It Started

Lyrics-Molly Johnson

Music-Paul Novotny & Joe Sealy

Verse 1:

It started in the winter
It started when it was cold
Just one kiss between the two of us
The story unfolds

Ya it started in the winter
And baby it was cold
Oh it just started

Verse 2:

So suddenly the snow falls
So gentle all around
It all began when you held me
We didn't hear a sound
In the cold, in the dark
We held onto the wall
Ya it started in the winter, and baby it was cold

Bridge:

Just this time of year dear
Just this time to get away
From the hustle on the street
From the folks you've got to greet
Just the tow of us, at this time of year

Verse 3:

Well maybe when love happens
All fresh and oh so new
We'll steal some quiet moments, oh really, just a few.
But, oh those special times
When it's just me and you
So precious, so happy in our deep dark blue.

Bridge:

Just the two of us alone dear
So good, to have you so near
Watch the moon play on the snow
Watch fire's embers glow
All those endless hours to do nothing
Nothing at all

Verse 4:

It started in the winter, maybe I mentioned that before
Winter's cold and blue, and we just shut that door.
Springs right around the corner, things feel kind of bright
This cold blue winter, these dark warm nights.
It started, ya it just started, cause it just started.
