NARRATIVE:

MetroPCS is proposing to modify an existing wireless communications facility at an existing building located on Weston Avenue, Somerville, Massachusetts. The installation will consist of four proposed dish antennas mounted to the existing building penthouses and equipment screen wall. The proposed dish antennas, total of four, will be mounted to the building penthouses and equipment screen wall at 88'-0" & 94'-0" AGL.

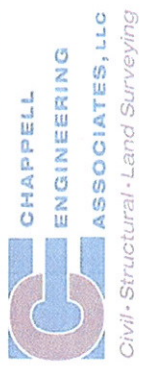

To accurately depict the proposed installation, Chappell Engineering Associates performed photo simulations of the site from several different locations. An existing condition and where visible a proposed condition photo are included for each location. The proposed condition photo shows the approximate location of the proposed dish antennas mounted to the penthouses and equipment screen wall.

A photo locations map is also included as part of this package. The locations of the photos are depicted on this map.
