

The Ballad Of Captain Jack

One In The Chamber

Lost the jam in my very first session

Kept it up just to add to the aggression

I'm on a mission to keep this consistent

I wish my second dad had've taken me fishing

Pretty girl got my stomach up a churning

Buy the drinks just to keep up the flirting

I gotta get an earning to keep up the learning

So my second dad will stop the concerning

I hope your daddy loves you

I hope your daddy cares

Cuz I need a woman

With no issues to spare

So baby back up against the wall and let your hair down while I stall

Take off your sweater, we'll make it better

Turn it up and change the weather

Tell me what to say, forget your sins of yesterday

Take off your sweater, take off your sweater

I promise honey it only gets better

Weekends hit so loosen up your tie

Party up with your girl by your side

If you're the single type and you're running out tonight

I wish you all the luck and I hope you get a bite
Might I recommend a shot to go with that
That's a pretty name mine is Captain Jack
You might have heard of me I'd like to dance certainly
I've got a reputation to keep up with the mystery
I like the way your body moves
I like the way you hold me tight
And I can see myself
Going home with you tonight

So baby back up against the wall and let your hair down while I stall

Take off your sweater, we'll make it better
Turn it up and change the weather
Tell me what to say, forget your sins of yesterday
Take off your sweater, take off your sweater
I promise honey it only gets better

Back up against the wall and let your hair down while I stall

Take off your sweater, we'll make it better
Turn it up and change the weather
Tell me what to say, forget your sins of yesterday
Take off your sweater, take off your sweater
I promise honey it only gets better

So go on slam the door

As our bodies hit the floor

Take off your sweater I'll make it better

Turn it up, baby feel it get wetter

Baby I can please

I gotchu begging on your knees

Take off your sweater take off your sweater

I promise honey it only gets better
