© 2026, Mabbett & Associates, Inc.

ACKNOWLEDGEMENT

Mabbett & Associates, Inc. (Mabbett®) prepared this ASTM International *Standard Practice for Phase I Environmental Site Assessments E1527-21* Phase I Environmental Site Assessment (Phase I ESA) of the approximately 1.97-acre subject property identified as Winter Hill Community Innovation School at 115 Sycamore Street in Somerville, Middlesex County, Massachusetts. Mabbett prepared this report under subcontract to Perkins Eastman Architects DPC (Perkins Eastman) for the Winter Hill Community Innovation School Architectural Feasibility Study (FS).

This Phase I ESA has been prepared for use by Perkins Eastman and Somerville Public Schools. Use of this report, in whole or in part, at other locations, or for other purposes, may lead to inappropriate conclusions; Mabbett does not accept any responsibility for the consequences of such use(s). Furthermore, reliance by any party not identified in the agreement, for any use, without our prior written permission, shall be at that party's sole risk, and without any liability to Mabbett.

Mabbett prepared this Phase I ESA report using reasonable efforts to identify Recognized Environmental Conditions (RECs) associated with hazardous substances or petroleum products in, on, or at the subject property. Findings contained within this report are based on information collected from observations made on the day of the subject property reconnaissance and from reasonably ascertainable information obtained from selected public agencies and other referenced sources.

Mabbett declares that, to the best of our professional knowledge and belief, the Mabbett staff who performed this Phase I ESA meet the definition of *Environmental Professional* as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312, and these Mabbett staff have the specific qualifications based on education, training, and experience to assess a *property* of its nature, history, and setting. Mabbett has developed and performed all of the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

This Phase I ESA Report has been prepared by:

Mabbett & Associates, Inc.
Cassidy Way, QEP, CHMM
Project Environmental Scientist/Project Manager

This Phase I ESA Report has been internally reviewed and approved for submittal by:

Mabbett & Associates, Inc.
Michael L. Bloom, PG, CPG
Practice Lead, Site Assessment & Restoration, Northeast

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) Report presents the results of non-intrusive environmental due diligence activities performed by Mabbett & Associates, Inc. (Mabbett) on behalf of Perkins Eastman Architects DPC (Perkins Eastman) to support the Somerville Public Schools' (SPS) decision making regarding capital investments at the Winter Hill Community Innovation School. The address of the subject property for this Phase I ESA is 115 Sycamore Street, which encompasses approximately 1.97 acres of land in Somerville, Massachusetts.

Subject Property Description

The Winter Hill Community Innovation School was constructed in 1975 and encompasses approximately 95,000 square feet. The school building includes four stories with a penthouse utility space. The building was constructed of steel and masonry, concrete, and wood. The building consisted of unoccupied classrooms, hallways, offices, a rooftop boiler and utility room, storage rooms, bathrooms, and mechanical rooms. Interior finishes consist of concrete, fiberboard, drywall, and vinyl and ceramic tile.

The exterior of the subject property had playgrounds, a paved athletic court, and a small turf field.

Subject Property History

The subject property was historically developed with the Forster School in approximately 1867, as well as several residential structures. The Forster School Annex building was constructed by 1900. This school was razed by 1975 to make way for the current Winter Hill Community Innovation School.

Historically, there were as many as seven residential buildings and four commercial units on the subject property in addition to the school. According to city directories, building occupants included a press, a beauty salon, a laundry, and a tailor.

Surrounding Areas

The subject property was located in a civic and institutional ("CIV") zoning district for public use as a school. The site vicinity was used primarily for residential purposes with some light commercial and religious use. The site vicinity was densely developed.

Conclusions

The Phase I ESA included a reconnaissance at the subject property by Mabbett on November 13, 2025. Mabbett obtained information about environmental conditions that could potentially be considered a Recognized Environmental Condition (REC); reviewed historical maps of the subject property and vicinity; interviewed Superintendent of Buildings Matthew Bennett, who was familiar with current and recent environmental history at the subject property; reviewed environmental database listings for the subject property and vicinity; performed a review of available files from the Massachusetts Department of Environmental Protection (MassDEP); and reviewed documents provided by the City of Somerville. This information was used to develop an opinion with regard to the presence or absence of RECs at the subject property.

The Phase I ESA findings are summarized in the following list:

- **RECs**

  According to Somerville Fire Department records, a 5,000 gallon #5 fuel oil underground storage tank (UST) was historically utilized by the Forster School that was permitted in 1952 and renewed in 1972 and 1978. A plan of the subject property from 1973 showed an "oil tap" in the northern corner of the property,

just west of the original school building. No removal records were available for this UST. The Forster School was reportedly demolished in place. As such, the UST may not have been removed. The historical presence of the #5 fuel oil UST and the possible age of the UST represents a REC.

- **Historical Recognized Environmental Conditions (HRECs)**

  No HRECs were identified on or affecting the subject property.

- **Controlled Recognized Environmental Conditions (CRECs)**

  No CRECs were identified on or affecting the subject property.

- **Data Gaps**

  No significant data gaps were identified during this investigation.

- **Business Environmental Risks (BERs)**

  Regulated Building Materials: According to the 2023 Hazardous Building Materials Survey Report, documented asbestos containing materials (ACM) are present throughout the entire school. Lead based paint (LBP) was also documented to be present at the subject property. The documented presence of ACM and presumed presence of LBP represents a business environmental risk (BER) due to the added cost of abatement during future demolition or renovation of the building.

  Additionally, the City of Somerville and Somerville Public School (SPS) indicated during the pre-bid briefing that two former educational buildings were demolished in-place on the northern portion of the property and built over during the construction of the existing school building. Based on the time of the demolition and construction of the existing school building, it is suspected that ACM may be contained in that demolition debris and comingled soils located beneath the current building and the current basketball court on the northern portion of the subject property. The potential presence of buried ACM represents a BER due to the environmental premiums associated with specialized excavation protocols, mandatory air monitoring, and elevated hazardous waste disposal fees which pose a material financial impact on future redevelopment costs.

  Fill Soils: The U.S Department of Agriculture (USDA) Web Soil Survey identified the soils located beneath the elementary school and southeast of the elementary school as Urban land (i.e., urban fill). The potential for the quality of fill materials to result in elevated environmental premiums for off-site management during future redevelopment activities is considered a BER.

  Per- and Polyfluoroalkyl Substances (PFAS) Risk: Rogers Foam Corp., addressed 20 Vernon Street, was located approximately 640 feet cross-gradient to the subject property. Rogers Foam Corp has been a fabricator of latex foam since 1947, a process which may have included the use of PFAs-containing chemicals. Although there has been no documented release of PFAS to the subsurface, PFAS from foam manufacturing operations at Rogers Foam Corp may be present in subsurface groundwater at the subject property. If extensive dewatering is required during site redevelopment, the potential PFAS plume if not already underlying the subject property may be pulled onto the subject property, resulting in elevated dewatering premiums to treat and manage PFAS contaminated groundwater, which is considered a BER.

1.0 INTRODUCTION

This Phase I Environmental Site Assessment (ESA) report presents the results of non-intrusive environmental due diligence activities performed according to the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-21) at the subject property, identified as the Winter Hill Community Innovation School, encompassing approximately 1.97 acres at 115 Sycamore Street in Somerville, Middlesex County, Massachusetts. A Subject Property Locus Map is provided as Figure 1-1. A Subject Property Plan is provided as Figure 1-2. Refer to Figure 1-3 for a Subject Property and Surrounding Area Layout Map.

1.1 Purpose

The purpose of performing a Phase I ESA is to render an opinion, to the extent practical, as to whether current or historical evidence indicates the presence of Recognized Environmental Conditions (RECs) at the subject property. The Phase I ESA findings are intended to help Perkins Eastman with decision making regarding potential environmental liabilities at the subject property. The Phase I ESA was completed following the guidelines of ASTM International Standard Practice E1527-21 (ASTM E1527-21), the United States Environmental Protection Agency's (USEPA) All Appropriate Inquiries (AAI) Rule, and industry standard practice. The following paragraphs describe the different types of RECs defined by ASTM E1527-21.

ASTM E1527-21 defines a REC as:

- the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment;
- the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or
- the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

The term REC is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

ASTM E1527-21 defines a Historical REC as:

> *"A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (i.e., activity and use limitations or other property use limitations)."*

ASTM E1527-21 defines a Controlled REC as:

> *"A REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (i.e., activity and use limitations or other property use limitations)."*

ASTM E1527-21 defines a Business Environmental Risk (BER) as:

> *"A risk that can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations."*

Although the subject property is not considered "commercial real estate," the identification of BERs is considered relevant to this assessment because non-scope environmental concerns at the subject property could have cost implications on potential future development efforts by the Manchester Essex Regional School District.

1.2 Detailed Scope of Services

This Phase I ESA was completed with a level of care and skill ordinarily practiced by the environmental consulting professional currently providing similar services under comparable circumstances in accordance with the provisions of ASTM E1527-21. Any significant additions, deletions, or exceptions to ASTM E1527-21 are noted below, or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the subject property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports;
- Use of the subject property, adjoining properties, and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports, and interviews;
- Observations regarding current usage and conditions include: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, nonhazardous solid wastes, and wastewater;
- Use of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties in, on, or at the property;
- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the subject property;
- Potential for subsurface vapor migration in, on, or at the subject property; and
- Potential per- and polyfluoroalkyl substances (PFAS) at the subject property.

1.3 Significant Assumptions

No significant assumptions were made during the preparation of this Phase I ESA.

1.4 Limitations and Exceptions

Mabbett prepared this Phase I ESA report using reasonable efforts to identify RECs associated with hazardous substances or petroleum products in, on, or at the subject property. Findings contained within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from selected public agencies and other referenced sources.

No exceptions to ASTM E1527-21 were noted during this assessment.

The ASTM E1527-21 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- Uncertainty Not Eliminated: A Phase I ESA cannot wholly eliminate uncertainty regarding the potential for RECs associated with a property since no actual environmental samples are collected for analysis.

- Not Exhaustive: A Phase I ESA is not an exhaustive assessment of the environmental conditions on a property.
- Past Uses of the Property: A Phase I ESA does not require review of standard historical sources at less than five-year intervals. Therefore, past uses of the property may not be discovered.

Other limitations are as follows:

- The observations described in this report were made under the conditions stated herein. Observations were based solely upon the non-intrusive services described herein.

Users of this report may refer to ASTM E1527-21 for further information regarding these and other limitations.

Mabbett makes no representation or warranty that the past or current operations at the subject property are, or have been, in compliance with all applicable federal, state, and local laws, regulations, and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, Mabbett is not responsible for consequences or conditions arising from facts not fully disclosed to Mabbett during the assessment.

Per ASTM E1527-21, Section 6, User Responsibilities, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of RECs associated with the subject property. Failure by the User to fully comply with the requirements may impact their ability to use this report to help qualify for Landowner Liability Protections under the Comprehensive Environmental Response, Compensation, and Liability Act. Mabbett makes no representations or warranties regarding a User's qualification for liability protection under any federal, state, or local laws or regulations.

In accordance with ASTM E1527-21, this report is presumed to be valid for a 6-month period. If the report is older than 6 months, the following information must be updated for the report to be valid: (1) regulatory review, (2) subject property reconnaissance, (3) interviews, (4) specialized knowledge, and (5) environmental liens. Reports older than one year may not meet ASTM E1527-21 requirements and, therefore, the report must be updated to reflect current conditions and property-specific information. Other limitations and exceptions that are specific to the scope of this report may be found in the corresponding sections.

1.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of and may be relied upon by Perkins Eastman, the Somerville School District, or third parties authorized in writing by Perkins Eastman. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual subject property conditions may change with time, and that hidden conditions may exist at the property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of the Perkins Eastman, is at the sole risk and expense of such third party.

Mabbett makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either express or implied.

2.0 SUBJECT PROPERTY DESCRIPTION

The subject property description was researched and developed by Mabbett representative Cassidy Way, QEP, CHMM, who meets ASTM's *Environmental Professional* qualification as defined in ASTM E1527-21 and who performed a site reconnaissance of the subject property on November 13, 2025. A Subject Property Locus map is provided as Figure 1-1. A detailed Subject Property Map depicting current subject property features is provided as Figure 1-2. Refer to Figure 1-3 for a Subject Property and Surrounding Area Layout Map.

2.1 Location and Legal Description

15 Sycamore Street (the subject property) was identified by the City of Somerville Assessor as Parcel 48-D-11 and encompassed approximately 1.97 acres owned by the City of Somerville. The subject property was improved with a school structure.

2.2 Current Use and Improvements at the Subject Property

The subject property was developed with the Winter Hill Community Innovation School that was originally constructed in 1974. The school was developed with an approximately 89,410 square-foot school building with a concrete exterior.

Exterior portions of the subject property included playgrounds, athletic fields, and landscaped areas.

The subject property was accessible from Medford Street to the south, Sycamore Street to the West, Evergreen Avenue to the north, and Thurston Street to the east. Access to the subject property was restricted by fencing on select boundaries.

2.3 Surrounding Area General Characteristics

The subject property was located in a civic and institutional ("CIV") zoning district for public use as a school. The site vicinity was used primarily for residential purposes with some light commercial and religious use.

2.4 Physical Setting

2.4.1 Topography

Based on the U.S. Geological Survey (USGS) 7.5-Minute Series Boston North Topographic Quadrangle map, dated 2024, the elevation of the ground surface at the subject property is approximately 60 to 80 feet (ft) above mean sea level. The subject property was sloped downwards toward the southeast. This information was confirmed during Mabbett's site reconnaissance on November 13, 2025.

2.4.2 Geology

According to the USGS Bedrock Geologic Map of Massachusetts, bedrock underlying the general area of the subject property was characterized as sedimentary and volcanic rocks and their metamorphic equivalents, specifically Cambridge Argillite. This bedrock typically consists of gray argillite and minor quartzite with rate sandstone and conglomerate.

No bedrock outcrops were observed at the subject property during Mabbett's site reconnaissance on November 13, 2025.

2.4.3 Wetlands and Surface Water

According to the U.S. Fish and Wildlife Service (USFWS) National Wetlands Inventory (NWI) Map Viewer, no wetlands are present on the subject property of within its immediate vicinity. The wetlands map is included in Appendix A.

This information was confirmed during Mabbett's site reconnaissance on November 13, 2025.

2.4.4 Groundwater

Based on the elevation contour maps, regional topography, and the location of nearby water bodies, groundwater underlying the subject property is inferred to likely flow to the southeast towards the Charles River.

Actual groundwater flow direction underlying the subject property may vary due to the topography, presence of underground utilities such as sewers, storm drains, and heterogeneous subsurface soil conditions. Measuring the actual depth to groundwater and flow direction is beyond the scope of an ASTM E1527-21 Phase I ESA.

2.4.5 Flood Zone

The subject property was located on the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map FIRMette panel 25017C0438F dated July 8, 2025. According to FEMA, the subject property was located within an area of minimal flood hazard (Zone X). A copy of the FIRMette is provided in Appendix A.

2.4.6 Soils

The soil at the subject property underlying the buildings were classified by the USDA Natural Resources Conservation Service as Newport-Urban land complex with 3 to 15 percent slopes (627C). The urban land was mapped beneath the entirety of the subject property. A copy of the USDA soil map is provided in Appendix A.

Subject property soils that were not covered with hardscape were vegetated with shrubs, and trees. No significant soil erosion or stained soil was noted during the site reconnaissance.

3.0 SITE RECONNAISSANCE

A site reconnaissance was performed to obtain information about environmental conditions at the subject property and at adjacent properties that could impact the subject property.

3.1 Methodology

On November 13, 2025, Mabbett representative Cassidy Way, QEP, CHMM, who meets the ASTM's *Environmental Professional* qualification, met in-person with Lisa Pecora, Senior Associate at Perkins Eastman, and Mattew Bennett, Superintendent of Buildings for the Somerville Department of Public Works. Mr. Bennett escorted Mabbett during the site reconnaissance. Information provided by Mr. Bennett is incorporated throughout this report.

Mabbett walked the subject property with the purpose of assessing potential RECs, BERs, and *de minimis* conditions. The site reconnaissance efforts consisted of making visual observations of conditions on the ground surface, building exteriors, and building interiors at the subject property, with a focus on identifying sumps, drains, improperly stored chemicals, and signs of chemical spills that may serve as a conduit between the building and the environment or a potential environmental hazard. The methodology involved walking through the main areas of interest within the building, including but not limited to, kitchens, custodial closets, classrooms, chemical storage areas, and boiler room. The focus of the site reconnaissance was on areas where hazardous substances or petroleum products are or may have been stored, used, treated, discharged, or disposed; maintenance and repair areas; utility penthouses; and a representative sample of occupant spaces. Mabbett toured the exterior grounds, observing all sides of the building. Mabbett also observed the adjoining properties from public thoroughfares. No intrusive activities were performed during the site reconnaissance.

The following sections present a summary of observations made during the site reconnaissance. Representative photographs are provided in Appendix B.

3.2 Observations of Subject Property Improvements

3.2.1 Buildings

The subject property was developed with one concrete building that was rectangle shaped. The exterior portions of the property consisted of a playgrounds, asphalt and tuft athletic fields, and concrete walkways.

Observed building materials included vinyl floor tiles, concrete block walls, and ceiling tiles. Utility rooms, were present on the first floor of the Site building (water boiler and hot water tank) and on the roof of the Site building (utility penthouse; heating and cooling).

3.2.2 Stormwater

Stormwater was managed onsite through catch basins and/or infiltration. According to Mr. Hunt, floor drains drained into the municipal sewerage system. Floor drains were observed in the Site building kitchen, as well as in the utility penthouse. Storm drains observed outside drained into the municipal stormwater system.

3.2.3 Roads/Parking

The subject property was accessible from Medford Street to the south, Sycamore Street to the west, Evergreen Avenue to the north, and Thurston Street to the east. The subject property did not contain any parking areas.

3.2.4 Heating and Cooling Sources

The subject property was heated via natural gas and steam. The subject property was cooled via chiller units.

3.2.5 Sanitary Sewerage

The subject property was connected to the Somerville municipal sewerage system.

3.2.6 Water Supply

Winter Hill Community Innovation School obtained its potable water from the Massachusetts Water Resources Authority (MWRA). The MWRA obtains its water from the Quabbin Reservoir, the Ware River Watershed, and the Wachusett Reservoir. Water is treated at the Carroll Water Treatment Plant and Storage prior to being transported to Somerville.

No potable water wells were observed on the subject property during the site reconnaissance. According to the MassDEP well database, an irrigation well was identified at 64 Thurston Street, northeast adjacent to the subject property.

3.3 Underground Storage Tanks (USTs)

No evidence of past of present USTs were observed at the subject property during the site reconnaissance. Documents containing evidence of a 5,000 gallon #5 fuel oil UST was reviewed at the Somervile Fire Prevention Office (see section 5.1.7).

3.4 Aboveground Storage Tanks (ASTs)

No evidence of ASTs was observed at the subject property. Documents containing evidence of 275 gallon fuel oil ASTs at the property's historical residential addresses was reviewed at the Somervile Fire Prevention Office (see section 5.1.7).

3.5 Hazardous Substance Use, Storage, and Disposal

The subject property did not maintain a designated hazardous waste storage area to temporarily store waste. Chemicals observed included paints, cleaners, and boiler chemicals. No improperly used, stored, or disposed of hazardous substances were observed during the site reconnaissance, apart from the three five gallon drums of oil observed in the utility penthouse.

3.6 Non-Hazardous Solid Wastes and Disposal

No non-hazardous solid waste was generated at the subject property due to the closure of the school. An empty dumpster was observed along the southern boundary of the subject property during the site reconnaissance. No improper handling of non-hazardous solid waste was observed during Mabbett's site reconnaissance.

3.7 Electrical Equipment and Polychlorinated Biphenyls (PCBs)

The Winter Hill Community Innovation School representative was unsure if PCB-containing oils were ever used at the subject property. Electrical transformers and hydraulic reservoirs observed at the subject property visually appeared to be in okay condition with no signs of leakage. The potential presence of PCBs could not be verified during the site reconnaissance.

A Hazardous Building Materials Survey Report was conducted at the subject property by Axiom Partners, Inc. and Haley & Aldrich, inc. in 2023. This report suspected PCBs may be present in light ballasts at the subject property; however, they were unable to be tested due to height constraints. PCBs were not detected in sampled caulking.

3.8 Stained Surfaces and Distressed Vegetation

Mabbett observed stained surfaces in the utility penthouse adjacent to heating and cooling equipment. Speedy dry had been applied on top of the stained surfaces. Floor drains were not observed in the immediate vicinity of these suspected releases. No distressed vegetation was observed at the subject property.

3.9 Underground Structures

Mabbett observed two grease traps located beneath kitchen sinks that drained into the municipal system. No other underground structures were observed at the subject property.

3.10 Per- and Poly-fluoroalkyl Substances (PFAS)

Mabbett conducted an assessment of potential sources of PFAS at or near the subject property. PFAS environmental contamination may come from a number of sources; including, but not limited to firefighting foam, waterproofing materials, wetting agents, and other industrial and consumer products. Department of Defense (DoD) facilities have also been associated with high levels of PFAS in groundwater due to training and firefighting activities, as well as other facility activities that are part of the DoD's mission. As a result, PFAS are nearly ubiquitous and have been found in rainwater and encountered in many environments and media including groundwater, soils, surface water, sediment, and human and animal tissues.

Mabbett searched USEPA, and other sources for identified PFAS sites within and in vicinity of the subject property (USEPA, 2026; EWG, 2026; Northeastern, 2026). The closest known PFAS sites was the Cambridge Water Department (EWG).

Mabbett found no reference to the use of PFAS-containing materials, historical fires, or firefighting responses at the subject property or adjacent properties. Mabbett found no specific potential sources of PFAS at the subject property or adjacent properties, or indications of past property uses associated with PFAS use from the historical data, apart from Rogers Foam Corporation at 20 Vernon Street in Somerville, Massachusetts. Although no release of PFAs has been detected or reported at the property to-date, the property has operated as a fabricator of latex foam since it opened in 1947. As such, the potential presence of PFAS at 20 Vernon Street, approximately 650 feet west and cross-gradient of the subject property, cannot be ruled out. Although there has been no documented release of PFAS to the subsurface at 20 Vernon Street, PFAS from foam manufacturing operations at Rogers Foam Corp may be present in subsurface groundwater at the subject property. If extensive dewatering is required during site redevelopment, the potential PFAS plume, if not already underlying the subject property, may be pulled onto the subject property, resulting in elevated dewatering premiums to treat and manage PFAS contaminated groundwater, which is considered a BER.

The available information reviewed by Mabbett did not identify historical releases of PFAS at the subject property.

4.0 USER PROVIDED INFORMATION

The following section summarizes the Phase I ESA User Questionnaire completed by the City of Somerville Director of Capital Projects, Ralph Henry, City of Somerville Project Manager, Debora Mitrano, and City of Somerville Facilities Supervisor, Michael Bowler. The completed User Questionnaire is provided in Appendix C.

4.1 Owner, Property Manager, and Occupant Information

The subject property is owned and managed by the City of Somerville and occupied by the Winter Hill Community Innovation School.

4.2 Title Records

The City of Somerville representatives were not aware of any deed restrictions, environmental land use restrictions, environmental liens, or activity and use limitations on file for the subject property.

4.3 Environmental Permits and/or Violations

The City of Somerville representatives were not aware of any state- or municipal-issued violations for the subject property.

4.4 Specialized Knowledge or Experience of the Owner

The City of Somerville representatives did not have any specialized knowledge of the subject property.

4.5 Significant Valuation Reduction for Environmental Issues

The City of Somerville representatives were not aware of significant valuation reduction due to environmental issues at the subject property, which is owned by the City of Somerville.

4.6 Reason for Performing Phase I ESA

This Phase I ESA is being completed to support the Somerville Public Schools' (SPS) decision making regarding capital investments at the Winter Hill Community Innovation School.

4.7 Other Owner-Provided Documents

The City of Somerville provided Mabbett with copies of August 2023 asbestos surface wipe sampling results and air sampling performed at the school following the disturbance of non-friable asbestos material in the stairwells of the school building.

Air samples collected and analyzed by Phase Contrast Microscopy (PCM) collected from various interior building areas were found to be well below the 0.010 f/cc standard. Asbestos was also not detected in the 18 surface wipe samples submitted for laboratory analysis. These reports are included in Appendix A.

No other owner-provided documents were available for Mabbett review.

5.0 RECORDS AND DATABASE REVIEW

Mabbett obtained and reviewed available environmental records for the subject property and adjoining properties. The records were reviewed to identify properties where chemical releases were reported to have occurred and to assess whether those releases create a REC at the subject property.

5.1 Standard Environmental Records

Mabbett contracted Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut, to conduct a search for available federal and state environmental records in compliance with ASTM E152721. EDR provided Mabbett with the database search results in an EDR Radius Report on January 23, 2026. EDR searched federal and state databases for records of properties with a history of a chemical release or chemical storage and located within the minimum search distance from the subject property as required by ASTM E1527-21. Records identified within these search distances from the subject property are summarized in Table 5-2. The databases for which no records were identified are presented in the full EDR report in Appendix D. The EDR report identified 111 "orphan" listings.

TABLE 5-1
Summary of Environmental Records Identified in the EDR Radius Report

Database	Records for the Subject Property	Search Distance (miles from the subject property)	Number of records within the search distance					Total Records Identified
			<1/8 mile	1/8 – 1/4 mile	1/4 – 1/2 mile	1/2 – 1 mile	>1 miles

NOTES:
TP = Target Property (the *subject property* per ASTM E1527-21)
NR = Not Required by ASTM E1527-21

5.1.1 Findings for the Subject Property

The subject property was identified within the MA Asbestos databases.

In 2010, approximately 10 linear feet (LF) of asbestos containing materials (ACM) was removed from the subject property. In 2011, approximately 20 LF/SF of ACM was removed from the subject property. These permits were filed under the address 58 Thurston Street.

In 2018, approximately 4,000 LF of "other window caulking glazing" and 400 SF of non-friable roofing materials were removed from the subject property. In 2021, approximately 1,000 LF of asbestos caulking was removed from the subject property.

5.1.2 Findings for Adjoining and Surrounding Properties

Table 5-2 below describes selected properties identified in the EDR federal or state databases that are located within 0.25 miles of the subject property. Table 5-2 organizes findings by the EDR Map ID number.

As previously described in Section 2.4.3, groundwater flow at the subject property and immediate vicinity is inferred to generally flow towards the southeast. Based on this groundwater flow direction, Mabbett was able to categorize the following properties identified in EDR databases as likely to be hydrologically upgradient, cross-gradient, or downgradient from the subject property. Contaminants released at upgradient or cross-gradient properties, and where the contaminants have reached groundwater, could have the potential to migrate in groundwater beyond the boundary of that property to reach the subject property. Contaminated groundwater that migrates beneath the subject property has the potential to impact environmental conditions.

Contaminants released to soil at upgradient or cross-gradient properties may migrate beyond the adjoining/surrounding property boundaries in sediment-laden stormwater. However, stormwater from these properties would not likely reach the subject property because of the many physical obstructions between the properties and the subject property; these obstacles include but are not limited to roads, curbs, and stormwater catch basins.

Contaminants released to groundwater at downgradient properties are assumed not to be a threat to environmental conditions at the subject property because the groundwater beneath these properties flows away from, and would not reach, the subject property.

TABLE 5-2
Records Identified in the EDR Radius Report

EDR Map ID(s)	Property Name(s) and Address	Database Listing(s)	Distance from Subject Property (feet)	Direction from Subject Property	Gradient Relative to Groundwater Flow in Area	REC? (Y/N)	Basis for REC Conclusion
5	Di Tucci Lorraine 415 Medford Street	EDR HIST CLEANER	61 ft	WSW	Upgradient	N	Drycleaner in 1975. No other information.
6	EQC 43 Thurston Street 2	EDR HIST CLEANER	146 ft	SE	Downgradient	N	Drycleaner in 2000. No other information.
8	148 Sycamore Street	LUST, RELEASE	437 ft	NNE	Upgradient	N	Fuel oil UST release in 2003. Regulatory closure achieved.

TABLE 5-2
Records Identified in the EDR Radius Report

EDR Map ID(s)	Property Name(s) and Address	Database Listing(s)	Distance from Subject Property (feet)	Direction from Subject Property	Gradient Relative to Groundwater Flow in Area	REC? (Y/N)	Basis for REC Conclusion
14	Residence 8 Miner Street	LUST, RELEASE	825 ft	W	Crossgradient	N	Fuel oil release in 2005. Regulatory closure achieved.
16, 17, 18	Rogers Foam Corp. 20 Vernon St	RCRA VSQG, ICIS, US AIRS, FINDS, ECHO, MANIFEST, E-MANIFEST, AIRS, HW GEN, SHWS, RELEASE, TIER 2	640 ft	WSW	Crossgradient	BER	Fabricator of latex foam products since 1947.
19	188 Central Street	LUST, RELEASE, ASBESTOS	845 ft	NNW	Upgradient	N	Fuel oil release in 2000. Regulatory closure achieved.
29	33 Robinson Street	SHWS, RELEASE	893 ft	WNW	Upgradient	N	Fuel oil release in 2006. Regulatory closure achieved.

5.1.3 Aerial Photographs

Mabbett reviewed aerial photographs provided by EDR of the subject property and surrounding area. Aerial photographs were available for the years 1938, 1946, 1952, 1955, 1962, 1969, 1970, 1978, 1980, 1985, 1995, 2010, 2014, 2018, and 2023. Historical Aerial Photographs are provided in Appendix E. Certain details of the aerial photographs were difficult to ascertain due to the resolution and/or wide scale of the aerial photographs.

In the earliest aerial photograph dated 1938, the subject property was developed with a combination of stores, residential dwellings, and a school. The St. Ann's Parochial School was present southeast adjacent to the subject property. The subject property vicinity was very densely developed.

Between 1952 and 1969, most of the residential dwellings on the western portion of the property had been razed. By 1980, the current school structure was present. By 2010, athletic courts had been constructed on the northern portion of the subject property.

The review of aerial photographs did not definitively identify past uses indicating RECs in, on, or at the subject property or surrounding area.

5.1.4 Historical USGS Topographic Maps

Historical USGS topographic maps provided by EDR were available for the subject property, adjoining areas, and the surrounding area for the years 1893, 1903, 1943, 1946, 1949, 1956, 1970, 1977, 1979, 1985, 2012, 2015, 2018, 2021, and 2024. The Historical Topo Map Report is included in Appendix E.

The subject property was depicted as developed within the earliest topographic maps dated 1893 and 1903. The subject property and its vicinity were depicted as densely developed urban areas. By 1943, a school was depicted on the subject property, but no other individual structures were depicted on the subject property or within its vicinity.

No significant changes were observed on the subject property until 1985, at which point the current school building had been constructed. No significant changes were noted on the subject property in the remaining topographic maps dated through 2024.

The review of historical USGS topographic maps did not definitively identify past uses indicating RECs in, on, or at the subject property or surrounding area.

5.1.5 Historical City Directories

Historical City Directories provided by EDR were available for the subject property and for select addresses within the surrounding area for the years 1940, 1970, 1975, 1984, 0989, 1992, 1995, 2000, 2005, 2010, 2014, and 2022. A copy of the City Directory search is provided in Appendix E.

Year	Subject Property Listing	Notable Nearby Address & Listing
1940	407/407A Medford St – occupant names/tailor 409 Medford St – vacant 411/411A Medford St – occupant names, Foo Chin Laundry 413 Medford St – Morse A O & Son, druggists 97 Sycamore St – residential 121 Sycamore St – Forster School	389A Medford St – J&J Cleaners and Launderers 404 Medford Street – Rainbow Cleaners
1970	407 Medford St – Occupant Names 409 Medford St – Margies Beauty Salon 403 Medford St – Salco Press 97 Sycamore St – occupant names	No Notable Listings
1975	407/411 Medford St – no occupants listed 97 Sycamore St – no occupants listed	415 Medford St – Brothers Cleaners
1984	Not Listed	No Notable Listings
1989	Not Listed	No Notable Listings
1992	Not Listed	431 Medford St – Cobble Hill Laundrymat & Dry Cleaners
1995	115 Sycamore St – Somerville Teachers Association	431 Medford St – Cobble Hill Laundrymat & Dry Cleaners
2000	Not Listed	431 Medford St – Cobble Hill Laundrymat & Dry Cleaners
2005	Not Listed	No Notable Listings
2010	Not Listed	No Notable Listings
2014	Not Listed	No Notable Listings
2022	115 Sycamore St – Various individuals, Winter Hill Community School/Somerville High School	No Notable Listings

The Historical City Directory information did not definitively identify past uses indicating RECs in, on, or at the subject property or surrounding area.

5.1.6 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were requested for the subject property and surrounding areas from EDR and available for the years 1900, 1933, 1950, 1989, and 1991. The Sanborn document provided by EDR is provided in Appendix E.

In the earliest Sanborn dated 1900, the subject property was divided into seven parcels and developed with two story dwelling (97 Sycamore Street), a three story residential dwelling (103 Sycamore Street), a 2.5 story two family dwelling (107-109 Sycamore Street), two 2.5 story residential dwellings (58 and 62 Thurston Street, a 2.5 residential dwelling (62 Evergreen Avenue), and the Forster Grammar School and Forster School Annex (no listed address). Properties abutting the subject property consisted of residential dwellings and church buildings.

By 1933, the subject property consisted of six parcels of land. 97 Sycamore Street had been developed with four storefronts addressed 407, 409, 411, and 413 Medford Street. The 103 Sycamore Street dwelling had been razed and replaced with two dwellings addressed 99-101 Sycamore Street and 103 Sycamore Street. The 107-109 Sycamore Street dwelling had been razed and its land added to the school property to the north. An additional dwelling structure associated with the St. Ann's Parochial School had been constructed on the northeastern portion of the subject property. Automobile garages were constructed on three of the parcels comprising the subject property. Properties abutting the subject property consisted of residential dwellings, stores, and church buildings.

By 1950, 99-101 and 103 Sycamore Street dwellings had been razed.

By 1989, the subject property consisted of a singular parcel developed with the St Ann's Parochial School constructed in 1975 and included a gymnasium.

No significant changes were noted on the 1991 Sanborn.

5.1.7 Municipal Records

Mabbett requested current and historical environmentally pertinent information associated with the subject property from the City of Somerville in February 2026. Departments contacted included the Fire Department, City Clerk, Board of Health, Conservation Department, Archive Department, and Engineering Department.

Mabbett reviewed available permits from the City of Somerville. These permits included electrical permits, certificates of inspection, sidewalk utility permits, plumbing permits, and commercial renovation permits.

Records reviewed at the Somerville Fire Prevention Office included the following:

- 5,000 gallon #5 fuel oil UST for the Forster School that was granted in 1952 and renewed in 1972 and 1978. A plan of the subject property from 1973 showed an "oil tap" in the northern corner of the property, just west of the original school building. No removal records were available for this UST. The possible presence of the UST on the subject property represents a REC.
- 275 gallon fuel oil AST for historical address 409 Medford Street dated 1946
- 275 gallon fuel oil AST for historical address 62 Evergreen Avenue dated 1947
- 275 gallon fuel oil AST for historical address 58 Thurston Street dated 1952
- 275 gallon fuel oil AST for historical address 62 Thurston Street dated 1952
- 275 gallon fuel oil AST for historical address 97 Sycamore Street dated 1948

No fire department records were available for historical addresses 99-101 Sycamore Street, 103 Sycamore Street, and 107-109 Sycamore Street. Relevant Fire Prevention and Archive Department files reviewed are included in Appendix A.

5.1.8 Other Historical Sources

Mabbett reviewed the following historical atlas maps:

- Somerville 1874 atlas map published by G.M. Hopkins & Co.
  - The subject property was developed with the Forster Public School and four residences. Evergreen Avenue had not been constructed.
- Somerville 1884 atlas map published by G.M. Hopkins & Co.
  - The subject property was developed with the Forster Public School and six residences. Evergreen Avenue had not been constructed.
- Somerville 1895 atlas map published by G.W. Bromley & Co.
  - The subject property was developed with the Forster Public School and eight residences. Evergreen Avenue had was present to the north.
- Middlesex Couty 1900 atlas published by Geo. W. Stadly & Co.
  - The subject property was developed with the Forster School and Annex and eight residences.

Copies of the atlas maps reviewed are included in Appendix A.

6.0 SUBSURFACE VAPOR MIGRATION

Mabbett conducted a qualitative screening for potential Vapor Encroachment Conditions (VEC) that may affect the subject property. The screening used information about the current and historical usage of the subject property available from the EDR Radius Report to evaluate Chemicals of Concern (COCs), including petroleum hydrocarbons and non-petroleum chemicals. A copy of the EDR report is provided in Appendix D.

ASTM E 2600-10 defines an area of concern (AOC) with a minimum search radius of 1,760 ft (0.3 mile) from the subject property boundary when identifying properties contaminated with non-petroleum COCs that could potentially present a vapor intrusion risk at the subject property. For sites contaminated with petroleum hydrocarbon COCs, the AOC minimum search radius is 528 ft (0.1 mile) from the subject property boundary.

Mabbett considered the nature and extent of on-site and nearby sources of potential subsurface vapor migration by evaluating the current and historical usage of the subject property, the physical setting, and the regulatory agency database information (summarized in Section 5.0). To pose a vapor encroachment risk, releases must have contaminants that have migrated to groundwater, and the groundwater must have the potential to flow beneath the subject property. Additionally, the contaminant released must have the potential to migrate upward from groundwater to soil gas and then to the atmosphere.

Neither the subject property nor hydrologically upgradient or cross-gradient properties were identified as having releases of petroleum and non-petroleum COCs meeting these criteria within proximity to the Winter Hill Community Innovation School building. Due to the historical presence of dry cleaners at various locations within the subject property vicinity between 1940 and 2000, the risk of vapor encroachment conditions existing at the subject property cannot be ruled out but is considered low.

7.0 INTERVIEWS

Mabbett interviewed the individuals listed in Table 7-1 for information regarding environmental conditions at the subject property. Information from the interview is incorporated throughout this Phase I ESA.

TABLE 7-1
Interviews Completed for this Phase I ESA

Role	Name	Title/Company	Years in Current Role	Interview Type
Superintendent of Buildings	Matthew Bennet	City of Somerville	2+ years	In-person site reconnaissance
Director of Capital Projects	Ralph Henry	City of Somerville	Unknown	User questionnaire
Project Manager	Debora Mitrano	City of Somerville	Unknown	User questionnaire
Facilities Supervisor	Michael Bowler	City of Somerville	Unknown	User questionnaire

During the pre-bid site walkthrough for the project on July 16, 2025, Mabbett spoke with Mr. Rich Raiche, the Director of Infrastructure & Asset Management at City of Somerville, who explained that the City was of the understanding that the two educational buildings, identified as the Forster Public School and Continuation School on the northern portion of the subject property, were demolished in place and built over during the construction of the existing school building in 1975. The location of these former buildings suspected to have been demolished in place and built over during the construction of the existing school building is shown on Figure 1-3. Based on the information presented on the Sanborn -maps (Appendix E), the Forster Public School was constructed in 1866 and the Continuation School was constructed in 1899. As these buildings were demolished, presumably in place based on the information conveyed to Mabbett by the City of Somerville, prior to the construction of the current school building in 1975, hazardous materials or asbestos abatement was unlikely to have been performed because federal requirements for pre-demolition asbestos removal were only in their infancy, with the USEPA first promulgating the National Emission Standards for Hazardous Air Pollutants (NESHAP) for asbestos on April 6, 1973. Furthermore, early enforcement was frequently inconsistent, and many modern rigorous abatement standards (such as those later established by the Toxic Substances Control Act [TSCA]of 1976) did not yet exist to mandate the comprehensive removal of all materials prior to site redevelopment.

While ACM may not have been used during the initial construction of these buildings prior to 1900, renovations and improvements made during the peak use period from the 1940s through early 1970s are anticipated to have introduced ACM to these buildings Based on the time of the demolition of the two former school buildings and construction of the existing school building, it is suspected that ACM may be contained in demolition debris and comingled soils located beneath the current building and the current basketball court on the northern portion of the subject property. The potential presence of buried ACM represents a BER due to the environmental premiums associated with specialized excavation protocols, mandatory air monitoring, and elevated hazardous waste disposal fees which pose a material financial impact on future redevelopment costs.

© 2026, Mabbett & Associates, Inc.

8.0 OTHER ENVIRONMENTAL CONDITIONS

8.1 Lead Based Paint

Lead-based paint (LBP) was commonly used prior to their ban in 1978. As such, it is possible that LBP is present on surfaces that were painted prior to 1978. Minimal painted surfaces with cracking and peeling paints were observed during Mabbett's site reconnaissance.

A Hazardous Building Materials Survey Report was conducted at the subject property by Axiom Partners, Inc. and Haley & Aldrich, inc. in 2023. Paints containing lead at the subject property included beige wall tile in various rooms and black newel post in stairwells.

8.2 Asbestos Containing Materials (ACM)

Asbestos has historically been used in a wide range of building materials, including roofing shingles, ceiling and floor tiles, paper products, pipe insulation, asbestos cement products, and more.

A Hazardous Building Materials Survey Report was conducted at the subject property by Axiom Partners, Inc. and Haley & Aldrich, inc. in 2023. Materials confirmed to contain >1% asbestos included the following:

- ~ 165,000 sq ft of lightweight concrete in stairwells and interior walls throughout
- ~ 95,500 sq ft of tan 12 x 12 inch vinyl floor tile and mastic
- ~ 1,300 sq ft of brown 12 x 12 inch vinyl floor tile and mastic
- ~ 27,500 sq ft of gray duct sealant
- ~ 21,400 sq ft of red duct mastic
- ~ 350 linear ft of perimeter flashing on the gym lower roof

The report also presumed that asbestos may be present in the asphaltic damp proofing on foundations and footings, in buried pipes beneath the building or subject property, in pipe insulation throughout the building, in the sprinkler system, in drywall and joint compound, and more.

9.0 CONCLUSIONS AND RECOMMENDATIONS

Mabbett performed a Phase I ESA of Winter Hill Community Innovation School (the subject property) at 115 Sycamore Street in Somerville, Middlesex County, Massachusetts in conformance with the scope and limitations of ASTM E1527-21. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

This Phase I ESA Report presents the results of non-intrusive environmental due diligence activities performed by Mabbett on behalf of the Perkins Eastman and the City of Somerville to support decision making about architectural feasibility at Winter Hill Community Innovation School. The subject property for this Phase I ESA encompasses approximately 1.97 acres of land.

The Phase I ESA findings are summarized as follows:

- **Recognized Environmental Conditions (RECs)**

  According to Somerville Fire Department records, a 5,000 gallon #5 fuel oil UST was historically utilized by the Forster School that was permitted in 1952 and renewed in 1972 and 1978. A plan of the subject property from 1973 showed an “oil tap” in the northern corner of the property, just west of the original school building. No removal records were available for this UST. The Forster School was reportedly demolished in place. As such, the UST may not have been removed. The historical presence of the #5 fuel oil UST and the possible age of the UST represents a REC.

- **Historical Recognized Environmental Conditions (HRECs)**

  No HRECs were identified on or affecting the subject property.

- **Controlled Recognized Environmental Conditions (CRECs)**

  No CRECs were identified on or affecting the subject property.

- **Data Gaps**

  No significant data gaps were identified during this investigation.

- **Business Environmental Risks (BERs)**

  Regulated Building Materials: According to the 2023 Hazardous Building Materials Survey Report, documented ACM are present throughout the entire school. LBP was also documented to be present at the subject property. The documented presence of ACM and presumed presence of LBP represents a BER due to the added cost of abatement during future demolition or renovation of the building.

  Additionally, the City of Somerville and SPS indicated during the pre-bid briefings that two former educational buildings were demolished in-place on the northern portion of the property and built over during the construction of the existing school building. Based on the time of the demolition and construction of the existing school building, it is suspected that ACM may be contained in that demolition debris and comingled soils located beneath the current building and the current basketball court on the northern portion of the subject property. The potential presence of buried ACM represents a BER due to the environmental premiums associated with specialized excavation protocols, mandatory air monitoring, and elevated hazardous waste disposal fees which pose a material financial impact on future redevelopment costs.

  Fill Soils: The USDA Web Soil Survey identified the soils located beneath the elementary school and southeast of the elementary school as Urban land (i.e., urban fill). The potential for the quality of fill materials to result in elevated environmental premiums for off-site management during future redevelopment activities is considered a BER.

PFAS Risk: Rogers Foam Corp., addressed 20 Vernon Street, was located approximately 640 feet cross-gradient to the subject property. Rogers Foam Corp has been a fabricator of latex foam since 1947, a process which may have included the use of PFAs-containing chemicals. Although there has been no documented release of PFAS to the subsurface, PFAS from foam manufacturing operations at Rogers Foam Corp may be present in subsurface groundwater at the subject property. If extensive dewatering is required during site redevelopment, the potential PFAS plume if not already underlying the subject property may be pulled onto the subject property, resulting in elevated dewatering premiums to treat and manage PFAS contaminated groundwater, which is considered a BER.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Middlesex County, Massachusetts
Survey Area Data: Version 25, Sep 5, 2025

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Mar 1, 2023—Sep 1, 2023

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Project Manager/Principal

1.0 PURPOSE AND SCOPE OF WORK

Axiom Partners, Inc. (AXIOM) was retained by Haley & Aldrich, Inc. to perform an inspection of the referenced building in advance of planned property renovation work.

The purpose of this investigation was to identify Asbestos-Containing Materials (ACMs), Lead-Containing Paint (LCP), Polychlorinated Biphenyls (PCBs), Mercury (Hg), Chlorofluorocarbons (CFCs) and other miscellaneous hazardous materials and wastes for abatement prior to or in conjunction with planned property redevelopment activities.

2.0 SITE DESCRIPTION

The building is an occupied four-story building and has a footprint of approximately 95,000 square feet. The floors are designated as first floor, second floor, third floor and fourth floor. The building was constructed in 1975 and was reportedly renovated over many years to the present day. It is constructed of steel and masonry, concrete and wood. Most notably, the building's areas consist of classrooms, hallways, offices, a boiler room, storage rooms, bathrooms, and mechanical rooms. The exterior walls are stone and concrete façade over CMU block. Interior walls are a combination of concrete, fiberboard, and painted drywall. The vast majority of the floors have vinyl flooring, carpeting as well as some ceramic floor tile coverings. The majority of spaces have concrete or metal wall panels and suspended ceilings covering concrete decking. The building has a flat rubber roof system with a built-up layer underneath.

3.0 INSPECTION PERSONNEL, METHODS, AND LABORATORY

3.1 Inspection Personnel and Process

3.1.1 Inspection Personnel

The investigative survey was conducted from July 24-27th, 2023 by experienced and Massachusetts Department of Labor Standards (DLS) licensed Asbestos Inspector, Geoff Gerace and Jesse DeGeorge (Massachusetts Asbestos Inspector License Number AI034620 and A1031684, respectively).

3.1.2 Inspection Process

The inspection for ACMs and hazardous building materials (HBMs) was conducted in a systematic manner using AXIOM's standard safety procedures and inspection protocols including:

1. A visual inspection of the building' interiors, exteriors, and roofs to locate, quantify and assess the condition of materials suspected to contain asbestos, lead, PCBs, CFCs, Mercury and other hazardous chemicals, materials, and wastes.

2. Collection and analysis of materials as described herein to determine their composition.

3. Review of previous asbestos survey and post-abatement reports, sampling reports and laboratory analysis for ACMs. Reports or related testing data were not provided to AXIOM during this investigation.

3.2 Asbestos-Containing Materials (ACM) Investigation

3.2.1 Methodology

The inspection for suspect ACMs included:

1. Collection of representative bulk samples of each homogeneous application of suspect material in sufficient numbers to comply with EPA/AHERA criteria (see Chart A below).

2. To prevent release of any airborne asbestos, samples of suspect friable materials were collected by wetting the suspect materials and then removing a small full-thickness sample and placing it in a sealed plastic bag labeled with a unique sample identification number.

3. Chain-of-custody documentation was used to ensure sample integrity.

4. Analysis of the bulk samples by an accredited laboratory using the EPA-approved Polarized Light Microscopy (PLM) method.

5. A review of the inspection findings and lab results to ensure proper and consistent identification and characterization of all confirmed and presumed ACMs.

Chart A

Minimum Asbestos Bulk Sampling Criteria

Type of Suspect Material[1]	Minimum Sampling Criteria
Surfacing	EPA/AHERA mandated statistically random criteria (Min. of 3 samples; Max. of 7 samples)
Miscellaneous	A sufficient number of samples to determine if material is an ACM (typically 2 samples of each homogeneous application)
Thermal System Insulations	Three random samples of each homogeneous material

3.2.2 *Definition of Key Inspection Terms*

Given the specific purposes and objectives of this inspection, the following definitions were used for the terms: Suspect Materials, Non-Suspect Materials, Homogeneous Applications or Areas, Inaccessible Building Areas, and Confirmed ACMs:

1. Suspect Materials: Installed building materials that either were pre-formed (i.e., manufactured off-site) or were prepared and installed on-site. All building materials are considered to be suspect ACMs except as noted in #2 below.

2. Non-Suspect Materials: For the purposes of this inspection, the following materials were considered non-suspect and were not assessed or sampled if observed:

[1] Per homogeneous material or area

- Plastic
- Glass
- Wood or Wood Composite Materials
- Brick, Granite, Marble, or Other Stonework
- Pink or Yellow Fiberglass Insulation on Pipes or Other Mechanical Components
- Clay or Ceramic Tiles
- Rubber or Synthetic Foam
- Paint (unless textured)
- Concrete or Mortar (except Gypcrete)
- Carpeting, Curtains, Wallpaper, and Other Paper/Natural Fiber, Fabric, or Synthetics

3. Homogeneous Applications or Areas: Are suspect materials which serve the same function or purpose (e.g., floor or ceiling tiles) have similar color and texture and were likely installed at or near the same time. Note that the homogeneity of certain materials such as wall and ceiling plaster at times cannot be readily determined.

4. Inaccessible Building Areas: Areas that AXIOM could not survey because it was unsafe or impractical to disassemble or remove systems or coverings or because a human being cannot physically enter or observe the area or components. These areas include, but are not limited to, Transite pipes coming on to the site from municipal utilities mains from the surrounding streets, underground trenches, boilers, vessels, storage tanks and mechanical systems. Also, the principal's office was inaccessible at the time of the survey.

5. Confirmed ACMs: Suspect materials where at least one of the bulk samples contains an asbestos concentration greater than 1%. According to the EPA/AHERA criteria, if all bulk samples of a homogeneous area of material are found to contain less than 1% asbestos, the material may be classified as a non-asbestos material.

6. Friable and Non-Friable ACMs: An ACM that can be crumbled, crushed, or otherwise reduced to powder by hand pressure is a friable material; non-friable ACMs cannot. This is important with respect to managing ACMs. Additionally, some non-friable ACMs are regulated differently.

3.3 Asbestos Laboratory Services

3.3.1 PLM Bulk Sample Analysis

Bulk samples collected during the inspection were submitted to and analyzed by EMSL Analytical, Inc. (EMSL) located in Woburn, Massachusetts. EMSL is a Massachusetts-licensed asbestos bulk sample laboratory (License #AA000188). Bulk samples were analyzed for asbestos content using EPA Method 600/R-93/116. A chain-of-custody form was used to ensure sample integrity.

The entire inventory of collected samples may not have required analysis. Initially, one sample per material was analyzed. If the first sample was found to contain asbestos, the remaining samples were not analyzed (*Positive Stop* protocol). If the first sample was determined not to contain asbestos, however, the remaining samples were analyzed until >1% asbestos was detected or until the entire sample set was analyzed.

3.4 Lead Containing Paint (LCP) Investigation

Representative testing of paints for the presence of lead was performed in the building as part of AXIOM's scope of work.

3.4.1 Introduction

Historically, lead was added to paint because its color stability properties made it a desirable pigment and because it enhances durability. Lead-Containing Paint (LCP) becomes harmful when ingested or inhaled as dust or fumes. Once lead was proven to be a health hazard, it was officially banned in 1978 from paints used in residences.

In an occupational setting, if lead-based painted surfaces are to be impacted by renovation or demolition activities, contractor personnel exposure (per OSHA compliance) and waste disposal (per EPA compliance) issues must be addressed and factored into the cost of the project.

3.4.2 Testing Methodology

AXIOM utilized a Portable X-Ray Fluorescence Analyzer (XRF) to perform the lead paint survey. The XRF is a hand-held instrument that contains a radioisotopic source and operates on the principle of X-ray fluorescence. The depression of a spring-loaded trigger mechanism on the XRF unit opens a shutter in the faceplate that allows radiation from an isotopic source to stimulate the lead atoms in the paint. This stimulation causes the atoms to emit (fluoresce) X-rays which the unit detects and converts into electrical pulses which are then processed, and the result is read through a digital display on the instrument.

AXIOM used a NITON Model XLp300 which analyzes surfaces quickly, accurately, and non-destructively. Surface levels of lead are measured in milligrams per square centimeter (mg/cm^2). This unit can measure the concentration of LCP on surfaces as little as 0.01 mg of lead/cm^2.

3.4.3 XRF Testing Procedures

Upon arrival at the site, a "validation test" was performed to ensure that the XRF instrument was operating properly. The validation test was performed on a calibration test sheet supplied by the manufacturer to determine if the instrument is consistently measuring lead content. During this survey, the XRF was functioning properly as defined by the manufacturer.

In conducting the LCP survey representative tests were performed on homogeneous (similar color and use) painted surfaces. Results were related to other surfaces possessing similar homogeneous characteristics. By following this sampling protocol, every painted surface did not have to be tested. Representative testing was performed for the presence of lead-based paint (LBP) and lead-containing paint (LCP) on accessible interior and exterior painted surfaces.

3.5 Polychlorinated Biphenyls (PCBs) Investigation

AXIOM conducted an inspection of the building and grounds to identify suspect PCB-containing fluorescent light fixture ballasts, electrical transformers, and bulk products. The survey was conducted in a systematic manner that included:

1. Performing a detailed walk-through to inspect and categorize the various types of accessible fluorescent light fixtures and electrical transformers.

2. Preparing an inventory of electrical light ballasts and transformers known or suspected to contain PCBs. Nameplate data was recorded if it was present and legible.

3. AXIOM inspected the building to identify suspect PCB-containing caulking. The survey included identifying and testing representative caulking compounds materials for PCBs. The bulk samples were collected using hand tools and placed into seal containers (glass sample jars) which were promptly labeled and placed into a cooler with ice. Samples were picked up at the site by a courier and hand delivered to Alpha Analytical Laboratory located in Westborough, MA for analysis. The samples were prepared using the Soxhlet extraction method and analyzed for PCBs by the Environmental Protection Agency (EPA) Methods 3540C and 8082. The complete laboratory reports can be found in Appendix A.

3.6 Mercury Light Tube and Thermostat Investigation

AXIOM inspected the building to identify suspect Mercury-containing equipment as follows:

1. Preparing an inventory of fluorescent light bulbs that contain Mercury vapor in conjunction with the light ballast inspection described in Section 3.5.

2. Performing a walkthrough to identify and inventory thermostats, switches, actuators, and other equipment that contain liquid Mercury.

3.7 Chlorofluorocarbons (CFCs) Investigation

AXIOM inspected the building to identify suspect chlorofluorocarbons (CFCs) associated with refrigeration and air conditioning equipment and prepared an inventory of equipment including an estimate of CFC quantities. Nameplate data was recorded if it was present and legible. Assumptions were made if the unit was inaccessible or if the nameplate was not present or illegible.

3.8 Miscellaneous Hazardous Building Materials

AXIOM inspected the building for miscellaneous hazardous building materials and chemical wastes including oil-containing devices (e.g., boilers, generators, elevators, motors, grease traps, etc.) and miscellaneous items such as lead acid batteries, paints, cleaners, and other chemicals.

4.0 FINDINGS AND RECOMMENDATIONS

4.1 Asbestos-Containing Materials

4.1.1 Asbestos-Containing Materials (ACMs)

Materials **confirmed** to contain >1% asbestos for the survey are as follows:

TABLE 1 - CONFIRMED ACMS
WINTER HILL COMMUNITY SCHOOL BUILDING, 115 SYCAMORE STREET, SOMERVILLE, MA

Flange Gaskets	Sprinkler System	TBD	Non-Friable
Sprinkler Pipe Thread Sealant	Sprinkler System	TBD	Non-Friable
Drywall and Joint Compound	Library Area	2,000 SF	Friable
Black Sink Mastic	Room 220	1 EA	Non-Friable
Glue Daubs with Tectum Panels Under Windows	Classrooms Throughout	~2,000 SF	Non-Friable
12" x 12" Blue Floor Tile and Mastic	2nd Floor Bathrooms	100 SF	Non-Friable
Lab Counters	Room 216	200 SF	Non-Friable
Mortar Joints of Concrete Ceiling Panels	Throughout	TBD	Non-Friable
Interior Components w/ Boiler Unit	Basement, Boiler Room	TBD	Friable

Materials **confirmed** to be Non-ACMs for the survey can be found in Appendix D.

4.1.4 Discussion and Recommendations

The mere presence of asbestos in a building does not mean that the health of building occupants is necessarily at risk. As long as the ACMs remain in good condition and are not disturbed, exposure is unlikely. However, when building maintenance, repair, renovation, demolition, or other activities disturb ACMs, or if ACMs are damaged, asbestos fibers are released creating a potential hazard to building occupants.

ACMs associated with the subject building are friable and non-friable and were in good condition. Since the subject building will be renovated, all ACMs must be removed by a Massachusetts-licensed Asbestos Removal Contractor prior to or in conjunction with the demolition work. As required by governing regulations, completion of each asbestos removal task must include a visual inspection by a Massachusetts-licensed Asbestos Project Monitor and final clearance air testing if asbestos removal is performed inside a negative pressure enclosure (containment).

Regulations require that all ACMs be included in a site-specific asbestos operations and maintenance (O&M) program designed, at a minimum, to comply with 29 CFR 1910.1001 and 1926.1101, incorporating the basic components in the EPA's *Guide to Managing Asbestos in Building*.

PACMs that may be present are identified in Table 2.

Removal of ACMs, PACMs and other HBMs should be clearly defined in a project specification which is used to obtain competitive bids for the work. A detailed cost estimate for removal of ACMs is present in Appendix F and includes an allowance for the removal of PACMs and HBMs.

4.2 Lead–Containing Paints (LCP)

The HUD[3] lead paint standard classifies Lead Based Paint (LBP) as paint having $\geq$1.0 mg/cm^2 as measured by the XRF or $\geq$0.5% of lead by weight as analyzed by Atomic Absorption. With respect to renovation and demolition work, OSHA defines a lead-containing paint (LCP) as paint containing detectable amounts of lead.

Testing revealed five paints at the subject building are LBPs. A complete listing of the testing results can be found in Appendix B; however, Table 3 provides a summary of the LBPs at the site.

TABLE 3
SUMMARY OF LBP RESULTS

Description	Location	XRF Reading (mg/cm^2)
Beige Wall Tile	1st Floor, Cafeteria, Kitchen, Classrooms, Offices, Elevator Machine Room, Storage Rooms, Offices, Teacher's Dining Room, Janitor's Office, Hallways, Stairwells, Bathrooms, etc.	2.4
Beige Wall Tile	2nd Floor, Classrooms, Offices, Copy Room, Storage Rooms, Health Office, Gym, Hallways, Stairwells, Bathrooms, etc.	1.4
Black Newel Post	2nd Floor Stairwell	1.6
Black Newel Post	3rd Floor Stairwell	1.5
Black Newel Post	4th Floor Stairwell	1.5

Based on analytical results, several the paint samples contained lead in detectable quantities. The most elevated levels of lead were detected in the ceramic wall tile and stairwell newel posts. The other levels were non-detectable and substantially below the regulatory limit for lead toxicity.

Contractors should be made aware of the presence of lead paint testing results to satisfy the hazard communication requirements set forth by OSHA regulations. Specifically, contractors and subcontractors should be required to comply with OSHA regulation 29 CFR 1926.62 and Massachusetts regulation 453 CMR 22.11 for lead exposure in construction and 29 CFR 1926.59, *Hazard Communication for the Construction Industry*. This could be accomplished by providing the affected contractors with a copy of this report. The General Contractor is responsible for informing and managing their employees and subcontractors.

[3] U.S. Department of Housing and Urban Development

The current interpretation of the EPA's Resource Conservation and Recovery Act (RCRA) requires that waste generated during projects where LCPs are present and will be disposed of is tested for the toxicity characteristic of lead in the waste stream. TCLP[4] testing is performed to determine whether waste (construction/demolition debris) must be classified as hazardous because of its lead content or if it can be disposed in a conventional construction and demolition (C&D) landfill. The regulatory limit for lead toxicity is 5.0 milligrams per liter (mg/L) using the EPA Method SW846-7420 for Atomic Absorption Spectroscopy (AAS). Since the need for TCLP testing is typically determined by the disposal facility/landfill, AXIOM recommends that pre-disposal testing is the contractor's responsibility.

4.3 Polychlorinated Biphenyls (PCBs) and Mercury in Electrical Equipment

4.3.1 Fluorescent Light Fixtures

AXIOM identified two (2) types of fluorescent light fixtures in the subject building. AXIOM was unable to dismantle and inspect the light fixtures due to height restraints and occupied spaces. Therefore, the ballasts are presumed to contain PCBs. If there were ballasts labeled "No PCBs" they would be presumed to contain di (2-ethylhexyl) phthalate (DEHP). A summary of fluorescent light fixtures is provided in Appendix C.

Handling and disposal of fluorescent light ballasts that contain PCBs should be performed in accordance with the Massachusetts Universal Waste Management Standard (310 CMR 30.1034) and EPA's Resource Conservation and Recovery Act (RCRA) and other governing regulations and requirements. There are two methods currently available for disposal of PCB-containing ballasts including incineration and disposal. Incineration is typically more expensive. Regardless of the method, documentation must be provided that verifies the proper removal, transportation, and disposal (destruction/incineration) at an approved facility. In general, PCB ballasts must be placed in 55-gallon drums which once filled, the drums must be closed and properly labeled for temporary storage, transport, and disposal in accordance with all applicable regulations. Drums containing PCB ballasts must be transported to an EPA-approved disposal facility (landfill or incinerator). Documentation must be provided that verifies the proper removal, transportation, and disposal (or destruction/incineration) at the approved facility. Drums containing non-PCB fluids, ballasts or capacitors shall be disposed of at a legally permitted disposal facility. There is presently no regulatory mandate for special handling and disposal of DEHP-containing ballasts, however, since there are a number of regulations that may be indirectly applicable[5] and since the disposal cost is not significant, AXIOM recommends disposing of DEHP-containing ballasts similarly.

4.3.2 Transformers

AXIOM did observe one pad-mounted transformers on the exterior of the site.

4.3.3 Mercury-Containing Items

[4] Toxicity Characteristic Leachate Procedure (TCLP)

[5] Environmental Protection Agency (EPA) Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"), Solid Waste Disposal Act, the Clean Water Act, Safe Drinking Water Act and the Toxic Substances Control Act.

There are approximately two thousand (2,000) fluorescent light bulbs associated with actual light fixtures at the subject building. A summary of mercury-containing items is provided in Appendix C.

Handling and disposal of fluorescent light bulbs that contain Mercury should be performed in accordance with the Massachusetts Universal Waste Management Standard (310 CMR 30.1034) and EPA's Resource Conservation and Recovery Act (RCRA) and other governing regulations and requirements. Guidance documents are also available from the EPA (e.g., the 1994 Green Lights Program for Lighting Waste Disposal). If fluorescent lamps become broken or damaged during removal, the broken lamps should be managed as hazardous waste. Note that fluorescent light tubes may be reused.

Mercury-containing devices must be properly recycled in accordance with 310 CMR 30.1034.

4.4 Chlorofluorocarbons (CFCs)

AXIOM identified widow air conditioners, several water fountains, and refrigerators units at the subject building. A summary of CFC-Containing items is provided in Appendix C.

4.5 Polychlorinated Biphenyls (PCBs) Testing

4.5.1 Summary of PCB Bulk Product Testing Results

The following table provides the laboratory results of analysis of caulking for PCBs. The laboratory reports are in Appendix A.

TABLE 4
SUMMARY OF PCBS IN CAULKING COMPOUND RESULTS

Sample Number	Description	Location	Analysis Results[6]
PCB-01	Exterior Expansion Joint Caulking	Exterior Throughout	ND
PCB-02	Exterior Window Caulking w/metal window)	Exterior Throughout	ND
PCB-03	Exterior Door Caulking	Exterior Throughout	ND

Laboratory results are reported in micrograms per kilograms (*u*g/kg) which AXIOM converted to milligrams per kilograms (mg/kg) which is equivalent to parts per million (ppm) for comparison to EPA definitions.

4.5.2 Discussion

[6] ND = PCBs not detected at the Reporting Limit (RL) for the specific samples. Refer to lab report for PCB Reporting Limits; Results are reported in milligrams per kilogram (mg/kg) which is equivalent to parts per million (ppm); all ND results include Aroclor 1016, 1221, 1232, 1242, 1248, 1254, 1260, 1262 and 1268 unless specifically noted otherwise.

According to 40 CFR 761, the EPA specifies that products and materials containing greater than 50 ppm are PCB bulk products. Based on the result of this investigation, **none** of the caulking is considered a PCB bulk product.

4.6 Miscellaneous Hazardous Wastes

4.6.1 Miscellaneous Hazardous Materials/Wastes

AXIOM identified other hazardous materials/wastes including batteries associated with exit signs, batteries associated with emergency lighting, fire extinguishers, monitors, cleaning supplies and chemicals. These items are also listed in Appendix C.

The above-listed materials/components are not typically considered hazardous wastes while in use. However, those that are left behind must be properly characterized and disposed of in compliance with governing regulations.

Intact, non-leaking batteries should be handled and disposed of in accordance with the Universal Waste Management Standard 310 CMR 30.1034. If batteries are damaged or become damaged or leak during removal and/or handling, they should be managed as hazardous waste.

5.0 LIMITATIONS AND EXCLUSIONS

5.1 Limitations and Conditions of This Investigation

5.1.1 NESHAPs Asbestos Survey

This NESHAPs survey involved an investigation for ACMs in preparation for building demolition. Although this investigation attempted to identify and sample inaccessible building materials, some materials were inaccessible, and the potential remains that concealed ACMs may be encountered in the building or at the site.

5.1.2 Inaccessible Materials and Locations

Inaccessible building areas, systems, structural components, or surfaces which may not have been observed because it was unsafe or impractical to demolish, disassemble, or remove systems or coverings, or because a human being cannot physically enter or observe the area or component. Unless specifically noted, inaccessible materials or areas may include:

- buried or otherwise concealed pipe trenches and utility vaults/corridors;
- buried foundations;
- enclosed wall and ceiling cavities;
- electrical equipment/wire;
- concealed mechanical materials;
- concealed pipe/fitting insulation;
- Principal's Office

AXIOM made every reasonable effort to address these potential ACMs. However, the potential remains that concealed ACMs could be encountered during renovation or demolition work.

5.1.3 Other Environmental Exclusions

1. This investigation did not include an assessment of air quality or analysis of soil, surface water or groundwater. Furthermore, this study did not include any subsurface exploration, testing or assessment for wetlands.

2. This investigation did not include assessments for the presence of pesticides, herbicides, urea-formaldehyde, or Radon, nor any air quality monitoring, or any chemical analysis of soil, surface water, or groundwater at the Site.

3. No attempt was made to check the compliance of present or past owners of the Site with Federal, State, or local laws.

4. The testing for lead paint was performed by an experienced Industrial Hygienist. It is intended only to satisfy the requirements of OSHA regulations including 29 CFR 1926.62, *Lead Exposure in Construction: Interim Final Rule* and 29 CFR 1926.59, *Hazard Communication for the Construction Industry*. This investigation was not performed by an EPA HUD[7] or state accredited/licensed Lead Inspector which is often required for residential structures where children under the age of six live.

5.1.4 Project Specifications

Users are cautioned that this document is an inspection report, not a project specification. Although it is often feasible to use a report such as this to obtain bids for asbestos and related abatement work, it does not provide a proper and/or complete document for defining the scope of work and specifying contractual obligations.

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 “Interim Method”) but augmented with procedures outlined in the 1993 (”final”) version of the method. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample. Estimation of uncertainty is available on request.

Samples analyzed by EMSL Analytical, Inc. Woburn, MA NVLAP Lab Code 101147-0, CT PH-0315, MA AA000188, RI AAL-139, VT AL998919, ME LB-0039

Test Report: Asbestos Analysis of Bulk Materials via AHERA Method 40CFR 763 Subpart E Appendix E supplemented with EPA 600/R-93/116 using Polarized Light Microscopy

			Non-Asbestos		Asbestos
Sample	**Description**	**Appearance**	**% Fibrous**	**% Non-Fibrous**	**% Type**
072623-57-08B *132304815-0036*	Room 320 - Interior Window Caulking	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
072623-57-08C *132304815-0037*	Room 208 - Interior Window Caulking	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
072623-57-08D *132304815-0038*	1st Floor Café - Interior Window Caulking	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
072623-57-10A *132304815-0039*	Room 408 Art - Expansion Joint Caulk w. Concrete Columns & CMU Walls	Beige Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
072623-57-10B *132304815-0040*	1st Floor Kitchen Area - Expansion Joint Caulk w. Concrete Columns & CMU Walls	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
072623-57-10C *132304815-0041*	3rd Floor Hallway - Expansion Joint Caulk w. Concrete Columns & CMU Walls	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
072623-57-11A *132304815-0042*	4th Floor Art Studio - Safety Glass Glazing	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
072623-57-11B *132304815-0043*	2nd Floor Main Office - Safety Glass Glazing	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
072623-57-12A *132304815-0044*	Room 402 Library - Carpet Square Mastic	Yellow Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
072623-57-12B *132304815-0045*	1st Floor Room 105 Storage - Carpet Square Mastic	Green Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected
072623-57-14A *132304815-0046*	Room 409 - 12x12" Brown Floor Tile	Brown Non-Fibrous Homogeneous		95% Non-fibrous (Other)	5% Chrysotile
072623-57-14B *132304815-0047*	Room ST-306 - 12x12" Brown Floor Tile				Positive Stop (Not Analyzed)
072623-57-14C *132304815-0048*	Room 205 - 12x12" Brown Floor Tile				Positive Stop (Not Analyzed)
072623-57-15A *132304815-0049*	Room 409 - 12x12" Brown Floor Tile Mastic	Black Non-Fibrous Homogeneous		90% Non-fibrous (Other)	10% Chrysotile
072623-57-15B *132304815-0050*	Room ST-306 - 12x12" Brown Floor Tile Mastic				Positive Stop (Not Analyzed)
072623-57-15C *132304815-0051*	Room 205 - 12x12" Brown Floor Tile Mastic				Positive Stop (Not Analyzed)
072623-57-16A *132304815-0052*	4th Floor Mens Room - 1x2" Ceramic Floor Tile Grout	Gray Non-Fibrous Homogeneous		100% Non-fibrous (Other)	None Detected

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 “Interim Method”) but augmented with procedures outlined in the 1993 (”final”) version of the method. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. Non-friable organically bound materials present a problem matrix and therefore EMSL recommends gravimetric reduction prior to analysis. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample. Estimation of uncertainty is available on request.

Samples analyzed by EMSL Analytical, Inc. Woburn, MA NVLAP Lab Code 101147-0, CT PH-0315, MA AA000188, RI AAL-139, VT AL998919, ME LB-0039

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

PCBs

L2343732-02: The sample has elevated detection limits due to limited sample volume available for analysis.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL	- Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EMPC	- Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LOD	- Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
LOQ	- Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.) Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NDPA/DPA	- N-Nitrosodiphenylamine/Diphenylamine.
NI	- Not Ignitable.
NP	- Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.
NR	- No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.
STLP	- Semi-dynamic Tank Leaching Procedure per EPA Method 1315.
TEF	- Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.
TEQ	- Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.
TIC	- Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: Data Usability Report

Project Name:	WINTER HILL COMMUNITY SCHOOL	**Lab Number:**	L2343732
Project Number:	01164.136	**Report Date:**	08/04/23

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

Report Format: Data Usability Report

Project Name:	WINTER HILL COMMUNITY SCHOOL	**Lab Number:**	L2343732
Project Number:	01164.136	**Report Date:**	08/04/23

Data Qualifiers

ND - Not detected at the reporting limit (RL) for the sample.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Report Format: Data Usability Report

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Biological Tissue Matrix: EPA 3050B

Winter Hill Community School Building
115 Sycamore Street, Somerville, MA

Material	Location	Quantity	Removal Cost
Drywall and Joint Compound	Library Area	2,000 SF	$14,000
Black Sink Mastic	Room 220	1 EA	$500
Glue Daubs with Tectum Panels Under Windows	Classrooms Throughout	~2,000 SF	$12,000
12" x 12" Blue Floor Tile and Mastic	2nd Floor Bathrooms	100 SF	$1,000
Lab Counters	Room 216	200 SF	$1,000
Mortar Joints with Concrete Ceiling Panels	Throughout	TBD	*NA
Interior Components w/ Boiler Unit	Basement, Boiler Room	TBD	*NA
Subtotal, PACM Removal (Recommended Allowance)			**$ 151,500**

*N/A – Not applicable at this time

Abatement Cost Estimate Summary

Description	Estimated Removal Cost
Asbestos Removal, Confirmed ACMs	$ 2,228,300
Asbestos Removal, Presumed ACMs	$ 151,500
Miscellaneous Hazardous Building Materials	$ 6,000
~10% Contingency	$ 238,000
Estimated Abatement Design/Bid & Monitoring Fee	$ 156,000
Total Hazardous Building Materials Abatement	**$ 2,779,800**

Cost Estimate Assumptions

- Based on current market conditions by a non-union contractor.
- Power, water, and heat provided by the Owner.
- Does not include demolition to access concealed ACMs.
- Includes materials, labor, equipment, notifications/permits, transportation, and disposal.
- Excludes the cost for removal of any other hazardous materials or conditions not identified herein.

Project # 01164.133

RE: Targeted Asbestos Surace Wipe Testing, Winter Hill Community School, 115 Sycamore Street, Somerville, Massachusetts

Dear Mr. Worthy

AXIOM performed surface wipe sampling at targeted areas in the above referenced building. The purpose of the sampling was to determine asbestos contamination in representative areas within the school. The sampling is in response to an asbestos disturbance in the stairwells of the school building. Specifically, a cementitious skim coat containing asbestos on the walls of the stairwells was accidentally disturbed at several locations during construction activities.

The sampling was performed on August 10, 2023, by Massachusetts-certified Asbestos Inspector Christopher LaPorte (License #AI 031166). A total of eighteen (18) surface wipe samples were collected and analyzed in various representative areas throughout the building. An emphasis of the surface sampling was used on the building areas directly outside the stairwells (hallways, classrooms) and in the kitchen areas (HVAC registers). Asbestos was not detected in the wipe samples collected.

Wipe samples were collected and immediately placed in labeled containers (e.g., Whirlpak™ sample bag) which were assigned a unique sample number and sealed for submission to the laboratory for asbestos analysis. The samples were hand-delivered to Massachusetts-licensed laboratory EMSL Analytical, Inc. (EMSL) located in Woburn, Massachusetts (License #AA000188). The samples were analyzed by Polarized Light Microscopy (PLM) Qualitative Analysis. Results are as follows and the laboratory report is attached.

TABLE 1- SURACE WIPE SAMPLING RESULTS

Sample No.	Sample Location	Analytical Results[1]
081023-47-01W	Kitchen at Middle Column	None Detected
081023-47-02W	Kitchen at South Column	None Detected
081023-47-03W	Kitchen at Hood near Entrance	None Detected
081023-47-04W	Kitchen Center, Dishwasher Area, Counter	None Detected
081023-47-05W	Kitchen Center, Prep Area Counter	None Detected

[1]NAD = No Asbestos Detected; CHR = Chrysotile Asbestos; SNA = Sample Not Analyzed

Sample No.	Sample Location	Analytical Results[1]
082123-95-06W	Kitchen HVAC Register Middle Column North	None Detected
082123-95-07W	Kitchen HVAC Register Middle Column South	None Detected
081023-47-08W	Floor Cafeteria at Serving Table	None Detected
081023-47-09W	First Floor, Stairwell No. 3, Floor Surface	None Detected
081023-47-010W	First Floor Hallway at Room 105, Floor Surface	None Detected
081023-47-11W	First Floor Elevator Lobby, Floor Surface	None Detected
081023-47-12W	Second Floor, Stairwell No. 2, Floor Surface	None Detected
081023-47-13W	Second Floor, Hallway at Room 207A, Floor Surface	None Detected
081023-47-14W	Second Floor, Room 218, Floor Surface	None Detected
081023-47-15W	Third Floor, Stairwell Middles Landing, Floor Surface	None Detected
081023-47-16W	Third Floor, Room 308, Floor Surface	None Detected
081023-47-17W	Third Floor, Hallway at Room 316, Floor Surface	None Detected
081023-47-18W	Fourth Floor, Stairwell No. 1, Middle Landing, Floor Surface	None Detected
081023-47-19W	Fourth Floor, Elevator Lobby, Floor Surface	None Detected
081023-47-20W	Fourth Floor, Hallway at Room 420, Floor Surface	None Detected

The qualitative PLM analysis indicated that no asbestos fibers were identified in the aforementioned samples. Based on the sample results, the asbestos disturbance is contained with the stairwell areas and not around surrounding building spaces.

Please call us if you have any questions or require additional assistance.

Christopher M. LaPorte
Asbestos Inspector

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. EMSL suggests that samples reported as none detected undergo additional analysis via TEM to avoid the possibility of false negatives.

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted. EMSL suggests that samples reported as none detected undergo additional analysis via TEM to avoid the possibility of false negatives.

Mr. Cole Worthy
Haley & Aldrich, Inc.
465 Medford Street, Suite 2200
Boston, MA 02139

RE: Background Air Sampling, Winter Hill Community School, 115 Sycamore Street, Somerville, MA

Dear Mr. Worthy:

At your request, AXIOM Partners Inc. (AXIOM) performed background air sampling in select and representative areas at the above referenced building. The purpose of the air sampling was to determine airborne fiber levels after a disturbance of non-friable asbestos materials in the stairwells of the school building. The air sampling was performed by our Senior Licensed Project Monitor, Charles Powanda (License #AM900571).

Air samples were collected and analyzed by Phase Contrast Microscopy (PCM) according to the National Institute of Occupational Safety and Health (NIOSH) Method 7400. This method is recognized by the US Occupational Health and Safety Administration (OSHA), the US Environmental Protection Agency (EPA) and the Massachusetts Department of Labor Standards (MADLS) for its ability to characterize total airborne fiber levels.

The results are as follows:

Sample Identification Number	Location(s)	PCM Air Sample Results (f/cc)*
081023-52-03	Kitchen Area	0.001
081023-52-04	Kitchen Area	0.001
081023-52-05	Cafeteria	0.001
081023-52-06	South Stairwell, First Floor/Cafeteria	0.002
081023-52-07	North Stairwell, Room 209	0.003
081023-52-08	South Stairwell, Third Floor	0.001
081023-52-09	Main Hallway, Room 218	0.002
081023-52-10	North Stairwell, 4th Floor, Library	0.002

Sample Identification Number	Location(s)	PCM Air Sample Results (f/cc)*
081023-52-11	South Stairwell, 5th Floor	0.002

*f/cc = fibers per cubic centimeter

Airborne samples results are acceptable when the air samples demonstrate fiber concentrations to be less than 0.010 fibers per cubic centimeter (f/cc), the MADLS standard for "clean air" as determined by PCM analysis. PCM air samples were collected in various interior building areas and all samples were found to be well below 0.010 f/cc standard. The results are also summarized in the attached air sample data sheets.

Please do not hesitate to call us if you have any questions.

Sincerely,

Edward Kearney, CIH
Principal/Project Manager

						11"	FULL & UNIFORM

NOTES:
1. MEASUREMENT OF ALL PLANTS TO BE APPROVED BY ARCHITECT PRIOR TO INSTALLATION.
2. PLACE 3" SHREDDED BARK MULCH IN ALL PLANT BEDS.
3. PLACE MINIMUM 6" HUMUS IN ALL HEDERA HELIX BALTICA BEDS.
4. STAKE ALL COLUMNAR NORWAY MAPLES WITH 3 STAKES - 2½" x 2½" x 10' SPACED 1'-0" FROM TRUNK & PAINTED GREEN, LOWER 4' TREATED WITH CREOSOTE. STAKES DRIVEN AT ANGLE & PLUMBED VERTICAL WITH DOUBLE STRAND #12 GAUGE GALV. ANNEALED TWISTED WIRE. STAKES TO BE MIN. 40" BURLAP.

GENERAL NOTES:

1. EXISTING CONDITIONS TRACED FROM "PLAN OF LAND IN SOMERVILLE, MASS." PREPARED BY HARRISON A. MEEKER, SURROUNDING ST. ANN'S CHURCH, DATED JANUARY 31, 1973.
2. CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND GRADES ON THE GROUND. ALL DISCREPANCIES MUST BE REPORTED IMMEDIATELY TO THE ARCHITECT FOR A DECISION.
3. ALL AREAS NOT REQUIRING GRADING SHALL BE LEFT UNDISTURBED. THE CONTRACTOR SHALL KEEP OUT OF THESE AREAS AND SHALL PRESERVE THE EXISTING PLANTING THEREIN.
4. ALL GRADED AND DISTURBED AREAS NOT OTHERWISE DEVELOPED SHALL BE SEEDED.
5. SEE ARCHITECTURAL DRAWINGS FOR ALL BUILDING DIMENSIONS.
6. STAKE ALL BLDG. CORNERS AND ALL UNIT OR WORK LINES FOR APPROVAL BY THE ARCHITECT PRIOR TO THE BEGINNING OF CLEARING & STRIPPING OPERATIONS.
7. SET ALL FRAMES, GRATES AND COVERS TO MATCH SLOPE OF PROPOSED GRADE.
8. WHEREVER EXISTING AND PROPOSED MATERIALS ABUT, MEET AND BLEND MATERIALS.
9. PROTECT ALL EXISTING TREES TO REMAIN.
10. THE UNIT OR WORK LINE SHALL BE EXTENDED TO PERMIT INSTALLATION OF UTILITIES TO 6'-0" EACH SIDE OF THE CENTERLINE OF UTILITY TRENCH.
11. DISTANCES ON STORM DRAIN LINES ARE APPROXIMATE.
12. BUILDING SHOULD BE LOCATED AS SHOWN ON DNB-L-2.

Re: 21E Records Request for the Winter Hill Community School (115 Sycamore Street)

From: Cassidy E. Way <way@mappett.com>
Sent: Thursday, February 26, 2026 11:27 AM
To: Fire <Fire@somervillema.gov>
Subject: 21E Records Request for the Winter Hill Community School (115 Sycamore Street)

This email is from an external source. Use caution responding to it, opening attachments or clicking links.

Hello,

I am doing the 21E Phase I Environmental Site Assessment for the Winter Hill Community School at 115 Sycamore Street. I am looking for the following information, if available:

- UST/AST records – install and/or removal
- Fire records
- Permits/violations issued
- Records regarding the storage/presence of hazardous materials

I would also be interested in any records available for the following addresses that the property previously held before being demolished in the 1950s-1980s:

- 97 Sycamore St
- 99-101 Sycamore Street → 100-102, No 99

ENVIRONMENTAL SITE ASSESSMENT OWNER QUESTIONNAIRE

Environmental Questionnaire

This questionnaire is to be completed by the site owner or representative with direct knowledge of the property.

Site name:	**Winter Hill Community School**
Street	115 Sycamore St
City, State, Zip	Somerville, MA

This questionnaire was completed by:

Name:	Ralph Henry, Debora Mitrano, Michael Bowler
Title:	Director of Capital Projects, Project Manager, Facilities Supervisor
Organization:	City of Somerville
Address:	93 Highland Ave, Somerville, MA 02143
Telephone:	617-666-3311
Email:	rhenry@somervillema.gov,
Date completed:	3/5/2026
Relationship to site:	City Staff

	QUESTION	RESPONSE
1.	Is the *property* or any *adjoining property* used for an industrial use?	Yes ____ No ✓ Unknown ____ Explanation:
2.	To the best of your knowledge, has the *property* or any *adjoining property* been used for an industrial use in the past?	Yes ____ No ____ Unknown ✓ Explanation: Explanation:
3.	Is the *property* or any *adjoining property* used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	Yes ____ No ✓ Unknown ____ Explanation:
4.	To the best of your knowledge has the *property* or any *adjoining property* been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	Yes ____ No ✓ Unknown ____ Explanation:
5.	Are there currently, or to the best of your knowledge have there been previously, any damaged or discarded automobile or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than 5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the *property* or at the facility?	Yes ____ No ✓ Unknown ____ Explanation:
6.	Are there currently, or to the best of your knowledge have there been previously, any industrial *drums* (typically 55 gal [208 L]) or sacks of chemicals located on the property or at the facility?	Yes ____ No ✓ Unknown ____ Explanation:

	QUESTION	RESPONSE
7.	Has *fill dirt* been brought onto the property that originated from a contaminated site or that is of an unknown origin?	Yes _____ No ✓ Unknown ____ Explanation:
8.	Are there currently, or to the best of your knowledge have there been previously, any *pits, ponds, or lagoons* located on the *property* in connection with waste treatment or waste disposal?	Yes _____ No ✓ Unknown ____ Explanation:
9.	Is there currently, or to the best of your knowledge have there been previously, any stained soil on the *property*?	Yes _____ No ✓ Unknown ____ Explanation:
10.	Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (above or underground) located on the *property*?	Yes ___ No _____ Unknown ✓ Explanation:
11.	Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the *property* adjacent to any structure located on the *property*?	Yes _____ No _____ Unknown ✓ Explanation:
12.	Are there currently, or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?	Yes _____ No ✓ Unknown ____ Explanation:
13.	If the *property* is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated contaminated by any government environmental/health agency?	Yes _____ No ✓ Unknown ____ Explanation:
14.	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user, (a.) Do you know the past uses of the property? (b.) Do you know of other chemical releases that have taken place at the property? (d.) Do you know of any environmental cleanups that have taken place at the property?	Yes _____ No ✓ Unknown ____ Explanation:
15.	Does the *owner* or *occupant* of the *property* have any knowledge of *environmental liens* or governmental notification relating to the past or recurrent violations of environmental laws with respect to the *property* or any facility located on the *property*?	Yes _____ No ✓ Unknown ____ Explanation:
16.	Has the *owner* or *occupant* of the *property* been informed of the past or current existence of *hazardous substances* or petroleum *products* or environmental violations with respect to the *property* or any facility located on the *property*?	Yes ✓ No _____ Unknown ____ Explanation: We had some environmental site assessments.

	QUESTION	RESPONSE
		ACM material coating on the concrete columns.
17.	Does the *owner* or *occupant* of the property have any knowledge of any environmental site assessment of the *property* or facility that indicated the presence of *hazardous substances* or *petroleum products* on, or contamination of, the *property* or recommended further assessment of the *property*?	Yes ✓ No _____ Unknown ____ Explanation: Assessment was done, and further assessment was suggested, but the building was vacated.
18.	Does the *owner* or *occupant* of the *property* know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any *hazardous substance* or *petroleum products* involving the *property* by any owner or occupant of the *property*?	Yes _____ No ✓ Unknown ____ Explanation:
19.	Does the *property* discharge wastewater on or adjacent to the *property* other than stormwater into a sanitary sewer system?	Yes _____ No ✓ Unknown ____ Explanation: .
20.	To the best of your knowledge, have any *hazardous substances* or *petroleum products*, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the *property*?	Yes _____ No ✓ Unknown ____ Explanation:
21.	Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs on the *property*?	Yes _____ No _____ Unknown ✓ Explanation:
22.	Are there any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls in place at the site and/or have they been filed or recorded in a registry under federal, tribal, state, or local law?	Yes _____ No ✓ Unknown ____ Explanation:
23.	As part of this study, can you provide any of the following? • Previous environmental site assessment reports • Environmental compliance audit reports • Environmental permits (including but not limited to solid waste disposal, hazardous waste disposal, NPDES, underground injection permits) • Registrations for aboveground and underground storage tanks • Registrations for underground injection systems • Material safety data sheets (MSDS) • Community right-to-know plan • Safety plans, preparedness and prevention plans, spill prevention, countermeasure and control plans • Reports regarding hydraulic conditions at the property and surrounding area • Hazardous waste generator notices or reports	If yes, please highlight which and provide Mabbett with a copy of said report.

	QUESTION	RESPONSE
	• Geotechnical studies • Risk assessments • Reports regarding any self-directed or other cleanup activities conducted at the property	

Preparer represents that to the best of the preparer's knowledge the above statements and facts are true and correct and to the best of the preparer's actual knowledge, no material facts have been suppressed or misstated.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 11/30/2025 has revealed that there are 6 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

MA SHWS: Contains information on releases of oil and hazardous materials that have been reported to DEP.

A review of the MA SHWS list, as provided by EDR, and dated 10/02/2025 has revealed that there are 349 MA SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

MA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection's Summary Listing of all the Tanks Registered in the State of Massachusetts.

A review of the MA UST list, as provided by EDR, and dated 10/07/2025 has revealed that there are 5 MA UST sites within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

MA INST CONTROL: Activity and Use Limitations establish limits and conditions on the future use of contaminated property, and therefore allow cleanups to be tailored to these uses.

A review of the MA INST CONTROL list, as provided by EDR, and dated 10/02/2025 has revealed that there are 13 MA INST CONTROL sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/30/2025 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 5 UST FINDER sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 13 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 11/30/2025 has revealed that there are 21 E MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System

ROGERS FOAM CORP. (Continued) **1000217454**

(AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

Environmental Interest/Information System:
The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Waste Description:	Benzene
Waste Code:	D026
Waste Description:	Cresol
Waste Code:	D028
Waste Description:	1,2-Dichloroethane
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	P001
Waste Description:	2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%
Waste Code:	P075
Waste Description:	Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts
Waste Code:	U002
Waste Description:	2-Propanone (I) (Or) Acetone (I)
Waste Code:	U010
Waste Description:	Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C
Waste Code:	U035
Waste Description:	Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil
Waste Code:	U044
Waste Description:	Chloroform (Or) Methane, Trichloro-
Waste Code:	U058
Waste Description:	2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide
Waste Code:	U059
Waste Description:	5,12-Naphthacenedione, 8-Acetyl-10-[(3-Amino-2,3,6-Trideoxy)-Alpha-L-Lyxo-Hexopyranosyl)Oxy]-7,8,9,10-Tetrahydro-6,8,11-Trihydroxy-1-Methoxy-, (8s-Cis)- (Or) Daunomycin
Waste Code:	U072
Waste Description:	Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene
Waste Code:	U085
Waste Description:	1,2:3,4-Diepoxybutane (I,T) (Or) 2,2'-Bioxirane
Waste Code:	U089
Waste Description:	Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-
Waste Code:	U129

WALGREENS #2760 (Continued) **1016957418**

Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U188
Waste Description: Phenol

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin

Waste Code: U237
Waste Description: 2,4-(1h,3h)-Pyrimidinedione, 5-[Bis(2-Chloroethyl)Amino]- (Or) Uracil Mustard

Waste Code: U279
Waste Description: U279

Environmental Interest/Information System:
The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Massachusetts - Environmental Protection Integrated Computer System (MA-EPICS) is the central repository for all environmental protection data for the State of Massachusetts.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Action Type:	A Notice sent to a Potentially Responsible Party (PRP)
Action Status:	A MassDEP piece of correspondence was issued (approvals, NORs, etc.
Action Date:	3/9/1999
Response Action Outcome:	Not reported
Action Type:	Immediate Response Action
Action Status:	Completion Statement Received
Action Date:	5/19/1999
Response Action Outcome:	Not reported

SOMERVILLE HIGH SCHOOL SCHOOL ST (Continued) **S132535696**

Action Type: Response Action Outcome - RAO
Action Status: Fee Received - FMCRA Use Only
Action Date: 6/11/1999
Response Action Outcome: Not reported

Action Type: Response Action Outcome - RAO
Action Status: RAO Statement Received
Action Date: 6/7/1999
Response Action Outcome: Not reported

Release:
Name: SOMERVILLE HIGH SCHOOL SCHOOL ST
Address: 81 HIGHLAND AVE
City,State,Zip: SOMERVILLE, MA 02143-0000
Release Tracking Number/Current Status: 3-0017909 / TIER1D
Primary ID: Not reported
Official City: SOMERVILLE
Notification: 01/29/1999
Category: TWO HR
Status Date: 01/29/1999
Phase: Not reported
Response Action Outcome: -
Oil / Haz Material Type: Not reported
