**1. PROJECT OVERVIEW**

**This proposal outlines arboricultural services to enhance safety, tree structure, and long-term tree health at Conway Park. All work follows ANSI A300 standards.**

**Park Summary and Overview: Pruning/Removal needs.**

All trees listed should be pruned to provide 6’-8’ of clearance off the buildings, and fixed structures, as well as raise 8’-10’ over the walkway and lawn areas. Remove dead branches 2” and larger, remove apparent broken branches. We identified multiple trees with potential girdling roots and compacted soil that we recommend Air Spading and Root Pruning. There are young trees around the field that need soil and mulch added. A Soil Sample will be taken from multiple points throughout the park and submitted for testing. We recommend a safety Inspection on the Zelkovas every (2) years to inspect weak unions to ensure they are not splitting.

**Proposed Start and End Date: 4/20/26 – 4/24/26 7:00am-4:00pm**

**Park can remain open as we will cone off our work areas from pedestrians with work zone cones and caution tape where needed.**
