

Your site is NOT Mobile Friendly!

Your Site Now!

[image from mobilizer of their site]

Hi [first name],

Unlike the sites of some of your competitors, your website is NOT Mobile Friendly. I'll be honest, the site looks terrible on a mobile phone as you can see on the left.

This is losing you money daily and causing your competition to get these clients.

Thousands of people in [name of city] search for [niche] from their mobile phones but it is hard for these potential clients to find your contact info on your site. Since your site is not mobile friendly, the stats show that approximately 40% of your visitors leave your site immediately and turn to one of your competitors.

I have a simple solution for you to easily start capturing these leads. Just ask yourself, how much is each one of these leads worth to you?

Give me a call and I'll tell you more about this solution.

(xxx) xxx-xxxx

What Your Site Can Look Like!
