red lines around use of our products for state violence and repression
