

Checkmate - Michelle Thibodeau

I'm just a pawn and you're the king
Tell me what this night will bring
Your moves are so calculated,
It's complicated to predict where you're going
Thought I was a queen, you shot me down
You rooked me and played me around
I should forfeit while I can

**What move will you make next
In this little game of chess
You've got me in checkmate,
You've got me in checkmate
Now the knight will make its' move
This game is so black and white
I've lost this fight to you
Checkmate, Checkmate**

Has it played out like you wanted,
Do you think you're gonna score?
Every night is the same, I think you're to blame
You leave me wanting more
There's no going back once you begin,
You're in the position to win,
I should have forfeit while I still had the chance

Chorus

Was I just part of your scheme?
Your grand design, your mark in time, a high strategy plotline
I should have known it was over from the moment it begun
You had me cornered before I even thought to run

Chorus
