

DR. CARL STEINBERG

GP/RESTORATIVE DENTIST
Philadelphia

“ I have had a lot of experience with Spear and with many of the people involved there for many years, so when I was invited to join Spear Study Club in my area, my response was a resounding “yes,” because I knew it was an opportunity to explore some quality, high-end cases. I am an educator myself. A lot of what we are covering in the club I have been doing for a long time, and I was very happy to be able to share what I know with the other participants. At the same time, I am always learning new things myself. That’s the great thing about this kind of collaborative environment — everyone shares and everyone learns.

I would recommend Spear Study Club as a great professional resource for any general dentist. It’s a great way to get acquainted with cases you may not have come across yet. You’re going to learn, you’re going to grow, you’re going to hear about different thought processes from different practitioners — which is important because there is always more than one way to approach a case, and it is always worthwhile to hear what other people in the profession see when they look in that mouth.

In the end, you can only treat what you know. So you want to get to know as much as you can, so you can treat more. Spear Study Club is the ideal experience for the dentist who has the passion and commitment to always want to do more for their patients.”
