KatRisk Hurricane Wind

KatRisk is a catastrophe modeling company that provides rapid event response hazard data and loss analytics for significant events. The data is a combination of observed and forecasted.

Coverage area & data available
- Atlantic Basin, including East Coast US & Central America
- Notable historical events through 2006 and further available upon request

Update frequency
Initial event data within one day of the event occurrence then updates as new data becomes available.

Enhanced columns
We enhance your data with one column that you can view and filter by:

- Wind (KatRisk) [Date/Time]

What the data means
Wind provides tropical cyclones return period wind speeds.

Exported Columns
The models you enhanced your data with will be available in exported CSV files as:

- KatRisk Hurricane Wind Speed [Date]

When you download your enhanced data, look for the columns that start with the "Provider Name", then the "Peril Name", and ending with the date. For example, "KatRisk Hurricane Wind Speed al092021_5".
