

Height Request for Wisteria Pergola

Property Owner: David Fang

Date: September 30, 2022

Project Site: 231 Morrison Avenue Landscape Pergola for Wisteria

Request for Permission - to allow 10' – 4" height for my Wisteria Pergola for Building Permit Application B22-001660

Reasons for my Request:

1. Wisteria is a genus of flowering plants in the legume family, Fabaceae (Leguminosae), that includes ten species of woody twining vines that are native to China, Japan, Korea, Vietnam, Southern Canada, the Eastern United States, and north of Iran. They were later introduced to France, Germany and various other countries in Europe. Some species are popular ornamental plants.
2. The flowers have drooping racemes that vary in length from species to species. *W. floribunda* (Japanese wisteria) has the longest racemes up to 90 centimetres (35 in).

Wisteria Flowers are usually drooping racemes with length:

Landscape Pergola for wisteria will need sufficient height to manage drooping racemes.

Your understanding and favorable reply on this matter will be greatly appreciated!

Thank You Very Much!

FYI:

These two pictures illustrate the second generation of my wisteria growing on my side fence –

Wisteria flowers with drooping racemes are evidence for my pergola additional height Request.
