1. PROJECT OVERVIEW

This proposal outlines arboricultural services to enhance safety, tree structure, and long-term tree health at Cummings School. All work follows ANSI A300 standards.

Park Summary and Overview: Pruning/Removal needs.

All trees listed should be pruned to provide 6'-8' of clearance fixed structures and buildings, as well as raise 8'-10' over the walkway and lawn areas. Remove dead branches 2" and larger, remove apparent broken branches. We identified multiple trees with potential girdling roots and compacted soil that we recommend Air Spading and Root Pruning. The (3) trees against the building need pavement removed to increase the tree well area. A Soil Sample will be taken from multiple points throughout the park and submitted for testing.

Proposed Start and End Date: 5/4/26 7:00am-4:00pm

Park WILL need to be closed during working hours.
