Addendum No. 2 to IFB #26-51

Questions and Answers

Below are answers to questions raised during the question period. Note the IFB package has been updated and reposted to the website.

The bid tabulation form from REBID IFB 25-69 Supply and Delivery of Stone & Gravel and Transportation & Disposal of Waste Material is attached.

Question 1: For clarification purposes a quantity of 1,000 twenty-ton truck loads of 3/4" crushed stone would equate to 20,000 tons of 3/4" crushed stone required for the project, and 2,500 twenty ton truck loads of 1 1/2" gravel would equate to 50,000 estimated tonnage for 1 1/2" gravel?

Answer: The estimated quantity of 3/4" gravel is 1,000 tons. The estimated quantity of 1 1/2" gravel is 2,500 tons.

Question 2: In Section II: Waste Disposal, the excavated street work spoilage is not labeled with a unit of measurement, please clarify if the quantity of 2,500 is twenty-ton truck loads or if it is something different?

Answer: The estimated quantity of spoilage is 2,500 tons.

Question 3: Can you please clarify rules for award?

Answer: The contract shall be awarded to the responsible and responsive Bidder submitting the lowest total price for the 3-year period. The contract will be awarded within ninety (90) days after the bid opening. The time for award may be extended for up to 45 additional days by mutual agreement between the City and the apparent lowest responsive and responsible bidder.

Question 4: Are these quantities a budgetary dollar value or will the unit price prevail on any overages as specified in bid document "Unit Price will govern"?

Answer: The vendor is required to provide the products and services at the unit prices contained in the price form.

Question 5: Are your quantities realistic for this contract? Are these the quantities you have used in the past?

Answer: Quantities are based on previous spending and the City expects the values contained in the price form during the course of the contract.

Question 6: Estimated quantity may increase/decrease depending on the need. In case the additional quantity is required, unit price will govern. Can you please clarify if unit prices will be governed if quantities are substantially increased? Will there be appropriated funds?

Answer: Quantities are not anticipated to substantially vary from the bid form. The City has estimated contract to cost \$295,000 annually and has budgeted accordingly.

Addendum No. 2 to IFB #26-51

Question 7: Will the size of the spoils coming out asphalt and concrete be a maximum of 1ft by 1ft, the industry standard?

Answer: No, there is no expectation that the City will break up excavated material into smaller or uniform sizes.

Question 8: Section II – Waste disposal location is listed as Somerville DPW yard 2 located on Charles E Ryan Road. Will the contractor be required to have a machine on-site to load spoils onto the contractor’s disposal trucks or will the City of Somerville provide resources to load the waste?

Answer: The City will provide assistance in loading spoils.

Question 9: If the City of Somerville provides the loading of waste, what is the time contractor’s should assume the trucks will be on-site being loaded?

Answer: The assumed time to be on site for loading is 7:30am on the day requested by the City.

Question 10: Please clarify the unit of measure and quantity on the bid item for ¾” crushed stone, is it 1,000 tons of stone delivered to the site or 1,000 20-ton truckloads delivered to the site?

Answer: The estimated quantity of ¾" gravel is 1,000 tons.

Question 11: Please clarify the unit of measure and quantity on the bid item for 1 ½” gravel, is it 2,500 tons of gravel delivered to the site or 2,500 20-ton truckloads delivered to the site?

Answer: The estimated quantity of 1½" gravel is 2,500 tons.

Question 12: Please clarify the unit of measure on the bid item for excavated street work spoilage, is it 2,500 tons of exported off site?

Answer: The estimated quantity of spoilage is 2,500 tons.
